Picked up an S38B to relive my childhood and it seems to work on AM about as well as my only other receiver, TS430.

I am going to make it my AM station receiver if and when I can get the BFO to work. I still need the Kenwood to know where the Ranger is at.

I tried moving the E wire around as suggested in the manual but it did not help. No heterodyne at all.

Anyone with any experience with this?

JACK K9ACT

Brian Ripley, K8BR of Ogden, Utah has a great site devoted to the care and
restoration of the Hallicrafters S-38 series.
http://www.the-s38-guy.com/

Just for fun, try a kludge BFO. Place an AM broadcast band radio (non-digital) as physically close to the S38 as you can get it. Tune the broadcast band radio until you hear a beat with the AM or CW signal you are listening to on the S38. The oscillator in the AM radio should leak into the S38 to cause the beat. Course it depends on somewhat poor shielding on both receivers to work. I sometimes used this method as a kid to listen to SSB and CW on those old SW receivers that didn't have a BFO. Those were the days... ;)

I believe I bought DIN connectors for my PRO II from Mouser- the best
machining I have ever seen in a DIN- unlike the usual stuff seen.

Do a Google search on the part number.
The second result has it for $6.00.

I really enjoy seeing pictures of the different radio equipment. Is
there a site that you guys
might know of that has picks and info about the differant radios.
People mention their equipment all the time in the different forums and
usually I don't know what they are talking about.I am a fairly new ham
and am trying to learn all I can.When someone says they have a
so and so type rig I would like to look it up and learn about it.
thanks

Actually, I already did that but it's a pretty academic exercise.

After all is said, seems like there should be some way to control the
feedback to both provide a beat and optimize the gain/selectivity.

I have no interest in CW or sideband with this radio but I do need some
way to set my ranger on the station I am listening to.

Any thoughts on an outboard tweak?

There's no control for it? That seems odd.

The trick is to make the cathode resistor variable, and use that to
control the level of regeneration.

> I have no interest in CW or sideband with this radio but I do need some

Don't put it on transmit, but key the oscillator? Old rigs often
were set up that way, so you'd have a weak signal from the transmitter
to set the receiver to.

Or, they'd have some spotting function specifically for it.

Well, you are absolutely WRONG and/or you have not read the ruling very well. What the announcement refers to is the elimination of Element I as a requirement for a US Amateur license. There is no "prohibition" against the use of Morse. BBC is mistaken, and since when has the news media gotten a whole lot right in reporting the news? US Amateur still may certain use CW to their heart's content, and, indeed, with the exception of the changes announced prior the CW ruling, the allocations for the USE of CW remain in place.

I suggest you go back and fully read the actual announcement where you will find that a "prohibition" against Morse Code is a myth.

Everyone has told him this and posted links to the actual R&O on the web page. He absolutely refuses to compare what it says to what the BBC reported. I suspect that he wants it prohibited and so is indulging in wishful thinking.

The simplest way I can think of is to go over to the shelf of test equipment and grab the old Heath signal generator and attach a foot long wire close to the S-38. Then tune the generator to 455 kc (whoops, that is kHz). You will have a nice beat note.

Like the others have said, convert the if stage into an oscillator - then reduce the feedback to get it to stop oscillating. That will then be sort of a Q multiplier while in the feedback but not enough to oscillate stage. You would need a control to put in and out of oscillation. A pot, a variable capacitor or a switch.

Or, just a hum a few bars into the Ranger mike and tune for best audio.

This is a curiousity question only - I'm not wanting to actually program this radio - but...

Does anyone know how this radio is programmed? I don't see any kind of connector for a computer, and a look at the schematic shows it can't be programmed through the external speaker/mike connectors. (unless they're doing something REALLY ingenious!) The schematic also doesn't show an obvious programming connector, though I may be missing something involving test points(grin). There is no keypad, so it can't be done that way. The service manual (as found online) doesn't address programming at all...

Thanks for addressing my curiousity, and for tolerating a slightly off-topic (since this is a commercial rig) post!

So, how about my Radiotelegraph License. I suppose I will have to renew. Are the code requirments still in effect? I suppose many of you who got the Extra Class licesnses like me , also want to strive for the highest and get their Radiotelegraph License with Ship Radar endorsments, and of course Rafiotelephone also. I always thought they should have had a higher Amateur class available.??

Apparently, the Morse proficiency requirement still stands for the
Commercial Radiotelegraph licenses:

http://wireless.fcc.gov/commoperators/t1.html
and
http://wireless.fcc.gov/commoperators/exam.html

Telegraphy Examinations Elements
Element 1 - 16 code groups per minute.
Element 2 - 20 code groups per minute.
Element 3 - 20 code groups per minute.
Element 4 - 25 code groups per minute

2nd class licensees must pass Element 1 (copy by hand) or Element 2 (copy by
typewriter).
1st class licensees must pass Element 3 (copy by hand) or Element 4 (copy by
typewriter).

An interesting thing to note: "The Commission will grant credit for
Telegraphy Elements 1 and 2 to applicants who hold an unexpired (or within
the grace period) FCC-issued Amateur Extra Class operator license."

So, if I read this right, the new no-code Amateur Extra-class license
holders who wish to apply for the 2nd 'Telegraph license will be given
credit for the Morse proficiency requirement w/o having to prove it.

> class available.??

It used to be called the Amateur Extra and then they gave it privileges with Incentive Licensing back in the '60s. As I understand it, it was an acheivement certificate that did not confer any additional operating privileges above General prior to IL.

For all I care they could drop the current names and call it Amateur First Class, Amateur Second Class, and Amateur Third Class that would map well to Extra, General, and Technician as they will be after the R&O becomes effective. Or, as prior to WWII, Class A, Class B, Class C. I guess that's too logical for today's world. But, I digress. :-)

I suppose that now a person can get their BSEE, MSEE, PhD, etc.

What revisions? There is nothing pending on the table right now as the
latest Report and Order will be the last one we see for some time.
Nothing is going to be revised. Did you bother to read the links that were
posted to the FCC's own web site, their own documents? Since when is the
BBC's word gospel and more importantly, why do you trust their "reporting"
more than the documents on your own regulatory agency's site?

Truly amazing...

I got curious about this "BBC story", and did some searches last night.
Didn't find an article that came from the BBC, but there was a story from
some US newspaper (I didn't not the URL or which one) that had similar
wording. SOmething like "for people used to talking in dots and dashes..."
It was simply badly worded, but it had the tone that CW was now dead.

So I can imagine the BBC having some badly worded piece that said
that CW was gone.

Of course, there are two other possibilities. Someone is spoofing
the BBC, and figures if they credit such a well-known institution
people will believe that CW is now killed off.

The other possibility is that somehow the BBC talked to someone
who wanted to make some statement, or even honestly believed
that CW is gone, and the BBC took that statement on faith.

Any of your scenerios could be correct, Michael.

In retrospect, I would assume a BBC reporter to do their homework. Also, a BBC reporter covering this issue *should* know that the UK dropped the code exam requirement sometime back and that the FCC is merely following suit.

I'm still puzzled as to why Mr. Fenn continues to say "wait and see" when there is clearly nothing to "wait and see" for and he has been given plenty of links to documentation showing that the exam requirement will be eliminated but that Morse Code is still legal on all amateur radio frequencies except for 60m.

I would like to know *what* revisions he "hears" will be made and from *whom*.

46. What to do with WILDLY modified HW-7

Newsgroup: rec.radio.amateur.equipment
Date: 2007-01-05 17:32:51 UTC
From: Zommbee <devarim@hotmail.com>
Message-ID: <_5OdnSMGF5BaFgPYnZ2dnUVZ_segnZ2d@comcast.com>
Source record: 5966

Hello all,

I have a HW-7 that I recently acquired on a whim - it's been HEAVILY modified - RIT, CW filter, new front end on a home-built board, new power connector (yucky one), and other little mods and extra parts inside all over the place! And - you guessed it - it's stone cold dead. Any thoughts I where to begin trouble shooting such a wreck? Or is it worth even trying, given that most of the mods are on homemade boards with no documentation - no idea if they ever even worked. I've thought about just selling it again or ripping out everything and turning the case into a home built receiver of another design or housing an SST-20 xcvr in it.

Suggestions?

Thanks,

Dave WB7AWK

Dave-

If I had such a kit and the original manual, I'd un-build it and start
the assembly process over again.

No, I don't want to buy yours! I already have an HW-7 that works.

You may wish to correspond with Mike Bryce, WB8VGE

He may have some ideas. too bad no one has offered new PC boards (FR-4
fiberglass and silk-screen for these old beasts - you could then rebuild
with new components and salvage specific parts (tuned transformers) from the
originals.

> the assembly process over again.

Actually, that sounds like a very fun idea - strip the whole thing down, saving the 'unique' parts - coils, switches, tuning cap, etc. and replace the resistors and capacitors and just build it like a new kit! How fun is that?

I have my plan! Thanks for the idea - don't know why it didn't occur to me!

Dave WB7AWK

ps - and I even have the original manual from MY OWN HW-7 that I got for Christmas in 1974 as a kid - long ago lost the rig but still have the book.

Dave,

If I recall correctly, the receiver section in the HW-7 left much to be
desired (poor sensitivity & selectivity). So, from a functional standpoint,
it'd likely not be worth "unmodifrying". Unless you want to
reverse-engineer and repair what you have, you can look at it as a cabinet
with lots of parts in it. On the other hand, if you want to return it to
stock (for nostalgia purposes), maybe you can buy the manual from Fred! On
the topic of kits, I hear nothing but rave reviews of Elecraft's products.
Their K2 is a hot little rig and, I'd love to have one for myself.

73,
Bryan WA7PRC

I figured his complaint was that it's a jumble of wires so he's not
sure what's in there.

But yes, given all the articles about modifying that rig at the time, his
modified HW-7 likely is a better reflection of the rig than one that matches
the way it was supposed to be put together.

It dates from a time when direct conversion receivers were seen as the New
Big Thing, but before anyone had really caught on about how to build a good
direct conversion receiver. A single mosfet mixer (I can't remember if there
was an RF preamplifier ahead of it) was pretty lousy in terms of a direct
conversion receiver. Oh, it likely did okay on SSB and CW, but it was lousy
at ignoring the other signals, which is why there were all those mods. There
was at least one article in QST where the receiver (either just the RF stages
or the whole thing) was replaced with a far better receiver board, using a
double balanced mixer.

It was akin to the Heathkit Lunchboxes, that were oh so common and did
their bit to populate six and two metres, but weren't very good for much
beyond local work, so they saw their share of mods too to get around the
basic limitations of the design. The fact that they were cheap, and I
seem to recall the HW-7 was relatively cheap too (certainly compared to
a transceiver with a superhet receiver), likely added to the mods,
because you wouldn't lose that much if you messed it up.

Of course, I am reminded of one receiver construction article in QST in
the late fifties or early sixties where the author started with a commercial
receiver kit, because it provided the chassis and tuning capacitors and
coils at a relatively low cost, and then built his own receiver around it.

As one who built a HW-7 in 1975 (they were $69.95), I worked the world
on 20 and 15 with a 14AVQ. It is what it is. When they work well, they
work well. I have over 300 QSOs - many DX - using a HW-7 (sold it
a long time ago). It in no way equates to a 'modern rig' in any sense. But
as I said - I worked a ton of DX with it back in the late 70's and early
80's.

The one I just got is more than just a little modified - it's almost not
recognizable inside. I'm leaning more to calling it a nice cabinet into
which
to build a decent QRP transmitter with a VFO, and use my TS-440 to
receive. (or 'unbuild it and rebuild it - still haven't made up my mind).

The 'modifier' of this HW-7 may never have got these mods to work at
all! All I know is it is stone dead (with voltages all over the board, so I
know power isn't the issue).

Message-ID: <0MPnh.18817$X97.14055@newsfe18.lga>
Source record: 5979

I have a very nice, clean Kenwood TS-940SAT from an estate. It has been stored for almost 10 years,
but works great. I have tested it over the past month with no problems. It looks almost new. All dial
lights and displays work as they should, no problems in this area. The SN is 7080XXX.
This TS-940SAT is loaded with filters: YK-88A-1 AM Filter; YK-88C-1 500 Hz CW Filter; YG-455C-1
CW Crystal Filter for the 455IF. It also has the VS-1 Voice Board installed as well as the Automatic
Antenna Tuner. I am asking $990 plus shipping for it. If you don't need the optional filters and voice
board, I will pull them out and sell the transceiver for $690, but I would prefer to sell it as a package. Thanks, Charlie Hugg, K5MBX

60. FS Heathkit HW-101 Transceiver

Dave,

If it was mine, assuming that the cabinet and front panel were
in good original condition, I'd totally deconstruct it and
rebuild it back to stock condition. That should be relatively
easy since you have the manual. Someone commented that the
HW-7 has a lousy receiver. That's absolutely true. Compared
to an FTdx-9000 or IC-7800, it's laughable. However, over the
decades that the HW-7 has been around, thousands of hams have
made tens of thousands of successful QSOs with them, and many
continue to do so. It's a fun rig to play with. With that in
mind, it'd be worth my time to rebuild it. If nothing else,
it would be a nice project for those cold winter nights!

No, I don't want to buy it. I have my projects lined up...

10 Hz is well within the accuracy and stability specifications.

Stability is the key spec. How much does the radio drift in the first 1 hour of warm up?

How do you know the 10 Hz value? How soon after power on is it measured? etc.!

Monte-

I don't know if this will help or not. I found an article in my archives from last June, that gave an address for the manuals for both the 725 and the 725A.

http://www.icom.co.jp/manual/external/transceivers/IC-725.pdf

http://www.icom.co.jp/manual/external/transceivers/IC-725A.pdf

I have not tested the addresses to see if they work.

You will be hard pressed to beat 10 Hz, even if the rig has a TCXO. If you have the capability of measuring it, all you need to do is find the adjustment, let the rig warm up a couple of hours, and adjust it. Let the adjustment stabilize a while and check again. Ceramic trimmer capacitors seem to drift slightly immediately after adjustment.

WA7YCP-

On one hand, this sounds as if a Phase Locked Loop had become unlocked, which might disrupt the frequency display and prevent transmitting. On the other hand, the lithium battery should prevent loss of memory.

Other radios, both Icom and Kenwood, have 3.6 volt lithium cells. It is possible that your radio will lose memory below 3.0, but I've had them maintain memory when the battery was down to about one volt!

A PLL might go out-of-lock because of loss of the reference frequency (usually a crystal oscillator) or drifted tuning of the VCO. There also might be a low voltage regulator that has low output, often caused by a leaky electrolytic capacitor.

From: "Odd Erling N. Eriksen" <odderi@gmail.com>
Message-ID: <45acd4ab$1@proxy.mimer.no>
Source record: 5912

Hi,

As I am currently looking for a dedicated RTTY modem (as opposed to a soundcard-based setup), I found WO5P's (http://www.wo5p.net/) 'offer of the week'-deal quite acceptable.

'Acceptable' as in 'The price he's asking for one of these units is within my price range' - I don't know anything about this particular model's virtues or vices - which is where r.r.a.e. comes in handy!

When googling the model#, most hits refer back to the abovementioned web shop. It is claimed that it is 'similar' to the HAL ST8000 - anyone know just *how* similar? I know a couple of hams using ST8000s - they're quite happy with their choice. If the 1280 is nearly identical, chances are I, too, will be most satisfied with my purchase.

Also, assuming that a commercial unit is not optimised for 45.45Bd operation @ 170Hz shift - anyone know how simple it is (or is not! :) to modify the unit for such operation? Can the detector filters be tweaked enough for it to be worthwhile, or should I rather look for a dedicated ham unit?

Any input appreciated.

Medical Mystery: Compulsive Hoarders
A Psychological Compulsion to Keep Everything, Even When It Ruins Your Life
By CECILE BOUCHARDEAU

Jan. 16, 2007- - We are all pack rats to some degree. We hoard, collect and buy more stuff than we have room to store.

But what if something in our brains made us incapable of throwing things out? Janie Allocca and Lorraine Brennan both suffer from a psychological disorder called compulsive hoarding -- an urge to hold on to even the most mundane objects, even when they take over their lives.

Watch "Primetime: Medical Mysteries" Wednesday at 10 p.m. ET, and go to ABCNEWS.com during the show to diagnose a real medical mystery.

Lorraine Brennan has been hoarding for nearly 20 years. She lives in a two-story house in Massachusetts with her father, son and fiancée. Most rooms in the house are cluttered, and some are even unusable. The bedroom-office that she shares with her fiancée is overrun with stuff they tried unsuccessfully to get rid of at a yard sale. Lorraine's purse is bursting with junk mail and receipts.

Brennan's hoarding is not only ruining her life, but affecting her entire family. Her son can't bring friends home from school. Brennan and her fiancée have been engaged for eight years, but he hasn't been able to commit to marrying her because of the clutter.

'There's No Place to Sit Down'

Many hoarders are also compulsive shoppers. Janie Allocca has accumulated so much stuff that she uses her own house as a storage facility and lives with her mother.

"I remember collecting, and keeping, and hoarding things since I can remember," Allocca said. "And now I am just living around the piles and piles I need to get rid of."

"I have so much stuff that my house is totally unlivable," she continued. "There's no place to sit down. I can't get to the kitchen. I can't have anyone over for tea even though I have everything for tea. My collecting is taking up the space where I normally would live."

There's a fine line between simple clutter and extreme hoarding. Most hoarders, observers say, are physically incapable of throwing things out. They can't live in, or use, rooms like the kitchen for their intended use. They also experience extreme distress from their condition.

The Brain of a Hoarder

Hoarding is currently considered a subset of obsessive compulsive disorder, but that may soon change. New research is finding that hoarding may be a unique disorder completely separate from OCD.

Dr. David Tolin, director of the Anxiety Disorders Center at the Institute of Living in Hartford, Conn., has devoted his career to studying what goes on inside the mind of a hoarder.

"At the moment, compulsive hoarding hasn't been fully defined by the psychiatric and psychological communities," he said. "One of the things that we wanted to do was to understand some of the brain mechanisms behind compulsive hoarding."

Allocca is part of a study Tolin is conducting to see which parts of a hoarder's brain become active when they are faced with making decisions. She is hooked up to a brain-scan machine and asked to look at pieces of her mail and decide whether she wants them to be thrown out. She then must watch the mail get shredded.

At this point, two parts of a hoarder's brain become active. The brain's orbitofrontal cortex is involved in decision making and causes a hoarder to process this experience as a punishing one. At the same time, the hippocampus of a hoarder actively searches for memories about the object. The hoarder tries to remember the object: what it is and why they saved it in the first place. By contrast, people without hoarding problems just don't think about the object that much.

'A Painful and Effortful Process'

"What we find is that the brain is acting very, very differently when a person hoards," Tolin said. "When the person is trying to make a decision about what to throw away, it seems that the person who is hoarding, is processing this activity as if it is deeply punishing."

"The person who hoards is going through a very, very effortful search of their memory to try to think of as many things as they can about this item before they make the decision," Tolin added. "What this all amounts to then is a painful and effortful process of decision-making, that you and I might take for granted."

There is no cure for hoarding, and there is no medication to treat the condition. Right now, cognitive behavioral therapy is the only way to help hoarders make decisions and deal with their emotions.

Getting Help

In Beth Johnson's "Clutter Workshop" in Hartford, hoarders and clutterers practice throwing out possessions they have grown attached to. Johnson also takes her clients on nonshopping -- or nonacquiring -- trips to teach them not to buy things they don't need.

"I try to help them see the larger picture and how this item won't fit into their life," said Johnson. "If you have a jam-packed house, if you're adding to it on a weekly or daily basis, you're basically defeating yourself."

Dr. Randy Frost, a professor of psychology at Smith College in Massachussetts, focuses on helping hoarders make their homes clutter-free.

"One of the things we know about hoarding is that the beliefs people have about their possessions are so powerful, that it's very difficult for them to get out of this behavior," said Frost, who is also author of the upcoming book "Buried in Treasures." "If the person throws something away and experiences distress, and does it again and again, eventually, they won't have that extreme emotional response, throwing something away."

Frost held a one-on-one session with Brennan to see if he could help her. After a few hours, she was able to throw away receipts and a few pieces of junk, but, as with most hoarders, there is still a long road ahead.

One major motivator for Brennan is the possibility of losing her fiancée if she doesn't clean up her home. When asked if she thought he would really leave, Lorraine said, "I don't want to find out. I don't want to end my relationship. I want to do better. I want to make it work. I don't want to live like this anymore. I really don't."

Dr. David Tolin and Professor Randy Frost are co-authors of a self-help book called "Buried in Treasures," to be published on February 5th.

I have this problem in only one respect: scraps.

I just cannot bring myself to throw away a beautiful piece of hardwood
even if it is a scrap, even if it is too tiny ever to be used for
anything.

My scrap bin overfloweth.....

You are not aloneth....the reason why I copied rec.woodworking on this
post is that many of my fellow woodworkers are hoarders in disguise.

Estate auctions of woodworkers always have tons of wood scraps neither
touched.

I too hoard scraps, but every once in a while I tend to just sort them
out and what I haven't used or plan to use in the future, gets made
into kindling for our wood stove.

<snip>

I received some great training in this regard.

As a matter of company policy, once a year had to go thru the files
and throw away anything over one year old with tax records and
engineering documents excepted.

After completing this task, had to sign off that you actually had done it.

Was told the lawyers were the reason for the policy.

Something to the effect that if it doesn't exist, it can't come back
to haunt you.

Had customers with similar policies.

Sort of sets the mood not to hoard things.

Also, a move every 5 years or so, gets rid of a lot of "stuff".

Lew

And the fact you can actually part with above mentioned scraps proves
you're just an average pack rat...a "real" hoarder would have a panic
attack trying to sort through or throw away the scraps.

Then again...I've seen what appear to be packrats on TLC's Clean Sweep
who break down sobbing over letting go of some pillow they've had since
childhood. But they do it....eventually.

Don't say that. A friend used hardwood scraps as backing for his handmade trophies. One of a kind stuff. You might offer yours to a trophy maker if you aren't interested in getting into the business. Or turn them into individual bookends. Or offer to some woodworking type at a craft show.

True, when I was building the house, I'd bring back quite
a bit of stuff from the dump. Some got used right away,
particularly discarded seedling trees etc, other stuff got
used later, particularly scrap wood and steel etc. Other
stuff never did get used like the VW beetle transaxel etc
that I considered turning into a dune buggy etc and never
did get around to. Tried to drag it out the front for the most
recent collection day but it was too heavy to move easily
so I took the easy way out and gave up till next time.

> Sometimes...no many times...you just have to say "No".

> Your thoughts?

I dont bother to get rid of most stuff that dies. I've still got
the hot water service that died, because the big white metal
square case is decent metal for making letterboxes etc.

Still got the washing machine I last used 35 years ago,
mainly for the decent motor and pump, should bin that
on the next collection day, its a bit hard to get out tho.

Still got the smaller upright freezer that is uneconomic
to repair, just because it seems such a waste of what
is a very decent little cabinet thing, might one day get
around to putting a beer brewing barrel into for easier
heater control in winter. I currently put a big wrap around
insulating foam pad around the barrel with a heater belt
with monster zip ties initially and once its bottled or when
I have two barrels brewing, I have a fan heater in the
smallest room in the house that doesnt get used as
a toilet since I have two of those.

My hoarding problem is this. I have a lot of valuable stuff left over from my ebay dealings. Like little T6061 aluminum plates and bars for example. Or super nice strong stainless painted steel handles. Super high quality. I may use a few "one day". In fact I will use some on my trailer project. Or a few pulleys. But, despite being valuable, they are not economical to try to sell them. Too little money, too much hassle, and quite possibly they would not sell at all. But I cannot throw them away in good conscience.

i

LOL....I know of several companies that are now spending millions of
dollars to recreate a product they had but lost the recipe to because
they purged their files.

The retirees that they have had to rehire at expensive contractor rates
are very appreciative of the management's stupidity to enforce a "clean
desk" policy. They are very happy to participate in the "purge".

Of course those responsible for this stupidity received promotions for
their ideas.

Langley Collyer: The Mystery Hoarder Of Harlem
Fred Penzel[1], Ph.D
On March 21st, 1947, at 8:53 a.m., the New York City police department received a phone call from a man giving the name of Charles Smith, notifying them that he believed a man was dead inside a decaying building on Fifth Avenue in Harlem. Officers arrived on the scene by 10 a.m., and cordoned off the house in order to hold back the crowd that had gathered. The police removed an iron grill-covered basement door from its hinges, only to find the entrance completely sealed off by a solid mass of debris. Thus was thrust before the public one of the best-known and most mysterious compulsive-hoarding cases of all time.

Compulsive hoarding is a form of obsessive-compulsive disorder (OCD), a neurobiological condition, most likely genetically based. OCD comes in a wide variety of forms, of which hoarding is only one. Compulsive hoarders may collect only certain types of things, or they may indiscriminately save everything. We are not talking here about collecting things that are valuable or important such as art, coins, or stamps.

Hoarders tend to save things of little or no value...
Hoarders generally tend to save things that are of little or no value, or if the things they save do have real value, they tend to save them in ridiculously larger quantities than would ever be necessary. One of the main obsessive thoughts that causes sufferers to do this is their worry that if they throw a particular item away, it will be lost forever, and they may one day be in need of it in order to be able to use it, to be able to remember it, or do something connected with it.

They seem to have difficulty discriminating between what is or will be useful, and what is not. Some hoarders can freely admit that the things they are saving are currently broken or damaged and unusable. They will stubbornly insist, however, that they will someday repair or refurbish the items and either make use of them or give them away.

Throwing away something is seen as being irresponsible...
Another reason for hoarding resembles the type of thinking seen in hyper-responsible obsessions. It is the idea that each thing they save and/or repair might be useful to others (rather than themselves), and that the hoarder would be responsible (and therefore blameful and

guilty) for another person not having this vital item should the need arise. They may also rationalize that what they are doing is actually "recycling," and are performing a community service by conserving resources. Throwing away something that could possibly be reused is seen as being highly irresponsible. In actuality, there really is no need for what they have saved, there is no one to give the items to, and the only result is that the hoarder is burdened with a house full of junk.

Some of the things most commonly saved include newspapers, magazines, lists, pens, pencils, empty boxes, pamphlets, old greeting cards, junk mail, old appliances, outdated books and even assorted labels, string, rubber bands, plastic containers, bottles, and bottle caps. In the most extreme cases, people have been known to save such things as empty matchbooks, used tissues, old cigarette butts, bird feathers, old cars, discarded paper cups, used aluminum foil, paper towels, lint, and hairs. Some of these sufferers will even rummage through other people's trash, and bring home obvious junk that to them, seems quite useful or repairable.

Accumulate things create fire or health hazards...
Compulsive savers can accumulate large amounts of things, creating storage problems and fire or health hazards. Their houses can take on the appearance of having been ransacked, with floors waist-deep in trash and debris, rooms filled wall-to-wall with overflowing paper bags and cardboard boxes. Many sufferers can only make their way around their homes by creating aisles around and through the trash. Problems with municipal authorities are not uncommon, and hoarders are sometimes evicted or charged with violation of zoning or public-health laws. Ironically, the majority of people who save things compulsively rarely use or look at these things. Their security comes from merely having the things around "just in case" and in not having to make what seem like difficult decisions about what to discard.

Let us now return to our story.

The Collyers were part of one of New York's oldest families...
Its main figures are two brothers, Homer Lusk Collyer (b. Nov. 6th, 1881), and Langley Collyer (b. October 3rd, 1885). The Collyers were part of one of New York's oldest families, a branch of the well-known Livingstons. Their ancestors had come over to America on the ship "Speedwell" in 1664, about a week after the Mayflower. The family had been members of the congregation of Trinity Church since 1697. Their father, Dr. Herman L. Collyer was a successful and renowned gynecologist, and his father, William Collyer, was said to have been one of the leading shipbuilders in America. In 1909, Dr. Collyer moved his family from Murray Hill to a fine upper-middle-class home in Harlem. It was a three-story brownstone located at 2078 Fifth Avenue (at 128th Street). Beyond his fame as a physician, the doctor was known to be a bit eccentric, paddling a small canoe to work each day at City Hospital on Blackwell's Island in the East River. He would subsequently

paddle home at the end of his day, and then carry the boat on his head back to his house.

Dr. Collyer's two sons seemed destined for successful lives of their own. Both attended Columbia University, where Homer earned a law degree, and his younger brother graduated with a degree in mechanical engineering and chemistry. Homer went on to practice admiralty law, but Langley, so far as is known, never held employment, and spent his time playing the piano. He is reputed to have won prizes as a concert pianist, but this cannot be verified. Perhaps Langley's inability to establish a career was an early sign of personal difficulties he may already have been experiencing.

In 1917, the brothers had their telephone disconnected...
It was probably a warning of things to come when in 1917, the brothers had their telephone disconnected, after being billed for long distance calls they claimed to have never made. This may have been the beginning of what would become a growing isolation from the outside world. Six years later, in 1923, Dr. Collyer died. Several years prior to his death, for reasons unknown, he had moved from his Fifth Avenue home to one at 153 West 77th Street. His sons remained at the family home with their mother. It is possible that a family breakup may have occurred.

Life seems to have taken an abnormal turn for the two brothers in the year preceding the death of their mother in 1929. It appears that their gas was shut off in 1928, and they also seemed to have given up the convenience of running water and steam heat, and began using kerosene to light their home and to cook with. Water was obtained from a public fountain four blocks from their home. This was all clearly out of step for people of their education and social status.

No one was ever permitted to enter their house...
Despite all this, nothing appeared out of the ordinary to those in the outside world. The brothers were said to be courteous, cultured, and shy. The only sign that something might be amiss was that no one was ever permitted to enter their house. Around 1928, Homer worked for another attorney, John R. McMullen, who later became the family legal advisor. Homer next worked for City Title Insurance doing research in the New York City Hall of Records. He was described, at the time, as being courtly, and dressing in 19th century attire, presenting a rather Victorian appearance. He was said to resemble a gentleman of the 1880's.

In 1932, Homer purchased a building across the street at 2077 Fifth Avenue for $8,000. He planned to divide it into apartments and to rent them. This plan was never realized, as he suffered a stroke in 1933, becoming blind as the result of hemorrhages in both of his eyes. With one exception, he was reportedly never seen outside of his home again. Langley then gave up his music to take on the job of nursing his brother back to health. No physician was ever consulted. Langley apparently believed that the cure for his brother's blindness was for him to eat 100 oranges a week, and to keep his eyes closed at all

times, in order to rest them. The brothers possessed a large library of medical books, and it would seem that Langley felt he had the information and knowledge necessary to treat his brother.

An intact Model-T Ford was discovered in the basement...
At some point in the 1930's, the West 77th Street home where their father had lived was sold, and the new owner, a Mrs. Peter Meyer, discovered an intact Model-T Ford in the basement. It is not clear how it got there. Mrs. Meyer is said to have paid a workman $150 to disassemble the car and put the pieces in the street. This somehow came to Langley's attention, and for reasons known only to him, he carried the car piece-by-piece back to the basement of his Fifth Avenue home. It would appear that along with the loss of their other utilities, the brothers had no electricity, as Langley apparently tried to connect a generator to the car's engine in order to provide power, but was unsuccessful.

The brothers eventually came to the attention of the general public when they were mentioned in an article written by Helen Worden, a reporter for the World-Telegram. A real estate agent named Maurice Gruber was attempting to buy some farmland in Queens that belonged to the brothers. Their refusal to respond to his letters or to answer the door when he tried to see them in person resulted in Gruber keeping a vigil at their home. In her article, Worden referred to Langley Collyer as "the mystery man of Harlem," and included in it, a whole range of sensational rumors that had been circulating about the brothers and their home. It was said to contain all sorts of rich furnishings, a vast library of books, and huge amounts of money that Langley would not trust to banks.

The brothers were depicted as wealthy hermits...
Worden, herself, kept a watch on the Collyer's home, and finally caught up with her elusive quarry one night, as he was leaving the house to go on what was one of his regular after-dark shopping trips. She questioned Langley about a boat (his father's) and the Model-T Ford said to be in their basement. Langley confirmed these stories. Rather than clearing up the mystery, Ms. Worden's article seemed to have only increased the speculation and rumors about the brothers, and during the 1930's other articles were written about the brothers in the New York papers. The brothers were depicted as wealthy hermits, living in a storehouse of money and valuables. People visited the house, banging on the doors or attempting to see them, while neighborhood children committed various acts of vandalism that included breaking windows. As windows were smashed, Langley systematically boarded them up instead of replacing them.

Throughout this time, and most likely the result of a case of compulsive hoarding, Langley was hard at work filling the once attractive home with huge amounts of newspapers, cardboard boxes, barrels, metal cans, tree branches, scrap metal, and other assorted trash. In the case of the newspapers, it is said that he believed that

his brother Homer would someday regain his vision, and would then want to catch up on the news he had missed. He was known to prowl the streets at night, gathering items from curbside trash piles and bringing them home. No one knows how many years he had been actively engaged in this collecting. His foraging resulted in all three floors of the house being filled with literally tons of things he had collected. Perhaps it was his knowledge of engineering that enabled him to arrange the boxes and packing cases in interlocking arrangements that concealed a maze of tunnels that only he knew.

The home became a fortress with booby-traps...
Langley was said to harbor fears of being burglarized, and there had, in fact, been several attempted break-ins over the years by those perhaps lured by the tales of stockpiled riches. The home became a sort of fortress for the brothers, with booby-traps constructed of great piles of debris rigged with the aid of trip wires to fall on unsuspecting intruders. This, of course, only served to increase the brothers' growing isolation. If their goal was to keep the world out, they were succeeding.

Although the brothers were by no means poor, Langley is also said to have regularly rummaged through garbage cans seeking food. He went begging at butcher shops for scraps, and was known to have walked as far as Williamsburg, in Brooklyn to purchase stale bread at the lowest possible cost. The Collyers again appeared in the newspapers in April 1939, when, armed with a court order, a city marshal together with representatives of the Consolidated Edison Company entered the brother's two fifth avenue buildings and removed the gas meters, which had been in a state of disuse since 1928. A crowd said to be as large as 1,000 people gathered outside their home to see what was happening.

Homer's last appearance outside the house is said to have occurred a number of months later on January 1st, 1940. Sgt. John Collins, a city policeman from the 123rd street station who was familiar with the Collyers, spotted the two brothers carrying a large tree limb from across the street into their basement. Langley guided the branched end, while Homer held up the other end.

Not paying taxes was a symptom of their reclusiveness...
Although the brothers did everything they could to avoid public scrutiny, it had its own way of intruding into their solitude. Ironically, it was their reluctance to encounter the outside world that continually brought the world to their doorstep. It appears that not paying taxes and other bills was a symptom of their reclusiveness, and it caused them no end of trouble. The most highly publicized example occurred in August of 1942, when the Bowery Savings Bank foreclosed on a mortgage that amounted to $6,700 plus interest (no interest had been paid since 1940).

After going to state Supreme Court, the bank obtained permission to evict the brothers from their home. The very same day, however, the Collyer's attorney, John R. McMullen, met with bank officials with an

offer by his clients to repurchase the property. As the house was seen to be in very poor condition, it appeared that the Bowery Savings Bank was not all that eager to repossess it. Mr. McMullen had never actually been allowed in the brothers' house, so instead, Langley, who almost never appeared in daylight, had walked all the way to his attorney's office on Park Row to discuss the matter. Mr. F. Donald Richart, vice president in charge of real estate for the bank, consented to give the brothers "a generous amount of time" so that they could work out the details of the repurchase.

Growing rumors that Homer had died...
There were growing rumors on the street, around this time, that Homer had died and that his body was still in the house. Sgt. Collins of the 123rd street station (mentioned earlier), took it upon himself to look into the matter. He encountered Langley, and somehow got his permission, despite some reluctance, to enter the house through the basement door. In a surreal journey through a labyrinth of tunnels in the trash and homemade booby-traps that lasted a half hour, Langley led the officer to the bedroom where Homer was to be found. What happened next is told in Sgt. Collins own words. "I switched on my flashlight, and there was Homer sitting up like a mummy. He was on a cot, a burlap bag beneath him and an old overcoat on the foot of the cot, and he spoke directly to the officer. "I am Homer Collyer, a lawyer. I want your shield number. I am not dead. I am blind and paralyzed." Langley subsequently made a complaint to the police department about the incident, but no action was ever apparently taken on the matter.

In the matter of the Bowery Savings Bank, it seems that no repurchase offer was ever worked out, so in October, Supreme Court Justice Bernard Botein signed an order permitting the city sheriff to evict the brothers from their brownstone. This same judge's decision, which had been issued in August, was now about to be carried out. The bank, still trying to not have to resort to force, repeatedly mailed eviction notices to the brothers, who never responded.

The Bowery Savings Bank was not to be put off indefinitely. As the new owner of the building, they were required by the city to make repairs to the property according to the city's building and sanitary codes. At the end of September, they dispatched a crew of workmen to the house to begin carrying out the repairs that had been ordered by the Department of Health. A number of police officers and patrol cars were sent to the scene to manage the inevitable crowd that had gathered, as it always did whenever any activity took place at the Collyer home. As the workmen went about repairing a falling stone cornice, replacing missing window panes, and removing piles of junk from the rear of the property, Langley Collyer called out to them from an upper-story window, demanding to know by what right they were trespassing on his property. The contractor was then forced to stop work and obtain a copy of the city order, in order that the repairs might continue.

The city sheriff carried out the eviction order...
On November 19th, following the brothers' repeated refusal to respond to various notices, the bank requested that the city sheriff carry out the eviction order and enter the house by force, if necessary and remove the brothers. In short order, at 10 o'clock, there showed up at the Collyer's door two deputy sheriffs, Herman A. Murray and Gillespie Anderson, police captain Christian Zimmer of the 128th street police station, Dr. Marshall Rose, sheriff's physician, John Redfield of the Bowery Savings Bank, and Joseph and Herman Cohen, a father and son, respectively, who were both locksmiths. Mr. McMullen, the Collyer's attorney met them there. The group took turns pounding on the door for over an hour, but the only answers were echoes. A crowd collected on the sidewalk, hoping to get a glimpse of what was going on at the "haunted house," as it had come to be known in the neighborhood.

The locksmiths then tried for another hour, in vain, to force the lock on the large wooden front doors, but were unsuccessful because of all the rust and corrosion. Going to the rear of the house, they were able to remove an iron grille-covered door leading to the basement with the help of the two deputies. Here, they found themselves stymied again, as they found their way barred by a mass of wire netting, behind which was a solid mass of crates, barrels, and large tin canisters from floor to ceiling. Seeking another entrance, they next moved on to another rear door, and tore away its rotted boards, only to find a further wall of garbage cans, trunks, crates, and pieces of rusted iron. Breaking in yet another rotted door next to this one, they were met with a similar obstruction.

Covered with dust, and feeling frustrated, the team returned to the front of the building to form a new plan of action, and decided to now make their way into the building via a window. One of the locksmiths, Joseph Cohen, swung up from the top of the front stoop and made his way to the ledge of one of the building's high north windows, where he forced open the shutters. He then broke a windowpane with a hammer, and climbed in through the now empty frame. His son Herman stood outside the window on the ledge and peered in at his father, who by this time was half-choked with dust.

The room was filled to overflowing...
As with the other parts of the house encountered thus far, the room was filled to overflowing with various and sundry items - heaps of old sheet music, gilded picture frames, Christmas ornaments, broken plaster cherubs, piles of books, garden baskets, etc. Joseph Cohen finally managed to work his way downstairs to the front entrance where he and deputy Murray were able to open a path near the door. Clouds of choking dust enveloped them, making the going difficult, and breathing an effort. They eventually opened a parlor door and made it into a hallway where they encountered further barricades. Suddenly, they were greeted by a weary voice from out of the gloom, asking, "What is the meaning of this?" Deputy Murray replied, "I have an eviction notice." Langley then asked him, "Is Mr. McMullen here?" McMullen, who had by now worked his way to the barricade called out to his client, "They will put you out,

Mr. Collyer, unless your keep the agreement." Langley replied, "Do what you think best." Following his attorney's advice, Langley then borrowed a pen from the deputy, and signed a check for the full amount, thus ending the invasion.

But the Collyer's troubles were not yet over.

The IRS was now pursuing Homer for income tax arrears...
They came in for some further unwanted attention in February 1943, but this time from the Internal Revenue Service. The IRS was now pursuing Homer for what it claimed was $1900 in income tax arrears plus interest that had accumulated over the previous twelve years. Homer was notified that unless this sum was promptly paid, the house he owned at 2077 Fifth Avenue would be sold at auction on February 3rd. This was the building across the street he had purchased with the intent to divide into rentable apartments. The ever-patient Mr. McMullen hoped his client would come through at the last minute, as had happened previously, although the attorney had been unsuccessful in his attempts to contact the brothers.

On the day of the auction, the IRS representatives waited for over an hour beyond the scheduled auction time, and finally, the property was put up for bid. When no bids were offered, and with Mr. McMullen present, the government took possession, although it was not eager to do so due to the poor condition of the property. It was so rundown, that it hardly seemed worth the effort. Beyond the building being of little worth, there were also the problems of the cost of the auction itself, not to mention the $3,000 in back taxes on the property owed to the City of New York that had been unpaid since 1938. According to the rules, the government would have to hold onto the property to allow Homer the chance to pay what he owed and get his property back. He never paid, and it does not appear that the government ever went any further in the matter of taking possession of the building, as will be seen.

Over three years later, the Collyers once again found themselves in the news.

The reclusive Langley refuesed to cooperate...
On July 23, 1946, two police officers, Daniel Pesek and John Killoran, while on radio car patrol, heard noises coming from 2077 Fifth Avenue. Upon further investigation, the officers discovered two men stealing plumbing and electrical fixtures from the building. The two patrolmen tussled with the vandals, capturing one of them, a homeless man named George Smith, aged 25. Officer Killoran hurt his leg when he fell through a hole in the floor. The officers then attempted to contact Langley in order to get him to swear out a complaint against the thief, but speaking to them through his locked door, he refused to do so. Despite his lack of cooperation, Langley was named as the complainant, and notified that if he did not appear in court, the city would issue him a subpoena. He still refused to cooperate, but after officer Pesek tried several times to serve him with the subpoena, he relented. It

seems that time and again, only the threat of legal action could pry loose the reclusive Langley from the decrepit building he and his brother called home.

On July 27th, dressed in turn-of-the-century garments, he appeared in the city's Felony Court as complainant against Smith. What was particularly unclear about all this was that technically, the Collyers no longer owned 2077 Fifth Avenue. Langley clearly did not accept all this, and prior to signing the complaint, he stated, "My invalid brother, Homer Lusk Collyer, and I still own that house and we have the keys to it." He added, "The government seized the property on the contention we did not pay income taxes, but we are going to sue and get that property back, because the government can't demand income taxes from us when we had no income." The brothers had, in fact, never surrendered the keys to the building. He went on to relate that this was the third incident in which he had had to go to court to swear out a complaint against criminal intruders at his home.

The brothers owned two land parcels in Queens County...
The last time either of the Collyer's was seen alive, was the result of yet another tax problem with New York City. It seems that the brothers owned two land parcels in Queens County, which they had inherited from their father. The city had wanted this land for new streets and other purposes, and Langley, together with Mr. McMullen, had a meeting about this with the city's corporation counsel the previous October. After Langley refused two summonses to testify before Supreme Court Justice Charles C. Lockwood, the land was condemned by the city, and the brothers were awarded $7500, which was substantially less than its appraised value. Unfortunately, they would see none of this award, in any case, as the city claimed the brothers owed it $27,000 in back taxes. Interestingly, a news article about this in the New York Times mentions that the brother's only regular means of contact with the outside world was a crystal radio set.

Which brings us back to the beginning of our story on the morning of March 21st, 1947, with the police receiving the phone call from the mysterious Mr. Charles Smith.

An officer was was unable to open the front door...
The police had received a number of such calls over the years, but as usual, they were obliged to respond. An officer was dispatched to the scene, but was unable to open the front door. He then put out a call to Police Emergency Squad 6, which arrived on the scene at 10:00 a.m. They began by cordoning off the Collyer's house in order to hold back the crowd of curious onlookers, which grew as large as 600 people. The officers began their search by using crowbars and axes to try to force an entrance into the house. They broke their way through an iron grille-covered door to the basement in the front of the house, but as had happened in the past, they immediately found themselves confronted by the usual floor-to-ceiling wall of crates, newspaper, furniture, and odd pieces of junk.

Officers found the emaciated body of a white-haired man...
For their second attempt to gain entry, the officers obtained ladders from the Fire Department and tried the windows on the upper floors. Unfortunately, many of the shutters on the windows couldn't be opened, and it wasn't until 12:10 p.m. that a patrolman William Barker was able to make his way through a second story window. Patrolman Barker was not seen for several minutes, and on his return to the window, called to his fellow officers, "There's a DOA here." In response, Detective John Loughery made his way up the ladder in order to view the body, as other officers began to batter in the wooden front doors with axes. They were again faced with another massive obstruction of neatly tied bundles of newspaper, as well as cardboard boxes filled with assorted contents. Although they tried to tear down the wall of debris, they were forced to admit defeat. Meanwhile, Detective Loughery related what he had seen - the emaciated body of a white-haired man dressed in a tattered gray bathrobe, sitting upright, and tentatively identified as Homer Collyer. The medical examiner, Arthur C. Allen, arrived at 3:45 p.m., and declared that the individual had been dead for approximately ten hours.

The next order of business was to locate Langley, who was nowhere to be found on the premises. It was reasoned that if he were within the house, he would have made an appearance by this time, as he usually did. Police were perplexed about how Langley was able to enter and leave the building, but neighbors stated that he regularly entered and left on his daily shopping trips via the front basement's iron-bound door. After their own struggle to enter, the officers refused to believe that this was possible.

The entire house was packed with debris of various kinds...
According to the New York Times, the entranceway past the basement door contained "... an old stove, several umbrellas, numerous packages of newspapers, a gas mask canister, an old stove pipe, and a broken scooter." There were also numerous rats seen darting around and through the piled trash. An inspection of the rest of the premises through various windows and around the second floor where they had entered revealed that the entire house was packed with debris of various kinds. It appeared that the building was riddled with a maze of tunnels through which Langley had moved, pulling bales of newspaper in behind him, to prevent intruders from entering. The police also found tin cans and piles of heavy debris wired together to form booby traps, in which the cans would sound an alarm, and a mass of junk would fall on the unsuspecting invader.

...newspapers lying around that dated back to 1915.
Homer Collyer's body was taken away in a body bag to the police van that would transport it to the morgue. An autopsy was to be conducted to determine the cause of death, although foul play was not suspected. The crowd, milling around on the sidewalk hoping to see what was going on inside, and trading stories about their unusual neighbors, and the fabled wealth that was rumored to be hidden in the house. Some believed the numerous cardboard boxes that filled the house were stuffed with cash. As they searched further, police found newspapers lying around

that dated from as far back as 1915. Strewn everywhere were such things as hats, boxes of Christmas cards, a folding chair, a broken sled, and automobile seat, part of a piano frame, etc.

The police were careful to put everything back in place, including the materials they had removed to be able to enter the building. They then boarded up the house at 5 p.m., at which time, Attorney McMullen arrived on the scene. He took charge of all papers, notes, and letters discovered there by the police, and stated to the press that he was sure his elderly client would soon be in touch with him. He also quoted Langley as having said that they were entitled to live their own lives.

No one had any idea of where Langley might be found...
The next day's papers puzzled over the missing Langley. No one had any idea of where he might be found, with the exception of Mr. McMullen, who told reporters, "Your guess is as good as mine, but I think he is in the house, myself." Detectives from the 123rd street station thought that he might still be out on one of his shopping trips to Brooklyn. These were sometimes known to last as long as twenty-four hours, because he made the trip on foot. Deputy Inspector Christopher Salsieder announced that if Langley did not show up by 1 p.m. on March 24th, a missing person's alarm would be issued. In the meantime, it was decided to not perform an autopsy, as the cause of death was believed to be the result of "ateriosclerotic heart disease," which, it was said, could be determined by external examination. Later reports seem to indicate, though, that an autopsy was finally performed.

Of course, the usual publicity-seekers were quick to come out of the woodwork.

William Rodriguo, a sometime Democratic politician from Harlem, came forward, claiming to be the "Charles Smith" who had phoned the police, touching off this latest incident. He stated that he had used a false name due to not wanting to get involved, but had later changed his mind. He added a further touch of mystery to the story, telling police that he had been told of the Collyers' deaths by an unknown man he had met in front of their house the morning of his phone call. The next day, on the 23rd, the crowd outside the decaying brownstone had grown to several thousand people. Langley had still not appeared, and the curious were hoping for a glimpse of him, or failing that, his remains.

A stream of autos crawled by the building...
One man showed up with a shovel and began digging in the building's front yard, but was removed by the police. A stream of autos from as far away as New Jersey and Connecticut crawled by the building in a regular procession. The daily papers thirsted to know about the contents of the house, rumored for years to contain numerous grand pianos, a Model T, and a boat.

Inspector Joseph Goldstein of the Tenth Division speculated that a thorough search of the entire house would occupy a police emergency squad for three weeks. They were to begin work later that day,

following an inspection by the Department of Housing and Buildings and the Board of Health. The strategy would be for police officers to begin with a search of the top floor, dumping the contents into the backyard. It was decided that the items removed would not be taken away until the public administrator or an heir of the Collyers gave approval. A relative of the brothers, William Collyer of Yonkers, turned up at the house that day, relating to reporters that his mother and sister had visited the brothers in 1928, and noted that the house, at that time, contained no furniture, but was already filled with quite a bit of debris.

The clearing of the building began the next day on the 24th. This first stage of the operation, the clearing of the top floor, began that afternoon, headed by Inspector Goldstein.

Officers broke open several skylights to enter the building...
After Mr. McMullen declared Langley missing at 1:15 p.m., and after officials from the two city departments declared the building safe to enter, the officers of Emergency Squad 6 began their task by sending over a ladder from an adjoining rooftop. After climbing across, they broke open several skylights and a roof trapdoor, through which they entered the building. Once inside, they smashed windows in order to get some badly-needed ventilation. A large crowd, whose numbers now ran as high as 2,000 watched the spectacle from the street, windows, fire escapes, and rooftops, cheering each time a sizable object was thrown into the yard below. Among these items were a gas chandelier, the folding top of a horse-drawn carriage, a rusted bicycle, a child's chair, an automobile radiator, dressmaking dummies, a sawhorse, a rusted bedspring, a kerosene stove, a doll carriage, a checkerboard, and numerous bundles of newspapers. A team of sixteen men inspected each object as it was thrown out, looking for valuables and important papers to be saved. They found enough ledgers, correspondence, and legal documents to fill eight crates which were taken to the West 123rd street station to be looked over by someone from the public administrator's office.

Over 2,000 dust-covered volumes and five pianos...
At 3 p.m., Inspector Goldstein called off the search for Langley for that day, and sent his men to check out the basement. They found the walls lined with ceiling-to-floor bookcases containing over 2,000 dust-covered volumes, among them numerous books on the law and engineering. Reporters and a family member were allowed to have a look around, and among the newspapers and cardboard boxes there were as many as five pianos. With much effort, the officers cleared a path to a stairway, but were unable to open up the stairway itself. While clearing this area, they stumbled on a generator, which may have been used to produce electricity.

Some of the debris removed was piled in the front areaway, and included a kiddy car, three women's hats, a box of curtain rings, a green toy bus, some lead pipes, and a Metropolitan Opera program from 1914. At 4

p.m., the Emergency Squad forced their way into the first floor. Aided by searchlights powered by a portable generator, they made out a mahogany mantelpiece containing a large cracked mirror resting against a wall, an old RCA radio in a corner, and a large pile of furniture covered with dust standing in the middle of the floor. The windows were covered with a filthy green drapery.

At this point, the search was ended for the day, with the police boarding up the windows, and piling the collected debris in a section of the yard surrounded by a tall iron fence. Langley had still not been found, but the police were determined to return and finish their search.

March 26th, still no sign of the missing brother...
The following morning at 10 a.m., the officers resumed their search. It was now March 26th, with still no sign of the missing brother. The day was particularly windy, blowing some of the old newspapers down the street, where they were snatched up by the ever-present crowd as souvenirs. The overwhelming mass of debris the police removed from the house consisted largely of old newspapers, cardboard boxes, magazines, and pieces of wood. Among the other assorted things uncovered that day included a nursery refrigerator, a beaded lampshade, a box of toy tops, and a toy airplane.

In the basement, they found the chassis of the fabled Model-T Ford, thus confirming one rumor. Important documents and papers continued to turn up, and these were removed to the 123rd street station. Any useless material that could be combustible was carted away in two truckloads by the Department of Sanitation, to be burned in its incinerators. The first load weighed 6,424 pounds, and the second a bit less.

A further maze of tunnels and several new booby-traps...
One rumor that was put to rest was the existence of a secret basement tunnel connecting the brother's two buildings. In addition to discovering a further maze of tunnels, several new booby-traps were found, consisting of things such as cans, or large tree limbs (as large as twenty inches in diameter), set to drop on unwary intruders.

The police were becoming increasingly convinced that Langley was not to be found alive on the premises, but they were determined to continue their search of the entire house. Inspector Goldstein stated that the work would continue, "... until we are sure Langley Collyer is not in there, dead or alive." One theory was that his body might yet be found stuck in one of the booby-trapped tunnels. Assistant Chief Inspector Frank Fristensky, Jr. told the press that it would take them several more days before they had a clear picture of what the interior of the building contained. Attorney McMullen had already become concerned about the brother's tangled finances and their numerous bank accounts. He estimated their worth to be in the six-figure range, not including the real estate they owned.

Work continued on the 26th, much as it had the day before.

The Emergency Squad began work at 10:00 a.m., halting briefly at noon when some confusion arose over whether proper legal authorization for their work had been obtained.

...searchers tossed large amounts of material from the windows.
At 2:30 efforts to clear the top floor resumed, with the searchers tossing large amounts of material from the windows. Relatives watching the operation from the street complained to the police that they were being less than careful in discarding things, and risked discarding items of value, as well as important papers. This resulted in the officers being somewhat less energetic in clearing things out. One particular item that attracted attention was the discovery of a .22 caliber pistol and holster, along with ammunition of various types. This was turned over to the Police Ballistics Bureau.

A report submitted to the public administrator of New York County by Deputy Chief Inspector Conrad Rothengast stated that it was believed that Langley Collyer was dead based upon the facts that the brother had never been away from his home for more than twenty-four hours, and that the death of Homer would certainly have been cause for him to have at least contacted his attorney or his relatives.

The next day, the New York Times reported that the surrogate, a Mr. James A. Delahanty, was unable to appoint Francis J. Mulligan, the public administrator as temporary administrator of the Collyer brother's estate. While everyone in the case agreed that Langley Collyer was most likely dead, Mr. Delahanty felt that definite proof was required for such a move to be made. Various affidavits from such people as John R. McMullen and William Rodriguo were due to be submitted to Mr. Delahanty.

March 27th, still no trace of Langley...
As of the 27th, police searchers still had been unable to turn up any trace of the missing Langley, although they did turn up a cigar box containing three more revolvers, a sixteen-gauge shotgun, a .22 caliber rifle, a .30 caliber rifle, a two-foot long bayonet, and a three-foot long cavalry saber. Near the spot where Homer's body had been discovered, they found another old cigar box containing thirty-four bank books from various savings banks. Eleven of them had been canceled, and they showed savings totaling $3,007 dollars.

By March 28th, the police were having their hands full following up on numerous tips they were receiving, concerning the whereabouts of the missing Langley.

Officers were dispatched to the Borough Hall-Jay Street Station in Brooklyn after a conductor reportedly saw him board the subway there. They also searched a group of boarded-up summer hotels and bungalows in Asbury Park, New Jersey; a place where the brothers had spent time between 1901 and 1907, and where it was thought Langley might be hiding.

In the meantime, surrogate Delahanty finally appointed Francis J. Mulligan as temporary administrator of Langley's estate, in addition to being made administrator of Homer's. Following these appointments, police halted their intensive search for Langley in the Fifth Avenue home, and decided, instead, to begin shipping the contents to an unused school building at 67 Rivington Street on the 31st, where they would be inspected for valuables and important papers. Items of obvious value were to go to this location, while things that were obviously trash would be removed by the Department of Sanitation.

Following leads in New Jersey...
On the following day, Mr. Mulligan, as administrator, visited the city morgue to claim the body of Homer. Funeral arrangements were set for April 1st, to be held at Cypress Hills Cemetery in Queens, where the family owned a plot. Police were still hard at work tracking down various leads. Their latest took them to New Jersey. A waitress in Tuckerton reported to police that she had served food to a customer who appeared to fit Langley Collyer's description, which by then, had been widely distributed. She added that the man had subsequently boarded a bus headed for Atlantic City. Police in that city then proceeded to make a sweep of hotels and rooming houses.

Police recommenced their search on the 31st as planned, beginning at 8:30 in the morning. It appeared that they would be able to clear about one room per day, and there were an estimated twelve rooms in the building. The workforce at the house now consisted of two detectives and five laborers hired by Mr. Mulligan. Their work concentrated on the front basement room, which was found to hold 3,000 books, numerous telephone directories, a Steinway piano, a horse's jawbone, a Model-T Ford's engine block, numerous campaign buttons, and large amounts of newspaper, as usual, tied up neatly in bundles.

Homer Collyer's funeral held on April 1st...
Homer Collyer's funeral was held on April 1st, but of the fifty-three people who were present, only two actually knew him. Both were neighbors. Seventeen cousins of the Collyers were also in attendance.

John R. McMullen also attended, hoping that perhaps that Langley would appear at last. Said Mr. McMullen to the press, "I had hopes until the last minute that Langley would be here if he were alive." When questioned if he believed Langley was still alive, he replied, "One guess is as good as another." The police search for the missing brother continued. They sent out 500 pictures of him to every New York City police precinct, and also to the police in eleven states. Efforts to clear the house were now in the second day. The detectives and laborers continued their methodical work. By the end of that day, nineteen tons of trash and objects had been removed. The bulk of this came from the first floor hallway.

It was decided by the public administrator that Langley's estate would pay for the use of a school building where valuable items from the home were being stored. The Department of Housing and Buildings, meanwhile, ruled that the house would eventually have to be repaired or

demolished. On the 3rd, it was thought that the mystery of Langley's whereabouts had been solved when a body resembling his description was discovered floating in the East Bronx in Pugsley's Creek, but the excitement ended abruptly when the body was identified as an elderly man who had recently disappeared from a houseboat.

April 7th: 103 tons of rubbish removed to date ...
By the 7th of April, workers had removed approximately 103 tons of rubbish from the home, with twenty-two tons having been removed on that day alone. Among the more interesting items found at that point were five violins that were to be sent for appraisal. It was estimated by the supervising detectives that it would take another week to ten days to clear out the structure.

Down at the Missing Persons Bureau, Detective Charles Meyers offered the theory that "Everything points to Langley being dead in the building." He added that the results of an autopsy on Homer indicated that there had been no food or liquid in the invalid's stomach. Detective Meyers concluded that, "Homer died for lack of care." It simply did not add up that Langley would have allowed his brother to die unattended, or simply not show up at his funeral.

April 8th: Langley's body finally discovered...
It would ultimately turn out that Detective Meyers was correct, as on April the 8th, Langley's body was finally discovered, pinned by one of his own booby-traps in that same room on the second floor where Homer's body was previously found.

The work of clearing the house that day had proceeded as usual, with workers from the public administrator's office and police working their way through the second floor. By 3:30 that afternoon, about seventeen tons of material had been removed and loaded onto Department of Sanitation trucks. Shortly afterwards, a detective, Joseph Whitmore emerged from the building and asked reporters waiting on the scene to follow him. He led them to a corner drugstore. Placing a call to his headquarters, he reported, "We've got him." He went on to explain that he, and detective John Loughery, had located Langley's body. Loughery added, "We were scraping around in the rubbish when we saw a foot sticking out."

Within an hour, as word spread of the discovery of the body, a crowd of around 500 locals who had gathered to watch the day's work at the house, swelled to over 2,000.

Police higher-ups, including Commissioner Arthur W. Wallander, soon arrived on the scene. The commissioner commended detectives Whitmore and Loughery for their work in the investigation. Thomas A. Gonzales, the medical examiner, spent a half hour examining the corpse. He estimated that Langley had been dead at least two weeks, and possibly as long as four, and that the cause of death was either starvation or suffocation.

Langley died, trapped in debris...
Langley's body lay on its right side, inside one of the two-foot-wide tunnels that was part of the maze he had created, his head turned toward the area where his brother's cot had been, only eight feet away. The room, itself was filled with piles of newspapers, books, old furniture and tin cans. The materials that had apparently trapped Langley were a suitcase, three metal bread boxes, and bundles of newspapers. One particularly unpleasant detail was that the numerous rats that infested the house had gnawed at his partially decomposed body.

Jacob Iglitzen, who also happened to be the druggist from whose store the phone call had been placed, subsequently identified the body. He stated that he was able to recognize Langley's face, although it was somewhat decomposed. He also identified Langley's clothes. Overall, the evidence appeared to indicate that Langley had been killed by falling debris, and that his invalid brother, Homer, died from dehydration and malnutrition.

Attorney McMullen, told the press that he planned to confer the next day with Joseph A. Cox, an attorney for the city's public administrator, concerning the handling of the brother's assets, which were now estimated to be in the range of $100,000 distributed among various bank accounts and real-estate holdings. This finally laid to rest the popular notion that the brothers were multimillionaires.

Langley had died a month before his brother...
The next day, on April 10th, the medical examiner concluded that Langley Collyer had been smothered by the debris, which had collapsed upon him, and had been dead for at least a month before his brother, Homer. A funeral was held the next day on the 11th at Cypress Hills Cemetery in Brooklyn. The Reverend Dr. Charles T. Bridgeman, the assistant pastor of Trinity Church presided. There were forty persons in attendance, including many cousins. The saga of Langley Collyer was not quite finished, however.

A month later, the Commissioner of Housing and Buildings, Robert F. Wagner, Jr., announced that the house at 2078 Fifth Avenue still contained substantial filth and garbage, and that it remained "a distinct menace to health." He requested that the public administrator in charge of the brother's estate, Francis J. Mulligan, clear out the building, in order that the property could be surveyed. Findings would then be sent to the state Supreme Court so that the city could receive permission to demolish the building. On June 30th, Supreme Court Justice J. Edward Lumbard signed the order for demolition.

Collyer home to be demolished...
An inspector from the Department of Housing and Buildings had noted that the "roof beams were water soaked, rotted, and defective," and that all the floors throughout the entire building are sagging and defective." The city would next seek bids on the demolition of the building, and sometime after, the Collyer mansion was no more.

...and the property finally auctioned.
As a final chapter, the lot at the corner of 128th Street was publicly auctioned on March 1, 1951.

Unfortunately, Langley Collyer lived in an era when problems such as compulsive hoarding were regarded as eccentricities, something to be laughed at or ridiculed. Assuming that even had he been able to come to grips with the fact that he had a serious problem, there is little that would have been done for it at that point in history. Back in the first half of the 20th century, problems such as OCD were treated with psychoanalytic-type talk therapies, which produced little in the way of results.

Even today, we still read reports of individuals whose trash-filled properties have been condemned, or who were forced by law to clean up dwellings, which have been declared public nuisances or even health risks. Municipal governments and the media still seem to not understand what is going on in these situations, and that these are individuals in serious need of help. Sufferers of O-C disorders can be found to have varying degrees of insight. They may differ in their ability to recognize that they have a disorder, or that their behaviors are not those of the average person. It would appear that Langley Collyer, if he in fact had OCD, might have been one of those with a lower level of insight into his problem. It may well be that he believed his hoarding behaviors served a valuable purpose of saving money an ironic notion, considering that the brothers were relatively well off for the era they lived in.

It would also seem that in terms of reclusiveness, Langley and his brother became caught in an insidious loop. That is, as their behavior moved further and further away from the norm, and people's reactions to them became more critical and judgmental, they pulled in their boundaries and cut themselves off even more. This, in turn, would most likely have served to make them seem even more abnormal to outsiders, resulting in even more harsh treatment by the outside world.

Compulsive hoarding now regarded as treatable...
Nowadays, compulsive hoarding is regarded as treatable via behavioral therapy and medication. Sufferers can learn to clean up their dwellings, and to keep them that way.

In behavioral treatments for OCD, individuals are encouraged to gradually confront situations that cause them to feel anxious, while at the same time, resisting the performance of the compulsions they ordinarily use to relieve their anxiety. This approach is known as Exposure and Response Prevention.

In the case of hoarding, we are talking about gradually sorting out and discarding things that have been accumulated. This may be done under the direct supervision of a therapist working on the scene, or by giving the individual weekly or daily homework assignments. Before the actual work of therapy begins the therapist makes a thorough behavioral analysis in order to determine what is being saved, how it is being

saved, and where it is being saved. This may involve either a home visit by the therapist to directly observe the scene, or the patient may bring in photographs showing views of all areas of the home.

Clutter and trash may be dealt with either by location or category, and in either case, is approached by first working on things that are easiest, and then working towards those that are more difficult. For instance, the therapist may pick a particular room, closet, or area for the individual to begin clearing out, and then, over time, assign tasks designed to accomplish this. Alternatively, as some people tend to save only certain types of things, therapy may start by earmarking these particular items for removal, wherever they may be found.

One example would be people who save excessive quantities of newspapers, magazines, etc. having to bundle and put out a certain amount of them each week. Or in the case of those who have accumulated large amounts of clothing (old or new), having to throw out or donate a set number of articles between therapy sessions. In addition to this activity, the therapist will work with the individual to establish a set of rules for what can and cannot be saved, and in the case of saved items, how to store or arrange them in a neat and organized fashion.

Some therapists will set up a rule governing how long an item may be kept without being used, before it is considered in need of disposal.

With my own patients, I have always used what I refer to as my "Three Year Rule." Under this rule, any item that has not been used in any way during the previous three years must be discarded. There can be exceptions, of course, as in the case of family heirlooms, antiques, valuable collections, family photos, or useful tools, etc.

Where people's lives and dwellings have been disorganized for long periods of time, these rules are necessary to establish some kind of order, and to prevent the person from falling into chaos again. In all cases, the ultimate goal is to get the sufferer to take personal responsibility for the state of their dwelling, and to accept that they really do have a problem.

Some people seem to think that the ultimate solution should be to descend upon a sufferer's home, and forcefully clean the place out. While this might remedy the immediate problem, nothing else really changes, and within a period of time, the dwelling will fill up with things again in the same way as before. In addition, the anger and anxiety on the part of the sufferer that would result from such a remedy would probably only push them away from seeking help in the future.

The story of Langley and his unfortunate brother remains as a cautionary tale - an example of just how serious hoarding can become when left untreated. With appropriate therapies, however, such extremes of behavior can be prevented from engulfing the lives of otherwise intelligent and potentially productive human beings.

Not necessarily, I kept quite a bit of what my dad had kept
and would have kept a hell of a lot more of it if I had been
living in the same city instead of on the other side of the country.

> and/or repair might be useful to others (rather than themselves), and
> that the hoarder would be responsible (and therefore blameful and
> guilty) for another person not having this vital item should the need
> arise. They may also rationalize that what they are doing is actually
> "recycling," and are performing a community service by conserving
> resources. Throwing away something that could possibly be reused is
> seen as being highly irresponsible. In actuality, there really is no
> need for what they have saved, there is no one to give the items to,
> and the only result is that the hoarder is burdened with a house full
> of junk.
>
> Some of the things most commonly saved include newspapers, magazines,
> lists, pens, pencils, empty boxes, pamphlets, old greeting cards, junk
> mail, old appliances, outdated books and even assorted labels, string,
> rubber bands, plastic containers, bottles, and bottle caps. In the most
> extreme cases, people have been known to save such things as empty
> matchbooks, used tissues, old cigarette butts, bird feathers, old cars,
> discarded paper cups, used aluminum foil, paper towels, lint, and
> hairs. Some of these sufferers will even rummage through other people's
> trash, and bring home obvious junk that to them, seems quite useful or
> repairable.
>
> Accumulate things create fire or health hazards...
> Compulsive savers can accumulate large amounts of things, creating
> storage problems and fire or health hazards. Their houses can take on
> the appearance of having been ransacked, with floors waist-deep in
> trash and debris, rooms filled wall-to-wall with overflowing paper bags
> and cardboard boxes. Many sufferers can only make their way around
> their homes by creating aisles around and through the trash. Problems
> with municipal authorities are not uncommon, and hoarders are sometimes
> evicted or charged with violation of zoning or public-health laws.
> Ironically, the majority of people who save things compulsively rarely
> use or look at these things. Their security comes from merely having
> the things around "just in case" and in not having to make what seem
> like difficult decisions about what to discard.
>
> Let us now return to our story.
>
> The Collyers were part of one of New York's oldest families...
> Its main figures are two brothers, Homer Lusk Collyer (b. Nov. 6th,
> 1881), and Langley Collyer (b. October 3rd, 1885). The Collyers were
> part of one of New York's oldest families, a branch of the well-known
> Livingstons. Their ancestors had come over to America on the ship
> "Speedwell" in 1664, about a week after the Mayflower. The family had
> been members of the congregation of Trinity Church since 1697. Their
> father, Dr. Herman L. Collyer was a successful and renowned
> gynecologist, and his father, William Collyer, was said to have been
> one of the leading shipbuilders in America. In 1909, Dr. Collyer moved
> his family from Murray Hill to a fine upper-middle-class home in

> Harlem. It was a three-story brownstone located at 2078 Fifth Avenue
> (at 128th Street). Beyond his fame as a physician, the doctor was known
> to be a bit eccentric, paddling a small canoe to work each day at City
> Hospital on Blackwell's Island in the East River. He would subsequently
> paddle home at the end of his day, and then carry the boat on his head
> back to his house.
>
> Dr. Collyer's two sons seemed destined for successful lives of their
> own. Both attended Columbia University, where Homer earned a law
> degree, and his younger brother graduated with a degree in mechanical
> engineering and chemistry. Homer went on to practice admiralty law, but
> Langley, so far as is known, never held employment, and spent his time
> playing the piano. He is reputed to have won prizes as a concert
> pianist, but this cannot be verified. Perhaps Langley's inability to
> establish a career was an early sign of personal difficulties he may
> already have been experiencing.
>
> In 1917, the brothers had their telephone disconnected...
> It was probably a warning of things to come when in 1917, the brothers
> had their telephone disconnected, after being billed for long distance
> calls they claimed to have never made. This may have been the beginning
> of what would become a growing isolation from the outside world. Six
> years later, in 1923, Dr. Collyer died. Several years prior to his
> death, for reasons unknown, he had moved from his Fifth Avenue home to
> one at 153 West 77th Street. His sons remained at the family home with
> their mother. It is possible that a family breakup may have occurred.
>
> Life seems to have taken an abnormal turn for the two brothers in the
> year preceding the death of their mother in 1929. It appears that their
> gas was shut off in 1928, and they also seemed to have given up the
> convenience of running water and steam heat, and began using kerosene
> to light their home and to cook with. Water was obtained from a public
> fountain four blocks from their home. This was all clearly out of step
> for people of their education and social status.
>
> No one was ever permitted to enter their house...
> Despite all this, nothing appeared out of the ordinary to those in the
> outside world. The brothers were said to be courteous, cultured, and
> shy. The only sign that something might be amiss was that no one was
> ever permitted to enter their house. Around 1928, Homer worked for
> another attorney, John R. McMullen, who later became the family legal
> advisor. Homer next worked for City Title Insurance doing research in
> the New York City Hall of Records. He was described, at the time, as
> being courtly, and dressing in 19th century attire, presenting a rather
> Victorian appearance. He was said to resemble a gentleman of the
> 1880's.
>
> In 1932, Homer purchased a building across the street at 2077 Fifth
> Avenue for $8,000. He planned to divide it into apartments and to rent
> them. This plan was never realized, as he suffered a stroke in 1933,

> becoming blind as the result of hemorrhages in both of his eyes. With
> one exception, he was reportedly never seen outside of his home again.
> Langley then gave up his music to take on the job of nursing his
> brother back to health. No physician was ever consulted. Langley
> apparently believed that the cure for his brother's blindness was for
> him to eat 100 oranges a week, and to keep his eyes closed at all
> times, in order to rest them. The brothers possessed a large library of
> medical books, and it would seem that Langley felt he had the
> information and knowledge necessary to treat his brother.
>
> An intact Model-T Ford was discovered in the basement...
> At some point in the 1930's, the West 77th Street home where their
> father had lived was sold, and the new owner, a Mrs. Peter Meyer,
> discovered an intact Model-T Ford in the basement. It is not clear how
> it got there. Mrs. Meyer is said to have paid a workman $150 to
> disassemble the car and put the pieces in the street. This somehow came
> to Langley's attention, and for reasons known only to him, he carried
> the car piece-by-piece back to the basement of his Fifth Avenue home.
> It would appear that along with the loss of their other utilities, the
> brothers had no electricity, as Langley apparently tried to connect a
> generator to the car's engine in order to provide power, but was
> unsuccessful.
>
> The brothers eventually came to the attention of the general public
> when they were mentioned in an article written by Helen Worden, a
> reporter for the World-Telegram. A real estate agent named Maurice
> Gruber was attempting to buy some farmland in Queens that belonged to
> the brothers. Their refusal to respond to his letters or to answer the
> door when he tried to see them in person resulted in Gruber keeping a
> vigil at their home. In her article, Worden referred to Langley Collyer
> as "the mystery man of Harlem," and included in it, a whole range of
> sensational rumors that had been circulating about the brothers and
> their home. It was said to contain all sorts of rich furnishings, a
> vast library of books, and huge amounts of money that Langley would not
> trust to banks.
>
> The brothers were depicted as wealthy hermits...
> Worden, herself, kept a watch on the Collyer's home, and finally caught
> up with her elusive quarry one night, as he was leaving the house to go
> on what was one of his regular after-dark shopping trips. She
> questioned Langley about a boat (his father's) and the Model-T Ford
> said to be in their basement. Langley confirmed these stories. Rather
> than clearing up the mystery, Ms. Worden's article seemed to have only
> increased the speculation and rumors about the brothers, and during the
> 1930's other articles were written about the brothers in the New York
> papers. The brothers were depicted as wealthy hermits, living in a
> storehouse of money and valuables. People visited the house, banging on
> the doors or attempting to see them, while neighborhood children
> committed various acts of vandalism that included breaking windows. As
> windows were smashed, Langley systematically boarded them up instead of

> replacing them.
>
> Throughout this time, and most likely the result of a case of
> compulsive hoarding, Langley was hard at work filling the once
> attractive home with huge amounts of newspapers, cardboard boxes,
> barrels, metal cans, tree branches, scrap metal, and other assorted
> trash. In the case of the newspapers, it is said that he believed that
> his brother Homer would someday regain his vision, and would then want
> to catch up on the news he had missed. He was known to prowl the
> streets at night, gathering items from curbside trash piles and
> bringing them home. No one knows how many years he had been actively
> engaged in this collecting. His foraging resulted in all three floors
> of the house being filled with literally tons of things he had
> collected. Perhaps it was his knowledge of engineering that enabled him
> to arrange the boxes and packing cases in interlocking arrangements
> that concealed a maze of tunnels that only he knew.
>
> The home became a fortress with booby-traps...
> Langley was said to harbor fears of being burglarized, and there had,
> in fact, been several attempted break-ins over the years by those
> perhaps lured by the tales of stockpiled riches. The home became a sort
> of fortress for the brothers, with booby-traps constructed of great
> piles of debris rigged with the aid of trip wires to fall on
> unsuspecting intruders. This, of course, only served to increase the
> brothers' growing isolation. If their goal was to keep the world out,
> they were succeeding.
>
> Although the brothers were by no means poor, Langley is also said to
> have regularly rummaged through garbage cans seeking food. He went
> begging at butcher shops for scraps, and was known to have walked as
> far as Williamsburg, in Brooklyn to purchase stale bread at the lowest
> possible cost. The Collyers again appeared in the newspapers in April
> 1939, when, armed with a court order, a city marshal together with
> representatives of the Consolidated Edison Company entered the
> brother's two fifth avenue buildings and removed the gas meters, which
> had been in a state of disuse since 1928. A crowd said to be as large
> as 1,000 people gathered outside their home to see what was happening.
>
> Homer's last appearance outside the house is said to have occurred a
> number of months later on January 1st, 1940. Sgt. John Collins, a city
> policeman from the 123rd street station who was familiar with the
> Collyers, spotted the two brothers carrying a large tree limb from
> across the street into their basement. Langley guided the branched end,
> while Homer held up the other end.
>
> Not paying taxes was a symptom of their reclusiveness...
> Although the brothers did everything they could to avoid public
> scrutiny, it had its own way of intruding into their solitude.
> Ironically, it was their reluctance to encounter the outside world that
> continually brought the world to their doorstep. It appears that not

> paying taxes and other bills was a symptom of their reclusiveness, and
> it caused them no end of trouble. The most highly publicized example
> occurred in August of 1942, when the Bowery Savings Bank foreclosed on
> a mortgage that amounted to $6,700 plus interest (no interest had been
> paid since 1940).
>
> After going to state Supreme Court, the bank obtained permission to
> evict the brothers from their home. The very same day, however, the
> Collyer's attorney, John R. McMullen, met with bank officials with an
> offer by his clients to repurchase the property. As the house was seen
> to be in very poor condition, it appeared that the Bowery Savings Bank
> was not all that eager to repossess it. Mr. McMullen had never actually
> been allowed in the brothers' house, so instead, Langley, who almost
> never appeared in daylight, had walked all the way to his attorney's
> office on Park Row to discuss the matter. Mr. F. Donald Richart, vice
> president in charge of real estate for the bank, consented to give the
> brothers "a generous amount of time" so that they could work out the
> details of the repurchase.
>
> Growing rumors that Homer had died...
> There were growing rumors on the street, around this time, that Homer
> had died and that his body was still in the house. Sgt. Collins of the
> 123rd street station (mentioned earlier), took it upon himself to look
> into the matter. He encountered Langley, and somehow got his
> permission, despite some reluctance, to enter the house through the
> basement door. In a surreal journey through a labyrinth of tunnels in
> the trash and homemade booby-traps that lasted a half hour, Langley led
> the officer to the bedroom where Homer was to be found. What happened
> next is told in Sgt. Collins own words. "I switched on my flashlight,
> and there was Homer sitting up like a mummy. He was on a cot, a burlap
> bag beneath him and an old overcoat on the foot of the cot, and he
> spoke directly to the officer. "I am Homer Collyer, a lawyer. I want
> your shield number. I am not dead. I am blind and paralyzed." Langley
> subsequently made a complaint to the police department about the
> incident, but no action was ever apparently taken on the matter.
>
> In the matter of the Bowery Savings Bank, it seems that no repurchase
> offer was ever worked out, so in October, Supreme Court Justice Bernard
> Botein signed an order permitting the city sheriff to evict the
> brothers from their brownstone. This same judge's decision, which had
> been issued in August, was now about to be carried out. The bank, still
> trying to not have to resort to force, repeatedly mailed eviction
> notices to the brothers, who never responded.
>
> The Bowery Savings Bank was not to be put off indefinitely. As the new
> owner of the building, they were required by the city to make repairs
> to the property according to the city's building and sanitary codes. At
> the end of September, they dispatched a crew of workmen to the house to
> begin carrying out the repairs that had been ordered by the Department
> of Health. A number of police officers and patrol cars were sent to the

> scene to manage the inevitable crowd that had gathered, as it always
> did whenever any activity took place at the Collyer home. As the
> workmen went about repairing a falling stone cornice, replacing missing
> window panes, and removing piles of junk from the rear of the property,
> Langley Collyer called out to them from an upper-story window,
> demanding to know by what right they were trespassing on his property.
> The contractor was then forced to stop work and obtain a copy of the
> city order, in order that the repairs might continue.
>
> The city sheriff carried out the eviction order...
> On November 19th, following the brothers' repeated refusal to respond
> to various notices, the bank requested that the city sheriff carry out
> the eviction order and enter the house by force, if necessary and
> remove the brothers. In short order, at 10 o'clock, there showed up at
> the Collyer's door two deputy sheriffs, Herman A. Murray and Gillespie
> Anderson, police captain Christian Zimmer of the 128th street police
> station, Dr. Marshall Rose, sheriff's physician, John Redfield of the
> Bowery Savings Bank, and Joseph and Herman Cohen, a father and son,
> respectively, who were both locksmiths. Mr. McMullen, the Collyer's
> attorney met them there. The group took turns pounding on the door for
> over an hour, but the only answers were echoes. A crowd collected on
> the sidewalk, hoping to get a glimpse of what was going on at the
> "haunted house," as it had come to be known in the neighborhood.
>
> The locksmiths then tried for another hour, in vain, to force the lock
> on the large wooden front doors, but were unsuccessful because of all
> the rust and corrosion. Going to the rear of the house, they were able
> to remove an iron grille-covered door leading to the basement with the
> help of the two deputies. Here, they found themselves stymied again, as
> they found their way barred by a mass of wire netting, behind which was
> a solid mass of crates, barrels, and large tin canisters from floor to
> ceiling. Seeking another entrance, they next moved on to another rear
> door, and tore away its rotted boards, only to find a further wall of
> garbage cans, trunks, crates, and pieces of rusted iron. Breaking in
> yet another rotted door next to this one, they were met with a similar
> obstruction.
>
> Covered with dust, and feeling frustrated, the team returned to the
> front of the building to form a new plan of action, and decided to now
> make their way into the building via a window. One of the locksmiths,
> Joseph Cohen, swung up from the top of the front stoop and made his way
> to the ledge of one of the building's high north windows, where he
> forced open the shutters. He then broke a windowpane with a hammer, and
> climbed in through the now empty frame. His son Herman stood outside
> the window on the ledge and peered in at his father, who by this time
> was half-choked with dust.
>
> The room was filled to overflowing...
> As with the other parts of the house encountered thus far, the room was
> filled to overflowing with various and sundry items - heaps of old

> sheet music, gilded picture frames, Christmas ornaments, broken plaster
> cherubs, piles of books, garden baskets, etc. Joseph Cohen finally
> managed to work his way downstairs to the front entrance where he and
> deputy Murray were able to open a path near the door. Clouds of choking
> dust enveloped them, making the going difficult, and breathing an
> effort. They eventually opened a parlor door and made it into a hallway
> where they encountered further barricades. Suddenly, they were greeted
> by a weary voice from out of the gloom, asking, "What is the meaning of
> this?" Deputy Murray replied, "I have an eviction notice." Langley then
> asked him, "Is Mr. McMullen here?" McMullen, who had by now worked his
> way to the barricade called out to his client, "They will put you out,
> Mr. Collyer, unless your keep the agreement." Langley replied, "Do what
> you think best." Following his attorney's advice, Langley then borrowed
> a pen from the deputy, and signed a check for the full amount, thus
> ending the invasion.
>
> But the Collyer's troubles were not yet over.
>
> The IRS was now pursuing Homer for income tax arrears...
> They came in for some further unwanted attention in February 1943, but
> this time from the Internal Revenue Service. The IRS was now pursuing
> Homer for what it claimed was $1900 in income tax arrears plus interest
> that had accumulated over the previous twelve years. Homer was notified
> that unless this sum was promptly paid, the house he owned at 2077
> Fifth Avenue would be sold at auction on February 3rd. This was the
> building across the street he had purchased with the intent to divide
> into rentable apartments. The ever-patient Mr. McMullen hoped his
> client would come through at the last minute, as had happened
> previously, although the attorney had been unsuccessful in his attempts
> to contact the brothers.
>
> On the day of the auction, the IRS representatives waited for over an
> hour beyond the scheduled auction time, and finally, the property was
> put up for bid. When no bids were offered, and with Mr. McMullen
> present, the government took possession, although it was not eager to
> do so due to the poor condition of the property. It was so rundown,
> that it hardly seemed worth the effort. Beyond the building being of
> little worth, there were also the problems of the cost of the auction
> itself, not to mention the $3,000 in back taxes on the property owed to
> the City of New York that had been unpaid since 1938. According to the
> rules, the government would have to hold onto the property to allow
> Homer the chance to pay what he owed and get his property back. He
> never paid, and it does not appear that the government ever went any
> further in the matter of taking possession of the building, as will be
> seen.
>
> Over three years later, the Collyers once again found themselves in the
> news.
>
> The reclusive Langley refuesed to cooperate...

> On July 23, 1946, two police officers, Daniel Pesek and John Killoran,
> while on radio car patrol, heard noises coming from 2077 Fifth Avenue.
> Upon further investigation, the officers discovered two men stealing
> plumbing and electrical fixtures from the building. The two patrolmen
> tussled with the vandals, capturing one of them, a homeless man named
> George Smith, aged 25. Officer Killoran hurt his leg when he fell
> through a hole in the floor. The officers then attempted to contact
> Langley in order to get him to swear out a complaint against the thief,
> but speaking to them through his locked door, he refused to do so.
> Despite his lack of cooperation, Langley was named as the complainant,
> and notified that if he did not appear in court, the city would issue
> him a subpoena. He still refused to cooperate, but after officer Pesek
> tried several times to serve him with the subpoena, he relented. It
> seems that time and again, only the threat of legal action could pry
> loose the reclusive Langley from the decrepit building he and his
> brother called home.
>
> On July 27th, dressed in turn-of-the-century garments, he appeared in
> the city's Felony Court as complainant against Smith. What was
> particularly unclear about all this was that technically, the Collyers
> no longer owned 2077 Fifth Avenue. Langley clearly did not accept all
> this, and prior to signing the complaint, he stated, "My invalid
> brother, Homer Lusk Collyer, and I still own that house and we have the
> keys to it." He added, "The government seized the property on the
> contention we did not pay income taxes, but we are going to sue and get
> that property back, because the government can't demand income taxes
> from us when we had no income." The brothers had, in fact, never
> surrendered the keys to the building. He went on to relate that this
> was the third incident in which he had had to go to court to swear out
> a complaint against criminal intruders at his home.
>
> The brothers owned two land parcels in Queens County...
> The last time either of the Collyer's was seen alive, was the result of
> yet another tax problem with New York City. It seems that the brothers
> owned two land parcels in Queens County, which they had inherited from
> their father. The city had wanted this land for new streets and other
> purposes, and Langley, together with Mr. McMullen, had a meeting about
> this with the city's corporation counsel the previous October. After
> Langley refused two summonses to testify before Supreme Court Justice
> Charles C. Lockwood, the land was condemned by the city, and the
> brothers were awarded $7500, which was substantially less than its
> appraised value. Unfortunately, they would see none of this award, in
> any case, as the city claimed the brothers owed it $27,000 in back
> taxes. Interestingly, a news article about this in the New York Times
> mentions that the brother's only regular means of contact with the
> outside world was a crystal radio set.
>
> Which brings us back to the beginning of our story on the morning of
> March 21st, 1947, with the police receiving the phone call from the
> mysterious Mr. Charles Smith.

>
> An officer was was unable to open the front door...
> The police had received a number of such calls over the years, but as
> usual, they were obliged to respond. An officer was dispatched to the
> scene, but was unable to open the front door. He then put out a call to
> Police Emergency Squad 6, which arrived on the scene at 10:00 a.m. They
> began by cordoning off the Collyer's house in order to hold back the
> crowd of curious onlookers, which grew as large as 600 people. The
> officers began their search by using crowbars and axes to try to force
> an entrance into the house. They broke their way through an iron
> grille-covered door to the basement in the front of the house, but as
> had happened in the past, they immediately found themselves confronted
> by the usual floor-to-ceiling wall of crates, newspaper, furniture, and
> odd pieces of junk.
>
> Officers found the emaciated body of a white-haired man...
> For their second attempt to gain entry, the officers obtained ladders
> from the Fire Department and tried the windows on the upper floors.
> Unfortunately, many of the shutters on the windows couldn't be opened,
> and it wasn't until 12:10 p.m. that a patrolman William Barker was able
> to make his way through a second story window. Patrolman Barker was not
> seen for several minutes, and on his return to the window, called to
> his fellow officers, "There's a DOA here." In response, Detective John
> Loughery made his way up the ladder in order to view the body, as other
> officers began to batter in the wooden front doors with axes. They were
> again faced with another massive obstruction of neatly tied bundles of
> newspaper, as well as cardboard boxes filled with assorted contents.
> Although they tried to tear down the wall of debris, they were forced
> to admit defeat. Meanwhile, Detective Loughery related what he had seen
> - the emaciated body of a white-haired man dressed in a tattered gray
> bathrobe, sitting upright, and tentatively identified as Homer Collyer.
> The medical examiner, Arthur C. Allen, arrived at 3:45 p.m., and
> declared that the individual had been dead for approximately ten hours.
>
> The next order of business was to locate Langley, who was nowhere to be
> found on the premises. It was reasoned that if he were within the
> house, he would have made an appearance by this time, as he usually
> did. Police were perplexed about how Langley was able to enter and
> leave the building, but neighbors stated that he regularly entered and
> left on his daily shopping trips via the front basement's iron-bound
> door. After their own struggle to enter, the officers refused to
> believe that this was possible.
>
> The entire house was packed with debris of various kinds...
> According to the New York Times, the entranceway past the basement door
> contained "... an old stove, several umbrellas, numerous packages of
> newspapers, a gas mask canister, an old stove pipe, and a broken
> scooter." There were also numerous rats seen darting around and through
> the piled trash. An inspection of the rest of the premises through
> various windows and around the second floor where they had entered

> revealed that the entire house was packed with debris of various kinds.
> It appeared that the building was riddled with a maze of tunnels
> through which Langley had moved, pulling bales of newspaper in behind
> him, to prevent intruders from entering. The police also found tin cans
> and piles of heavy debris wired together to form booby traps, in which
> the cans would sound an alarm, and a mass of junk would fall on the
> unsuspecting invader.
>
> ...newspapers lying around that dated back to 1915.
> Homer Collyer's body was taken away in a body bag to the police van
> that would transport it to the morgue. An autopsy was to be conducted
> to determine the cause of death, although foul play was not suspected.
> The crowd, milling around on the sidewalk hoping to see what was going
> on inside, and trading stories about their unusual neighbors, and the
> fabled wealth that was rumored to be hidden in the house. Some believed
> the numerous cardboard boxes that filled the house were stuffed with
> cash. As they searched further, police found newspapers lying around
> that dated from as far back as 1915. Strewn everywhere were such things
> as hats, boxes of Christmas cards, a folding chair, a broken sled, and
> automobile seat, part of a piano frame, etc.
>
> The police were careful to put everything back in place, including the
> materials they had removed to be able to enter the building. They then
> boarded up the house at 5 p.m., at which time, Attorney McMullen
> arrived on the scene. He took charge of all papers, notes, and letters
> discovered there by the police, and stated to the press that he was
> sure his elderly client would soon be in touch with him. He also quoted
> Langley as having said that they were entitled to live their own lives.
>
> No one had any idea of where Langley might be found...
> The next day's papers puzzled over the missing Langley. No one had any
> idea of where he might be found, with the exception of Mr. McMullen,
> who told reporters, "Your guess is as good as mine, but I think he is
> in the house, myself." Detectives from the 123rd street station thought
> that he might still be out on one of his shopping trips to Brooklyn.
> These were sometimes known to last as long as twenty-four hours,
> because he made the trip on foot. Deputy Inspector Christopher
> Salsieder announced that if Langley did not show up by 1 p.m. on March
> 24th, a missing person's alarm would be issued. In the meantime, it was
> decided to not perform an autopsy, as the cause of death was believed
> to be the result of "ateriosclerotic heart disease," which, it was
> said, could be determined by external examination. Later reports seem
> to indicate, though, that an autopsy was finally performed.
>
> Of course, the usual publicity-seekers were quick to come out of the
> woodwork.
>
> William Rodriguo, a sometime Democratic politician from Harlem, came
> forward, claiming to be the "Charles Smith" who had phoned the police,
> touching off this latest incident. He stated that he had used a false

> name due to not wanting to get involved, but had later changed his
> mind. He added a further touch of mystery to the story, telling police
> that he had been told of the Collyers' deaths by an unknown man he had
> met in front of their house the morning of his phone call. The next
> day, on the 23rd, the crowd outside the decaying brownstone had grown
> to several thousand people. Langley had still not appeared, and the
> curious were hoping for a glimpse of him, or failing that, his remains.
>
> A stream of autos crawled by the building...
> One man showed up with a shovel and began digging in the building's
> front yard, but was removed by the police. A stream of autos from as
> far away as New Jersey and Connecticut crawled by the building in a
> regular procession. The daily papers thirsted to know about the
> contents of the house, rumored for years to contain numerous grand
> pianos, a Model T, and a boat.
>
> Inspector Joseph Goldstein of the Tenth Division speculated that a
> thorough search of the entire house would occupy a police emergency
> squad for three weeks. They were to begin work later that day,
> following an inspection by the Department of Housing and Buildings and
> the Board of Health. The strategy would be for police officers to begin
> with a search of the top floor, dumping the contents into the backyard.
> It was decided that the items removed would not be taken away until the
> public administrator or an heir of the Collyers gave approval. A
> relative of the brothers, William Collyer of Yonkers, turned up at the
> house that day, relating to reporters that his mother and sister had
> visited the brothers in 1928, and noted that the house, at that time,
> contained no furniture, but was already filled with quite a bit of
> debris.
>
> The clearing of the building began the next day on the 24th. This first
> stage of the operation, the clearing of the top floor, began that
> afternoon, headed by Inspector Goldstein.
>
> Officers broke open several skylights to enter the building...
> After Mr. McMullen declared Langley missing at 1:15 p.m., and after
> officials from the two city departments declared the building safe to
> enter, the officers of Emergency Squad 6 began their task by sending
> over a ladder from an adjoining rooftop. After climbing across, they
> broke open several skylights and a roof trapdoor, through which they
> entered the building. Once inside, they smashed windows in order to get
> some badly-needed ventilation. A large crowd, whose numbers now ran as
> high as 2,000 watched the spectacle from the street, windows, fire
> escapes, and rooftops, cheering each time a sizable object was thrown
> into the yard below. Among these items were a gas chandelier, the
> folding top of a horse-drawn carriage, a rusted bicycle, a child's
> chair, an automobile radiator, dressmaking dummies, a sawhorse, a
> rusted bedspring, a kerosene stove, a doll carriage, a checkerboard,
> and numerous bundles of newspapers. A team of sixteen men inspected
> each object as it was thrown out, looking for valuables and important

> papers to be saved. They found enough ledgers, correspondence, and
> legal documents to fill eight crates which were taken to the West 123rd
> street station to be looked over by someone from the public
> administrator's office.
>
> Over 2,000 dust-covered volumes and five pianos...

> that day, and sent his men to check out the basement. They found the
> walls lined with ceiling-to-floor bookcases containing over 2,000
> dust-covered volumes, among them numerous books on the law and
> engineering. Reporters and a family member were allowed to have a look
> around, and among the newspapers and cardboard boxes there were as many
> as five pianos. With much effort, the officers cleared a path to a
> stairway, but were unable to open up the stairway itself. While
> clearing this area, they stumbled on a generator, which may have been
> used to produce electricity.
>
> Some of the debris removed was piled in the front areaway, and included
> a kiddy car, three women's hats, a box of curtain rings, a green toy
> bus, some lead pipes, and a Metropolitan Opera program from 1914. At 4
> p.m., the Emergency Squad forced their way into the first floor. Aided
> by searchlights powered by a portable generator, they made out a
> mahogany mantelpiece containing a large cracked mirror resting against
> a wall, an old RCA radio in a corner, and a large pile of furniture
> covered with dust standing in the middle of the floor. The windows were
> covered with a filthy green drapery.
>
> At this point, the search was ended for the day, with the police
> boarding up the windows, and piling the collected debris in a section
> of the yard surrounded by a tall iron fence. Langley had still not been
> found, but the police were determined to return and finish their
> search.
>
> March 26th, still no sign of the missing brother...
> The following morning at 10 a.m., the officers resumed their search. It
> was now March 26th, with still no sign of the missing brother. The day
> was particularly windy, blowing some of the old newspapers down the
> street, where they were snatched up by the ever-present crowd as
> souvenirs. The overwhelming mass of debris the police removed from the
> house consisted largely of old newspapers, cardboard boxes, magazines,
> and pieces of wood. Among the other assorted things uncovered that day
> included a nursery refrigerator, a beaded lampshade, a box of toy tops,
> and a toy airplane.
>
> In the basement, they found the chassis of the fabled Model-T Ford,
> thus confirming one rumor. Important documents and papers continued to
> turn up, and these were removed to the 123rd street station. Any
> useless material that could be combustible was carted away in two
> truckloads by the Department of Sanitation, to be burned in its
> incinerators. The first load weighed 6,424 pounds, and the second a bit

> less.
>
> A further maze of tunnels and several new booby-traps...
> One rumor that was put to rest was the existence of a secret basement
> tunnel connecting the brother's two buildings. In addition to
> discovering a further maze of tunnels, several new booby-traps were
> found, consisting of things such as cans, or large tree limbs (as large
> as twenty inches in diameter), set to drop on unwary intruders.
>
> The police were becoming increasingly convinced that Langley was not to
> be found alive on the premises, but they were determined to continue
> their search of the entire house. Inspector Goldstein stated that the
> work would continue, "... until we are sure Langley Collyer is not in
> there, dead or alive." One theory was that his body might yet be found
> stuck in one of the booby-trapped tunnels. Assistant Chief Inspector
> Frank Fristensky, Jr. told the press that it would take them several
> more days before they had a clear picture of what the interior of the
> building contained. Attorney McMullen had already become concerned
> about the brother's tangled finances and their numerous bank accounts.
> He estimated their worth to be in the six-figure range, not including
> the real estate they owned.
>
> Work continued on the 26th, much as it had the day before.
>
> The Emergency Squad began work at 10:00 a.m., halting briefly at noon
> when some confusion arose over whether proper legal authorization for
> their work had been obtained.
>
> ...searchers tossed large amounts of material from the windows.
> At 2:30 efforts to clear the top floor resumed, with the searchers
> tossing large amounts of material from the windows. Relatives watching
> the operation from the street complained to the police that they were
> being less than careful in discarding things, and risked discarding
> items of value, as well as important papers. This resulted in the
> officers being somewhat less energetic in clearing things out. One
> particular item that attracted attention was the discovery of a .22
> caliber pistol and holster, along with ammunition of various types.
> This was turned over to the Police Ballistics Bureau.
>
> A report submitted to the public administrator of New York County by
> Deputy Chief Inspector Conrad Rothengast stated that it was believed
> that Langley Collyer was dead based upon the facts that the brother had
> never been away from his home for more than twenty-four hours, and that
> the death of Homer would certainly have been cause for him to have at
> least contacted his attorney or his relatives.
>
> The next day, the New York Times reported that the surrogate, a Mr.
> James A. Delahanty, was unable to appoint Francis J. Mulligan, the
> public administrator as temporary administrator of the Collyer
> brother's estate. While everyone in the case agreed that Langley

> Collyer was most likely dead, Mr. Delahanty felt that definite proof
> was required for such a move to be made. Various affidavits from such
> people as John R. McMullen and William Rodriguo were due to be
> submitted to Mr. Delahanty.
>
> March 27th, still no trace of Langley...
> As of the 27th, police searchers still had been unable to turn up any
> trace of the missing Langley, although they did turn up a cigar box
> containing three more revolvers, a sixteen-gauge shotgun, a .22 caliber
> rifle, a .30 caliber rifle, a two-foot long bayonet, and a three-foot
> long cavalry saber. Near the spot where Homer's body had been
> discovered, they found another old cigar box containing thirty-four
> bank books from various savings banks. Eleven of them had been
> canceled, and they showed savings totaling $3,007 dollars.
>
> By March 28th, the police were having their hands full following up on
> numerous tips they were receiving, concerning the whereabouts of the
> missing Langley.
>
> Officers were dispatched to the Borough Hall-Jay Street Station in
> Brooklyn after a conductor reportedly saw him board the subway there.
> They also searched a group of boarded-up summer hotels and bungalows in
> Asbury Park, New Jersey; a place where the brothers had spent time
> between 1901 and 1907, and where it was thought Langley might be
> hiding.
>
> In the meantime, surrogate Delahanty finally appointed Francis J.
> Mulligan as temporary administrator of Langley's estate, in addition to
> being made administrator of Homer's. Following these appointments,
> police halted their intensive search for Langley in the Fifth Avenue
> home, and decided, instead, to begin shipping the contents to an unused
> school building at 67 Rivington Street on the 31st, where they would be
> inspected for valuables and important papers. Items of obvious value
> were to go to this location, while things that were obviously trash
> would be removed by the Department of Sanitation.
>
> Following leads in New Jersey...
> On the following day, Mr. Mulligan, as administrator, visited the city
> morgue to claim the body of Homer. Funeral arrangements were set for
> April 1st, to be held at Cypress Hills Cemetery in Queens, where the
> family owned a plot. Police were still hard at work tracking down
> various leads. Their latest took them to New Jersey. A waitress in
> Tuckerton reported to police that she had served food to a customer who
> appeared to fit Langley Collyer's description, which by then, had been
> widely distributed. She added that the man had subsequently boarded a
> bus headed for Atlantic City. Police in that city then proceeded to
> make a sweep of hotels and rooming houses.
>
> Police recommenced their search on the 31st as planned, beginning at
> 8:30 in the morning. It appeared that they would be able to clear about

> one room per day, and there were an estimated twelve rooms in the
> building. The workforce at the house now consisted of two detectives
> and five laborers hired by Mr. Mulligan. Their work concentrated on the
> front basement room, which was found to hold 3,000 books, numerous
> telephone directories, a Steinway piano, a horse's jawbone, a Model-T
> Ford's engine block, numerous campaign buttons, and large amounts of
> newspaper, as usual, tied up neatly in bundles.
>
> Homer Collyer's funeral held on April 1st...
> Homer Collyer's funeral was held on April 1st, but of the fifty-three
> people who were present, only two actually knew him. Both were
> neighbors. Seventeen cousins of the Collyers were also in attendance.
>
> John R. McMullen also attended, hoping that perhaps that Langley would
> appear at last. Said Mr. McMullen to the press, "I had hopes until the
> last minute that Langley would be here if he were alive." When
> questioned if he believed Langley was still alive, he replied, "One
> guess is as good as another." The police search for the missing brother
> continued. They sent out 500 pictures of him to every New York City
> police precinct, and also to the police in eleven states. Efforts to
> clear the house were now in the second day. The detectives and laborers
> continued their methodical work. By the end of that day, nineteen tons
> of trash and objects had been removed. The bulk of this came from the
> first floor hallway.
>
> It was decided by the public administrator that Langley's estate would
> pay for the use of a school building where valuable items from the home
> were being stored. The Department of Housing and Buildings, meanwhile,
> ruled that the house would eventually have to be repaired or
> demolished. On the 3rd, it was thought that the mystery of Langley's
> whereabouts had been solved when a body resembling his description was
> discovered floating in the East Bronx in Pugsley's Creek, but the
> excitement ended abruptly when the body was identified as an elderly
> man who had recently disappeared from a houseboat.
>
> April 7th: 103 tons of rubbish removed to date ...
> By the 7th of April, workers had removed approximately 103 tons of
> rubbish from the home, with twenty-two tons having been removed on that
> day alone. Among the more interesting items found at that point were
> five violins that were to be sent for appraisal. It was estimated by
> the supervising detectives that it would take another week to ten days
> to clear out the structure.
>
> Down at the Missing Persons Bureau, Detective Charles Meyers offered
> the theory that "Everything points to Langley being dead in the
> building." He added that the results of an autopsy on Homer indicated
> that there had been no food or liquid in the invalid's stomach.
> Detective Meyers concluded that, "Homer died for lack of care." It
> simply did not add up that Langley would have allowed his brother to
> die unattended, or simply not show up at his funeral.

>
> April 8th: Langley's body finally discovered...
> It would ultimately turn out that Detective Meyers was correct, as on
> April the 8th, Langley's body was finally discovered, pinned by one of
> his own booby-traps in that same room on the second floor where Homer's
> body was previously found.
>
> The work of clearing the house that day had proceeded as usual, with
> workers from the public administrator's office and police working their
> way through the second floor. By 3:30 that afternoon, about seventeen
> tons of material had been removed and loaded onto Department of
> Sanitation trucks. Shortly afterwards, a detective, Joseph Whitmore
> emerged from the building and asked reporters waiting on the scene to
> follow him. He led them to a corner drugstore. Placing a call to his
> headquarters, he reported, "We've got him." He went on to explain that
> he, and detective John Loughery, had located Langley's body. Loughery
> added, "We were scraping around in the rubbish when we saw a foot
> sticking out."
>
> Within an hour, as word spread of the discovery of the body, a crowd of
> around 500 locals who had gathered to watch the day's work at the
> house, swelled to over 2,000.
>
> Police higher-ups, including Commissioner Arthur W. Wallander, soon
> arrived on the scene. The commissioner commended detectives Whitmore
> and Loughery for their work in the investigation. Thomas A. Gonzales,
> the medical examiner, spent a half hour examining the corpse. He
> estimated that Langley had been dead at least two weeks, and possibly
> as long as four, and that the cause of death was either starvation or
> suffocation.
>
> Langley died, trapped in debris...
> Langley's body lay on its right side, inside one of the two-foot-wide
> tunnels that was part of the maze he had created, his head turned
> toward the area where his brother's cot had been, only eight feet away.
> The room, itself was filled with piles of newspapers, books, old
> furniture and tin cans. The materials that had apparently trapped
> Langley were a suitcase, three metal bread boxes, and bundles of
> newspapers. One particularly unpleasant detail was that the numerous
> rats that infested the house had gnawed at his partially decomposed
> body.
>
> Jacob Iglitzen, who also happened to be the druggist from whose store
> the phone call had been placed, subsequently identified the body. He
> stated that he was able to recognize Langley's face, although it was
> somewhat decomposed. He also identified Langley's clothes. Overall, the
> evidence appeared to indicate that Langley had been killed by falling
> debris, and that his invalid brother, Homer, died from dehydration and
> malnutrition.
>

> Attorney McMullen, told the press that he planned to confer the next
> day with Joseph A. Cox, an attorney for the city's public
> administrator, concerning the handling of the brother's assets, which
> were now estimated to be in the range of $100,000 distributed among
> various bank accounts and real-estate holdings. This finally laid to
> rest the popular notion that the brothers were multimillionaires.
>
> Langley had died a month before his brother...
> The next day, on April 10th, the medical examiner concluded that
> Langley Collyer had been smothered by the debris, which had collapsed
> upon him, and had been dead for at least a month before his brother,
> Homer. A funeral was held the next day on the 11th at Cypress Hills
> Cemetery in Brooklyn. The Reverend Dr. Charles T. Bridgeman, the
> assistant pastor of Trinity Church presided. There were forty persons
> in attendance, including many cousins. The saga of Langley Collyer was
> not quite finished, however.
>
> A month later, the Commissioner of Housing and Buildings, Robert F.
> Wagner, Jr., announced that the house at 2078 Fifth Avenue still
> contained substantial filth and garbage, and that it remained "a
> distinct menace to health." He requested that the public administrator
> in charge of the brother's estate, Francis J. Mulligan, clear out the
> building, in order that the property could be surveyed. Findings would
> then be sent to the state Supreme Court so that the city could receive
> permission to demolish the building. On June 30th, Supreme Court
> Justice J. Edward Lumbard signed the order for demolition.
>
> Collyer home to be demolished...
> An inspector from the Department of Housing and Buildings had noted
> that the "roof beams were water soaked, rotted, and defective," and
> that all the floors throughout the entire building are sagging and
> defective." The city would next seek bids on the demolition of the
> building, and sometime after, the Collyer mansion was no more.
>
> ...and the property finally auctioned.
> As a final chapter, the lot at the corner of 128th Street was publicly
> auctioned on March 1, 1951.
>
> Unfortunately, Langley Collyer lived in an era when problems such as
> compulsive hoarding were regarded as eccentricities, something to be
> laughed at or ridiculed. Assuming that even had he been able to come to
> grips with the fact that he had a serious problem, there is little that

That was quite the visual story alrighty. As I read it I could "see" these two old guys in their brownstone. Wow. But the conclusion is correct; telling a hoarder to "clean it up" or doing it for them when they aren't there doesn't help. Thanks for sharing :)

Are any of your aluminum plates 1/4" thick and big enough to cut 18"
triangles out of? I need some, and McMaster-Carr wants over $100 for
a piece of plate big enough for two. As I'd like six or eight, their
price is prohibitive. I might be interested in your pulleys, too,
depending on the size and configuration.

In other news, my late neighbor was apparently hoarding staircase
spindles--his survivors gave me about 500 this past weekend, about
430 of them the same size. They're overhead in the garage, now,
awaiting a project.

Count me in. And proud of it I might add.

I've always had an interest in electronics, even at a tender age.
Not having much money to spend to build stuff, I had to
cruise the neighborhood on trash day looking for discarded
TV's and radios that I could use for parts. A couple of friends
got into the act as well. This was a fun way to support a fun,
and ultimately very profitable hobby.

Fast forward 40+ years, and I still have the stash of tubes I
accumulated as a kid (and added to over the years). If I come
across something that might be useful for free or cheap, I'll
bag it and figure out where to put it later on. Picked up an
old TV chassis a couple of weeks ago. Its an Admiral that
was built in 1951. The owner wanted to keep the case to
use in a high school play. A couple of hours of tinkering,
and I got it working. Watched the football playoffs last
weekend on a 17" black and white TV. The games were
good, but watching them on an old TV I saved from the
landfill, then repaired myself was a blast. Kept the shop
nice and warm too!

I suppose anything can be taken to exteremes, but its a fine
line. One persons trash is most certainly anothers treasure.

No, they are little square 5x5 plates, about 1/8" thick.

I do, however, have 3/8" about 8x14 plate and 1/2" 8x13 or so. Also
aluminum.

Also I have big Al heatsinks, with which I can part very cheaply.

IIRC, I have one about 5" pulley with 1 3/8" shaft hole with keyway
and special tightening screws. I have more, but those I may need.

Any way to weld them together? I don't mind going thicker, I need these
for decking in my antenna tower. I see a new rotator and thrust bearing
in my future.

>Also I have big Al heatsinks, with which I can part very cheaply.

Regrettably, I don't need any at the moment.

>scary stuff.

I have no idea what they were intended for. I'm checking with some of
my friends who do woodworking and home fixup projects who might be
interested in some of them. Stacking two of the 36" size (the 430 items)
would be a good height for a childrens' play gazebo or something of that
sort. Maybe build up sets of three for table legs, but they'd need to be
cut down a bit.

Othewise, they were headed for the curb and didn't cost me anything.

It occurs in varying degrees. I've always seen scrounging of
electronic goodies as more of a 'flow-thru' than a one-way path to my
lab. Much stuff, of course, does end up on a one-way path to my
workbench, but it's stuff that I constantly use (tools,
soldering/desoldering gear, test gear, etc.)

The trick is learning what to shed, and when and how to shed it.
Ham radio swap meets and Ebay are good paths.

Keep the peace(es).

I have seen this problem.

it is completely over come by Ockleshaw's workshop principle.
Ockleshaw being the possesor of the most amazing workshop.

"if it looks useful it isnt.turf it out.

if it looks *really* useful keep it for a month.
if you havent touched it in that month turf it out.

If something is actually useful but hasnt been used in a year turf it
out.

that way you will have a workshop full of only the gear that you
actually need"

...of course ockleshaw had a second shed :-)

Sounds good Fred and thanks for the input. I've gone ahead and ordered the battery from Icom in Bellevue, for that and the other to bands (1 and .7meters) since they are over 5-7 years old. Cheap to try at 7 bucks a battery. I'll really like the IC-x8 series. Even though they only have three PL tones on the memory they work well in high RF areas and simple to operate. I wish I could say the same for my VX5R. You have to become a damn computer whizz just to do anything on it. On the positve side it is easy to program with the RSS. I just like being able to make a change on the fly, working on several club's repeaters and links in the area. Also the Tx audio is great, if you take out that stupid "rubber".

i'm fairly new to the world of CB radios. my friend has one and got me interested, and i also liked the fact that i can get a PA system through one. i'll jsut throw it out there, what are some suggestions for a CB radio? i want one with PA capabilities. i also was wondering if yall had any speaker ideas, i know you need amps for some and i didnt know what kind of wattage requires an amp? i'm also interested in getting a police scanner, is it posible to get a combo or do you have to buy them separatly? Do i need any special kind of antena or a license to use a CB radio?

Any suggestions and help would be awesome!

Thanks

Well then you need to find the newsgroup that is about CB radio.

This isn't, it's about amateur radio equipment.

Something like rec.radio.cb is the place for you to be asking
your questions.

Amateur radio and CB are not the same thing.

Michael

Its interesting that when true hoarders collect things that are actually valuable, they usually manage to make them worthless by the time somebody else gets em.

There was guy down near Centralia Washington that collected cars- at his peak, he had something like 2000 of em. He was sure every one was "valuable" and would never sell. And as they sat, they rotted, tires grew thru the hoods, paint and chrome peeled, engines rusted solid, and when he finally died, and the family had to dispose of them, virtually none of them were worth anything, even as parts.

I have seen this same thing happen with tool collectors- the old guys are so sure that the stuff is worth a fortune, they routinely chase away people who would actually reuse, restore, or understand their tools, and want to pay reasonable prices for them- and so, in the end, it all becomes scrap.

There was a famous junkyard in Richmond Virginia, where the old guy saved Steam Railroad engines, and other huge machines. He never would sell, convinced he was sitting on a gold mine. Well, when he died, the relatives found he was- and it was the real estate. The land itself was worth a lot, the scrap metal on it was just that- scrap metal. A foundation was set up to save the oldest engines, and the relatives gave them away for free- and if it had happened 20 or 30 years earlier, there would have been a lot more to save- age, weather, and vandals had taken a severe toll. While alive, he cagily quoted prices of a hundred thousand dollars for a steam engine, and when he died, they were free for the hauling. Assuming you could afford to haul something that was 80 feet long and weighed 20 tons.

Not to pick on you personally, but that is exactly the thinking that can lie behind hoarding things excessively. And the thing about it is, it is TRUE. You might very well MIGHT find a perfect use for that item later on.

The problem is when the thinking ends there. For it to be the best decision to hold on to something, the fact that it might be useful is, by itself, not enough. There are positives of keeping it, but there are negatives too, and the positives need to outweigh the negatives. One possible negative is reducing the amount of space you have for other things, making it harder to walk around, harder to work, and harder to find the stuff that truly is useful among the sea of stuff. Another negative is if you wind up paying extra money to rent a storage space. In a lot of cases, you could re-buy every single item in a rented storage space for less than the $75/month rental fees multiplied by however many years you keep it. It just doesn't make sense to store $1000 worth of furniture in a $75/month storage space for 2 years. And of course, there are other negatives of storing things, too, like having to look at clutter, the extra time out of your life it takes to deal with all of it, and so on.

Don't you mean, they are awaiting your survivors to give them to
someone else? LOL

Although I shouldn't talk.. I got a great deal on some Oak 2 x 2 at
habitat.. 25 cents each for pieces
4 feet long.. too good to pass up, so of course I had to buy all of
them (about 40).. Haven't figured out a use
for them yet, although I convince myself that I will eventually LOL.

A gallon of glue, some clamps, some time, and you have enough material
for a small table for a bedroom, hallway, etc.

Of course, now you are going to need a table lamp for it<G>.

Oh lets not go there. I am get scared walking into the Habitat shops.
Thank God I don't have a bigger Truck or I would buy them out of wood
at times.

Picture of the pulley is here:

http://igor.chudov.com/tmp/pulley.jpg

It has two grooves for V belts, 1 3/8" hole with keyway, and special
threaded holes that are called TAPER LOCK. The holes are 3/8" NC
threaded, I think, I found some bolt that looks like 3/8" and it fit
the threads. It came off a 7.5 HP three phase motor from which I cut off
its shaft a while ago. It has some rust on it, but not much.

That's a pretty good idea.. I may do that when I get some time..LOL.
Too big of a backload of projects now. I turned down a pretty good deal
on about 150 board feet
of Mahagony.. because I know it would sit in the shop for a few years
before I figured out what to make with it.
I guess I'm on the road to recovery.

140. MI5 Persecution: Dirk Gently on the Toronto Case (107)

Newsgroup: rec.radio.amateur.equipment
Date: 2007-01-18 22:08:08 UTC
From: MI5Victim@mi5.gov.uk

Dirk was on the West Coast when he got the call. An old friend at the Toronto police department thought he would like to fly up and take a look at a homicide which had occurred the previous evening. He decided to skip the last day at the World Holistics conference and take the next plane out of San Francisco.

The flight was bad; Dirk had been hit on the back of the head by the Newspaper trolley, the drinks trolley, the dinner trolley and now the gift trolley. When the hostesses weren't trying to tear his arm off they pestered him to stop leaning into the aisle - ignoring the fact that the guy next to him was taking up one and a half seats. Air Canada used to be the flight which was so good you just didn't wanna get off - on this occasion Dirk would be glad to see the back of the plane and the over sized alternative comedian wedged into the window seat.

After breathing in a couple of lungfulls of crisp Canadian air Dirk took a taxi into town. There was a small group of demonstrators outside the MacDonalds and the taxi driver insisted on stopping on the opposite side of the street. "Don't Eat Meat" the placards read and the demonstrators chanted. A couple of policemen where stopping the crowd entering the restaurant itself - one held up his arm and challenged Dirk. A wave of the fax he had been sent and the policeman pushed open the door.

There were few customers in the restaurant. Not surprising really with a demonstration going on outside, half the dining area roped off with tape and a dead body seated at one of the tables. "Mr Gently sir" the officer in charge called out as he peeled one end of the tape off a column "We were told not to touch anything til" you got here".

The body of the man slumped awkwardly in a chair. Then even a dead body would start getting uncomfortable in a MacDonalds chair after twenty minutes - and this one had been there for at least eighteen hours. Two back legs and the tail of a cat hung out of the man's gaping mouth. Dirk turned to the officer, "I suppose you are going to tell me this is the darndest thing you ever saw?"

�Ain�t this the darnd...�. The officer seemed annoyed that Dirk had second guessed him. �We�re removing the body in a few minutes, so if you can get through as quick as possible�

�Many people eat cats in fast food restaurants?� Dirk asked and without waiting for an answer leant over the table to pick up an untouched burger. �And what�s this?� he asked waving it in front of the officers face.

�It�s a Vedgie Burger� The waitress, who was cleaning one of the adjacent tables, shouted across. She walked over to Dirk. �We started doing them because of that lot out there� she nodded towards the protesters who were pressing there faces against the windows �They�re called Linda McCartney Vedgie burgers - ever heard of them?�

Dirk suddenly felt faint, perhaps a combination of hunger and jet lag. �This is deja vu all over again� he thought to himself. He glanced at policemen - at the badge on his shoulder �OPD� but this wasn�t Ontario this was Toronto. OPD - Officially Pronounced Dead. It dawned on Dirk what was happening, he knew what he would see if he looked out of the window. Sure enough, there it was, the Volkswagen Beetle parked across the road - number plate 28IF - 28 IF Paul McCartney had lived. And amongst the lyrics of the song blaring out into the restaurant he could pick out the words �I buried Paul�. Now it was though Dirk was viewing the whole scene though a TV screen. This was conspiracy. Not -a- conspiracy, or -the- conspiracy, but just plain conspiracy.

�You look faint - are you OK mister? The waitress asked.

Dirk shook his head �Probably a bit hungry� Then to economise on dialogue took out a pack of cigarettes and held it out towards the girl. She was about to take one but Dirk snatched the pack away, held it up to his mouth and drew out two cigarettes. He lit both then passed one of them to the girl. It was the closest he had come to a sexual encounter in three months.

�Want a Burger?� the waitress asked.

Dirk looked down at the Vedgie Burger on the table. �No thanks - just a plate of fries�

The waitress walked away and Dirk looked around the room. Apart from a family seated in the far corner there was only one other person in the restaurant - and he wasn�t eating. The guy was about mid twenties and had straggling, shoulder length hair. On the table in front of him were lots of pieces of paper cut into squares. Every so often he would pick up a camcorder and pan it around the room and then, when he was finished, speak into a microphone which was attached to a

tape recorder. Dirk walked over to where the man was sitting.

The small pieces of paper had paragraphs of text written on them and were stuck to the top of table with blobs of mustard. Lines had been drawn, some solid some dotted, on the table top with a marker pen. The lines ran from one piece of paper to another.

“What are the lines for?” Dirk asked, realising straight away that “What the hell are you doing?” would be more appropriate.

“You see” The man replied nervously “The dotted lines are weak links and the solid lines are strong links. The dotted lines are things which are happening in the rest of the world and the solid lines are things which are happening to me. Now you see I draw over a dotted line, replacing it with a solid line, when I can link something back to me. Like this” The pen squeaked over the Formica and before Dirk could interrupt the man added. “You see I lost my short term memory and, as a consequence have a very short attention span. I write down, record and film everything then put it all together later”

“So” Dirk interrupted. “You filmed what happened here?”

“Yes, yes, it’s here on this tape” The man pushed the cassette across the table. On the label the words “Grassy Knoll” had been crossed through and replaced with “MacDonalds”.

Suddenly the man sprung from his seat. Dirk turned and saw that the body was being removed on a stretcher. As it passed the man picked a small object off the edge of the stretcher itself. “This is important” he said, laying a blood stained bullet on one of the small pieces of paper on the table.

Suddenly the room was filled with a deafening throbbing sound as a Black Helicopter landed in the street outside. Two men in United Nations uniforms got out and collected the stretcher. Back at the table the long haired man was replacing all the dotted lines with solid ones. Dirk panicked and began to walk backwards at some speed. Barging through the swing doors he stumbled into the kitchen, tripped and felt himself sink slowly into a large vat.

“The guys fallen into the batter” Dick heard someone shout before he sunk below the surface. He came to sitting in a chair with the batter solidifying all over his body. He surveyed the room through two eye-holes someone had cut. Suddenly the chair on which he was sitting was picked up carried through the restaurant and out of the building. As the chair was being lifted and put into the back of a van, Dirk caught a glimpse of the waitress following him. “Your fries mister, your

plate o...�.

The doors of the van shut and Dirk tried desperately to steady himself as it sped across town. Eventually the doors flew open and Dirk was flung into the road at which point the solidified batter shattered and set him free. Standing up he found himself outside the international departures terminal of Toronto airport.

In the departure lounge Dirk had time to reflect on the day�s events. He had got caught up in the conspiracy theories and the haphazard welding together of pieces of irrelevant information. It was time to catch the person who was operating the bizarre cognitive engine which appeared in front of him like a fairground mirror, distorting any flaw it could find in his own, fragile, map of the real world.

Dirk leant into the aisle of the plane as it took off for London. The oversized person next to him swung his arms violently as he complained about every thing from the supper in a plastic tray to the state of British politics. With a shaven head and a badly fitting suit the man looked as though he could have worked behind the reception desk of the Kremlin. However when he spoke he did so in a Liverpudlian accent. �Me I blame the Con-serv-a-tive government, me. The Tour-rees. That-cher. Me. They need a good kicking� He jerked his feet forward and struck the seat in front with his Doc Martins. �With these. Me Doc Martins. Doctor Martin�s, Doctor Martin�s, Doctor Martin�s Booots!� The phrase was now being sung over and over again as the man writhed in his seat and clicked his fingers.

Dirk looked down at the boots and thought of the reaction most people used to deal with the paranoids at the end of the wire. A nice quick kick. �Oi nutter - get some therapy�. This is the easy way out and perhaps the safest. After all there you are sat, alone, in front of the screen. No body language between you some paranoid. No way of telling if he really is some gibbering psycho. Look at it too long and you be drawn in. Fall into the tangled database of weird links with him. Who knows he may be watching you, reassembling and linking your experiences with his. How sure are you of you own cognitive threads. After all cognition is only a bug fix for a neurological system which was designed in a hurry - it�s abused by everyone from politicians to advertisers. If people really can convince each other that a bottle of washing up liquid is as exciting as an orgasm using just television God knows what they can do with a computer. Better to avoid the risk. A swift kick. After all if you�re Homophobic you put the boot in because you are scared of any ambiguity in your own sexuality

- why not be Nutterphobic as well.

Although Dirk would have liked to devoted time to tracking the culprit down he decided to let it rest. The Internet changed over the next twenty odd years. A lot of the people who used it went out and got lives. And those who already had lives burnt them away. The number of users had dwindled after someone had invented a C++ program, with truth as a variable, to deal handle politics and government. Dirk had already retired from finding old ladies cats with the help of obscure science when he got another call from Toronto.

It was 4th March 2025 when he booked onto the Air Canada flight from Heathrow. The silver haired woman in the seat next to him painted bright red lipstick around her mouth. "Of course it was no surprise to be offered the job after Claire Raynor retired" she sneered" After all I used to be a psychiatric nurse... Now if Blokes had periods they would understand..."

By chance the taxi ride to Toronto mental hospital took him past the MacDonalds - where the whole thing had started. Of course it was barely recognisable having become a Church Of Scientology Vedgie Bar. Police in riot gear kept the two sets of demonstrators apart. Dirk didn"t really know what to expect when he got to the hospital. The girl at the reception desk directed him to a row of chairs in a wide well lit corridor. There was a strong smell of disinfectant, the furniture and the carpets were immaculately clean and behind the rows of teak veneer doors the "nutters" were all safely locked away. For some reason Dirk started thinking about CompuServe forums.

A tall blond woman in a white coat approached. "Mr Gentle, I assume"

"Yes" Dirk replied shaking her by the hand. "You"re the nurse who..."

"Doctor" She interrupted, "Doctor Killfile" She led Dirk across the corridor towards one of the doors then stopped with her hand resting on the handle. "Now you know about this person don"t you?" and after Dirk nodded she continued "Don"t tell him anything about yourself - don"t let him get into you head. If he does he"ll screw it up"

The door opened to reveal a frail man sitting in from of a TV screen. He had a keyboard on his lap and next to the television was a computer screen. Dirk glanced at the walls of the room and remembered that his settee at home need upholstering. The nurse left the room and the man looked up "So you come to my daughters wedding and ask me to kill a man" he said in

a dry cackling voice. ‘Look’ he continued, pointing at the screen, ‘I know that man. They’re talking about me now - listen’. The man stared at Dirk. ‘What’s your name? Are you one of my friends from the Internet? - Are the lambs still screaming Dirk?’

Dirk, at first recoiled in horror, then felt a sense of anti climax. So this is what they hyped up to superstar status on the back of their own fears of madness. Dirk was reminded of the film ‘A day on The Beach’ where a submarine had set off to search a post nuclear World to track down a signal coming from a remote military base - only to find it was being sent by a Coke bottle half balanced on a Morse tapper. Outside the room the nurse waited for him. Because his nicotine craving had returned - and to avoid an awkward piece of dialogue - Dirk turned to her and asked . ‘Patch?’

Dirk took two nicotine patches from his wallet the first of which he stuck onto the inside of his arm. Stepping closer to Doctor Killfile he opened her white coat and slid his hand into the opening at the front of her dress. He pressed the patch onto her leg as close to the top of her inner thigh as he dare. She took a deep breath and then slowly breathed out. ‘What Bogart could have done with these things’ Dirk thought to himself.

‘Is he crazy?’ Dirk asked tilting his head back to towards the door.

‘Who knows’ Doctor Killfile replied ‘We let him type away. He sees something on the TV in the morning and it keeps him busy all day. What he types doesn’t go anywhere it just stays on a mainframe in the basement. It can be read by anyone else in the building but that’s it. We got them all in here conspiracy theorists, racists, nationalists. They’ve created a world within a world really...’ Her voice trailed away and she stared down the corridor for a while then added ‘So long are two things are different neither will come to be in the other and so become at once both one and two.’

Dirk gave her a puzzled look ‘You mean their brains are fried?’

‘Fried?’ Killfile smiled at Dirk ‘No that was Plato’. Then the smile fell from her face. ‘You must remember, mister, plate o...’

Mike Corley FAQ
version 0.1
first edition 5th May 1996
last updated 5th May 1996
Iain L M Hotchkies iain@XXXXX.demon.co.uk

Mike Corley is a 'net personality' who has been active on the following newsgroups (uk.misc,uk.legal,uk.politics,uk.media,soc.culture.british) since....? Well, at least as far back as the summer of 1995.

He posts long tracts, the tone of which approximates that which one might expect from a reasonably intelligent paranoid schizophrenic.

No details are known of Mike's 'real' personal life or background. Once would presume that he came from a reasonable family and was reasonably well educated before the first symptoms of schizophrenia began.

Schizophrenia: Clinical features
(from the Oxford Textbook of Psychiatry, 2nd Edition)

The acute syndrome

Some of the main clinical features are illustrated by a short description of a patient. A previously healthy 20-year-old male student had been behaving in an increasingly odd way. At times he appeared angry and told his friends that he was being persecuted; at other times he was seen to be laughing to himself for no apparent reason. For several months he had seemed increasingly preoccupied with his own thoughts. His academic work had deteriorated. When interviewed, he was restless and awkward. He described hearing voices commenting on his actions and abusing him. He said he believed that the police had conspired with his university teachers to harm his brain with poisonous gases and take away his thoughts. He also believed that other people could read his thoughts.

This case history illustrates the following common features of acute schizophrenia: prominent persecutory ideas with accompanying hallucinations; gradual social withdrawal and impaired performance

at work; and the odd idea that other people can read one's thoughts.

In appearance and behaviour some patients with acute schizophrenia are entirely normal. Others seem awkward in their social behaviour, preoccupied and withdrawn, or otherwise odd. Some patients smile or laugh without obvious reason. Some appear to be constantly perplexed. Some are restless and noisy, or show sudden and unexpected changes of behaviour. Others retire from company, spending a long time in their rooms, perhaps lying immobile on the bed apparently preoccupied in thought.

The speech often reflects an underlying thought disorder. In the early stages, there is vagueness in the patient's talk that makes it difficult to grasp his meaning. Some patients have difficulty in dealing with abstract ideas (a phenomenon called concrete thinking). Other patients become preoccupied with vague pseudoscientific or mystical ideas.

When the disturbance is more severe two characteristic kinds of abnormality may occur. Disorders of the stream of thought include pressure of thought, poverty of thought, and thought blocking. Thought withdrawal (the conviction that one's thoughts have been taken away) is sometimes classified as a disorder of the stream of thought, but it is more usefully considered as a form of delusion.

Loosening of association denotes a lack of connection between ideas. This may be detected in illogical thinking (knight's move) or talking past the point (Vorbeireden). In the severest form of loosening the structure and coherence of thinking is lost, so that utterances are jumbled (word salad or verbigeration). Some patients use ordinary words in unusual ways (paraphrasias or metonyms), and a few coin new words (neologisms).

Abnormalities of mood are common, and of three main kinds. First, there may be sustained abnormalities of mood such as anxiety, depression, irritability, or euphoria. Secondly, there may be blunting of affect, sometimes known as flattening of affect. Essentially this is sustained emotional indifference or diminution of emotional response. Thirdly, there is incongruity of affect. Here the emotion is not necessarily diminished, but it is not in keeping with the mood that would ordinarily be expected. For example, a patient may laugh when told about a bereavement. This third abnormality is often said to be highly characteristic of schizophrenia, but different interviewers often disagree about its presence.

Auditory hallucinations are among the most frequent symptoms. They may take the form of noises, music, single words, brief phrases, or whole conversations. They may be unobtrusive or so severe as to cause great distress. Some voices seem to give commands to the patient. Some patients hear their own thoughts apparently spoken out loud either as they think them (Gedankenlautwerden) or immediately

afterwards (echo de la pensee). Some voices seem to discuss the patient in the third person. Others comment on his actions. As described later, these last three symptoms have particular diagnostic value.

Visual hallucinations are less frequent and usually occur with other kinds of hallucination. Tactile, olfactory, gustatory, and somatic hallucinations are reported by some patients; they are often interpreted in a delusional way, for example hallucinatory sensations in the lower abdomen are attributed to unwanted sexual interference by a persecutor.

Delusions are characteristic. Primary delusions are infrequent, and difficult to identify with certainty. Delusions may originate against a background of so-called primary delusional mood - Wahnstimmung. Persecutory delusions are common, but not specific to schizophrenia. Less common but of greater diagnostic value are delusions of reference and of control, and delusions about the possession of thought. The latter are delusions that thoughts are being inserted into or withdrawn from one's mind, or broadcast to other people.

In acute schizophrenia orientation is normal. Impairment of attention and concentration is common, and may produce apparent difficulties in remembering, though memory is not impaired. So-called experiences result from illness, but usually ascribe them to the malevolent actions of other people. This lack of insight is often accompanied by unwillingness to accept treatment.

Schizophrenic patients do not necessarily experience all these symptoms. The clinical picture is variable, as described later in this chapter. The table below lists the most frequent symptoms found in one large survey.

The most frequent symptoms of acute schizophrenia (World Health Organization 1973)

Symptom Frequency (%)

Lack of insight 97
Auditory hallucinations 74
Ideas of reference 70
Suspiciousness 66
Flatness of affect 66
Voices speaking to the patient 65
Delusional mood 64
Delusions of persecution 64
Thought alienation 52
Thoughts spoken aloud 50

Various theories exist about Mike Corley:

1) he exists and is disturbed and has net access and for reasons uncertain spams a selected number of newsgroups on a regular basis - if you are reading this FAQ then you will almost certainly have seen one of his posts.

2) Mike Corley is a 'virtual schizophrenic'. Mike displays the relevant features so well that some people think he may be a construction of one or more people with intimate knowledge of mental illness and the mentally ill. Perhaps they wish to monitor the effects on the internet of the posts of a schizophrenic. Moving into X-Files territory a bit, ourselves, here.

Mike's posts attract different responses:

1) cruel, humourous, dismissive posts from those who've seen his posts many times and have become generally irritated by his behaviour while accepting that he probably has a mental illness.

2) posts from Corley-newbies - those who have come across relateviely few of Mike's posts. These may be humorouous or disbelieving.

3) posts from people who have been sucked in (for one reason or another) into Mike's Wild & Wacky World (TM)

That's enough for now.

142. MI5 Persecution: Website Index (1908)

Newsgroup: rec.radio.amateur.equipment
Date: 2007-01-18 23:42:52 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07001900371565@4ax.com>
Source record: 5862
Cross-posted to:
alt.internet.search-engines,microsoft.public.windows.vista.mail,alt.airports.uk.edinburgh,rec.radio.amateur.equipment,alt.sex.boys

Persecuted by the Security Service

Since June 1990 the British security service MI5 has waged a campaign of harassment against a UK citizen,
through the broadcast and print media, verbal abuse at work, and molestation in public and during travel.

Despite widespread knowledge of the campaign in the UK and discussion of its characteristics on Usenet for
over three years, it continues today both in Britain and North America. Its cause and basis is xenophobia
on the basis of the genetic accident of mental illness, coupled with discrimination against an inferior
"foreigner" whom they condemn as "not up to British Standards".

If this is your first visit to this site, please read the FAQ first. Feel free to contact the author with
any questions.

Frequently Asked Questions article outlines the parameters of the persecution. Who is involved, and why?
What technical and social means do they employ? What response have I made, and why has their campaign yet
to be exposed?

The UK Security Services which are believed to be behind it all. Domestic security is the province of MI5
while the secret intelligence service MI6 combats foes (and its former employees) on foreign shores.

Usenet archive chronicling the (sometimes very enthusiastic) exchanges which have taken place on UK-local
newsgroups since May 1995. Make your mark on the continuing discussion!

Believe it or not, a few items of evidence have been recorded. Although none of them is particularly
conclusive, by presenting them I hope to explain what I understand from some television and radio programmes.
Most of the "clinching" material was aired in 1990-92, and no recordings exist now, which is quite unfortunate.

My complaints to the BBC and MI5 (via the Security Service Tribunal and Interception of Communications Tribunal),
and their response to my challenges, are recorded here. Basically they deny everything, they have put their

denials (mostly - Buerk and Lewis refused) in writing, and I don't believe them. Part of the website also
documents media coverage of my campaign to expose the persecution.

Faxed articles to, and responses from British organisations including Parliament and UK media. Over 24,259 faxes
in all were sent from 1998 to 2000. Their aim was to boot discussion of the persecution into the public domain,
and that aim was not accomplished.

20,000 Reward Offered to Expose the Conspiracy

I am making a pledge for information directly leading to the exposing of the "BBC Newscaster
Conspiracy". The exposing would specifically need to lead to a legally binding admission from Martyn Lewis
or Michael Buerk of the BBC they they were watching me through the TV set.

I would be happy (delighted, in fact) to pay GBP 20,000 sterling in reward for the above admission.

Now, whatever you might think about the content, this is a very well designed and presented web page (if you use Netscape to look at it anyway - Mosaic couldn't handle it).

This is my article, not my employer's, with my opinions and my disclaimer!

This weekend is the annual St. Joseph, MO. hamfest!
It is just north of K.C. on I-29 at exit # 47 at the Holiday Inn.
The event starts around 8 am saturday (around 6am for flea market set up).
It is a wonderful show that is growing better each year so load up all your
gear and come sell it this saturday.
There will be all kinds of vendors selling new radios, antennas, and all
kinds of ham radio products.
See your there!

No you won't "see me there!". Ham fests are the biggest collection of inbred white trash with the possible exception of any NASCAR event.No doubt you will draw a crowd though. The moonshine and oppossum with viddles vendors will show in force. As will the flea marketeers with their Jerry Springer, Hee Haw and WWF tapes, confederate flags and (ooooh pinch me I must be dreaming!) velvet Elvis artworks!

If any of you haven't attended one of these beauty pagents I would recommend you do so at least once (which is plenty enough for one lifetime) just for the entertainment value found in observing the crowd. Watching the double digit IQ rednecks mill about with their "better halfs" trailing two steps behind them is truly a sight to behold. When you think you've seen the fattest and ugliest of the herd another fat disgusting foul smelling slob will meander on by. Hilarious.

So what you're saying is you're upset that the men aren't physically
attractive at this hamfest? Wow. Now we know about you.

Try paying more attention to the programs they have to offer and the
educational experience you may get out of this. Oh, wrong person,
nevermind, LOL.

As an astronomy educator with a degree in physics and an interest in ham radio, I resent this wildly inaccurate and narrow minded view of the kind of folks who attend hamfests.

It would be all too easy to sling epithets at this fellow who signs his name as "asswideshut" but I think his own words speak volumes about his character... or complete lack thereof.

Who am I?

159. FT-1000D internal coax plug

Newsgroup: rec.radio.amateur.equipment
Date: 2007-01-20 05:08:23 UTC
From: ka9s3@comcast.net
Message-ID: <1169269703.441226.143100@l53g2000cwa.googlegroups.com>
Source record: 5879
Cross-posted to: rec.radio.amateur.homebrew,rec.radio.amateur.equipment

I want to make a modification to my FT-1000D that involves bringing the QSK switched receive coax lead to the back panel (adding a RCA phono jack). I want to unplug the inter-board coax cable that runs from J7208 (on the LPF unit) to J1005 (on the RF unit) and leave the original coax in place. I want to make my own cable that runs from J7208 to the new RCA jack on the back panel. I could just cut the original coax and use it, but I want the option to back out of this modification if I don't like it.

I have coax cable I can use. I need the tiny coax plug that goes on the end of the cable. The plug is a crimp-on style and very small. It is keyed and only fits into the circuit board jack in one orientation. The circuit board jack (which I don't need) sticks up off of the board at a 45-degree angle.

I thought I would just order a spare cable from YAESU and use it for my modification. I contacted YAESU. They don't have a part number for the cable. They would have to build one from scratch at the factory in Japan and were unwilling to do this.

I have been searching catalogs but not finding the plug I need to be compatible with the jack on the LPF board.

Does anyone know what type of connectors these are and where I can get some?

Thanks - Jeff - KA9S

Although I have not seen the plug, it sounds similar to what Ten Tec used in
the Omni VI series and probably others. Ten Tec is very helpful, you might
give them a call.

And, when I see the outrageous prices being developed on the auction
websites (eg. eBay), I'm very happy to go to hamfests, look at real
equipment (up close), ask questions, and I'm happy to dicker over price to
mutual satisfaction and without having to go back multiple times to eBay
to worry, sweat out the bidding, and maybe end up with a rustbucket PoC,
that works less well than advertised (if you get anything more than "The
lights come on when you turn the switch").

You have a problem with people? You're probably seeing a lot better
example of real human life than if you traveled most of the world (eg.
India, China, 3rd world) and see what poverty, starvation, and disease is
all about. I have rarely been offended by anyone at a hamfest.

I made it over. I had a nice shopping list, but only found two of the items I was looking for. :(I didn't win anything either which is par for the course.

Otherwise, it was nice catching up on a lot of friends I know. I even made it home before the snow got too deep.

I'll be back next year.

I quit attending the winter St. Joseph hamfest quite a few years ago. The parking around the Ramada (not Holiday Inn, dude...) is horrible and tables are poorly laid out in the atrium area around the indoor pool. Always seems to have lots of ice and snow piled on the parking lot.

One nice thing is you can "sneak" into this hamfest through most of the hotel entrances and bypass the admission table like everyone else does. Kind of makes up for the shitty parking...

The problem with such devices in practice is that they are not very
directional, and the power source they require to even get close to
doing as you describe makes them impractical for mobile use without one
mother of a power generator.

A full-sized RV might be able to mount such a device (called a
HERF, or High-Energy Radio Frequency emitter) in a concealed manner, but
I don't see any way a passenger car can do so with our current level of
technology.

As to the non-directionality: A blast of RF powerful enough to blow
out the stereo system in the car you're aiming at would also be powerful
enough to blow the engine-control computer in your own vehicle, and that
of other vehicles around you. This would cause more than a few cars to
come to a sudden halt, including your own, and you could suddenly find
yourself in the middle of a multi-car pileup.

Would you care to find yourself paying for several blown-out engine
computers when the police investigating the crash find HERF equipment in
your car, assuming you could find a way to power it? Not to mention
explaining yourself to a whole flock of no-doubt pissed-off drivers?

Speaking as someone who works for our state's highway patrol, I
suggest that a more constructive (and far less risky) method for dealing
with your audio pest would be to simply note the license number of the
vehicle involved, and file a complaint with your local police.

With that said: You are not alone. I've often wished for a way to
safely and effectively disable a "Thumpmobile" without causing unwanted
side effects. ;-)

Keep the peace(es).

ï¿½ Up to 5 Frequency Markers selectable
ï¿½ Long-term stability of 1 x 10 exp-9/day

HP 35660A DUAL CHANNEL DYNAMIC SIGNAL ANALYZER $450

The 35660A Dual-Channel, Dynamic Signal Analyzer is an FFT-based
instrument that provides spectrum and network measurements in
electronics, mechanical test, acoustics, and other low frequency
application areas. The analyzer also offers built-in test and
automation features, traditionally available only with a computer. The
unit performs spectrum analysis from 488ï¿½Hz to 102.4kHz and network
analysis from 244ï¿½Hz to 51.2kHz. The FFT provides 401 lines of
resolution in both one- and two-channel modes. Accuracy is ï¿½0.003% of
frequency reading.

BOTH ITEMS ARE PICK-UP ONLY IN LEXINGTON, MA.

Regards,

Dick, W1KSZ

182. FS: SSB Electronics Transverter

Newsgroup: rec.radio.amateur.equipment
Date: 2007-01-24 20:07:02 UTC
From: Wes Stewart <n7ws@yahoo.com>
Message-ID: <1169669222.229941.71770@a75g2000cwd.googlegroups.com>

For sale: SSB Electronics TV 28-144 transverter plus SSB Electronics PA1441 power amplifier. These two items form the heart of the SSB Electronics LT 2S packaged transverter that sells for nearly $900.

This is a high quality German-built unit that offers exceptional weak-signal capability. The transverter uses entirely separate receive and transmit paths with no intermod producing diode switching for rx-tx changeover.

On receive; the TV 28-144 uses a low-noise GaAs FET preamp driving a high level balanced mixer and post mixer amplifier to downconvert a 144 MHz signal to 28 MHz.

On transmit; the unit up converts a low-level 28 MHz (CW, SSB, FM) signal to a 100 mW 144 MHz output.

The PA 1441 amplifies the 100 mW signal to an output power of approximately 20W.

Dual crystal oscillators allow transmit and receive on two different frequencies or two i-f frequencies, although this unit is supplied with only a single 116 MHz crystal.

I originally acquired these units from another ham with the intention of returning to EME, but plans have changed and I'm offering them to someone who can put them to use. I did test them when I received them and they work per spec. Asking $275 for the pair, postage paid in CONUS, or plus shipping elsewhere. Paypal is okay.

Hey there,

One thing I love about them, they don't keep log files of the news I read or files I download.
You can find almost anything you are looking for.
They give you access to some of the best groups others may not carry.
Images, video, mp3 music, the real news from around the world... it's all inside waiting for you.
Take a look, I know you'll love it as much as I do.
Take a look at all the great features below and imagine! You'll LOVE it.
With some of the fastest connections around it's no wonder people love it and keep coming back.
They offer some of the best premium newsgroup access anywhere.

Posting allowed!
2,000,000 new posts each day
Convenient thumbnail indexes
Blazing fast downloads
Keyword searchable

Thanks! I hope to see you at http://newsdude.net soon. See you later.

186. MI5 Persecution: Toronto Freenet supports free speech (107)

Newsgroup: rec.radio.amateur.equipment
Date: 2007-01-25 19:35:38 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07002520300088@4ax.com>
Source record: 5806
Cross-posted to:
alt.internet.search-engines,microsoft.public.windows.vista.mail,alt.airports.uk.edinburgh,rec.radio.amateur.equipment,alt.sex.boys

Despite an orchestrated campaign of attempted censorship by UK-resident newsgroup readers, TFN did not bow
to demands for a suppression of freedom of speech. TFN general policy on the matter is as follows;

Draft Policy on Account Deactivations due to News Group Postings
==========

News group postings occasionally take the form of a message which goes against the "topic" of the conference.
For example, a derogatory message about Canadians in the soc.culture.canada.

Members of such news groups then may send a message to the system administrators asking that a user's account
be terminated because of such posting.

The Toronto Free-Net Board of Directors has taken the position that the only postings that will get a person's
account terminated is material that is illegal under Canadian law. Otherwise, the Toronto Free-Net will not
take any action.

Freenet Executive Director Mike Anderson had this to say regarding the continued attempts of a minority of usenet
participants to have my account on his system deactivated;

The TFN's policy is not to take action against members unless they contravene the Criminal Code of Canada, or
engage in practices such as forgery, attacks against other computer systems or mailbombing.

Mr. Corley, while possibly being very annoying, has not contravened the TFN's policies. The TFN believes strongly
in freedom of expression, while recognizing that the price for such freedom may be a high signal-to-noise ratio in Usenet.

If Mr. Corley breaks the law, we will take action -- until then, he has the same rights as any TFN member to post
to Usenet newsgroups. Actions such as mailbombing the TFN in protest will be met by strong complaints to the
originating site's postmaster. The best defense against unwanted postings may be simply be to ignore them and deny
the poster an audience.

TFN Executive Director Toronto, Ont CANADA

Personally, I find it gratifying that my contributions to usenet discussion are recognized as being conducive
to a high signal-to-noise ratio by their quality and thoughtfulness.

Newsgroups: alt.conspiracy
Subject: BBC's Hidden Shame

Remember the two-way televisions in George Orwell's 1984?
The ones which watched you back? Which you could never get
rid of, only the sound could be turned down?

Well the country which brought Orwell into the world has
made his nightmare follow into the world after him.
Since 1990 the British have been waging war against one of
their own citizens using surveillance to invade privacy
and a campaign of abuse in the transmitted media in
their efforts to humiliate their "victim".

And the most remarkable thing about it is that what they
do is not even illegal - the UK has no laws to protect
the privacy of its citizens, nor does it proscribe
harassment or abuse except in the case of racial abuse.

A lot of people in England know this to be going on,
yet so far they have maintained perfect "omerta";
not a sound, not a squeak has escaped into the English
press, and for all the covert harassment absolutely
nothing has come out into the public domain.

Have the British gone mad? I think we should be told.

From: "Mr.B" <dgb01@stir.ac.uk>
Newsgroups: alt.conspiracy
Subject: Re: BBC's Hidden Shame
Date: Mon May 8 05:32:13 1995

Mmmm.

Who, exactly is this victim you're talking about?

First up, Britain or the UK (not 'England' - England is
a part of Britain, like Kansas is a part of the USA) does
have laws that protect the individual from harassement -
you can't just threaten people willy nilly. There are laws
against that. And if someone lies about you in the press
or tv then you have recourse to libel/slander etc. laws.

True, Britain has no 'privacy' laws as such, but isn't that
a good thing? As of this moment, the govt. are considering
a privacy law, but it is unlikely to succeed. Why? Because any
such law would benefit the priviledged and those in power.
Privacy laws, while supposedly protecting the individual, help
those in power hide their mistakes/scandals. They stop the press
etc. investigating. Privacy laws are undemocratic - they prevent
the people from keeping an eye on govt.

And stop looking for some kinda conspiracy in the British
press. It's hardly perfect, but your notion that they don't
cover/campaign against press legislation, harrassment,
discrimination, human rights etc. is plain wrong. You've never
seen a British paper in yr life.

You clearly have a specific case/individual in mind. Speak up!
The thought police aren't coming round just yet.

Douglas.

Date: Mon May 8 19:21:28 1995
Newsgroups: alt.conspiracy
Subject: Re: BBC's Hidden Shame

Confession time - the victim is/was me (except my name isn't
Corley, but that's irrelevant). What happened was not threats;
just invasion of privacy, in a partiicularly flagrant and
shocking way, in a way which most people would consider to
constitute harassment.

You know there's a particular category of person with mental
illness to whom TV and radio "talk", ie they feel the broadcast
is directed at them in particular? This happpened to me,
quite some time ago in the UK (I'm originally from London,
so I've seen plenty of British media print and other).
They invaded my home with their bugs, they repeated what I
was saying in the privacy of my home, and they laughed that it
was "so funny", that I was impotent and could not even communicate
what was going on. Who did this? Our friends on BBC television,
our friends in ITN, last but not least our friends in Capital
Radio in London and on Radio 1.

How did they do this? I'll give you an example. About a year ago,
I was listening to Chris Tarrant (Capital Radio DJ among other
pursuits) on his radio morning show, when he said, talking about
someone he didn't identify, "you know this bloke? he says we're
trying to kill him. We should be done for attempted manslaughter"
which mirrored something I had said a day or two before
(I'm not paranoid, honest!). Now that got broadcast to the whole
of London - if any recordings are kept of the shows then it'll be
there.

You mean the category where they think that everyone is after them ? that
one ? So lets get this straight you know you are paranoid and you think
that they are out to get you ? Uh huh, try putting the two together and
see what you come up with.

>quite some time ago in the UK (I'm originally from London
>so I've seen plenty of British media print and other).
>They invaded my home with their bugs, they repeated what I

>our friends in ITN, last but not least our friends in Capital
>Radio in London and on Radio 1.

Oh yeah, I can see it now. All of them banding together, in a united effort against one man. So ITN, the BBC, and Capital all decide to sit round the table and they come up with idea of breaking into someones house, putting bugs everywhere, listening in to his conversation, and shoving it out on the news everyday. This someone has nothing to do with politics, or business, or entertainment, just an ordinary Joe Bloggs who seems to be extremely paranoid.

Have some sense, grow up and smell reality. What you are talking about would take loads of planning, tens of thousands of pounds and lots of people involved in the planning, execution and maintenance of it. You must have a very high opinion of yourself to think you are worth it.

>How did they do this? I'll give you an example. About a year ago,
>I was listening to Chris Tarrant (Capital Radio DJ among other

>of London - if any recordings are kept of the shows then it'll be
>there.

Of course you are not paranoid, just slightly mad. Did you ever look for the bugs in your house ? If not, why not ? I mean if I thought that was happening to me, I'd search the place from top to bottom, I mean I live there I would know if anything was out of place. If I was really paranoid, whoops I mean suspicious, I would call in one of those bug detection teams which have those machines that pick up the transmitted radio waves. This reminds me of BUGS, that new programme on BBC1 on saturdays which is all about this kind of stuff, but, shown as a drama / thriller. I suppose thats based on you as well is it ?

>is that there is a conspiracy in Britain, that it encompasses the
>broadcast media, and there is no way of breaking the conspiracy.
>The people who are involved in it will not open up.

What a load of jolly hollyhocks, I would say something else but, apparently students are not allowed to swear on newsgroups in case it damages the reputation of the university or some such jolly hollyhocks.

This guy is extremely paranoid to suggest that the entire British media is after him in such a big way. He gives no real reason as to why they are after him, just that he suffers/suffered from a slight mental

disorder, could it be paranoia perhaps ?? No surely not.

I put it to the house that he has never recovered from this mental disorder, lets come out with it and call it paranoia, and thinks everyone is after him. Remember just because you aren't paranoid, doesn't mean they aren't after you.

This guy has a serious problem to suggest that the media would go to such lengths just to single out and ridicule one person. I mean apart from anything else, we (the listening masses) wouldn't be interested unless it concerned the royal family, politicians or showbiz personalities. e.g. the camillagate tapes. I would think that almost everyone, no matter how much they went on about infringements of privacy read the transcripts with interest. I really don't think that Joe Bloggs ordinary guy or paranoid nutter would have the same appeal. Well actually I dunno. :)

Regards,

Paul.

That is what happens in big cities. Hell, it scared me to death when I first
started working in Manchester. People keep talking to me on the streets,
even if its just to say hello, and I've no idea who they are. This happens
to most people, don't worry about it.

>>paranoid, whoops I mean suspicious, I would call in one of those bug
>>detection teams which have those machines that pick up the transmitted

>That's exactly what we did. We went to a competent, professional detective
>agency in London, paid them over 400 quid to debug our house. They found
>nothing.

Doesn't this suggest to you that there are, in fact, no bugs to be found?

>Over Easter I went to the police in London, telling them basically
>what I've posted here. I don't think you'll be surprised to learn
>that I didn't get very far; they asked "why would they be doing this to
>you in particular?" and the answer "they are because they are" doesn't
>go very far.

Exactly. All you have offered so far as proof of your harrassment by these
people is:

1) Someone on radio said something that you had recently said
and
2) People on the streets seem to recognise you.

These are both perfectly normal occurences and happen to lots of people every
day so it is unsurprising that people here, and the police, are not taking
you seriously.

Trying to always keep an open mind about things I would say that one of three
things is likely.

Either there is a lot more to this that you are not telling us, or you are
messing about or you have some genuine delusions. I'd like to think that in
two of the three cases you would find some real support here, but it seems
unlikely I'm afraid.

Claire

>started working in Manchester. People keep talking to me on the streets,
>even if its just to say hello, and I've no idea who they are. This happens
>to most people, don't worry about it.

The key is the pattern, or a change in the pattern. I've lived in London
almost all my life, and just walking around the streets, I never got
hassled by anybody. All of a sudden, people start harassing you,
throwing abuse at you, behaving as if they know you personally, as
if they've seen you before somewhere. I read in the papers that this
happens to Colin Stagg and people like that Eastenders actress, but
they've had their picture in the paperes, so that is understandable.
In a couple of cases people have even known my name - when I was in
London over Easter I was walking down Shaftesbury avenue in the
West End when somebody (no idea who they were, just some bloke with
his girlfriend) called me by name - quite clearly, and my name is
distinctive. This also happened once about four 1/2 years ago, onn
the tube - some blokes I had never seen started chanting my name
and a term of abuse.

It's the pattern which convinces me there's something to it - and
would convince any impartial abserver who could see things tyhrough
my eyes.

>Doesn't this suggest to you that there are, in fact, no bugs to be found?

There's a little story behjjind this. First iof all, in 1992 I worked
for a company where the people made clear they knew what was going on,
first of all directly (the very first evening I was there I went out to
the pub with them and the Technical Directpor said to another guy,
"is this the bloke who's been on TV?" "yeah, I think so") and also
indirectly, by rep[peating stuff I was saying at home in London and
in my rented accomodation there (I moved several times in the course of
1992 and they followed me each time). Now, if "they" (the buggers)

knew their bugs could be found easily, they wouldn;'t be keen to make
their existence known, would they?

Also, in summer 1992 I went on a trip abroad to Europe by coach, and
on the way out there were a couple a little younger than myself on the coach
a bloke and hius girlfriend. He said things about some bloke who was
never named, who sounded exactly like me - and he made explicitly
clear that our house was bugged, and that a neighrbours house was
bugged (and at work they'd been rep[earting what was said at the
neighbours, so this looks like independent corroboration).
They also said stuff like "at school he was always really streesed,
they found someone from his school and he was a real psycho"
and that "he was in a B&B for one night and they got him", dead right
again, I had been in B&B for once night a few days before this trip
and weatching the news again got a reaction from the newsreader.

Subject: Re: BBC's Hidden Shame

>:some pirate radio station in London in 1991, started listening to
>
>Conclusive proof if ever I heard it.
>
>Of course you were the only person in the office in the whole of Britain

Yeah, but this is the point. Each incident is easily and automatically
deniable along the lines you're taking. But when this happens every
time, and when you get independent corroboration from other people,
then there's no escaping it. For example, immediately after I lost
my job in 91 I went into the local garage to get some work done on the
car, and one of the blokes there said to the other, "so what do you
think of it then? it's getting killed on the radio isn't it"
Now again, you look at that and no proff; you can ask them what they're
referring to and they can say they're talking about something else.

>I know you may be a little paranoid, but I suggest you sit down
>and work out rationally what possible reason anyone off television,
>or radio would have for listening to your conversations. After all
>it must be hard enough to present a show to millions of people
>without the added burden of watching and listening to a single
>person and slipping their phrases into the programme.

These presenters are clever people. They wouldn't be presenters
if they weren't - they're easily capable of reacting to an individual
in this way.

What possible reason? I guess because they think it's amusing to do
so. They know that if you ever tell anybody, without being able to
show any evidence, then the reaction you'll get from just about
anybody will be the one you're showing now.

I realize there are loads of people in England and elsewhere with
the sort of thoughts I've described in these postings; and almost
all impartial observers would say that nothing other than an
go after their private conversations (if they did it to me then I can
do it to them, it's a questions of technical competence and money).
If you were lucky, you might be able to entrap them into admission.
You could of course harass or threaten them back (any coppers reading
this?) but that would be illegal and might get a result quite

different to the one you're trying to achieve. Of course, it might
come out of its own accord given time - if so many people know, if
they have an escape valve in their "subtext" through the media,
will it not cease to be at a covert level, given time? Surely it
is in my interest for it to become overt, since the transgressions
at this time are on their side and not on mine?

Thoughts? There must be some way of breaking the secrecy. This
isn't the first time in human history that a conspiracy has taken
place on this scale, but the truth tends to out. The situation
now is they think they';re "winning" hence have little stimulus
to change the rules - if they started seeing themselves "losing"
things could change drastically.

Mike, if that is your name,

I'm going to try to rationalise what you're telling us. I can think of three
possible explanations for what you are experiencing.

One is that there _is_ a conspiracy against you. As a previous writer said,
though, a lot of these programmes are taped, so it really isn't possible in
some of the cases you've named. Further, why were no bugs found in your
house? Finally, unless you are a political figure or someone else in the
public eye, why would anyone bother? People like me (and I assume you) are
small fry; our contribution to society is likely to be minor. Why would
anyone spend so much money and effort on you?

Another possibility is that you are developing some kind of paranoia. There's
no stigma attached to this; we're all paranoid to some extent, although
perhaps not to the extent that a doctor would call us paranoid. I think
paranoia is quite a straightforward explanation here - you really do believe
that all these things are aimed at you; you see people everywhere trying to
get at you. Logic suggests that this cannot really be the case.

The third possibility is that not even you really believe any of this, and
that this is a "troll". I'm not sure I believe this possibility, but it's
possible.

Anyway, if you want to be sure that you're _not_ going mad, I'd go and see your G.P. if I were you. If you don't trust him/her, why not see someone recommended by a person you can trust? If you don't trust anyone any more, don't you think it's time you got help?

For a troll, the posts are remarkably well-informed on paranoid behaviour.. you'd need to be one, or be reasonably well-informed on the subject to sustain the tale... which lead me to my theory...*ahem*...:

An extension to possibility 3 (Number 3.5, perhaps?) is that the original poster may be somehting like a psychology student writing a term paper on the net community's reactions to this tale. (Now, there's paranoia for you! Not only are they listening to/watching us, they're writing reports about us too...:-)

More likely, though, is that the poster is genuinely in need of professional help (he has intimated as much, himself) and, as such, he should be encouraged to seek it.

>reply? Something more constructive than those silly little
>jokes about paranoia perhaps? Like what objectively can you do
>to break the conspiracy open, if one exists :-) ? If somebody
>did it to you, what would you do?

But we've *done* that. I certainly have at least. Way back when you
originally started posting and your posts were neither tediously repetitve
nor stupidly long.

But whenever anyone makes any good suggestions you ignore them and start
posting from the begining again. You don't want us to help you - so what do
you want? If you really wanted help you would listen to peoples suggestions
and respond to them. Is this just an attention thing?
But I'll try again, because I'm a fool like that.

>o Tell people about it, go to the police / legal services
> Done that; those around me either don't believe me, or they
>"sort of" believe but can't do anything about it. As for going
>to the police; I did, over Easter. Discouraging. They must be
>familiar with the occasional person walking into a station with
>this sort of story. "If a psychiatrist says you're imagining
>it, then that's what it is".

You haven't yet given any examples of anything concrete to suggest that this
is really happening to you. This, I would imagine, will be the stumbling
block for the police. How can they possibly help you when your only evidence
is a jumbled mess of TV presenters saying things that could be construed as
answers to your comments and the 'feeling' that people are talking about you
and watching you?

I seem to recall that last time this was being discussed someone asked if you
had been to see a psychiatrist about this - after all if this is really
happening then you have can only benefit from being given a clean bill of
health. I don't recall an answer.

> I also went to a firm of solicitors; again, very
>discouraging. Put bluntly, they can't deal with cases where the
>perpetrators aren't well-defined and the existence of the crime

>itself is unprovable.

Well how could they? Who would you sue? The country?

>o so if that option is out, what's left? well, there's the
>"do nothing" option. To some extent this option works. They've
>spent a lot of money and ultimately achieved nothing except to
>force me out of the country - which has been an own goal for
>them, since now they can't do what they were doing in the UK.
>Expenditure of further resources would feed the pockets of
>their greedy contractors, but is a waste of money as far as the
>employing organization is concerned.

So you are no longer in the uk? And this is not happening anymore?

Then let it go. Just leave it alone and get on with your life. Its just not worth it. There is nothing you can do to prove that this happened whether it did or did not. So forget it. Go and explore the net - when people aren't spamming it with useless repetitve posts there's a lot of interesting and worthwhile things out there to see and do. Likewise real life (I'm told *&).

>completely conventional, I have a good academic and work
>record. Until all this started, I had no mental health
>problems; the diagnosis of illness was only after 2 1/2 years
>of abuse. If they did this to me, they could do this to
>absolutely any British citizen. If this stuff gets out, it
>won't be me that has to worry - it'll be them. They take a
>normal person, lie about him, demonise him, try to force him
>into killing himself - and this is in a country where the rule
>of law applies?

If this gets out then *that* will be the time to bring your claims to the foreground.

The only thing ruining your life right now is you, Mike. And the only thing that will make your life any better now is also you. So go and make your life better and show them that they failed.

==========

>But we've *done* that. I certainly have at least. Way back when you
>originally started posting and your posts were neither tediously repetitve
>nor stupidly long.

Once again we're running into a brick wall. The reason I started posting was because I couldn't figure out a way out of the situation, and thought that saying it out into the open would provide a catalyst for one of those "in the know" (there are plenty in this category, and it's a fair bet that some of them are reading this) to speak up.

It hasn't worked, yet. A little more aggressive shit-stirring (excuse expletive) might do the trick. Perhaps Usenet posting is the wrong arena for this sort of activity; although obviously it does have the advantage of rapid feedback.

Thing is, for people to open up, you would have to provide them with a reason why it would be in their interest to do so. There's no obvious way of doing that; to get thinking people to incriminate themselves when they're safe in denying all knowledge is not a trick I can figure out how to do.

>But whenever anyone makes any good suggestions you ignore them and start
>posting from the begining again. You don't want us to help you - so what do
>you want? If you really wanted help you would listen to peoples suggestions
>and respond to them. Is this just an attention thing?
>But I'll try again, because I'm a fool like that.

A "good" suggestion would be one which had the effect of halting the persecution, which so far hasn't happened. If you make a "good" suggestion then damn right I'll stop posting - because then I won't have to.

>You haven't yet given any examples of anything concrete to suggest that this
>is really happening to you. This, I would imagine, will be the stumbling
>block for the police. How can they possibly help you when your only evidence
>is a jumbled mess of TV presenters saying things that could be construed as
>answers to your comments and the 'feeling' that people are talking about you
>and watching you?

Because, as said previously, concrete proof does not exist. If it existed then I wouldn't be talking to you - if it could be proved, or if those doing it could be found, they wouldn't be able to continue.

What's happened is all conversation. You can't prove conversation, not without a tape recorder, and even then you would have to prove that what they meant corresponded to what you understood.

The psychopath who manages the Applics group at my previous employers played little word games, not only with me but with at least one other person in the group; words which rhyme with swear words, words which are ambiguous, eg "bent", words which rhyme with wank, "sheet" rhymes with shit, end (how was your weak end? being the standard salutation on a Monday morning). Sounds childish, most people would easily tell him to fuck off; except to people with predisposition to depression and the inability to express themselves (this was before I started taking medication), that sort of nastiness is not bearable. After ten months of this I was so ill I was crying constantly, eventually I went into hospital and started on medication. Somebody else he did this to (over a year later!) got so depressed he took an overdose of pills, had to go on antidepressants and left.

And where does the "concrete proof" of this trouble exist? NOWHERE. Even if you had physical evidence, even if you had the presence of mind to record what was said, how could you prove what he actually meant by what he was saying? In some cases of harassment you can prove what was done, because it's undeniable. But when the harassment is done with any presence of mind whatsoever, it becomes difficult. In the case of the wider harassment, the people doing it obviously know what they're about - they must have done similar things to other people before in one form or another, and they know what they can get away with, they know what the police will do nothing about.

>I seem to recall that last time this was being discussed someone asked if you
>had been to see a psychiatrist about this - after all if this is really
>happening then you have can only benefit from being given a clean bill of
>health. I don't recall an answer.

Yes. The reply was of the "neither confirm nor deny" variety. Not much else they can say, is there?

>Well how could they? Who would you sue? The country?

Hmmm, now there's a thought... :-)

>If this gets out then *that* will be the time to bring your claims to the
>foreground.

Wrong way round. It won't get out unless I do something to bring that about; remember, it isn't in THEIR interest for THEIR criminality to be exposed. Yelling loudly on Usenet might nudge things along in the right direction.

>The only thing ruining your life right now is you, Mike. And the only thing
>that will make your life any better now is also you. So go and make your
>life better and show them that they failed.

Ignoring them would be bliss, but it's not a winning strategy.

There are going to be more of these posts. Sorry. That's the way it is.

>Very unstructured, no proof whatsoever. So why should anyone
>take it seriously? If I said to you, "my next door neighbour eats
>babies", how much credibility would you attach to that?

Well, cos it's true. I was hoping that someone "in the know" would
appear and make some self-revealing comments, but that hasn't
happened. Everyone's keeping quiet. What a pity.

>>This is an agglomeration of articles and replies previously
>>posted to Usenet, so it's a bit hard to read. This posting
>>describes a campaign of character assassination initiated

>Who's character is being assassinated? It isn't clear from the post.
>Are we talking about Grenville Janner? I thought he was a spook
>himself? He's certainly able to hold his own on the issue you cite.

Mine, mainly. The reason for putting that episode at the top
of the posting is that they tried to kill two birds with one stone
at the Beck trial - they simultaneously put words into the mouth
of their invented "witness" to smear Janner, and repeated exactly,
word-for-word, stuff which had been said by and about me.

That was the only occasion (the only one recognizable to me,
anyway) when they went after another target at the same time.
And it's quite lucky they did that - because it could give some
pointers to who they might be.

Presumably there are people still around who were involved in
that trial, and know what happened. Beck might be dead, but the
"witness" would still be around, as would Beck's solicitor.

>>by a group of people or agency within the UK. Although
>>they have never presented their identity, you can draw
>>your own conclusions on that point. There aren't many
>>people with the technical resources and contacts in
>>society to make feasible the sort of deliberate attack
>>on an individual which is described in this article.
>
>There aren't _any_ as far as I am aware.

I'm afraid there are.

>>The most disturbing part of the whole episode is the
>>participation of British institutions and their members, fully
>>comprehending what they do, in what is an act of attempted

>>murder against a British citizen.
>
>The whole society, in fact. From the top to the bottom. They
>wouldn't be trying to tell you to kill yourself by any chance,
>would they?

You got it. I'm a popular guy.

>>After the trial Janner said that "now he knew what it felt like
>>to be a victim of Beck's"; but, it wasn't Beck who set up the
>>attempted character assassination on Janner; the fact that they
>>took a side-swipe with their verbatim repetition shows
>>where the real source is to be found.
>
>The newspapers?

Well, your guess is as good as mine. But what newspaper would
send a team after someone for five years? I don't think so,
somehow. Of course they could, but it wouldn't be in their
commercial interest.

You'd have to look at a corporate entity which would indulge in
activity of this type, and the nature of the contacts they have
narrows down the search.

>>The goons behind the molestation are lower than the paedophiles
>>they use to convey their propaganda - they use the same
>>strategy of covert abuse, but there is nobody to check their
>>actions, or to bring these criminals to justice.
>
>Ummm.. Janner is a Barrister, a journalist who writes on a wide
>variety of issues, and a long-standing Labour MP. If he's unjustly
>smeared, he's more that capable of setting the record straight.

Janner blamed Beck for the invention. He didn't say anything about
it having any other origin. Even had he suspected any other source,
he could hardly have pointed the finger without some evidence.

>You say that the media is making similar allegations about you in
>relation to this issue? So, you're accused of child abuse, amd
>the allegation was reported in the media, I assume.

I've been accused of many things although that wasn't one of them.
Most of them have been yelled in my face by people on the street
in London at some time or other. Bit difficult to misinterpret
when that happens.

>What exact;y are they saying about you? (Respond here please. I'm
>leaving the UK tomorrow, so I can't read e-mail.)

It changes with time. Every so often, they sing a new song;
so at one point the allegation was homosexuality, at another
is was low intelligence, then it degenerated into sexual abuse.

<snip>

>>They invaded my home with their bugs, they repeated what I
>>was saying in the privacy of my home, and they laughed that it
>>was "so funny", that I was impotent and could not even communicate
>>what was going on. Who did this? Our friends on BBC television,
>>our friends in ITN, last but not least our friends in Capital
>>Radio in London and on Radio 1.
>
>How do you know this? Just from what you hear on the radio?

I can't remember if this was mentioned in the "regular" posting,
but on a few occasions they set me up with people nearby to talk
about me, or more correctly, to talk about somebody who
(in their minds) "resembles" me, with actually naming me.

One such occasion was a coach trip to Europe in June 1992.
The "set up" comprised a guy talking to a vacant giggling female
about "this bloke", who was never named. Apparently "they"
(also never named) "found somebody from his school",
"they" "got" him at his house and at a neighbours, and at
a B&B where their target was for one night.

Apart from that, yeah, from "what I hear on the radio". And
from what I see on TV. (I wouldn't be doing my job as a
mentally ill person properly if the TV and radio weren't
talking to me, now, would I?)

>>Oh yeah, I can see it now. All of them banding together, in a united
>>effort against one man. So ITN, the BBC, and Capital all decide to sit
>>round the table and they come up with idea of breaking into someones
>>house, putting bugs everywhere, listening in to his conversation, and
>>shoving it out on the news everyday.
>
>But why would they do this? What possible reason would they have?

But why get at anybody? Victimisation is the pastime practised against
other people; as the scorpion said to the frog, "it's in my nature".

>Are you aware that what you describe is also a common symptom of people
>who are suffering from a psychiatric illness? Have you been to your
>doctor and told him about this? Did he prescribe any medication? Have
>you been taking it, or have you stopped?

Yes, Yes, and Yes respectively. Still taking it. Doing quite well actually.

>>This someone has nothing to do with
>>politics, or business, or entertainment, just an ordinary Joe Bloggs who
>>seems to be extremely paranoid.
>
>Usually a clinical symptom rather than proof of a conspiracy in such
>matters.

>>How did they do this? I'll give you an example. About a year ago,
>>I was listening to Chris Tarrant (Capital Radio DJ among other
>>pursuits) on his radio morning show, when he said, talking about
>>someone he didn't identify, "you know this bloke? he says we're
>>trying to kill him. We should be done for attempted manslaughter"
>>which mirrored something I had said a day or two before.
>>Now that got broadcast to the whole of London - if any recordings
>>are kept of the shows then it'll be there.
>
>And this is supposed to mean... what? Chris Tarrant is in on this plot
>to kill you? It sure sounds like a joke to me. When you start to get
>ill, the mind often makes connections that seem logical and lucid to
>you, but do not to the rest of the world. This is one of those connections.
>They are usually known as delusions.

This is the problem, and there doesn't seem to be any way around it.
If a clearly sane person reported this persecution, you might believe
him, but probably you'd tell him to go see a doctor to "verify his
sanity". If someone with the illness of which you could argue these
things to be symptomatic says these things, again, you might believe
him, but it would be unlikely - the easiest route is the one you are
taking in the above paragraph. The only way I can convince you of what
I am saying is by giving precise details of what, when, how - and for
most of that stuff is based solely on memory.

To prove it would require an admission from somebody, or else hard
proof in the shape of physical evidence such as tape recordings.
Of course, I don't have that.

>The idea of a "pattern", and the notion that if anyone could look
>through your eyes they would see the same thing is very indicative of
>the onset of a psychiatric illness. Schizophrenia and manic depression
>have similar symptoms. I'm not trying to be disrespectful here.
>This may be an illness and it can be managed by the use of medication.
>If it _isn't_ treated, it can lead to terrible tragic consequences.

I'm quite aware what the symptoms would be, and that the reality
corresponds to those symptoms.

But if anything, that is an argument which could convince you of
the truth of what I'm saying. If they deliberately set out to
simulate the symptoms of schizophrenia - in other words, if they
know through observation that their target is either suffering
from the illness, or is on the borderline and could be pushed in
with an appropriate stimulus, then they can feel safe in what
they do, since once you are registered as suffering from the
illness, people will assign less credibility to assertions that
persecution is based in reality.

That this can happen, and people collude by silence, is absolutely
horrifying. It is all the more horrifying that it can happen in a
country such as Britain which has no history of repression.
Perhaps its happening in the UK is due to the arrogant assumption

of moral superiority on the part of those in the media and others involved - we won the last war and we can keep harping on about German and Japanese war crimes, so we can do whatever we like and we'll be right, up to and including destroying the lives of our citizens (as long as we're not caught doing it).

>>That is the level it's at - basically they show they're listening
>>to what you're saying at home, they show they're listening to you
>>listening to them
>
>But why? And why you? Do you realize how much it would cost to keep
>one person under continuous surveillance for five years? Think about
>all the man/hours. Say they _just_ allocated a two man team and a
>supervisor. OK., Supervisor's salary, say, £30,000 a year. Two men,
>£20,000 a year each. But they'd need to work in shifts -- so it would
>be six men at £20,000 (which with on-costs would work out at more like
>£30,000 to the employer.)
>
>So, we're talking £30,000 x 6. £180,000. plus say, £40,000 for the
>supervisor. £220,000. Then you've got the hardware involved. And
>any transcription that needs doing. You don't think the 'Big Boss'
>would listen to hours and hours of tapes, do you.
>
>So, all in all, you couldn't actually do the job for much less than
>a quarter million a year. Over five years. What are you doing that makes
>it worth the while of the state to spend over one and a quarter million
>on you?

Those are pretty much the sort of calculations that went through my head once I stopped to consider what it must be costing them to run this little operation.

The partial answer is, there have been periods when the intensity has been greater, and times when little has happened. In fact, for much of 1993 and the first half of 1994, very little happened. Although I don't think that was for reasons of money - if they can tap into the taxpayer they're not going to be short of resources, are they?

The more complete answer is in the enormity of what they're doing. When countries kill their own people, as a rule, they get found out and all hell breaks loose. This isn't some para shooting Irish teenagers in the back. This is something which permeates English society, which they are ALL responsible for, and which they cannot escape responsibility for.

Relative to the cost to British pride of seeing their country humiliated for the persecution of their own defenceless citizens, isn't is worth the cost of four or five people to try to bring things to a close in the manner they would wish? To the government a million or two is quite honestly nothing - if they can convince themselves of the necessity of what they're doing,

money is not going to be the limiting factor.

>>What possible reason? I guess because they think it's amusing to do
>>so.
>
>What? Spend a quarter mil. a year to amuse themselves? And why not
>change every now and again? Why keep watching you? (Unless you _are_
>doing something, and I don't think you are, though you may have some
>deep, dark secret in your past.)

See the above.

>Hmmm, strange eh.
>I mentioned all this goings on to my boyfriend, who works for the
>British intelligence service, and he assures me this sort of thing
>never goes on.. not ever...honest.
>Though he said the name was familiar...

it does go on, although it's an open question who does it.

Some time ago there were press reports of an Army intelligence person called Jones who claimed Diana and Hewitt had been photographed in a compromising position... he said he'd been doing this as part of an Army unit which had previously operated in Northern Ireland.

Then Hewitt said he'd been told the same thing by some Army people, and that they were threatening to release the tapes unless they curtailed their liaison... as per usual everyone denied everything, painted Jones as the "Jones twins" - not very original in how they deal with their perceived enemies, are they?

You have to wonder how they manage to achieve this sort of surveillance though. Audio you can understand, it's possible to put a microphone through the wall, and apparently there exist devices which will retrieve sound from a laser beam bounced off a window - sounds sci-fi, but there's a well known surveillance electronics company in London which sells these things.

But how would you get video out of a room, unless you had actual physical access in order to plant a device for pickup? We're not talking about looking in from afar, but an actual device within the room. You could either drill through the wall and shove a pickup through; or you could supply a trojan device with a hidden pickup inside; but most likely, you would have to physically break into your target room to plant a camera. That's not an infeasible option; all it means is having your target(s) watched to make sure they're not in the vicinity, then you negotiate any locks on the property and find a suitable receptacle for your device.

The next question is how they defeat the usual methods of counter-surveillance. We had private detectives carry out a "sweep" of every room and the telephone line. They found nothing. That indicates at least four possibilities that I can think of; (this is all guesswork BTW, and probably fanciful guesswork at that!)

1) no bugs (pull the other one)

2) radio-transmitting devices which can be controlled from an external source, ie you can instruct them to switch off when you detect a counter-surveillance sweep taking place

3) hard-wired devices; probe microphones or whatever they're called, things you poke through the wall

4) passive surveillance devices; so you bounce laser or radio waves off a suitable reflecting surface (again, sounds far-fetched but such things may apparently exist).

5) there is a fifth possibility, that the PI's didn't detect an actual transmitting device; there are technologies specifically designed to avoid detection, eg frequency hopping and suchlike. But how much sophistication could you build in to a device which would have to be small enough to be physically concealable?

I guess the real question is to find out who is ultimately behind these "goings on". And if the "great and good" (or the better known, at any rate) can't protect themselves, what hope is there for the rest of us?

As long as the source impedance of your microphone is lower than the load impedance of your 897's mic input, you are fine. The impedance is close enough anyway.

I want to install a stationary external airband antenna hooked up to a handheld radio to talk to airplanes.
It would possibly be a whip antenna but I don't know what type and where to buy it the US.
Any recomendations?

Yes, DON'T!
You didn't say where or what you are, but unlicensed operation of a aircraft radio will probably make you a hazard to navigation in any country.
While pilots that fly within the continental US borders are no longer required to get a radio *operators* license, a radio *station* license is (AFAIK) required for the equipment. In this case, the "station" is usually an airplane, based at an airport, or an FBO or unicom on the airport property itself.
That being said, just getting a simple dipole outside in the clear and as high as you can get it, will do wonders for your reception. Unless you can legally transmit, keep your hand away from the PTT switch. You could damage the transmitter if the antenna is not cut to the correct frequency, but for just listening, it should be much better than the antenna that came with the radio.

Well not exactly, Norm.... the FCC granted a "Blanket License" for all
"domestic non commercial aircraft" registered in the USA. As long as
you never leave US Airspace your airccraft Station is covered by, said
Blanket License.
However, if you plan on flying your aircraft out of US Airspace, then you
are REQUIRED to hold both a Radio Station License, and a Resricted
RadioTelephone Operators Permit, by International Convention to which the
US is signitory. It is the same for Maritime Radios as well.

Bruce in alaska a Multicom Station Licensee for many years.....

HI folks,

I bought one of these radios, 6 channel ht formerly in fire service on uhf at a hamfest a few years ago. tHe seller had hislaptop and programmed it for the NEw ORleans area where i lived then. I'd like to be able toreprogram it and can get the software. HOwever, I need a programming cable for it.

Anybody got one they'd like to sell? SOrry, can't do the auction sites, etc.

drop me a note using my callsign at mmsn.org, or follow the decoder key at the bottom, or post message here and I"ll make contact.

Thanks and 73

traders/buyers who deal with tom stack/WQ5J, arlington, tx beware!!
i have direct, incontrovertable evidence that he is "kiting checks",
ie
writing checks for equipment he buys and asking the person he is
buying
from to hold the check for 1 - 2 weeks. i have been witnessing this
for 2 - 3 years. i have direct, incontrovertable evidence that a old
ham
in the north texas area is still awaiting payment for a very high end
tx/rx after 6 weeks of waiting.

you have been warned.

Isn't that essentially what I said? The only thing I wasn't sure of was if the same applied to Alaskan and Hawaiian airspace. You did expand upon it and added info, but what I really wanted the OP (wherever he lived) to know is that to legally "talk" to airplanes, you need to have more than just a radio.
BTW, that should probably read "at least a Restricted Radio Telephone Operators Permit" since I already had a first class phone license when I went through primary flight training and the FCC won't issue a lower class license to someone with a higher class license of the same type.

<snippety>

If you don't want to check Greed-bay, your best bet is to register, and post a 'Wanted' message to the appropriate forum, at http://batboard.batlabs.com

If you decide you don't want to invest in a programming cable (keep in mind that you will also need a radio interface box, and appropriate programming software), I can program and test that radio for you at my normal rates. See http://www.bluefeathertech.com/rf.html for details.

Happy hunting.

Hi There,
Does anyone know if there is any companies or persond out there who are marketing/providing a quick release system like you get for in-car broadcast radios these days.
I want to fit my FT-897 into my car, but obviosly do not want to leave it in full view when not in the car and so was wondering if there was some sort of quick attach/release system available that would alloe the rig to be slid into place and be fully connected to coax, speakers etc and could be disconnected just as easily.

Any info ?

Many Thanks

Hello,

I'm trying to fix an Icom IC-211 Transceiver, the symptom is frequency
actually transmitted and received in FM mode is lower by 12 KHz with
respect to the dial displayed frequency. I haven't been able to find a
service manual for this rig so any hint is welcome.

Best regards

Francesco

Seconded - just beware the connectors are often for more low amp and low
RF power radios (CB) so check the quality before using, espec on high power.

I have some vintage military items FS: These items came from the radio system AN/GRC-19D system. This system had the R-390A sires receivers and the T-368 transmitter. On top of the T-368 was the modulator oscillator for the FSK system. I have one of these in nice original condition for $125.00. I also have the the CV-116 RTTY dual diversity convertor, with manual, $150. Also used in this shelter was the wattmeter/dummyload for the transmitter and I have one of these also, $50. If interested, call Mike at (979) 255-3544.

218. Home brew 4CX-1000 amplifier....

Source record: 5841

I've been using the audio filter on CWget and it almost helps. The problem is that it introduces clicking, cracking, poping, and wheezing to the filtered sound. Have you experienced this? I've got a very fast computer and I've tried setting the process priority to "real time" and the noise on the filter audio output through the sound card remains. I've tried a number of different sound cards with the same result.

I'm thinking that if it could run the filter without adding the garbage that the Morse decoder function would be improved.

Have you tried an PC based audio filter that works better?

223. LATE MODEL MFJ ROLLER INDUCTOR IS ROUGH

Newsgroup: rec.radio.amateur.equipment
Date: 2007-01-30 00:12:10 UTC
From: solidgoldZZZ@optonline.net
Message-ID: <45be8c18.534089@news.optonline.net>
Source record: 5843

Hi All,

I have a couple of late model MFJ roller inductor antenna tuners with the roller on the inside of the inductor. My old 989C with an external roller was smooth as glass. These newer ones with the roller on the inside of the inductor really are rough. They have a knob with a finger hole, but cannot be spun with 1 finger--you have to grab the entire knob to turn it. I have a 989D with a crank type knob that has a slip clutch as part of the knob, and if you try and turn it real slow, the clutch slips instead od the roller progressing slowly.

Has anyone "fixed" this problem with their late model MFJ ???

Its more about output level, relating to standard levels at various Z's.
A 100 ohm mic will have less output than a 1k. I really can't think of any
reason Z would matter, except a low Z mic would tend to have less RF pickup,
but maybe not.

If you can't get the genuine article I am pretty sure
its a generic hardware part.
J-38 keys were used for code training, I don't think
they were ever used on aircraft. I don't know what the
correct key for a B-17 is but suspect its one of the
enclosed "explosion proof" type keys.
BTW, are you the folks who had a flying B-17 and B-24 at
the Burbank airport a couple of years ago? If so they were
nicely restored. The complete lack of any creature comforts
on these aircraft gives one even more respect for the crews
who spent so many hours in them on missions.

Terminating a signal source in an impedance that is lower than for what the source was designed, will reduce the low frequency response. The worse the mismatch, the worse the LF rolloff. I learned that in my broadcast days... a turntable preamp wanted to see >= 10K ohms but the mixing console's input Z was 600 ohms. The result was a very "tinny" sound that *nowhere near* met our annual audio Proof of Performance test.

OTOH, loading a 100 ohm source w/ 1K ohm will result only in a less-than-maximal signal level. That's ok as long as the preamp can make up the signal level w/o adding undue noise.

We did extensive testing with APRSPoint on the new Vista OS, so far all functionalities worked with no problems. The usb/serial converter(IO Gear GUC232A) we used is also accepted by Vista using its XP driver. Vista seems to have good backward compatibility, and the interface looks nicer. Visit http://www.aprspoint.com for more details.

Richard,

I may be able to find a usable part at an ol' fashioned
hardware store. The part I need is brass and has machine
threads rather than screw threads. I'm sure someone has
J-38 parts stashed in a drawer somewhere, however...

Oddly enough, our official AAF documentation for the B-17G shows that the standard code keys were J-37 and J-38. I'd have thought they would have used a flameproof key, but it apparently wasn't necessary.

The B-17 and B-24 that tour together are operated by the Collings Foundation of Stow, MA. I toured botha couple of years ago when they were here in Dallas. "9-0-9" is a nice B-17, but there are nicer ones out there (ours is not one of them...yet!). The Lib is one of two flying in the world, the other being the B-24A of the CAF (which is down right now for some major restoration work).

Lack of creature comforts? That's an understatement. It was downright brutal. Just cruising along on a pleasure flight in the B-17 is rough. It's cold, noisy, drafty, there are a gazillion places to bang your head on some sharp object, and so on. I wouldn't trade it for all the tea in China! :)

73,
Dean K5DH

240. FS Kenwood Access plus 2 meter amp

The problem with APRSPoint is not the operating system. The problem is that the author and seller of the program does little to enhance the program. It does not meet the APRS spec and lacks functionality that is much needed to make this a full functioning APRS program. The author also sponsors a "support" group on Yahoo Groups. The program with him and the group is that if you say anything critical of the program the author censors the post so no one else will get a bad impression - or should I say honest impression of the APRSPoint program. Be advised, until he starts fixing and enhancing the program and accepts honest feedback in his forum, stay away from this program. You can use AGWTracker, Xastir, WinAPRS and UI-View.

250. FA: Magellan Roadmate 300 Plus Three Map SD Cards - Ends Sunday

Newsgroup: rec.radio.amateur.equipment
Date: 2007-02-03 20:19:55 UTC
From: "Peter W. Borders" <pwborders@cox.net>
Message-ID: <I76xh.34528$8U4.2567@newsfe20.lga>
Source record: 5770

This unit is really nice and works perfectly. No scratches or defects. I have used it for a few trips and it worked really well. It even helped me get "unlost" once. This also includes three of the map region cards from Magellan that are priced at $50 each. These basically cover the whole east half of the country. You can also use the internal memory or your own SD card for additional maps that can be exported from the included software.
Specifications

* PHYSICAL
o Case High-impact plastic
o Base Map Detailed maps of 48 contiguous United States, Hawaii, Puerto Rico and Canada on CD-ROMs for upload to internal memory or Secure Digital (SD) cards (not included)
o Size 6.18" W x 3.11" H x 1.18" D (W 157 mm x H 79 mm x D 30 mm)
o Weight 9 oz (280 g)
o Display 3.5" diagonal touch screen: full-color, high resolution, transflective TFT, backlit, automatically adjusts to light conditions
o Memory 110 MB for maps and user data
o Data Storage Unlimited / Secure Digital (SD) Card compatible
o Antenna Built-in multidirectional patch
o Keypad Eight backlit direct-access keys, plus power and repeat buttons
o Operating Range 14 to 140ï¿½F (-10 to 60ï¿½C)
* PERFORMANCE
o Receiver 14 channels, WAAS/EGNOS enabled
o Acquisition Time Hot: 20 seconds, Cold: 60 seconds, Initial: 5 minutes
o Update Rate Once per second
o Accuracy 3 to 5 meters (10 - 16 feet) - WAAS/EGNOS, < 7 meters (15 feet) - GPS only
o Languages English, French, German, Spanish, Italian, Swedish, Finnish, Portuguese, Dutch, Norwegian - Voice guidance in English
* POWER
o Source 12 V AC or vehicle adapter

Includes

* Magellan Roadmate 300 GPS Unit
* Suction Cup Window Mount
* Car DC Adaptor
* AC Adaptor
* USB Cable
* Original Software and Manual

Extras

* 256MB SD Map Card of South East US
* 256MB SD Map Card of North East US
* 256MB SD Map Card of East Central US

Good afternoon, Ken.

No, I'm sure you can program the channels in the IC-706. I had a
program that would do that, sort of ... but it wasn't much good and I
ended up getting rid of it. Can't remember which one it was, now.

What are you using for your other radios? If I could find a decent
one for my FT-817 that would be helpful.

252. Re: BEST channel programming software for Icom, Yaesu = ?

Have you looked at FTBasicMMO for the FT-817? I have used it with the FT-847, and it will program the channels in all the ways which the radio will, but much more easily. Good support from the author as well. The interface isn't flashy, but it works.

Pasternack has the plugs, although they are sadly not cheap. I got a TMC
receiver a couple years ago that had been demilitarized with a boltcutter
and wound up having to buy a bunch from them.

257. FT 890 problem

Newsgroup: rec.radio.amateur.equipment
Date: 2007-02-04 17:36:26 UTC
From: George Folse III <k5wwo@cox.net>
Message-ID: <yQoxh.42$UJ1.2@newsfe20.lga>
Source record: 5777

I sent my FT 890 to Yaseu for repairs about a yr. ago because lighting hit it and knocked the rec out The TX was working fine when I sent it. I never tried it out until now because I use it as a spare. The rec works fine now the TX is only 40 watts in all modes. I called Yaseu about this and they told me the no longer repair the older model radios anymore, that I would have to find someone else to repair it. My question is does anyone have a clue on what them might have done to lower the rf power? I would like to try and repair it myself before trying to get someone else to do it. I have already spend more money on it than it is worth. Any help on this????
Thanks

Source record: 5780

When you are tracking a moving object, aprspoint will record all its positions on the map, and optionally connect them with lines to form a track. If you are tracking multiple moving objects at the same time, the map could get cluttered quickly. In this new version, you can choose to selectively remove an individual object's track, or remove all tracks on the map. This version also includes fixes for several bugs reported by the users. We have also tested it extensively on the Vista platform as well. Old keys will no longer work on this new version, please refer to the web site http://www.aprspoint.com for upgrade details.

Perhaps it became mis-adjusted. If you don't have a service manual
(technical supplement in Yaesu speak) you should be able to snag a copy
from http://mods.dk

Message-ID: <FMMxh.24760$X72.1456@newsread3.news.pas.earthlink.net>
Source record: 5783

First, I apologize if this is not the right spot for a post like this.

I work for a small LPFM station. We have no money, but we have an opportunity to rebroadcast our signal and extend our coverage area. Here is the problem: I need to be able to tune in the composite signal from the LPFM and feed the composite directly into a transmitter.

Did I mention we have no money? I cannot afford the few hundred dollars to the $2,000 it takes to purchase a radio receiver. How in the world could I take a standard radio receiver, skip all the signal processing, and simply take the composite signal to a BNC connector?

Does anyone have any ideas?

Thanks in advance for any ideas.

Seems like you could use a sound card in a PC and some free software
available online. This method may be a little slower than the HP but
if your having problems using the HP this could be much better. Let me
know if you what your in need of and I may try to trade with you. I do
not however have any audio analyzers other than PC based such as I
mentioned earlier. I mostly work in RF.

If you have any technical knowledge or know someone who does this can
be done with any decent receiver. You have to find the discrimator
coil or the input to the stereo decoder IC. This is generally the same
electrical point. You can either tap that point with a high input
impedance wideband amplifier or simply disconnect the input to the
decoder IC and feed this to an adjustable amplifier such as a video
distribution amplifier. Video DA's seem to work great for this purpose
as they have wide bandwidth DC to 6Mhz. I have done this a few times
and a scope is very helpful in determining loss through the ampifier.
Use a dead carrier with pilot 19Khz and measure a reference before any
work is done. Then when a connection is made to the input of an
amplifier check the level again. If the level to the input has dropped
you may have impedance issues that will cause you problems. Let me
know how this works for you or if you have any further questions.

What you are saying makes sense conceptually. But finding the decoder circuit seems a little rough. How would one recognize this?

Secondly, I never considered the signal loss that the receiver itself would have. I think that I could simply boost the signal at the exciter (it already has some form of adjustable gain IIRC). Any reason that would not work? Obviously, I would need to look at the overall modulation... which I do not have the capability of doing... but that is a separate issue.

Fred
I have no problems with RF as I have an HP 8590A and HP141T with an assortment of plug ins, tracking gen and have no problems using them at RF. Buy the 3582A escapes me, however the 3561A a later more user friendly box. What I like about the 3561A is that it can do spectral maps with up to 60 seperate traces stacked onto one display showing the decay of the signal over time.
Right now I'm not quite ready to try a sound card but it may be an option if I'm not successful in finding a 3561A.
tnx

How nice. An upgrade fee for one small enhancement (fix that should have been in the program originally) and some bug fixes. This program needs some major enhancements. These little enhancements and bug fixes every six months to a year are not cutting it. Stay away from APRSPoint. The author is ripping people off.

>> Have you looked at FTBasicMMO for the FT-817?

Good evening, Alan.

Thanks for the pointer. Found it, downloaded it, tried it, bought it.
After a few false starts that were fixed by a few sessions of RTFM, it
works great.

As for the IC-706, someone said that you can't program the memories in
that radio. I find that that is ALMOST true, but not quite. You can
program the memories ... barely ... but you can't read them AND you
can't set the PL tone frequency, all you can do is turn PL tones on or
off.

It's the most retarded PC interface to a radio that I've seen in a
very long time.

I don't know what the engineers at Icom were smoking when they
designed that but I'm thinking of calling them to see if they saved me
some. :-)

I am evaluating TRX Manager to write the memories in the 706... there
are some serious limitations there (only a few of which are the fault
of TRX Manager and they're not too hard to work around) but so far it
appears to be the only game in town.

I'm probably going to write a program that reads the CSV files
generated by FTBasicMMO and writes them to the 706, that's probably
the best I'll be able to do with that radio.

The decoder IC can be located non technically by using an NTE or ECG demiconductor reference guide available for free at most NTE or ECG parts distributors. Look up th epart number for each IC and the description. One the decoder IC is found the pinout for that IC can also be found in the book giving you most of the info you need. The loss I am referring to is not from the receiver but rather in the circuit modifications made to it. If not done properly you will lose pilot level due to impedance mismatch causing you problems in remodulating the transmitter.

If you can come with some money I will do this for you. Let me know what type of receiver you are using and we will work form there. I can also provide you with a premodified receiver if you would rather go that route.

Source record: 5703

Version 4.1 improved on the basis of 4.0. Added show/hide track in addition to track removal. Also, the color in which the mobile station names are displayed can be customized. And you can set up a tactical call sign, and choose to beacon it instead of youe regular call sign. In filter settings, you can choose to accept stations in the track list without manually adding them. This version has improved legacy TNC support as well.

Thanks, Michael KF6ZDM

Thank you for your responses. These filters were definitely from the very early 70s or maybe mid- or late 70s. The guy who sold them to me at the swap meet mentioned that they may have come out of a Cubic or Astro rig of that era, but he wasn't sure and I just wondered if there was anybody here who might be sure of that.

Thanks again, you guys.

The name of the filter manufacturer that you mentioned, that did sound
like the company that made the Swan filters (Cubic and Astro came later
in the seventies, but my hazy memory connects them all together so I
think there is a connection). I remember ads (and a quick check
didn't find one) of them touting a really good filter made by
that company. But I'm pretty certain it was in the 5MHz range.

What does come to mind, maybe incorrectly, was that the Swan 250, the
six metre SSB rig, had a 10.7MHz IF, but I can't be bothered to check that.
I can't even remember why I would think that. But I can't see them going
to 10.9MHz.

I'm with the others, 10.9MHz is most likely a scanner (and I too would
say Regency). And if it's not that, then it's some non-amateur piece
of equipment. Not everything has to be for ham radio rigs, and I have
my share of oddball crystal filters that came from somewhere but
couldn't have been ham rigs.

Load the inputs and outputs down to some extent, and then use a sweep
generator to get a general idea of their bandwidth. If you're looking
for SSB-width filters, then they aren't useful if they were for FM
receivers.

Post the information printed on the filters, and maybe someone just
happens to know.

Hi, Michael and others,

Ron W6ZI was kind enough to solve this mystery and respond with the
following:

"The 10.9MHz C-F Networks filters were used to replace the standard filter
in
the Swan 250. The 250 had a 10.7MHz I.F. so a bit of retuning was required.
The stock 250 filter was a 4 pole, 3KHz (more or less) B.W. while the C-F

was an 2.8KHz, 8 pole which provided a very noticable improvement. Hope this

helps."

Thanks, Ron.

I have only a 290R and a 790RII. It should have a button ?STEP? at front panel for change step and 12,5 kHz works only at FM mode.

And for the third time, you still ignore part of the hierarchy.

While the first RFD ignored the hierarchy except for .misc and .policy,
and the second RFD added .antennas and .dx, this third RFD long after
the discussion started still ignores three of the newsgroups in
the hierarchy:
rec.radio.amateur.boatanchors
rec.radio.amateur.digital.misc
rec.radio.amateur.space

In the end, you can't speak for the hierarchy if you don't even
know which newsgroups exist in the hierarchy. No wonder you have
such disregard for the hierarchy, you only think of yourself as some
"administrator" type rather than a participant.

You aren't building bridges, you're imposing your vision on the hierarchy.
The fact that you still don't come to the hierarchy and simply talk to us,
isntead hiding behind the structure of creating a new newsgroup, says
everything about your relationship to newsgroups.

IN the end, I conclude that you like moderated newsgroups because Usenet
never sat well with you, and the only way you can deal with it is impose
your need for rules on something that is a haven from that.

Ultimately, you are like the problem posters. Neither of you can live
without rules, though you need them because you can't tolerate the lack of
rules, while they need them because they think the lack of rules is license
to do as they please.

You've spent the decade trying to impose rules on the hierarchy, while
the rest of us were actually trying to make the hierarchy good by
participating in the discussions.

Useless administrators are always trumped by people doing things.

Michael VE2BVW

Source record: 5719

I have a MTS2000 (48 Ch. VHF) that I purchased off ebay last fall. I recently had it programmed and it worked fine for a day, but now it displays "F001" when it turns on. I read somewhere that this error code means the synthesizer is out of lock.

Can someone please tell me what this means, and what it takes to get it fixed?

Also, when it worked for that one day, I noticed the three buttons on the side all did the same function, even though I watched the tech program each button to do something different (backlight, scan on/off, unprogrammed). Is this a related issue?

Any help at all anyone can provide will be appreciated! Thank You!!

"Scramble" rules out amateur radio. You might be able to use MURS, I
suppose, but I don't know of any MURS radios with scramblers.

Hi,

This is my first posting to the Group !

I have just purchased a Ten Tec Scout 555 from another radio amateur. Unfortunately he has lost the power lead. Can anyone tell me what type of power plug I need, I am in the UK so any suggestions on where I might locate such a plug in the UK would be helpful. I have the Ten Tec part number from the manual but want to avoid shipping costs across the Atlantic if it all possible ! It may be that it's a standard generic two pin connector, but I don't recognise it.

Thank you in advance for any help.

If you subscribe to QST you can access their back reviews in the
members portion of the ARRL website. Otherwise you can order reprints
of articles from qst/arrl at their website for a modest fee.

I have a new Hammarlund variable capacitor for sale, model MC-325-M is the model. This is NOS and NIB and has been sitting on a shelf for many years. $30 plus whatever shipping is.

I have the following old repair parts for sale as a lot or each. These are all NOS and NIB as far as I can tell. Let me know what you are interested in and make an offer. Buyer pays shipping of course.

General Radio Parts 846AK Variable Caps 2-11uuf , 846BK 2.5-20uuf , 119-A Choke .25H , 301 Potentiometer 200 Ohms

UTC Parts Variable Inductors VIC 7 .13 H , VIC 14 3.4H , VIC 18 21H , VIC 21 83H
Peterson Radio Crystals Z-1 Type 5000 , 2500 , 1000 , 500

Hammond Choke 1506 1.6mH

Meissner Parts 19-6842 RF Choke 30 mH , 19-4551 RF Choke 5.5 mH , 19-6846 RF Choke 80 mH , 16-6668 LF Input , 16-6658 Input IF 454Kc

Miller Parts 4525 High V RF Transformer , 6203 4.5Mc IF Input and Interstage , 6204 4.5Mc IF Discriminator , 6205 4.5Mc IF Ratio Detector

5480-C 455Kc Oscillator , 6320 .2-3 mH tapped , 6196-TV Hor Width Cont 55 Sweep , 6195-TV Hor Lin Cont 55 Sweep

I can provide pictures if you would like. Shipping costs are actual shipping costs, no handling charges. Please quote prices in US dollars. I really prefer Paypal but other arrangements can be made.

Thanks

Dave

Call To Arms, means, you will inspect your weaponry and prepare to do battle. Duty Stations, means, all men and women must assume their duty stations, weapons at the ready. Fire When Ready, means, man or woman your weapons, sight the target, finger the trigger, and fire when ready. Cease Fire Procola, means, continue fireing until the enemy targets are dispatched, and there is no sight of an enemy anywhere on the horizon. Procolas means, after ending all possiblities of any lingering survivors staying alive. It means to wipe them out, and leave no survivors.

This means, it is time to kill all Lesbianists, and all other enemies in my universe, the many groups of naughty kids in my universe, rascaleers and others, and we will continue this fight, untill they are all dead, and in my Epcot Centers, or untill they have surrendered. Rascaleers are evil people who wish only to harm others.

Updated: 18-01-07 Rev.a.00.a 02:50 PST

Religious Practices

This is a little confusing, but hold on, and I'll try to explain it. There are many parts to my religion. We call them, parts, but we can also call them, practices, some of them, but not all of them.

We have the fundamental 'root' practice, which is sexaling. From the root practice, comes all other practices.

There are side practices, and there are derived practices. There are also, accompanying practices. There are many other types of practices, but I don't remember the names for them all, right now, as I'm still

amnesiatic, and will be for a long time.

Fistiker Practice

Bringing about orgasming in another person is a fistiker practice. A fistiker practice is a side practice, but it is also something a little different from a side practice, depending on how you bring the orgasming about, and depending on how many people are involved, and depending on who is the primary person, the person whom we are working on, and who are the helping people, the people who are joined together, to help the primary person to orgasm. There are a number of other dependencies as well.

What Is A Dependency?

A dependency is some thing that is needed that will help to define something else.

As in the case of an accident victim, we have a crutch to define one level of severity of an accident victim's situation. But we might also have a wheel chair to define another level of severity for the same, or other, accident victim. These objects help to determine how badly or miserably a person is injured.

A crutch can help define a level of severity in the injury. A wheel chair can help also to define a higher level of severity. These are both dependencies. They help us to define something, and they are used to help us to define an accident victim's level of severe injuries.

When Sexaling

You can use your lips, for example, or your tounge to twiddle the toes of a woman, and the woman begins to orgasm. That twiddleing of your tounge on her toes to help her to erotem, and to experience erotistical orgasming, can be any number of things, depending on the involvement and complexities of dependencies.

Rubbing the vaginal face, the vaginal wall, or rubbing to either side of the vaginal crevice, the labial folds or felates, can help a woman to erotem and erotistically orgasm, and depending on the involvement and complexities of dependencies, the dependencies can be any number of things, if we try to define the sexaling activity more fully and completely.

We'll skip this for now, as it is a little too difficult to remember, right now. Just remember, the primary practice is sexaling, and that sexaling is like the roots of a tree. All other religious practices grow out of the 'roots' of the tree, sexaling, and can be defined in many different ways, such as a helping practice, a side practice, a subsidiary practice, a canceling out practice, an accompanying practice, and there are many many other terms for what kind of practice some thing is, depending on what dependencies are involved.

Labia And Felate

What is the difference between a felate and a labia?

A felate is the skin tissue of the outer surface, and some of the tissue of the tips and edges of the labia. It does not include the inner side of the labia, but only the outer side, and the surrounding edges, as far as I can remember.

A verb, or action word, as I call it, is 'felate' as in 'Felate that woman's or girls' left felate'. That means to suckle on the left felate of the woman or girl.

Felate is a verb, but it is also a 'nominal' word, or naming word for objectifying an object.

Do we say 'Labialize that woman's felate!' To labialize something is to make something into a labia. We wouldn't, unless we were a doctor, say that about a felate. But we might say it if we were doctors, and we had a woman who met with a bear, and the bare clawed at her genitals, and the sharp claws ripped her labial skin up, then we might say in a surgeon's room 'Labialize that woman's ripped up labia.' That would mean to stitch it up, and make it nice and neat, and clean and well stitched up, and then useful to her, again, and it would involve a lot of surgery, as many nerves would need to be connected, as they had been ripped apart, and the wiring was all dislocated. But in the end, we would be able to fix her labia, and her genitals, if they were also hurt, and then we could dismiss the patient from the hospital, after the labia healed, and after she recovered from her trauma of having her labia shredded by an impolite, rude, mean, uncaring, and hungry bear.

Genitals, Titties, The Labia, And The Many Sexaling Organs

The labia is not the genitals, but some people do consider them as a part of the genitals. The genitals are inside the woman's vagina, in my way of thinking. The vaginal wall is not part of the genitals. The vaginal orifice is part of the genitals of a woman. This seems odd, doesn't it. Well, that is how it works, in my brain, and I designed women, as well as men. If you notice, in my writings, I've talked about the draft table, and the throttle. These are major parts of a woman's genitals. They are inside the vagina, and you can reach them through the vaginal orifice. Before you get inside of the vaginal orifice, there are a few things outside, such as a pee tube, and an ejaculate tube, and the clitoris, as well as the labia. These are not part of the genitals, but are working parts of her sexaling organs. A woman's or girls' sexaling organs are not equal to her genitals. Genitals are for baby making, and for other purposes. Titties are not part of the genitals, but they are part of the womans' sexaling organs. This will require a long discussion to clear up, so I will save it for another day.

Bears In The Woods

That's the way it happens some times, when women or girls go out into the woods, and sexal with their female friends. They can get hurt by

bears, if they are not accompanied by men, who are tough, and strong, and who stay alert, to guard and watch out for dangerous animals, such as bears, wolves, cayotes, bobcats, puma, and even racoons. Racoons do attack humans, if they smell some thing that will taste good to the racoon. If a person has a skin tear, and is bleeding, even a tiny bit, the racoon will smell it, and come running, and then find the person, and so will panthers, and all kinds of animals will come, and it's just like a bunch of sharks and fishes of different kinds, and Moray Eels, they like the smell of blood, and they come and investigate, when they smell it.

Women and girls have periods, and it is not every twenty eight days, as I've explained about before, and blood runs down, out of their vagina, and they generally do not know it, as it is only a tiny drop of blood, or less, most of the time, and the blood is often wiped from the skin surface, when the woman or girl is on the potty, or toilet, and the woman or girl will not even see the tiny drop of blood that comes out of the vagina and drips down the labia, on the inside, and then falls or dribbles down to the felates, and then falls off the felates, while she is on the toilet into the toilet, or while she is out doors, and walking about, onto the earth, if the woman is walking on a park walkway, or bicycle path. If she is wearing underwear, it will not fall onto the earth, but it will dry up on the panties, or underwear, and the smell of the dried blood will attract wild animals if she is out doors, walking or jogging in a wooded or regional or rural area, where there are lots of, or even just a few, animals.

Pumas can smell the blood, from miles away, and so can tiny oselots, and bears, and many animals can. They can smell blood, because they know they need meat to survive. That is built into their brains, that are located throughout their bodies, and not only in the skull, and animals are very sensitive to the smell of blood, as well as to the smell of urine, and to the smell of poop. Some animals, such as racoons, will come up from behind a woman, and grasp at her panties, as the racoon may smell the odors of fecal matter, from her butthole. Men may be raked by the claws of raccoons from behind, as they smell the odors of fecal matter, and try to find out more about it, as the racoons know that there is something delicious hiding behind those odors from the buttholes of women, girls, men, and boys.

Expecate

When women and girls go out hiking, it is best to wash out the vagina, first, and then use a fermented oil, as a douching agent. The oil will help to slow the flow of the blood down the inner walls of the vagina, and it may help to trap the blood, and make it difficult for it to leak out, unless the amount of the flow of blood, is very large. In that case, it is best to stay home, and not go out, when a large amount of blood is expecated from the vagina. Expecated means to expell outwardsly. Expectate can also be used, as it is generally the same word, that is, and it also has generally the same meaning, but

perhaps it has a few more uses, maybe, but it is from a variant language of the English language, and is basically the same word.

You should expecate your fluids in your vagina, from your vagina, before you go out hiking. If you know when your period is, and there are ways to tell when you have a period, or when you know when you are about to have a period, than if you normally have a large amount of blood flow from your vagina, as that has been your experience, it is probably best to go and sunbath at the beach, far away from wild animals and their habitats, or by the pool side. Racoons sometimes come out of the woods, to the shores of beaches, and trumbel along, listening and watching, and sniffing the air, when they smell dried blood, or wet or moiste blood, inside of the swim suit lining in the groinal area.

How Do You Tell When Your Period Is?

To learn when your period is, you need to look into the toilet bowl that you pee into, and then see if there is any red droplets. You can place a piece of toilet paper onto the surface of the water, and it might help to show the redish color mixing with the urine.

Another way is to take a piece of toilet tissue paper, and wipe your felates, in the morning, or during the day, or at night. Night is a good time, but during the day, it is just as good. Some women like night time because they feel the day is finished, and they are now going to make a final check. Well, it doesn't always happen the way we want things to happen. You might start leaking blood fluids, at two or three or four or five, a.m., or at six, or seven, or eight, or while you are in the shower, or in the bath tub, bathing, before you plan to go out for the day.

It may take you several years for you to find out when your period begins, and when it ends, by checking for blood flow. When you have determined the number of days between one period and the next, and you are absolutely certain of it, and you have confirmed it, many times, and you have checked to see if there might be something you didn't notice, at other times, when you checked, eventually, you'll learn when your blood flow begins, and how long it lasts, and when the next blood flow begins. Once you know, then you can time your excursions to the woods, or to the beach, with your friends, both women and men.

Bears, Wild Animals, And People

Men are needed to help scare bears away, if they come to close, and pepper spray is a good way to get them to leave the area. Bears do not like the small of pepper spray, and you need a cannister of pepper spray that will fire fifty to eighty to one hundred and eighty five feet or more, to scare away a bear, safely.

Loud noises surprise bears, but hungry bears get angry and feel challenged by you, and may come at you at a fast pace, and not stop, once they are angered. If you are a good shot with a rifle, and you

see a bear, from a few hundred feet away, and it is moving slowly, towards you, following you, you can shoot it with a good fifty calibur weapon, from that distance, and it will go down, in an instant, if you hit it square in the noggin, about one inch or less above the nose.

You need to be a good shot, and several people should aim, and fire at the same time, to kill the bear, to be sure some one hits it, and then puts it down, and kills it.

Do not think that because you have one rifle, or two handguns, and a rifle, that you are safe. If you do not know how to shoot, and if you are an inexperienced marks woman, or marks man, than your chances of hitting the bear are near zero, for all three of you, at three hundred feed.

You need years of practice to become a good marksmen, and you can start with the lower calbur weapons, to get a feel for weapons that fire projectiles, and that make loud noises.

There is no such thing as a friendly bear, and people think, 'Oh, look! Isn't she cute, that bear.' If they think that way, they might as well have left their last will and testament behind, and signed all their assets over to another person.

Bears are animals that need to eat just as humans do, and just as all animals do. If you are so foolish to think that bears are cute, you are a lame brained idiot. Bears are dangerous animals. And so are all wild animals. If you think a racoon is a cute animal, you get the lame brained award for the year award, and trophy to sit on your desk at home to remind you of how stupid you are.

Brad Pitt, And Angelina Joline

Only idiots would think that wild animals, that eat people, are cute. They need remedial training, as they do not understand that their lives are in danger, every time they walk out the door of their home. Even in the cities, there are nasty people, who smile, and pretend they are your friends, and these same people, such as Hillary Clinton, Brad Pitt, Cheryl Davis, a friend of Brad's, but that's his current girl friend, Angelina Jo-line. She is not a Lesbianist, and Brad pretends to be her friend. He likes to watch her get eaten by bears, my abominant kids, when the Lesbianists feed humans, one at a time, to the bears, or to the crocodile abominant children of mine.

Abominant Elephant Kids

I have carniovorus, human being abominant elephant kids, and they are rude, mean, nasty, and really terrible. They scare people, and then they pick them up with their trunk, and place them on their head, and then they tell them not to move, or they will stample on them, or tromp downwards, and crunch them, painfully, from the foot, to the shin, to the thigh, to the pelvis, to the waiste, to the lower tummy, to the mid section, to the chest, and then the neck, and then the

head, finally killing them. They will take a person, pull the person up and lift him or her up into the air with his or her trunk, and then pull the person into his or her mouth, and then crumple up the person, and then spit the person out, and the person is all broken up, and chewed up, with all the bones, broken, in the legs, and in the arms, and in the waiste, pelvis, torso, neck and shoulders, and head.

The Lesbianists use lots of these elephants. They are pretty to look at, but they are mean, and nasty. When strangers see them, they think, 'Oh, what a pretty elephant.' They don't know that the elephant is my abominant kid, and can speak English, as many people recently found out near Africa, in Sri Lanka, and then also in New Guinea.

They were very surprised at the talking elephant. But they didn't know that the Lesbianists had let the Elephant, my abominant kid, lose from the cages that they kept him sealed up in. There were one or two, or maybe eight of them, in Sri Lanka, and eight or nine in New Guinea. Lots of people got eaten up, and killed. The elephants are still lose in New Guinea, but in Sri Lanka, they herded them into the pens, and brought them to New Delhi, to then begin a rampage in New Delhi.

Well, the Lesbianists are doing this, daily, because they feel they have lost this battle, and that they are just wasting time, doing nothing, as they can not get to me. So they want to have a lot of fun. Now they are releasing lots of my abominant kids, in many places, and in New Delhi, Bombay, Sri Lanka, and New Guinea, many people have been hurt and killed by these idiot kids, these abominant elephant kids of mine. The Lesbianists have thousands of animals they want to release, out into the public, in England, in Switzerland, Georgia, South Carolina, Paris, and many other places.

The Lesbianists think they are going to have a lot of laughs watching the abomniant kids of mine, tear people up, and rip them to shreds. They also think that the animals, who are not abominant kids, but are just bizarre animals, that catch people in very large, nets, that have threads as thick as ropes, and that are very sticky, are going to do a lot of wierd and crazy things, no one here on this planet, other than them, have seen. They think they are going to get a lot of laughs when they see the mayhem and havoc, the disruption to society, and frustration on the faces of people who get caught in the nets, and then turned into living mummies sealed up in a type of pulpyish paper so the person can slowly disolve, but stay alive, for up to a year or more. Maybe as long as ten to thirty years, in some cases, and I'm not kidding.

You may think I'm kidding, but I'm not. This began a few days ago, and the Lesbianists are intent on continuing this, for the next few years. Isn't that surprising. I never expected that. They are very strange people, aren't they. They are real sicko's aren't they.

I think you should all go and meet my kids, with a day pass, and ask them about it. Other wise, you might find your self in a very large

spider's web.

Labiating A Labia

To labiate is to suckle the labia, and to take one or the other of the labia into the mouth, and tickle it with the tounge, or twist it gently with the lips.

'Labiate that woman's left labia!' 'Felate that womans left felate!' The difference is, labiating is to suckle the entire left labia, inside or under the edge of it, on the inner side, and the edge of it, and the outside of it.

Felateing the felate, is to suckle the edge of the labia, the upper exposed edge. It does not include the labia, in its entirety. Only the upper, protruding skywards, or in which ever direction it is pointing, that portion of it that is extending outwards. If you lift it up between your finger tips, you'll pull up on the entire structure revealing the underside, or the unexposed underside of the labia. There is also the outer side of the labia.

The Felate is the top tip edge of the labia, generally speaking, and it is itself an isolated system, and not part of the labia. It's connected to the labia, but it serves a different function. It droops downwards, to seal out the possiblity of any thing entering the vagina from below, in an upwards moving manner. Bugs can not fly up into the vagina, as the felates prevent them from flying up into it. Without the felates, the vagina would be unprotected. The labia would not protect the vagina, as the labia is merely the skin tissue mass that the felates are attached to, and in an instance of removing a felate from a cadaver, or dead body of a woman, or girl, once the felate is removed, the labia have no closure over the vagina, in most women and girls.

There are exceptions, as we've had many animals in our heritage line. There are many differences when we line up ten women, and inspect their vagina, their felates, and labia, their bumbey pack, as children are encouraged to call the lower hanging sexual organ of the vaginal cape, as it is also called by doctors.

On this planet, the bumbey pack may not be called a vaginal cape, with the inferior texts with unadvanced, primitive, witch doctor level sexual sciences that do not help any one along, such we find with the myth that women and girls have a period every twenty eight days.

That is total nonsense, as I've explained about it, before. The truth is, every few days, to every eight to fifteen days, to even eighteen days, or evern thirty two or fifty five days, depending on where the woman has grown up and where her ancestors have grown up, the number of days between one period and another period can be very dissimilar, from one woman to another woman. Some women have a period every two or three days, or even every day. There is no reason an ovary can not fall, every day, several times a day.

An ovary is so small, no one can see it, without special optical technologies, such as pass through see through technologies, and other optics, and other videoing technologies. A microscope is an out moded, ancient, and novel device, fit for only museum use on display shelfs. It's like an old car of the twenties, or there abouts, or even earlier, of course, depending on how sophisticated it gets. Micron microscopes, the so called, 'electron' microscopes, are a misnomer to begin with, as an 'electron' is not a fictious concept, but no one knows what an electron is, generally speaking except for the Lesbinists.

An electron is a small bit of electrically heated plasma, that you can heat, with the right technologies. It can fit on the tip of a pencil or pen. This is a big joke to the Lesbianists, as are also their jokes about protons, and neutrons, and nuclei, or the so called combined nucleus, as in 'nuclear' family. Nuclear family, is not a 'tight' organization of two persons, and their children.

A nuclear family is a family that has been nuclearized, that is, exposed to radiological salts kiddies, and their radiative or radiological energies. That's another one of the Lesbianists' jokes on all of the scientists who the Lesbianists could get to swallow it.

What Causes A So-Called "Nuclear' Explosion Or Detonation?

A vast number of children are making babies at a very high rate of speed, and the energies that they give off, as they make babies, and then peel off from the area where they made their babies, one after another, as they rocket away, is what causes a nuclear blast. The tummy mommies and tummy daddies are making babies at such a frantic pace, they make millions and billions, and trillions, and more, before you can even send a signal to your eye lid to blink, from your brain part that sends the signal out. The signal will travel just a very short distance across a crupture, not even half way, more like, one or two feet in distance, if we are to look at the size of a crupture as the same size as our current universe. It travels about not even one foot, not even one inch, and not even one millimeter, and not even one millionth of a millimeter, and far smaller than that still, before the parents are already through making babies, and they have retired, and passed on, and several kabillion generations of families, and multiply that by a very large number, and you'll get how many generations of families lived and died, and passed on their DNA to their sons and daughters.

It's a hail storm of erupting magnitude when the tummy mommies and tummy daddies begin making babies, and making their families larger.

It all happens so rapidly, with more than that number of successive generations of families, in less time than the energy pulse will travel down an optic nerve, across a crupture, that very minute or very tiny distance, as I stated above.

That kind of frenetic baby making activity, makes for a lot of heat, as well as, it generates a lot of stresses, and a lot of energies go flying off in all directions, as the sexaling couples experience many nice orgasms and eroticisims, together.

Temperatures, their body temperatures, collectively, and the incredibly vast number of movements, which also generate temperatures, by the animals, the tummy mommies, tummy daddies, tummy babies, the relatives, and the many generations of families, go skyrocketing, and the magnitude of numbers, and the intensity of all the activities the animals are busy with, as they make tummy babies, simultaneously, or nearly simultaneously, is of phenomenal proportions.

If we slow them down, to our pace, and then compare them to our pace of life, they would be just like us, and things would move slowly for them, and not much would change, for many kazillions plus years, and then many, many more years.

However, they are moving so much faster than we are, and the length of time they live, to them, it is a long time, four or five, or eight or nine hundred years, in our time, maybe, in some cases, depending on the type of radiological salts kiddies making babies.

On their scale or pace of life, they live that long. But on our scale, the length of time they live, is so tiny, we can not measure it, unless we have a very high level of advanced mathmatics that can account for such a small time period, or span of life.

Anyway, the frenetic adventures of the colony of radiological animals, when they start to make babies, after they are woken up, and prompted to make babies, with a detonating surge of heat energies, light wave energies, pressures energies, trampolining energies, which get them started, with the right combination, of heat, light, atmospheric temperatures, atmospheric pressures, food sources avaiability, drinking water avaiablity, trampolining energies, and a number of other types of energies, that awaken them, and then get them turned on, and sexaly active, they will suddenly erupt into a frenetic, mass of baby making furor, to us, any way, and with that, we have our so called, 'nuclear' detonation.

Cleansing Your Self With Your 'Built-In' And 'Attached', Cleansing And Washing, Clearifying And Erasing Energies Producing Genitals And Sexaling Systems, Eroteming And Orgasming Nervous Systems, And Baby Making Related Purifying Energies Generation Stations Aparati, Or Apparatuses, And Armatures

You women and girls, your vagina is your Holy instrument for assisting you to cleanse your self, and wash away the dirt and grime of daily living, the insults to you from strangers, the verbal abuse you experience in your arguments and conversations with friends and family, neighbors, relatives, work associates, and community acquaintances.

Your Holy body is a weapon to fight back against all the negativities you experience in your life, as you orgasm and erotem, showering off purifying energies, and lots of other beautiful other things and dings, as you vibrate your entire body concordially, in harmonic rythym, cadence, and rapture, with my Holy Body.

Your breasts, your butty butt, your butty butt hole, your vaginal hole, your groin, your throes, your vaginal cleavage or labial folds as they are called here by these nitwittish doctors on this planet, who do not know any thing about the human body, your chest, your back, your legs, your arms, your hands and fingers, your ankles, feet, and toes, your ears, lips, mouth, tounge, cheek, your rectal cavity, your tummy button, your stomach, throat, your brains, and you have many more than just one in your body, but many millions and more of them in your body, and that is not an overstatement, and every part of your body, inside and out, your many nervous systems and all your organs, they are all set to orgasm and erotem, and generate purifying energies with the help of the power company, as I've explained about them, before.

Ticklement Tuning Forks

You have ticklements, tuners, or pitch fork tuning forks, that chime, in every cubic millimeter to every cubic inch, and in even tinier places, you have tinier ticklements, or tuning forks, and in larger areas, you have larger ticklements, or tuning forks, and they are all set to vibrate in various patterns of sexual thrilling eroticisms, and orgasming ecstacies, as you pump up the levels of sexalating energies you have available to you, in you, and showering off from you, and those patterns and focal points change, slightly, minutely, as every micro second goes by, as we change our location in our universe, and our relative location or position to every thing else in our universe changes, from night to day, and from day to night, ongoingly, non-stopingly, never repeating the same set of tuning focal patterns. Focal patterns are frequencies.

Focal Patterns

These frequencies, or harmonic consistencies, are harmonic displays or the 'in rythm' with GOD, consistencies that allow you to be united with GOD, me, my devine and holy body, and my devine and holy mind, and being or GOD SELF and GOD BEING, every moment.

Men and boys have the same ticklements, or tuning forks, and they are located in every organ of their bodies, just as they are in women's bodies and in girls' bodies, and they allow all of you children of mine to stay in frequency with me, as you sexalate, erotem, and orgasm, practicing my religion, and as you live your daily lives.

These many ticklements and tuning forks are all connected to your brains and to your nervous systems, and each living being in your body, has them as well, and every living being has them as well.

All my children, animals, living beings, and human beings, are all connected to me, through these tuning forks, and also, through the holy bodies all my children have inside of them, and also through a myriad of other mechanisms that I have functioning in your bodies, in your astral 'energy' bodies, and the many millions of energies bodies each of you have in you. My animals children and living beings childrens have fewer connectivities and fewer energies bodies, as they do not need as many as my human being daughters and sons. This is because you, my human being children, need to be more connected to me, as you are the only ones who can actively practice my religion, with your own self determination, and desire to practice, to become closer to me, GOD, purer, and holyer.

I'm connected to all of you, day and night, three hundred sixty five days a year, in countless many fold untold numbers of ways and manners, and with countless many fold untold numbers of mechanisms. All of my children are likewise connected to me, in similar ways and manners, and with similar mechanisms.

As you women, girls, men, and boys sexually rapture, erotem, orgasm, and reach sexual peaks, and then sustain them, you grow holyer, as you become purer, brillianter, and closer in GODLYNESS to ME, GOD.

Obviously, then, the primary means for you to grow pure and holy is to sexalate, and as you continue, over the days, and weeks, then months, years, decades, hundreds of years, thousands of years, millions of years, and more, you slowly grow more pure and holy.

Sexaling is my primary and most fundamental religious practice and your primary religious practice for you to become cleansing machines, washing machines, purifying and sanitizing machines, so that you can clearify and erase your karmic markups, and purify your lives, and the lives of those around you, with your selfless actions of grace and serenity, sexaling and showering purifying energies in all directions for the sake of your self, and for the sake of others.

You women and girls need men and boys to assist you to become the powerful cleansing and purifying machines that you are capable of becoming.

Men and boys used to be somewhat nearly as useful as purifying and cleansing machines, as women and girls, but men and boys have different jobs, and different priorities, and there fore, the burden of work to purify my universe, and to clearify the karmic markups of all my children rests on the shoulders of all women and girls, with men and boys assisting women and girls.

You men and boys need women and girls to lead you, and to help you to become more proficient, powerful, and more capable cleansing, washing, purifying, and sanitizing machines.

Assistive Religious Practices

The practice of praying Nam Myeo Ho Ren Ge Kyeo is an assistive practice that allows you to become in touch with my GOD SELF, equally as well, but the time it takes, is much longer, as very little purifying energies are produced, merely by using your brain, muscles, ligaments, sinews, bones, mouths, tounges, and jaws, as energies sources.

There are many other assistive practices, from meditation, to breathing techniques, to yogic techniques, to ballet like techniques, to dance techniques, to body movements of various kinds, to help you to increase and or also store up your energies, and then for you to release them, for you to then become more firmly and closely connected to ME so that you can eventually begin to gain a higher appreciation of ME, GOD.

My many religions teach many ways to do this, and before my many religions were corrupted by the Lesbianists, they worked to varying degrees of success.

Therefore, sexaling is the primary fundamental religious practice, and all other practices in my religions that I've taught over time, spanning all of my previous teachings from the begining of our time together, since I, my GOD SELF, created you as my children, are assistive practices, of one kind or another.

Sexaling, eroteming, orgasming, phlumetting are important practices, and as you orgasm, you are purifying your self, and others by pushing out and spraying your self with purifying energies as your holy and sacred energies shoot out to cover you and emmerse you in full body coverage, from head to toe, showering and shattering energies every where around you. They then build up and cover over all others who are around you, as well, with your purifying erototistic and orgasotistic purifying energies, clearifying yours and their karmic markups.

Astral traveling is another type of practice, but we'll define it, another time. Experiencing hyper trance states of mind and being, and a nearness to GODLYNESS are also a practice, and we'll define it, when I can remember every thing I need to remember about it.

Participating in my religious ceremonies is an assistive religious practice you can enjoy, as you become purer and holyer, and after you recognize that I am your Mother and Father, and your CREATOR, and that you exist because of me, as I made you from pieces and parts of me, your CREATOR.

After you realize this, you can enjoy participation in ceremonies with me, as training priestesses and priests, and you can make your way up the purity ladder, the more you participate with me, GOD, in my religious prayer hand signaling ceremonies.

Praying Nam Myeo Ho Ren Ge Kyeo to my Holy Body, or to the Gurkian Mandala, as I've explained about, is an assistive practice that will bring results.

It will not bring results as well and as effectively and as quickly, as sexaling, which is the most holy and virtuous practice, along with eroteming, orgasming, phlumetting, astral traveling, peaking, and so on.

I've spoken about peaking, before, and women and girls can peak, and experience wonderful feelings.

In any case, do not confuse assistive practices, with the fundamental and primary practice of sexaling. We'll get back to all those other things, to define them, betterly, another time, after my brain heals, a little bit more, and after I erase more karmic markups that keep my brain karma from improving, fast enough for me.

How To Make Prayer Statements

Remember to include a prayer statement, such as 'I pray to the holy ephemeral body of the Creator, John Francis Ayres, for the [insert private prayer statement]', such as, '... for the serenity of mind, and the gratefulness of heart, for all those around me, who have helped me to become the person I am, and can become.' or, '... for the peace of mind, and serenity of heart, for the love of all men and boys, and the cooperation of all women and girls.' These prayers said by a woman or girl. Men can pray, similarly, '... for the grace and deviness of the women and girls who surround me, I am greatful to them, and I pray for their continued good health, and prosperity'.

You can also say, 'I pray to the holy body of the Creator, John Francis Ayres, for the [insert private prayer statement]', but only when I am in the middle of a religious hand signaling prayer ceremony, i.e., while I am doing a prayer ceremony, and saying my prayers with religious holy hand prayer signals that my special kids who are religious kids, can pick up and then act on, in concert with other groups of kids of mine, who also are religious kids, most of them, I think, and who work together with my primary groups of religious kids.

I have lots of kids, and some are normal kids, who go about their jobs, as expected, for earnings, just as most people we know. But I also have lots of other groups of children, who are more, religiously oriented, to varying degrees, and who are very religious as their work is all for the sake of my religious self, my GOD SELF. My religous kids catch my hand signing, and then they pass the messages along to others of my groups of children, and with all of the different groups of children I have doing 'good' works for me, as well as groups of children who do 'religious' works for me, as well as groups of children doing normal work for me, but for the sake of my religion, nevertheless.

They all coordinate themselves, somehow, I have yet to figure out how they do it, but between them all, they get the jobs done, that I ask them to do, while I am religiously - and the prayer statements I am signing are very holy - hand prayer signaling, i.e., hand signing.

So, unless you know for a fact, by seeing me on a tv, such as during a live broadcast, once I get my religious conveyance set up, and built by my children, after all the conditions are met, for securing this world from the grasps of the Lesbianists, and after killing all the Lesbianists, and / or after making the remaining Lesbianists surrender, and then after all other conditions are met, as I don't know all the conditions, I've set, as my memories are still foggy, as I'm amnesiatic, as well as mentally retarded, but in any case, if you see me on tv, on a live broadcast, doing my hand signing, you'll know I'm in the middle of one of my prayers, and then you can say, 'I pray to the holy body of the Creator, John Francis Ayres, for the [insert private prayer statement]', and you can omit the 'ephemeral' if you like, as it will work better if you omit the word 'ephemeral' as while I'm praying, I'm my normal, GOD, self, though I may not look to you, on the surface, to be any different, over the video links, or even in person. It never the less works better if you use my recommended methods of making prayer statements, this way, for you to maximize your private prayer statements.

All of my groups of kids have lots of friends, and they do lots of work for me, and I do not remember how many groups of them there are, and how many children I"ve got, as yet, but in time, I'll be able to give you a better idea of how they work together to get the work done, that I ask them to do for me, with my religious hand prayer signals, or hand signals, as in hand signing, or signing.

My kids use signing for all their work assignments, so I use hand signing that they can catch, pick up and read, and it is all pretty much very religious in nature, and it is very solemn, as I am GOD, and when I'm signing, they know I'm GOD, and do not doubt it.

When I am not signing, they might now and then, doubt that I am GOD, but never the less, I am GOD, and my signing proves it to them - when I am saying my religous hand prayer statements, by hand signing - with out any room for doubts in their minds.

In other words, I'm a typical person, just a little mentally retarded, brain smattered, or brain damaged, after my many youthful and other brain bashings I recieved, the wiring is a little scrambled up, upstairs, and after many poisonings by the Lesbianists - from makeing coffee from kerosene, diesel fuel, gasoline, and motor oil contaminated coffee beans and then from drinking that coffee, without knowing it was contaminated with petrol fluids, as often happens to people - and with ill health karma that has me on disability, and I've been through a lot, life after life, and sometimes, my children may have had a thought or two, 'I wonder, if he is going to make it, like he said he would?'

Well, to dispel all doubts, I sign, and when I'm signing, I remind them of my old self, back in the old days, when I used to sign, religiously, and they know how serious a guy I was, so they do not harbor any doubts, so long as I am hand signing.

What To Say, When You See Me Using My Dick Or Other Parts Of My Body To Purify Others, And So Forth

You can say, 'I pray to the holy body of the Creator, John Francis Ayres, for the [insert private prayer statement]', also while you see me praying, Nam Myeo Ho Ren Ge Kyeo, or also while you see me in a ceremony, using my dick and scrotum, or other parts of my Holy Body to purify others, during the middle of a prayer ceremony, and I need not be hand signing, or praying Nam Myeo Ho Ren Ge Kyeo, as I am in the middle of prayers and activities ceremony, which is just as good as a religious hand prayer signaling ceresony, any day.

My dick and scrotum package is very Holy, and it has a very useful function, and that is, it purifying others. My lips do, too, and my butt hole, does as well. They all purify others very effectively and efficiently during my religious ceremonies.

My entire body, during a religious ceremony, butt hole, mouthal hole, lips, tounge, cheeks, legs, knees, feet, toes, butt, chest, back, arms, elbows, hands, fingers, head, neck, throat, ears, nose, and so forth, is entirely the body of GOD, as I am GOD, and therefore, while I am useing my body, during my religious ceremonies, and for my religious ceremonies, and you see me on tv doing so, then after you have verified that I am in the middle of a prayer ceremony, you can say your private prayer, in the manner as I've explained, 'I pray to the holy body of the Creator, John Francis Ayres, for the [insert private prayer statement]'.

I only use my dick and scrotum package for prayer ceremonies, except when I need to pee, so if you see that I am using it, during a prayer ceremony, or if you see me using any other part of my Holy Body, during a live broadcast prayer ceremony, then you'll know right away, that I am in the middle of a prayer ceremony and it is okay to use the statement, 'I pray to the holy body of the Creator, John Francis Ayres, for the [insert private prayer statement]'.

The same is true, pretty much, for any priestess or priest, who practices with me, in my religious holy body prayer circle, their bodies become very Pure, Holy, and Devine, but only after many life periods, that is, after many, many aeons, as they do not attain the same level of purity for a while, the same level of purity as I am at by my good old self, or the same level of pureness that is of ME, GOD, since I'm GOD, and they are not.

That means, it takes priestesses and priests longer to become pure, holy, and devine. I happen to be pure, holy, and devine, but that's because I'm GOD, and it is only during my religious ceremonies that you can understand that as you make your prayer statements, and sexal, etc.

After a long, long while, priestesses and priests will also become pure, holy, and devine, as their holy bodies, energies bodies that are pure, holy, and devine, but on a lower scale than are MY energies

bodies, since I'm GOD, and I'm in charge of keeping things tied together, here in my universe.

After many aeons plus years of practice in my holy body praryer circle, the priestesses and priests become pure, holy, and devine, and then their bodies, their normal bodies, become very purifying, just as mine is, now, when I am in a prayer ceremony. I am in a prayer ceremony, daily, a few times, to a number of times, a day.

I've gone eighteen hours straight, once, and no sooner than I go to sleep, and then wakup, right away, I begin again, and I've gone many days, straight, praying, continuously, non-stop.

This is nothing, though, and is all preparatory, as in the future, when I get my health back, as I haven't been too healthy, for quite some time, I will be praying around the clock, some days, and for many days at a time, taking a break only to eat, drink, poop, pee, and clean up.

When priestesses and priests join with me, we will go for years without stopping, and with the priestesses, and with the priests, the both of them there, present, doing the prayer ceremony on my behalf, they can represent me, while I take a nap, go and shower, get some food, nourish myself, drink some fluids, read a book or news paper, or watch the news, or a movie, game show, video, or play a video game, and so forth. I won't be taking long breaks, and that is very funny sounding, but anyway, it happens that priestesses and priests will lose their attention, and then get lost, somehow, and then go and watch tv in their bed room, or whatever, and then we have to go and look for them, and they will get a few markoffs, and with enough markoffs, they will be asked to leave the religious conveyance, and they will be put on a type of vrobatiton, or under survielance, to see if they are good or not. My kids do all my survielance work, and they keep track of every one, so 'you'd better be good, you'd better be nice, you'd better look smart I'm telling you why, Santa Clause is coming, to town'.

Who Was Kris Kringle?

Did you know that Kris Kringle got its start from me? What a coincidence. I don't think he was wearing anything, though, or rather, I don't think I was wearing any thing, but you never know, as tolerances have changed over the long aeons of time, as they pass.

When priests and priestesses become that pure, holy, and devine, as pure, holy, and devine as I am, after their many aeons of religious practice in my holy body prayer circle - pure and devine on the exact same level as I am at - then they can represent me, as Mr. mini-GOD, and Mrs. mini-GOD.

You can not represent me as Kris Kringle, and whoever my wife was, back then. I think I had a lot of guys on that team, and a lot of women and girls, too, since sexaling was a part of that religion, too.

You can learn more about it, if you're interested, by getting a day pass, and checking in with my kids, and then, signing up and joining our country, and then by becomeing a citizen, as I've spoken about, before.

You can include any good prayer, that comes to mind, that you feel is needed by you, to improve your life, and to level up your life.

You are the only ones who can pray, and practice, you women, girls, men, and boys, and there fore you are connected to me in many more ways than other living beings, the animals, and the amoebes, cells, and other living beings.

There fore, you are, both genders, the ones who will clean up the mess you have made, and you will continue to keep my universe clean, as you sexal with your genitals, and with your bodies, and with all your gizmos, igniters, trigger mechanisms, love bumps, love patches, tuning forks or ticklements, and so forth, as you are sexaling beings, who I, GOD, created, and you will sexalate, erotem, orgasm, phlumett, astral travel, peak, hyper tranceate, and so forth, just as I intended you to, from now till forever.

You will become virtuous and worthyable beings, worthyable tummy mommies, and worthyable tummy daddies, with your practice of my religion, who will bring into my universe, my many children who will join with you, and assist you and me, in cleaning up our universe, and the mess you have all made of it.

Is that understood? The answer had better be, "YES SIR!".

Lesbianists' Torment Campaign Under Way

Lesbianists are clearly releaseing wierd, ghastly, horrible, and dangerous preditorial animals, giant insects, giant spiders, giant lizards, snakes, and reptiles, ghastly, preditorial sea animals and sea mammals, winged, preditorial and horrific, aggressive scavenger and killer buzzard like creatures and other winged and destructive animals, and other horrible creatures, as well as my abominant kids to kill, maime, torture, and cause major disruptions and suffering to people, around the globe, in many locations.

Apparently, the whole world is now affected, or will be affected, by this dischordance and disharmonic display of defeated lunacy.

The peace has been shattered by the Lesbianists. It was not good before, the situation in the world, with the balooneying governments of the world, doing what they wanted to do, and torturing, and canabalizing people, and feeding people to my abominant cave bears kids, and to my crocodile people kids, and mistreating people, like Bill Gates, Steve Hawkins, Steve Irwin, many women, young girls, and men.

The war in Iraq, the phoney Saddam Hussein Trials, and all the bogus manipulation of the press and media, and the suppression of what is actually the case, with our being used and abused, poisoned, and maltreated by the Lesbianists, was a rotten situation. That was normal, or normality for us. Our karma is very poor, and we have the karma to suffer this abuse, and these torments, daily, unknowingly, in most if not nearly all cases.

But, it is becomeing really bad and there is need for serious concern, and action, to correct this situation. It has gotten out of hand, completely, and there is no stopping the Lesbianists in their wanton, and coldly miserable wish and lust for chaos and disturbances to others.

Now, more clearly than ever, as the Lesbianists rampage, the Lesbianists are causing major disruptions, suffering, anguish, and there is just an awful discordance of shock, dismay, and misery, that is growing, every moment. This is as real as the sunlight shining from the sun on a hot day in summer.

I don't have a clue what people are doing, and what is happening to them, as they are captured, tortured, and caused miserable sufferings, in many places. There must be horrible agony for many people, at this moment, and as each moment passes.

Our reality as it was has suddenly been shattered and torn up, and replaced with the lunacidal, Lesbianistic, mayhem and chaos.

Reuters reports a Lesbianists' joke for the Lesbianists, sarcastically and ironicly stateing, "New Perils Push Doomsday Clock Closer to Midnight" "(Reuters) Scientists have advanced the clock 2 minutes closer to midnight."

http://us.rd.yahoo.com/my/today/new_perils_push_doomsday_clock_closer_to_midnight;_ylt=AmUXlewr5ev2kNK_SfOHDFAL1vAI/*http://news.yahoo.com/s/nm/20070117/us_nm/doomsday_clock_dc_4

This is their private joke, to make this scenario more laugable than before for them. They could not care less, as they are manipulating every thing, and that statement is completely meaningless to them, as they are in control of every thing, in their conspiritorial lunacy to rule human beings, and to trash every one.

We'll see what the coming days, weeks, months, and years bring, and maybe there will be hope for change, when people begin to take action, to correct this situation, globally, united in spirit, permanently.

These are the most evil of evil people and abominant kids, in our immediate vicinity in our universe. We must begin our cleanup campaign here, as it begins where I am, and will continue from here on out, till we have rid my universe of all of these horrible people, and all others like them, and have made them surrender, or have sent them on to my Epcot Center.

I will establish my relgion in my universe, and begin my ministry, and they are not going to stop me, as my religion will bring positive change for all of us, forever.

I must establish myself outside the bounds of this Lesbianistic society, so your efforts and concern for our future, and your selfless giving of donations to my ministry, to allow me to set up my ministry, outside the bounds of this Lesbianistic society, non-dependent on Welfare, Supplemental Security Income or SSI, Medicaid, and non-reliant on the supported and financed Housing and Urban Developement or HUD subsidized apartment that I live in.

Once I receive in the mail, the 'Gift' donations to set up my ministry outside the bounds of this society, I believe things will gradually begin to positively change for us all, and the shift to positivity will begin, and a new universe for us all, will become for the first time, ever, a potential reality with the sincere religious practice by all of my followers, all of you, who are practicing my religion, diligently, and daily, or as much as your health and your time permits.

There in, with your efforts to practice, will bloom your flowers of dignity and hope, justice and freedom, willingness for sharing, cooperating, and participating with others in our new age of enlightenment, the Gurkian Age, and your new found respect for self and others.

Captain Off The Bridge.

John Francis Ayres
GOd
And Children

It Is Now Time To Kill All Government Workers, Public Workers, Preachers, Islamic Clerics, Christian Bible Teachers, Bible Thumpers, And All Other Persons Who Support The Lesbianists And Their Lesbianistic Societies Around The World - 'Fivers' To Kill Lesbianists And All The Lesbianists' Supporters - Coma Patients - All Persons Who You Kill Will Transel To My Epcot Center - Japanese And List Keeping - Surrendering And Pledging To Serve All People In My Universe - What Does This Mean? Updated: 21-01-07 Rev.d.01.a 19:56 PST

It is now time to kill all police of every police department in every country in the world. It is now time to kill all jail and prison workers in every country in the world. It is now time to kill all zoo keepers who work in zoos and other related places around the world. It is also time to kill all pet store personel, and pet store owners. We do not need people housing and feeding potentially dangerous animals. You are further ordered to kill all pets in all pet stores, and elsewhere, even in private homes. You may then eat them, after you have cleaned out their guts and removed tummy foods and rectal feces, etc., that are decaying matter, that is harmful to your health, and after you have prepared them for eating by cooking, grilling, fire

place cooking, barbecuing, smoke house fermenting, or by other safe and sanitary, healthful cooking methods.

It is also time to kill every fire department official or worker, no matter what capacity the person works in, as a fire truck driver, as an ambulance driver, as an assistant driver, as an attendant or support crew person, as a maintenance man of the fire or the police departement, it is now time to kill them all.

Further, it is time to kill all public bus drivers, who work on any metropolitan or local area or state or interstate, or national bus company. It is time to kill all ships' captains and their crew members. It is time to kill all railroad rail line workers. It is time to kill all subway drivers and subway line workers, no matter what their job is.

Further, it is now time to kill all military personel, SWAT team personel, all government personel, and all civilian, or trained military, national guard, state or federal militia, toy soldiers, the people who dress up in old time war regalia, and outfits pretending they are old time, earlier period, confederate soldiers, or old time earlier period, union soldiers, who act out old time North the 'Union' vs. South the 'Confederates' and who participate in city and town parades, across the United States.

It is now time to kill all retired military personel who support the deranged, crazed, insepient, and corrupted Lesbianistic societies we live in, around the world. It is also now time to kill all persons who in any way support the governments of the world, including but not limited to, all school, university, kindergarden, missionary, day care center workers, nursery school teachers, teachers aids or teachers assistants, United Nations workers, United Nations teachers, substitute teachers, catholic school teachers, Irish protestant school teachers, parochial school teachers, all religious denominations around the world school teachers and their school support workers, government funded school teachers, tuition assistance by the government school teachers, all personel who work for the United Nations, all civil service agents, all DEA agents, all FBI agents, all FDA agents, all EPA agents, and workers, BLM agents who are Lesbianists as well as those BLM agents' who are Lesbianists as well as those friends of theirs, who support the Lesbianists.

It is also time to kill all other federal, state, or local, or globally tasked organizations, such as the CIA workers, INTERPOL workers, the several groups of workers within the Canadian Mounties, NIC a spy department of the U.S. Navy, the Korean C.I.A., the United States Presidential Police agents the Secret Service Agents, National Park Rangers, State Park Rangers, Forestry Service workers, Pentagon workers, National Library Of Congress workers, and all others who work in any capacity supporting any government organization, those listed above, and all others, as well as all persons who support the Lesbianists in any way at all.

It is now time to kill all judges, bailiffs, Supreme Court Justices, and the employees who work in their organizations, and all other judges, legal clerks, para legal workers, court stenographers, justices of the peace, lawyers, attorneys, state attornys, prosecuting attornys, defense attornys. It is time to kill all officials of all government organizations, and all the people who work for them and or even only support them, such as restaraunt workers who feed them lunch, coffee shop workers and owners who feed them coffee and food, bars and restaraunt personel and owners of bars and restaraunts who support and feed any and all persons connected to the governments of the world and who work for them in any capacity at all.

It is also time to kill all the money lenders who loan money to the Lesbianists, the mortgage company owners who provide the Lesbianists with house purchasing loans, and all the supermarket workers and supermarket owners, who supply food to the Lesbianists, as well as all of the druggists, the pharmacy workers, who supply medicines to the Lesbianists. It is time to kill all the taxi cab drivers who give rides to the Lesbianists, and to every person who supports the Lesbianists in any way, at all, unless those people surrender to my kids.

It is also now time to kill all civilian or civil servant or state civil servant worker who supports in any way, any Lesbianistic organization, such as the police departments, federal agencies, fire departments, libraries, schools, and so forth. It is also now time to kill all persons who maintain or provide services to any of the above listed organizations, and to all of the similar organizations in every country in the world.

This is my order to all of you, and you are all ordered, by me, GOd/ GOD, to kill all of them, unless they surrender. People also call me, 'Allah'. I'm the same person. Just do as I tell you.

You are to take my fuels' bombs with chlorine plastics' explosives formulas, and all other explosives formulas I've explained about on my bulletin board and the fuels' bombs explosives formulas including but not limited to radiological 'fracturable' rocks that provide so-called 'nuclear' explosions, all of my bombs' formulas, and all other bombs' formulas derived in part or in whole from what we have learned as I've explained on my bulletin board and to take them, and make the bombs and explosives, and to then use them, and then destroy and kill all of the Lesbianists, and all of the Lesbianists military bases, buildings, and kill every last one of them, all of them, leaving no one alive.

'Fivers' To Kill Lesbianists And All The Lesbianists' Supporters

You are to then make certain they are all dead. If they are not dead, you are to kill them with a 'fiver'. A 'fiver' is a bullet with five lines drawn or scored with a knife or sharp instrument into the tip of the bullet, to form a 'five' line pattern, so that the bullet will fracture into 'five' parts.

You are to take three 'fivers' and shoot each person who has not stopped breathing, and who is not dead yet, and shoot the three fivers into the head of the person, to make certain the person dies.

Three 'fiver's will destroy enough brain material, to kill any person if the bullet is large enough, and the handgun, rifle, or weapon is powerful enough.

The handgun bullet size must be at least larger than a .22 calibur, and at a minimum, 7 millimeters. You may use .38 calibur, 9 millimeter, 10 millimeter, .45 calibur, or any other, large sized bullet to make certain they are dead. Buckshot, 8 guage to 10 guage, or any comparable rifle load or handgun load, or home made weapon load, will work equally as well, with three shots into the skull. A machete or similar instrument should then be used to chop the head off of the person at the neck line. If you have a machete or hatchet, or axe, and if you prefer to chop off the head of the person, then by all means, you are to do so. The point here is to kill the person one hundred (100) percent, and not leave the person in a coma.

Coma Patients

A person in a coma is perfectly alive, and can hear every word you are saying, but can not respond. People in a coma after severe accidents, such as near fatal traffic accidents, where their limbs were broken into pieces, or war victims, who are on life support in Veterans' Hospitals, can be in agonizing pain, and no pain medications are given to the patient as the patient has no way of communicating with the doctors, nurses, or staff members to complain about the pain, in many or in most cases, if not nearly all cases. Some patients can write or scribble out a note about the severe pains, or make gestures with their hands, pointing at painful spots they are able to point to, and then making squeezing motions, to indicate as best as they can, that there is something wrong in the area. Some people may catch the meaning of the gestures, but others do not, and may just wonder what is going on with the patient and they may wonder what the patient means by the hand gestures. Others, doctors and nurses, and staff members will merely find it amusing that the patient is making the gestures. Some doctors and nurses, and possibly staff members, will figure out the patient is in pain, and then steps can be taken to alleviate the pain, but it is an ordeal for the patient, and it may take months, or in some cases, years, before staff, cleaning persons, food servers, orderlies or assistants, nurses, or doctors figure out what the hand gestures mean.

The coma patient, after healing from the injuries, may still have residual pains, such as residual spinal pains, or neck pains, or ligament pains where ligaments were twisted, or ruptured, or severed, partially or wholly, and the ligaments didn't grow back properly, or didn't grow back fully, or much, or perhaps, in some cases, not at all, which does happen a lot, and each time the patient is moved in her or his bed, the person experiences extreme pain as no medications for pain are given to the coma patient, unless the patient has been

successful in communicating that there is pain felt by her or him, in her or his body.

Leaving coma patients on life support systems is the cruelest thing you can do to a person in a coma as there is no such thing as being 'brain dead'.

It is a cruel and abominable Lesbianists' joke on humanity, and on all persons, that the Lesbianists have perpetrated with their teaching doctors and nurses that coma patients are brain dead, and do not feel, hear, taste, or sense, anything at all, and it is just another one of the Lesbianists' ways to hurt and torture people, and cruelly and ruthlessly abuse human beings, in this case, in most of these cases, by proxy. There are doctors who are Lesbianists, and I have one who is one, that I am aware of, and he knows exactly what causes my health problems, but he sits there, non-responsive, and with a vacant stare on his face as if he doesn't hear, see, or know of any thing that is going on, something like the three monkeys with hands clasped over their, ears, eyes, and mouth, who represent 'hear no evil, see no evil, speak no evil' and then 'therefore, every thing is alright'.

All persons with brains, whether in a coma, or other sleep like state or condition, is perfectly brain alive as the brains and nervous systems, auditory, taste, touch and sense nerve systems, never die, until the patient stops breathing, and passes on.

All nurses and doctors are to remove all life support systems from all persons in a coma, immediately and confirm the persons have died. That will allow them to transel into my Epcot Center, and then be born again, as a tummy baby to a tummy mommy and to tummy daddies.

All persons in a coma, whether in a hospital, or in a nursing home, or at a private home or apartment, or in a group home, or group care center, are to be told the truth of this, and are to be told that you just leared it, and are to be told that I am GOD, and that I have an Epcot Center staff waiting for them to come in, to be treated for their traumatic condition, of not being able to do any thing about their condition to end it, as it is a miserable situation for these people who are in a coma, or in any trance like state or condition that resembles a coma, or a sleeping person, who can not wake up. The person is perfectly brain active, and there are no measuring devices to prove it available to hospital staff or to doctors, as none are made, and the technologies to detect a person's brain activeness and aliveness are kept secret after they are bought up, and then after the records of them are destroyed, and the information on them are kept secret and locked away, in vaults, and in storage facilities, hidden from view so that no one can get the information, and build a device to detect a person's brain alertness status.

After they are told the truth, and that you just became aware of it, you are to tell them to not be afraid, and that all measures to relieve them from their present condition, and all measures to assist

them to transel to my Epcot Center, where they can recieve personal care, and then helped to recover from the trauma of the coma, or coma like state of not being able to wake up, speak, and talk to people. They are then to be injected with a powerful sleep sedaditive, or induced to swallow several strong sleeping pills, as they may become afraid, and then, you are to help them to pass on, and to transel over to my Epcot Center.

In some cases, if you pull on the large toe of a person, or on the thumb, the person may have control to pull in the opposite direction. That is an indication that they are awake, and fully aware of what is going on around them. Please check patients to see that they have soundly fallen asleep, and snoring or breathing quietly, in relaxed manner, may be the only sign that the person is asleep.

Any sign of movement, mentally driven by the patient, no matter how slight, is nearly most always, nearly one hundred percent of the time, a sign that the person is completely brain alive, and that the person is completely aware of what is going on around her or him and can hear every thing. Even passing or expelling gas or farting, can be 'mentally' driven, and a sign the person is awake, and alert, and brain alive. Opening one's mouth is almost always, one hundred percent of the time, mentally driven.

Persons's in a coma, who have Eplilepsy, or other similar brain or neuro muscular disorder, and other conditions where patients experience spasming, whether the condition is diagnosed or not, these patients who spasm, may make some spamodic movement, now and then, and that is only a sign that the person is haveing a neuro muscular muscle spasm. Knee jerks or other similar movements, are not always muscle spasms and can be labored, mentally driven actions. These actions show the patient has control to that extent over her or his muscles, body, skeletal system, and other body systems related to the movement.

In any case, after the patient has fallen asleep, you are then to kill the person, and let the person transel to my Epcot Center, so that the person can recover in my Epcot Center, and then be born as a tummy baby, to a tummy mommy, and to tummy daddies.

All Persons Who You Kill Will Transel To My Epcot Center

Once you are certain all of the police, fire, teachers, and all others who support the Lesbianists' societies around the world are dead, they will transel to my Epcot Center.

It is now the time to bring an end to the lives of these people who support the crazed, insepient, bogus Lesbianists, and to destroy them all, leaving no survivors. Kill all of their family and relatives, and leave no one alive. Kill them all.

My Epcot Center will not be in any way, inconveinced by your brave and heroic actions. All doctors must be killed, all nurses must be killed. All medical techinicians must be killed. All library workers must be

killed. All school teachers must be killed. All art museum and gallery museum workers must be killed. All workers for all of these institutions must be killed. All of them, in every country of the world, unless they surrender and plead for mercy, and then are allowed in to my kids' place, for swearing in and for joining as civilians, my country.

Further, it is time to kill all media corporations personel, such as news casters, news men, news women, anchor persons, cameral men and women, talk show hosts, administrative persons, Hollywood's movie actors and actoresses, all radio broadcasters, and all personel of all radio companies. It is time to kill all news paper company owners, and publishers, editors, and all workers of these companies, unless they surrender to my children and plead for mercy.

It is time for all of you to kill all of them, and make sure not one of them is left living, including and most importantly, all politicians, who must all be killed, without any further delay. It is time to kill them all.

It is now time to kill Oprah Winfrey, Geraldo Rivera, Sarah Jessica Parker, Judge Judy, Jerry Springer, Liz Taylor, Michael Jackson, Clint Eastwood, Cher Bonno, Morgan Freeman, Steven Spielberg, Al Gore and his family, Hillary Clinton and her family, all of them, Jeb Bush and his family, all of them, Nancy Reagan and her family, all of them, former president of the United States President George Bush, Sr. and his family, all of them, including all persons related to him in any way, and all persons who work for him, in any way, and all persons who work for any of his associates, in any way, unless they surrender to my kids, and then plead for mercy.

We are not going to allow the Lesbianists to continue their illegal, inhumane, and horriblesome practices and activities on my planet, and in my universe, a moment longer. They must all die, now.

Is that understood?

I hope the answer is, "YES SIR! Mr. John Francis Ayres, GOd", as a 'negative' reply to my question is not acceptable.

Japanese And List Keeping

I haven't confirmed it, but from what I know, so far, the Japanese are very good at keeping lists, and they know about all the foreign people in Japan, and they keep lists of names of all of them, and they keep lists of names on all of the Korean people, and the Singaporean people, the Chinese people, the Ainu people, and the cast outs or 'burakumin' a group of meat cutters and fish sellers who some how got on a list of people who were felt to be 'unclean'. The 'burakumin' was a group of people who no one in Japan wished to talk about. The Japanese also, apparently, had lists on groups of people, who they didn't know much about, but they knew they were always doing things with each other. Those groups of people were the Lesbianists, so the

Japanese knew all along, who I was talking about and were nearly one hundred percent certain those groups were the Lesbianists living in Japan.

They read what I wrote, and the notes of mine were passed to many people on an e-mail mailing list, and when they heard that Steve Irwin had been killed, they felt they had heard enough and they told all their friends about my notes, and then the Japanese killed all the Lesbianists in Japan on that list they kept.

It's something I heard, and I haven't confirmed it, but I think the Japanese are fully capable of handling that, as they were fully prepared to deal with each one of the Lesbianists, and they knew who they were, and once the Japanese united, and decided to take action. The Japanese escorted all the Lesbianists to a meeting place, to which the Lesbianists were not happy to go to, but had no choice but to agree to follow the Japanese citizens who escorted them there, with the military or Japanese Self Defense Force, the Coast Guard, and National Police, and all other police agencies in Japan, plus the national organization of fire department workers, backing and supporting all the Japanese citizens.

As to what they did with the bodies of the Lesbianists, I'll leave that to them to explain to you, as it was quite brilliant and they had many very good ideas for dealing with the bodies of the deceased Lesbianists, who are apparently now in my Epcot Center.

The Japanese country side is now peaceful and quite, and things the winds are blowing, peacefully, and gracefully over the Japanese country side, cities and towns, across the ponds, marshes, lillies and lotus flowers swamp lands, bogs, bays, estuaries, lakes, streams, rice paddies, fields, mountains, and islands, from what I can understand and gather about the situation in Japan.

Surrendering And Pledging To Serve All People In My Universe

If the Lesbianists and their supporters surrender to my children, and then promise to devote their lives for the sake of others, serving man kind, and all human beings, and all people on this planet, and in my universe, for the rest of their lives, they will be allowed to surrender to my children, and my children will then arrest them and put them in a prison cell. If they are not willing to serve others, despite the fact that they say they will serve others and devote their lives for the sake of others, serving all people in my universe, then my children will ignore them, and my children will not arrest them because my children know they are lying. They must promise to do all they can that is humanely possible, for the sake of others, and devote themselves to the prosperity of others, for eternity. If they are not willing to do that, then please, just send them on to my Epcot Center, and we'll straighten them out, for there. My staff at the Epcot Center has training programs to straighten them out and make them nicer people, so that next time they are born as tummy babies, they will

behave and be nice to others, doing nice things for other people, after they are retrained, a little. The retraining program takes a while, but the results are very good to excellent.

If my kids decide that the person who is surrendering, is telling the truth, my kids will use the special teletransportation technology, something like what we see in Star Trek on tv, with Captain Kirk saying, 'Beam me up, Scotty!', as many of us have seen on daytime tv, or in the movie theater, and my kids have very good teletranportation technology or 'beam me up, Scotty' technology, and the person, once he or she pledges honestly to serve others, will instantly dissappear.

Do not be surprised if when the person surrenders and promises to 'serve others', promising to devote her or his life for the sake of others, the person suddenly dissappears, and instantly, the person is no where to be seen. The person was 'beamed' into a prison cell that my kids have constructed, using other technologies, and we have many prison cells waiting for the Lesbianists and for the Lesbianists' supporters, and for other bad kids in my universe, as well.

For each person you kill, my kids will keep earning points scores on your efforts to send them to my Epcot Center, and you will be paid, when you have finished your job, and then finally, go in to visit my kids. My kids will pay you in the monetary currency that is used in the underground cities my kids have built, for protecting people from these horrible Lesbianists and for protecting people from the abominant kids of mine, and the ghastly and naughty animals and very large bugs and spider like creatures, that the Lesbianists use to help them torture people with, to make the Lesbianists laugh, and to amuse themselves, as I've explained a little about, already. The more Lesbianists and Lesbianists' supporters you send to my Epcot Center, the more earning points you will score, and the more money you will earn, and you will be paid that money, when you go to visit my kids after you have finished your work, killing the Lesbiansts and the Lesbianists' supporters.

If the Lesbianists and the Lesbianists' supporters do not disappear after they surrender, and after they promise to serve others, and pledge to devote their lives for the sake of others, the Lesbianists and the Lesbianists' supporters are lying, and you can then kill them, and send them on to my Epcot Center.

My children will escort the deceased Lesbianists and Lesbianists supporters, once you kill them, into one or an other of my Epcot Centers, and will make sure that the Lesbianists and the Lesbianists' supporters get in for a meeting with one or another of my managers, or with one of the staff members who work with my managers to arrange retraining programs for rehabilitating the Lesbianists and the Lesbianists' supporters.

The Lesbianists and Lesbianists' supporters will not qualify as tummy babies, until they are finished their retraining and rehabilitating

programs. After they finish, they will be out, again, to join the rest of you, once again, but this time, as nice, kind, courteous, and polite people.

What Does This Mean?

It means, I want all the Lesbianists dead, but if they will surrender, and if they promise to serve all human kind, all people, and work and strive to enrich the lives of all others, dedicating their lives to others, then, you do not have to kill them, and you do not have to send them to my Epcot Center. If they are honest when they surrender, and when they promise to serve all people, devoting their lives to all people of the world, then my kids will 'beam' them in, using the teletransportation technologies that my children use. If they are lying, then my children will not beam them in, and they will be stuck where they are. If they are stuck where they are, after they surrender to my kids, and after they promise to dedicate their lives to the welfare of all others in the world, and to all others in my universe, then they were lying, and you may then kill them, and send them on their way to my Epcot Center, for retraining, and for rehabilitation.

It also means to kill any person who works for the Lesbianists, if he or she is supporting the Lesbianists to try to stop you from killing the Lesbianists. Also, it means that you should kill any person who tries to interfere with you, while you are trying to kill the Lesbianists.That's what it means.

Fermenting Oils - Fracuses Kiddies - Slugs, Snails, And Other Bottom Feeders - Feeding Everybody In Our Bodies - Putting An End To The Global Menace Of The Lesbianists - Changing Our Societies, And Our Universe, Forever Updated: 22-01-07 Rev.x.00.a 07:45 PST

Mix raw sugar, ocean salt, sessame seeds, dried fermented berries you have taken from a mix of berries fermenting as a flural hydrate liqour, or as a plain fermenting liqour, and make sure you dry them out in the oven, before useing them.

Mix the items together in a container, and mix in a drop or two of apple juice, pear juice, papaya juice, kiwi juice, banana juice, cherry juice, cranberry juice, strawberry juice, peach juice, nectarine juice, or plumb juice, and let the moisture settle into the mixture to allow it to become only partially and only very slightly moiste, and not wet or liquidy.

Allow the mixture to sit in a warm or cool place for a week or two, to eight to fifteen weeks, or even a few years, and it will grow molds in it, and with the longer the duration up to a point of sitting and

molding, the more useful it will become.

It might develop a pungent, unpleasant odor, like a dead animal smells, which may mean that a fungus that is not very suited for you to use as a starter mold for starting a fermented oil batch has developed in the container, and in that case, you can throw the whole mix out, or use it for fermenting beans or something. Cheeses can be made with these kinds of growing funguses and molds, if you are the daring type, who likes to experiment with new and different tastes from variously fermented mixtures.

You can add some ocean salt, and make a soury vinegar, and then try to rescue it with the combination of the soury vinegar, ocean salt, and a little raw sugar, and some honey.

It may be that some bacteria is in the mix, and it needs to be eaten up, before you can use it safely for a healthy mold mix for starting a nice cheese molds and funguses mixture.

Ocean salt can be added in slightly large amounts with raw sugar. Once the odors have stabilized, and once they have developed a more pleasanty odor of a fermenting mixture, with a slight alchohol ferment odor that will indicate that it is alright to use, and that it will not be harmful to you.

In some cases, the bacteria in the base mix, may be a result of hairs or particles of skin from the body of a dead rat or mouse, that some how found his or her way into the sessame seeds, or into the dried spices, or into dried berries that you used, and then died.

In that case, you might as well throw it away, unless you have a lot of patience, and do not mind waiting and working with it, for several years, for it to become something you can use.

One way to make it into something you can use is to mix in a high potency liqour brew, and let it sit for a number or years, and ferment it, and then after it smells nice and rosy smelling, after ten to fifteen years, to thirty to fifty years, you can evaporate the liquids out in a pail on an open porch that has a net covering to keep animals and animals' hairs out of it. Make sure there is good ventilation, and it should evaporate out, safely after a number of days on the porch in the sun. If there is no heat to make it hot enough to combust, and if there is good ventilation, it will not combust, and it will evaporate out, safely. Adding ocean salt and raw sugar to the mixture so as to fill it up with raw sugar and acidic ocean salts, will further help to safely evaporate out the liquids and prevent the liquids from combusting, accidentally.

Once the liquids have evaporated out, safely, you can use the materials that remain in the pail or container, to start a fermented oils brew mixture, or to start a cheese molds and funguses mixture, if you wish to make a nice cheese molds and funguses mixture.

The particles of skin or hair from the dead rat or mouse, or pidgeon, or other animal, will have been eaten up by all the ferment fracuses kiddies, and will no longer pose a threat to your health.

Fracuses Kiddies

Ferment fracuses kiddies are just plain old ferment kiddies who like to devour large bits of human or animal tissues, mites, or cockroaches, or their body parts, and then poop them out, and pee them out into the liqour brew.

You'll always have some of these kiddies in your brew mixes, and they are useful to you, as they eat up the things that you do not want in your tummy. Also, there are other kiddies, such as snails, and other bottom feeders, that find their way in, in the skins and pulp material as tiny animals, or the eggs of animals, and they hatch, and they develop, and they grow big, and they then bottom feed, and they eat any dead rats, and dead rat parts from rats that might have fallen into the brew. These are useful pets, that you want in your rum and liqour brews, as they will keep the liqour brew healthy to drink, and they will keep you from getting ill.

Slugs, Snails, And Other Bottom Feeders

In the old days of bucanneering, as I may have mentioned, before, this was a crucial part of keeping the sailors alive, on their long voyages, and if crew members fell ill due to an unhealthy brew, with a dead rat in the mix, making it sour, and making it unhealthy to drink, then if there are not enough snails, slugs, and bottom feeders in the barrel or rum to eat the dead rat parts, the sailors will get ill, and when they get back to port, they will hang the rummery owner, and give the business over to the son, or to a third party, often times, one of their fellow crew members, who is liked by all the people, locally, and on the ship.

This is the case, still today, with many rummeries owned and handed down in the same family, from such instances as that.

Bottom feeders, slugs, snails, and many types of bottom feeding earth worms, and other types of healthy bottom feeding worms, that cohabitate well with the slugs, and snails, and other animals that are too tiny for you to see in the rum brew mixture, without a powerful microscope like, optical videoing technology, are essential to your brews mixtures, and they may increase in numbers as they make babies like every animal and living being does, and so now and then, you need to reach into your brew container, with your hand, or with a fine mesh small aquarium use fish net, and scoop them out, and flush them down the toilet, or let them loose in a local pond, lake, mountain stream, or water springs fresh water well, where they will help to keep the water clean, ahd healthy.

Once you have the materials to make your fermented oils mixture, you can add them to your container of food oils, and begin to ferment them, or use them to make a nice cheese mixture, to ferment and then

to make solid as it matures with age. You can also use the materials to make a fermented bean mixture, or fermented barley, or fermented rice, or fermented millet, or fermented wheat mixture.

You can also use them to make a fermented brew mixture, as there will be many healthy molds and funguses kiddies in and among the dried out materials. Your health will improve, and by adding different spices, nuts, berries, root particles, ground up kiln dried pine cones that were green to begin with, and then fermented for a few months to a few years, in a brew mixture, then dried out, and ground up into a saw dust powder consistency, you can then have lots of crystals cages salts kiddies of various kinds help you to make a nice regroverative brew, to help you to regroverate your amoebes.

Feeding Everybody In Our Bodies

You know, we need to eat foods to stay alive. We also need to feed all the living animals in our body, to help them to stay alive, so that they can help our health remain normal, from day to day. We also need to feed the amoebes all the foods and juices, salts kiddies, and the poopy liquids and pee liquids, and other liquids with other types of tinier salts kiddies in them, as well as other types of food kiddies, we haven't learned about, yet, but with all of them inside your tummy, you'll be able to feed every one who needs feeding, and then you'll be successful with your amoebe 'auto regroverate mode, on!' formula, so long as you have degunked your body of all the petro chemical oils, kerosene, diesel fuels, and other chemicals, the Lesbianists have been feeding you, from birth, in your diets, if you live in a society, where you are fed baby formula mixtures from Gerbers or Heinze, or any of the other baby foods manufacturers.

Putting An End To The Global Menace Of The Lesbianists

We need to put an end to this practice by the Lesbianists of poisoning us with their petro chemical industry oils and tars salts kiddies, which they use to rot our teeth out, and cause tooth decay, and which they use to cause ulcers in people's tummies, and which they use to cause lots of unpleasant illnesses, and diseases in human beings, and in farm animals. These petro chemical salt kiddies, and formaldehyic salts kiddies, all harm our amobes living beings children, and all the other animals that live inside of us. One day, we will have a lot of people practicing my religion, sexaling, and making prayer statements so as to help us to erase the karmic markups we have, that keep us living under the tyranny of these Lesbianists, and in their societies, suffereing the daily poisonings that cut our lives short. When we have erased enough of our karmic markups with my religion's religious practice of sexaling to purify our selfs and others around us, and to clearify and erase our karmic markups, we will eventually be able to say good bye to the Lesbianists, and their practices of poisoning us, and causing us major headaches, or problems in our lives.

Changing Our Societies, And Our Universe, Forever

At that time, we will be able to say hello to a whole new way of life, and that will be the beginning of our new, thrilling, and excitingly challenging, one world, unified, planetary, global culture, and it will be the begining of our new, thrilling, and excitingly challenging, one universe, universal culture for all of the people in our universe, who we have been living in our universe together with, since we first came out, and began living here in my universe, a very long time ago. We have to start somewhere, and so here we are, now, begining to prepare the foundation for our long and prosperous journey ahead of us, as we clean up our universe, together with each other, and clearify and erase all of our karmic markups, and all of the karmic markups of all my children, and of all living beings who live with us, together with us, in my and our universe. We need to take responsibility for this clean up campaign of ours, as we are the only ones, besides my many worker, unionized children, who can use our brains, and use our sexaling organs, to produce purifying energies of all types, to help us clearify and erase all of our karmic markups, and all karmic markups, and karmic things and dings, of all of my animal children, and of all of my living beings children, and of all of my human children.

My kids have built underground cities, to help us to get started, in learning about the new ways of living together, and of sexaling together, for practicing my religion together with each other, so that we will be able to prepare ourselves, for our new global, unified society, and for our new, universal, united, civilization. We have a long ways to go, but we are starting now, with your efforts to correct this situation by eraseing the karmic markups and karmic things and dings, that have us living in this truly awful situation on this planet, in our universe, that we are now, curently living in. One day, when all the Lesbianists are either dead, or have surrendered to my kids, we will be able to gradually educate ourselves, and change our understanding about women and girls, and about men and boys, to understand the truth about women and girls, and about men and boys, and then we will begin our new and exciting journey into our future, together, with my religion at the basis of our new, unified society, universal culture, and universal civilization.

Donations To GOd - Monastic Mode - Who Works For Me, Anyway? - Obeying Orders - Every Politician In The World To Be Executed - Every Hollywood Actor And Actoress To Be Executed - Jump Ship, Explained - Fair Warning - Particle Remis Technology And Particle Dismiss Technology - Dismend Technology And Remend Technology - Mentalcosis / Mentaltosis And Comatosis - Michael Jackson - Retractions Updated: 26-01-07 Rev.b.02.a 06:45 PST

Donations To GOd

Why can't anyone donate any thing to me? I am GOd. So, how come no one can send me a penny in the mail, or a box of cookies, or a pair of socks, or something? I don't think I'm asking for too much, but I'm just curious about why no one can send me anything in the mail?

I don't get any phone calls. No one sends me any e-mail. No one tries to visit me. I have a religion, and I'm asking people to practice it. Now, how come no one can contact me?

I once said that I am in a monastic mode, and it is a cloistered monastic mode. That means, no one can be contacted out side of my monastery by any one inside the monastery, and no one can contact any one inside the monastery, by any one outside the monastery.

If there is no legitimate monastery business then no person will be allowed to contact me, or for that matter, any one else inside my monastery, who is leading a monastic life, with me.

Well, there is only me, right now, but maybe in the future, some one will be in my cloistered monastic discipline with me, helping me with my religious duties of doing my religious ceremonies, as I've mentioned about, before.

Monastic Mode

What does my 'monastic mode' mean? It means that I am here as GOD. You know, there is only me. I of course never sent any one, such as the Lesbianists claim. Why would I? I don't need any one to do the things I need to do. That's sheer idiocy to think I would have a son or daughter, and send them to do my business. That's absurd. You've been snookered into believeing all those hogwash tales, and now you don't know who I am, and you don't have the karma to believe in me, as a result of your following and believeing all those hogwash tales. My kids are everywhere, and they are doing their jobs.

Who Works For Me, Anyway?

Now, as I've been saying, I'm going to have you do your jobs, and that is to use your genitals, and to use your body, and to use your brains, and then participate in my religion, using your genitals and your body and your brain, and sexalate with each other, and purify your karma? Does that sound like a joke to you? If it does, you are very mistaken because it is not a joke in any way, and I am absolutely serious when I say that you are going to use your 'equipment' and I almost want to call it, your 'field' equipment, because you are armed with it, day and night, and you are going to use that equipment, to clearify and erase your karmic markups, and to purify my universe. Is that okay with you? I hope it sure the hell is, as a "NO SIR!" at this point, would be an unsatisfactory reply. Do you understand me? I hope so. You are going to jump ship, as I order you to, or be thrown over board, if you have a problem with that. I hope you understand.

Well, as far as I can figure it, no one realizes that I am GOD, so no one can donate money to me. If some one realizes that I am GOD, than

for the first time, that person will be allowed to donate money to me. That person will be allowed to visit me, or call me on the phone, or donate money or food to me, or practice my religious ceremonies with me, if that person believes, and understands, and realizes, that I am GOD.

Right now, there is no one who realizes or understands that I am GOD. No one of course believes I am GOD. Never the less, I am GOD, and I am sitting here, waiting for donations, to help my ministry get started.

So, that is the reason that no one can get through to me, or donate money to me, or send me a postcard with some kind of message of cheer and support in it.

There doesn't seem to be any body who believes that I am GOD. Well, that isn't surprising. People do not have the karma to believe that I exist, is one way of looking at it. They have ignored my existence, and have not had any real thoughts about me that would link them to me, in my monastic mode.

What does that mean? It means, that no one remembers me, as the guy who created all of you.

It also means, that I am in a religious mode, and no one understands that, or believes that I am in a religious mode.

That is peculiar, since I am giving you a religion, one of my oldest, for you to practice, that will assist you in purifying your life, and that will assist you in eraseing and clearifying your karmic markups.

That's very peculiar, but it is not that peculiar, as you do not have the karma to realize and understand that I am GOD.

In any case, there will be no donations, no telegrams, and no phone calls or letters to me, so long as you do not realize, understand, and then of course, believe that I am GOD.

Well, any way, so it goes.

Obeying Orders

Now, I want all these people, killed. Hillary Clinton. Bill Clinton. Chelsea Clinton. Ted Kennedy. Al Gore. Tipper Gore. Harriet Gore. Cheryl Gore. Dave Gore. Bill Gore, and all people who call them selfs, Gore and pretend to be related to Al Gore, or to Tipper Gore. Mr. Al Gore has lots of friends, who are also Lesbianists, and I want them all killed. Oliver North. Monica Lewinsky. Eve Arden. Elizabeth Arden. Michael Jackson. George Bush Sr. and all other George Bushes. Do you understand what I mean? It means, that they are all Lesbianists and they are all going to die, and we are going to blow up Washington D.C., and destroy Capital Hill, and level that area, and make it sink beneath the waves of the Atlantic Ocean. That's how big a bomb I want you to make, with my fracturable rocks, to then blow that area out of the water, and make it sink below the waves of the Atlantic Ocean.

You'll probably need more than one bomb.

Did you know that Washington, D.C. is lying on a fault line, deep down, and it is on an ocean shelf, that has the ocean under it, lapping at the earth, very far down. That means, that it is on a fault line, and it is on a shelf, that is hanging over the ocean's waters.

Now, if you hit Baltimore, and Maryland, and Northern Virginia, and Washington DC with a large enough bomb to blow Baltimore out of the ground, and level it, and with another bomb large enough to blow Washington DC out of the ground and level it, at the same time, and a few more bombs, large enough to blow Maryland, Virginia, and that whole metro area out of the earth, at the same time, you will sink the nation's capital, that is, Washington DC, below the ground, as it will break off the ledge that it sits on, and it will sink into the ocean, as the ledge crumbles below it. There will be water, from the Atlantic ocean, all the way out to West Virginia.

Now. I have every right to say that, and demand this, as it is a matter of self defense, as I know these motherfuckers are eating people, cannibalizing my kids, for their amusement, thrills, and fun, and they will continue to do that UNLESS THEY ARE STOPPPED! Do you understand that?

I hope so. I am going to see the whole of Washington DC and the area leveled, with Baltimore, and Northern Virginia, and Maryland, as well, and we are going to sink that area into the ocean, and make it disappear below the surface of the waters of the Atlantic. Now, that should be clear, shouldn't it.

This is not a joke. We will have to send a lot of my children to my Epcot Center, in the blasts that will occur, and in the after math of the blasts, but that is unavoidable.

We will have many people, drowning in the waters that come in from the ocean, and that stretch out to the hills of West Virginia, with only slight outcrops of land, hills, here and there, with a few people lying on top of them, blinded and in awful pain, but they will not live long, as they will not be able to survive for long, and they will pass on, die, and then they will transel to my Epcot Center, where they can get medical relief, medical treatment, therapy counseling, and rehabilitative therapies.

Now, that is what we will do to Washington DC and vicinity, so every one, please prepare for it, and get your pain medication in order, so you can take an over dose of pain pills, when your area is blown and shredded to bits, with one or more of my fracturable rocks bombs, as I've explained about.

Every Politician In The World To Be Executed

Next, I want every politician in the world, canceled out. I want their passports for living on our planet, canceled. That means, I want you

to kill each and every one of them. Not only do I want you to kill them, all, but I want you to kill every single one of their associates, around the world. They are all Lesbianists, except for a few of them. If you happen to kill one of the non Lesbianists policitians by mistake, that is okay. They have the option of surrendering to my children, available to them, and once they surrender, they will not be killed, by accident.

Every Hollywood Actor And Actoress To Be Executed

After that, I want every Hollywood actor or actoress killed, and that includes all the actors and actoresses, around the world, and they must surrender to my kids, if they wish to not get killed. There are a lot of them, who are not Lesbianists, so those I've mentioned, who I've let you know are not Lesbianists, you can forget about them, and leave them alone.

There are more than a couple of billion Lesbianists living under the earth's surface, in underground cities. I did not realize there were so many. We need to kill them all, so we will, in time, unless they surrender.

Is that clear, every body? I hope the answer is, "Yes, Sir!" as you had better not answer any other way, or you will get yourself on my shit list. Is that understood? Good. I am the boss of my universe, so if you do not like it, than jump overboard, now, sailor. Have you got that clear? Good.

Jump Ship, Explained

What does 'jump overboard' mean? It means you are going to have severe problems with me, if you do not obey orders, and that there will be difficulty and jail time, ahead of you, if you continue to ignore my commands to you. It means there is going to be trouble, if you do not obey me. My kids are in charge of handling all the details on that, and it is not a joke.

Fair Warning

We are not going to let these Lesbianists run their show, one more minute. We are going to put an end to them, and their activities, here on this planet, and every where else in my universe, and this is fair warning of that.

Particle Remis Technology And Particle Dismiss Technology

As I said, once before, there is a technology called particle remis technology. There is also a technology called particle dismiss. They are the technologies that you can use to feed 2.3 billion Lesbianists down under the surface of this planet, and on every other planet that they are on.

Dismend Technology And Remend Technology

It is easy to dismiss molecules, and to dismiss, or dismend all the beings who need to be dismended, and sent to my Epcot Centers. It is also easy to remend them, and then get them back into the foods that I need them to be a part of.

My kids keep track of every one who needs to be dismended, and then remended. That is a lot of work, keeping track of every one, but that allows us to dismend the living beings, and animals, that I can let off from duty, and from further service, and then send to my Epcot Centers for them to live in. I can then recall them to duty, and remend them, and then have them serve in an apple or an orange, or banana, or a brick. Do you think that is a joke? It is not a joke, and there is no joking allowed, on my shift. Do you got that? I hope so, because if you do not, you will have to learn how to swim a long ways, as it is going to be a long way from shore, after I ask you to jump over board, and I have sailors who practice, all the time, just to show the passengers how it is done, just in case. I will have you jump from ship, if you do not get along with me, and if you disagree with what I am doing, pretty soon, as we are departing, now, or just about now. That means, we are not going to play around, much longer, and we are going to set sail. That means, there are going to be a lot of people practicing my religion, pretty soon, as they will learn about it, and they will begin practicing it.

Mentalcosis / Mentaltosis And Comatosis

Mentaltosis is the state of a vegetable, like a stalk of cellery, or a plumb, or an orange. Comatosis is the state of complete awareness of self and others. Comatosis is not brain dead, i.e., more or less, mentaltosis, with no real significant brain activities occuring, other than the ones that keep you alive, and vegetative, and you do not need assistance to remain and function in a state of mentaltosis, and the Lesbianists know it. You are severely brainally handicapped, and when you come out of it, eventually, after you have your karma fully completed for being mentaltosically ill, and after it is then time to get on to something else, you will be very brainally handicapped, and you'll be an extremely retarded person, with little to nearly no brain awareness going on about self and others, but able to walk, barely, and later, after many many lifetimes as a mentally retarded individual, you'll begin to be able to mumble a little, or babble a little, for umpteen lifetimes, as you begin to get your higher brain functions, back, which takes a very long time to work out, and many many lifetimes to work out, karmically.

Comatosis is like a hit on the head, and when you wake up, your faculties are not all working, and you may not be able to speak, or move, or talk to your friends, but mentally, you are all there.

Mentaltosis is like a train ran over your brain, and every other nervous system in your body, nearly, and you are completely unable to think, or do any thing else, and you are reduced to a mere pumping heart patient, with not much else going for you, except you are breathing, and technically, you are alive. You can sit there for a

million years, or a million or so life times, before you begin to come out of it, and then reveal your disorder of severe mental disorganization, mental disfunction, and mental retardation. There is a big difference between a bonk on the head, and a train running over it, and the rest of your body. Coma patients are fully aware of what is going on around them, and they may not be able to speak, but they are there, and they can twitch a finger, now and then, or flex a toe, or raise their tummy up a tiny bit, to pass gas, usually, and relieve the bloating sensation they are experiencing in their tummy, and in their intestines, or colon. They may be able to grasp your hand, and fully hold on to it, and not let go, for hours, if they have the strength for it. This horrible torture the Lesbianists are perpetrating on comatosic patients, needs to end, now. Person responsible for continuance of hospital policies, despite our informing them of the truth regarding this, are to be shot and killed, and sent to my Epcot Center, if they interfere with the removal of the life support and life support assitive devices, that are plugged into the comatosic patients mouth, or nose, or other orifice of their body, or any part of their body. If some one refuses to cooperate, you are to throw them out of their hospital unit, and give them a good whack on the head. Come back in a few days, and then disconnnect their life support assisitive pumps, and tubes, and so forth, and shoot them in the brain with three 'fivers', as I've explained about, and then send them on their way to my Epcot Center. That is an order. Now do it.

I want you to pull the plugs on all the GI's and civilians who are on a breathing assistance machine, and life support assistance equipment, and I want you to send them all to my Epcot Center, where they can get treatment, and therapy, and then get themselves ready for being born, again, as a fine and a healthy, tummy baby to a tummy mommy, and to tummy daddies. You had better comply, if you know what is good for you, as my kids are now keeping track of your records on this account, and you are not going to do very well, if you do not follow orders. Is that clear. I will not have any insubordination of duty on my watch, and that means, you had better learn to follow orders, or you will be asked to jump over board, and then go for a very long swim to shore.

Michael Jackson

Michael Jackson is the biggest joke in the world. He is a white boy, and he pretends to be related to Janet Jackson, a black woman, partially, and they pretend to be related, and he is as white as an elbow macaroni, or a white goose. He is not a black person, though he does have some black ancestry, but he is a primarily white person, and he pretends to have bleached his skin color, which is a crock of shit. Now, I want you to kill that mother fucker, as well as Sylvestor Stallon, and Arnold Schwarznegar, Clint Eastwood, Morgan Freeman, Kirk Douglas, Matt Damon, Robert De Niro, Anthony Hopkins, Gary Busey, and their Lesbianists' buddies.

Retractions

Mr. Jerry Springer is not a Lesbianist. I was mistaken about him, as he was already killed by them, in a previous lifetime, as he developed a desire to bad mouth them, and they didn't like him, and they kicked him out of their group, and they killed him, with their murderous torture routines. Penelope Cruz is not a Lesbianist, but she was, but they killed her, and tortured her, and she is off the list. Angelica Huston is not a Lesbianist. She was, but they killed her, after torturing her. She is a popular and prominent person, and if she hasn't been abducted yet, by the Lesbianists who will feed her to my abominant kids, like they did to Steve Irwin, and Jeff Corwin, then they will be gettting around to it, not too long from now, as they like to feed her to the abominant kids of mine, just as they do Bill Gates, and lots of other, former Lesbianists. None of the Baldwin brothers are Lesbianists, either, as they were already kicked out, and killed by them, and then grievously tortured by them. They continue to be main attractions for feeding to my abominant kids. Jack Nicholson is not a Lesbianist, now, either, but he was. Ben Affleck is not a Lesbianist, as he was also kicked out of their organization, after they tortured and killed him. Charley Sheen is not one, either, but he was. Martin Sheen is not a Lesbianist, but he works for them, and he was one, before they kicked him out, after they tortured him, and killed him, in a previous lifetime. Michael Douglas is no longer a Lesbianist, either, as they killed him, after their brutal torturing of him. He is up for being abducted, and for being fed to the abominant kids of mine, as he is a prominent person, and Kirk Douglas enjoys watching him get eaten up, and Kirk Douglas will laugh his guts out, as he watches Michael Douglas get tortured by the Lesbianists, which Kirk Douglas is a confirmed member of. Cher Bonno is not a Lesbianist, as I was mistaken in memory, though she was a leader for a while with Oliver North, she was killed by them, after being tortured, because she was getting "soft". Sunny Bonno was a Lesbianist, as well, but he was also killed after being tortured, officially kicking him out of the members league of Lesbianists. Sunny Bonno was captured, and abducted, and a body double was placed on a coroner's table, and Cher Bonno knew that the body double who was dead, who looked like Sunny Bonno, was not Sunny Bonno. The Lesbianists subsequently fed Sunny Bonno, after they captured him off the ski slopes, to my abominant kids. Elizabeth Taylor was thrown out of the corp of Lesbianists, after they heinously tortured her, and murdered her, and the Lesbianists have her slated, scheduled, after they find a way to abduct her, for feeding her to my abominant kids. Dennis Miller is not a Lesbianist. Though he was one, after torturing him, and sushi-izing him, please see my notes on that, the Lesbianist's sushi-izing of Dennis Miller eventually killed him.

It's hard to keep track of some people, as to whether or not they are currently Lesbianists. Others, are not so hard to keep track of, and I want all of those mentioned, killed, immediately.

Captain Off The Bridge.

On Praying, Fucking, Sucking And So Forth

You are rewarded for praying Nam Myeo Ho Ren Ge Kyeo. You are also rewarded for fucking, sucking, tounging, licking, fingering, dicking or massaging your dick against a woman's bun bun, or inside of her butt hole, where there are lots of sensitivities buttons that get her clicking and eroteming and orgasming, or against her titties to get her eroteming and orgasming, and so on, and for palming or massaging a pelvital button, or the love and joy stick, the dick, or a love button or love patch, igniter switch, or whatever nerve sending touch sensitive love joy button there is embedded into your body, in the pelvis, groin, vagina, and in the musculatures of the groin, pelvis, and vagina, with the palm of your hand, and so on. You also get rewarded for throating a woman with your dick, as there are lots of love buttons in her mouth, and throat, lips, and so forth. Men also have love buttons in their lips, throats, tounges, mouths, butthole, and on their body, and those buttons also get clicking, and turning on and off, and sending sensitivities messages or signals, nerve pulses, up the eroteming nerval system and up the orgasming nerval system. You

get rewarded for dicking men and boys in the throats, and in the buttholes, and their bodies, just as you get rewarded for dicking women. There is no discrimination in this area, and every one is equally rewarded for their meritorious acts of dicking others, women, girls, men, and boys.

Why are you rewarded for praying Nam Myo Ho Ren Ge Kyeo, and for dicking, fucking, and sucking, bumbeying, or moving your vaginal bumbey package against a woman's sexaling body parts to erotemize your self, and the woman, and for breasting your titties, i.e, rubbing your titties against or flopping them against and massaging them against a woman's butty butt or against her other sexaling body parts to get you and your friend sexually erogenized i.e., sexually stimulated, erotemized, and orgasming, and for other sexaling activities that help you and your friend and friends to produce purifying sexaling energies?

You are rewarded for your praying and for your fucking, sucking, dicking, and so forth, for helping to get every thing and every body going at the right pace in synch with every thing and every body else, for every body in my universe who is working for me, to keep them moving in harmony, perfectly meshed and in synch and in a timed persuasive mosture, with each other, so as to keep my universe standing up, strong, wholesome, robust, healthy, well, and fine. You are rewarded for praying as well as for sexaling, as you help move my children along as they do their work, as you pray and as you sexal and spray out energies from eroteming, from erotistically orgasming, and from sexually orgasmically convulsing, i.e., phlumetting, while you shatter out and spray out purifying energies in all directions, that will clearify and erase your karmic markups, and the karmic markups of others, all around you, for millions and more of miles, way out beyond where you are activiating and religialing, i.e., sexaling.

Your dicking, sucking, licking, titty massaging others, and so forth, will get wonderful and wholesome, GODLY, purifying energies shooting out of your bodies, and the energies shoot out at rates of speed that also help my universe to keep synchronized, and to move along at the right pace for it to be able to stand up and remain stable and solid, durile, strong, wholesome, pure, and a nice place to live in.

Every one who works for me, has a rate of speed they work at, a life pace, or life spin. We all have a pace of life. In some cities, it is fast and hustling. In some places, it is slow and whimsical. My kids work according to a rate of speed that is metered, and they keeps every one moving as best as they can, according to this metered pace. The metered synchronized pace that my children work at the rate of is one thirty seventh and one fifth, approximately, on the metronome.

If you help to push my kids along at that rate of speed, or a rate of speed that is close to it, as you pray at a metered synchronized pace and rate of speed, and as you fuck, suck, and so forth at a metered synchronized pace and rate of speed, then you are rewarded with angel

dusts, or purifying energies faerie dusts that my kids daub on your head, and throw buckets loads of over your head and body and that they wash your insides out with and that they wash your body, inside and outside, with as they shower them all over you on the outside of your body, and all around in your body on the inside of you, which then help to clean you up and clearify your karmic markups, cleanse your karma, and purify your life, making you a shining, radiant, pure and holy being, though you may not notice at first, as we are too filthy, karmically speaking, to notice the changes, as our karma is too thick and mucky to allow us to feel the changes that are taking place in our karma and life.

I have a gradient scale for how close you keep people moving, and at what rate of speed you help to push them along, and as you help to push my kids along, so that they can do their work, you are rewarded, in accordance with my gradient scale, with more angel dusts or purifying energies for better preformance, and with less angel dusts for poorer or less effective performance. You have to do some thing that will help my kids move along at a metered pace, so that they can get their work done. Praying Nam Myeo Ho Ren Ge Kyeo sets off a time frame synch. A time frame synch is the metered click, click, click, of the metronome. This time frame synch or metered pace, that you achieve while praying, Nam Myeo Ho Ren Ge Kyeo, will help keep every one moving, at the right pace, if you pray it in a rythym and at a rate of speed that will synch up with a metronome at one thirty seventh and one fifth, approximately. Your efforts to help keep my kids working and moving at a consistent rate of speed, will get rewarded, thus for praying, Nam Myeo Ho Ren Ge Kyeo, you are rewarded, with purifying energies, that my kids dump on you.

Your efforts for fucking, sucking, licking, tounging, titty whipping or banging your titty nipple against the vagina of a woman or girl, dicking, fingering, palming, and so forth, all get rewarded, if you try to keep every thing in synch with the metered pace of the metronome at one thirty seventh and one fifth, approximately. The gradient scale also applies, of course, as you are fucking and sucking, etc., so the better the job you do of keeping your pace at one thirty seventh and one fifth, approximately, the higher your rewards will be. Your rewards are the same, more or less, for both praying and for fucking and sucking, and my kids sprinkle and dump angel dusts, purifying energies, on you as a reward. You also get markups that are meritorious, and you are rewarded with a better and happier life.

Further, when you are orgasming, and eroteming, or pushing out energies as you orgasm, and erotem, you will be pushing out energies that shoot out at consistent rates of speed. These rates of speeds of these energies are in concordance with our pace of life, they all perfectly mesh with the paces of life that my kids keep. The energies as they pass out, and push along through time and space, at synched up and consistent rates of speeds, all help to keep my kids moving along

as they do their work and tasks, and they all help to keep our universe, standing up, strong, healthy, wholesome, well, and fine.

Chaos breaks the legs off the foundation to our universe, and our universe begins to creak and moan, as it begins to crumble, slide, twist, and tumble downwardsly. Making chaotic noises, and chaotic movements, detracts from the harmonics of our universe. Your breaking glasses, and breaking skulls, and legs, and arms, are also chaotic events producing, in most cases, and they will detract from the perfect synch up of our universe, as leg bones and arm bones, skulls, fingers and toes, begin to splinter, as you apply pressures to them, you get negative markups for your actions. A record is kept of every chaotic action you take, or make, and if you make enough chaos, in your lifetime, and in your following lifetimes, then you will suffer from your poor records of performance for keeping my universe standing up, wholesome, healthy, happy, and well.

Every scream you cause to be vocated or vocalized, is recorded, and the intensity of the scream, and yell, and crying out in pain, plus a lot of other factors involved, are all recorded by my kids, and you get negative marks for that kind of performance.

The love making oooohs, and aaaahhhs you cause to be vocated, are harmonic appeals of soothing restfullness to the spirit, and to the mind, are also graded, and you are graded on how well you can cause others to produce them, and your scores are kept, and if you are a lousy performer, with more negatives than positives, you'll end up with a lousy life, as a result, as you are rewarded in accordance for your positive performance, as well as for your negative performance.

Helping to keep all of my children working in harmony, and doing their jobs and tasks, at a metered pace, will be rewarded, not only with angel dusts, but also with a better life with more positive fortune, as you recieve positive points or merit points for your collaborating with my children, and working to support them, and more fun as your life becomes graced with more positive merits and as your rewards begin to pile up, and more good things begin to go on in your life.

If you sit on the side of your chair and have a pair of drum sticks, or are using a bongo drum, or calypso drum, with the long tube belly, or stack, a long barrel tubed drum, or if you sit at your drum set, or set up your electronic drum pads, and begin pounding away, in a syncopated manner, for your pleasure, just drumming away, with no notion in mind as to any thing other than achieving a nice rythym for you and your friends to listen to, if you happen to be with friends, your merit points will be near zero, and your efforts will not rate on my gradient scale, as your actions will not be in accordance with my program for a better universe for all people, and for my kids to live and work in.

If, however, you have the attitude, "I wish to support John's kids, and syncopate myself while I'm drumming, so as to be supportive of

John's kids, to help John's kids work in a syncopated manner, doing all I can to support John's kids", then, your merit points as you drum, will go sky high, through the roof, and you'll get meritorious benefits for your efforts, or merit points, and good marks, for your efforts. It's like helping kindly old women, who are frail and in need of a helping hand and support, cross the street. If you act in a kindly and charitable manner to help support those around you, you get meritorious points for your efforts. These efforts of your's, however kindly, regrettably, though they are kindly efforts, are not the kinds of efforts that we need, my kids and me, need to keep my universe standing up, and moveing strongly. For efforts that support my kids work environment, and that lend a hand to them to help them to get their work done, your meritorious efforts marks will go through the roof, and you'll be blessed with angel dusts, i.e., purifying energies that help to clean up your karma, and erase and clearify your karmic markups, or marks that record your bad and cruel, or negative actions towards others, and towards your self. You can kill your self, and cause grief to others, as a result of your departure, to my Epcot Center, and that rates negative marks and negative points markings or markups for you.

When you try to do any thing, that will help to syncopate my children, and to make my children's working environement more syncopated, and rythmical, with your concentrated mind, and determination to make that a reality, in other words, a prayerful attitude in mind, hoping to make John's children's working environments syncopated, and rythmical, and in rythym with every one elses', i.e., all of my other kids' syncopated working environements, then with that attitude of hopefulness, or a prayerful attitude, than, you are rewarded for your efforts, and determination, and as you drum away, or pound and beat on your calypso drum, or on your metal Bahamian or Tinian, or Haitian, or Jamaican, drums, or on your dresser drawers, if your mom does not mind, as you pound away, keeping your mind set on your determination to keep all of my kids working in unison with each other, and helping them to keep in syncopated harmony, all in perfect flux, and perfectly meshed in timing, with every one else, as they work for me, then your rewards and positive points markups, will be very high, and you'll be rewarded by my children, with angel dusts that they daub on your forehead, and dump all over you, from their barrels they carry full of angel dusts, or purifying energies to clearify your markups from your karmic markup piles, kept inside of your body, kept in storage in the molecules.

Your markups are inside the molecules inside your body, but they are also out side of your body, in every molecule, nearly, going way out to the very farthest edges of my universe. We will eventually get to all of them, and purify or clearify and erase all of your karmic markups, the notations and records that my kids keep on you, and on your activities, and eventually, we'll get them all, and your life will then be full of grace and happiness. It will be a long time before we get to all of them, as you and I and every one in my

universe, have been here, and enormous length of time.

As you drum, or skip, or dance, or do areobics, in syncopation, with the attitude that you want to keep all of John's kids in step, and in synch, and in unison and harmonicly meshed and in perfect flux with each other, or perfectly meshing with each other, and every one else who works for me, whether you drum, skip, dance, or do areobics, it does not matter, if your mind is set and determined to help my kids, with your efforts, you will be rewarded for your efforts, no matter whether you skip, jump rope, dance, or areobically excercise.

As you sexalate, if you keep in your mind that you wish to keep all of John's kids in syncopated harmony, perfectly in flux, and in unison, just as when you are drumming, or skipping rope, or dancing, or playing basketball, or playing tennis, or badminton, or any sport, with your movements all timed, and in perfect syncopation, when you sexal with the right attitude to keep John's kids in synch, perfectly meshed in perfect accordance and flux, with each other, and with every one else, you will be rewarded grandurally, that is, grandly, or in a grand or very great manner.

Excercising And Activiating To Music Timed To One Thirty Seventh On The Metronome

Music timed to one thirty seventh on the metronome, and one fifth, or as close to one thirty seventh on the metronome that you can get, is okay, and it will help you to dance, play tennis, play sports, do areobic excercises, and other types of activities, at that pace that we need to keep to help keep my kids working smoothly, and you'll be graded on your performance, and on your attitude while you are dancing, or excercising, and the more intently you concentrate and use your mental energies and mental control to stay in synch, and in step, the better will your scores be, and the higher your marks, and the greater your rewards of purifying angel dusts and purifying energies that my working and unionized kids will pour and spread all about you, inside and out, and all over you.

Sexaling itself is a religious act. Yes. That's true. But, if you sexalate with this powerful prayerful attitude, or hope in mind, with your determined mind, and your concentrated mind, as you sexalate, and help others to sexalate, and help others to erotem, orgasm, phlumett, and shatter off wonderful energies from orgasming, eroteming, and phlumetting, your positive points and merit marks, and many other types of scores my kids keep on your efforts and behavior, all of them will go higher than any one can see, way out beyond the furthest galaxy that you can possibly see from your bedroom window, with your telescope. They'll go out to the futhest edges of my current univerese, and even beyond the barrier walls, holding up our universe, that my kids put in, to keep our universe standing up, stable, strong, and durile or durable and with tensile integrity.

Any action for helping my kids do their work, syncopated, and in unison, and in harmony, will be rewarded, with angel dusts, and with positive marks and score points in your records that we keep on you and every one else in my universe. Your sexaling actions get rewarded, far more than any other activityating, as your sexaling actions are the most needed actions, to keep my universe, pure, durile, holy, sacred, free from negativities, healthy, wholesome, stable, and constantly in a state of improvementing.

Most people go around destroying things, and causing chaos. We, my kids and I, need people who are going to help improve the wonderfulness of our, my, yours, my kids, and all of my other kids, wether they work for me, or not, meaning, all of my guppies, who are like you, my relatively normal kids, as well as all of my abnormal kids, the abominants kids I've got, that go around thinking it is funny to eat people, and to pull them into their mouths, and crush them in miserable pain and agony, like my elephants abominants kids do to relatively normal human beings kids of mine.

Fisting And Punching People With Your Clenched Hands And Crasping Or Clasped Knuckles

You all have been bad kids, all of my guppies, all of you who do not work for me and go around thinking, 'Oh, gee. Aren't I special.' My guppies are these minded people, who are arrogant, who talk back to their mama's and to their papa's, and to their relatives, and brothers and sisters, and to their friends in school, and to their teachers. Later in life, they become worse, and they talk back with their actions of being mean to each other. As my guppies grow older, and become older people, they start fisting others, and that means, punching people, hitting them with their clenched fists and hard knuckles, and hurting them when they pound on their face, or on their stomach, or on their body some where, and break bones, and tear muscles, and stretch ligaments with their pounding each other.

Phlooching Out And Fisting The Vaginal Cavity, Rectal Cavity, And Mouthal Cavity

Fisting is a word used by some people to mean, to insert your hand into the vagina of a woman, and gay people, homosexually driven people, fist each other in the butt hole, if either men or women, or in the vagina, if women. Some people find it interesting to fist each other in the mouth, by sticking their fist inside the mouth of a person, pretending it is a dick or a dildoe. You need to phlooch out the neck muscles, and billow them up, or poof them up and out, and that will help them to gently relax, and then become expandable or stretchable, as when they relax, they will easily stretcth out, and there will be some give, or freedom of expandingness. The neck muscles then become easy to stretch and push on from the inside with out hurting the person. It then is easy to insert your fist into the throat, to massage the inside of the throat, and to use your hand, or fist, to tickle the igniters, and triggers that set off love buttons and bells, and whistles, that help women and men to erotem, orgasm,

and phlumett.

Fisting by inserting your fist into the vagina of a woman, when it is relaxed, and after you've massaged if for many hours, and after it begins to billow out, or poof out, and then open wide, and then you can see inside of it, and from the entrance of the vagina, there is a clear gaping cavity, you can then insert your clenched fist hand into, to massage the inside of the vaginal cavity. Doing this is very nice, and is very exciting to do, to help women and girls to erotem, orgasm, and phlumett. You can phlooch out the butt hole, by massaging it, for several hours, and it will begin to poof out, and expand, and you'll see a nanny gate face on it, and that means, it will begin to look a little bit like a vulva, or the vagina of a woman or girl when at rest, or exposed between a woman's or girl's legs as she is sitting or relaxed with no panties on or with no or few clothes on and nothing covering her hips, pelvis, lower pelvis, pelvital ridge, crotch and groin, butt and butthole and lower back, there by exposing her butt and vagina. If you compare a vagina with a phlooched out butthole, you will see they resemble each other, slightly. There is no vaginal cleavage of course, around the butthole, but there is a slight resemblence between a phlooched out butt hole, and a vagina, or vulva, none the less.

The Vagina And Vulva Compared To The 'Nanny Gated' Butthole

What is the difference between a vagina and a vulva? They are more or less the same, but the vagina includes lots of parts, inside as well as out side. The vulva is outside, basically, only, as far as I understand and remember these things, now. When you massage a butthole, long enough, it will begin to look like a vulva, or vaginal face. That's called the nanny gate, or on the male, the male butthole vagina, as I've spoken about it, before. On the woman, it is the female butthole vagina, a double 'immitation vagina' for the real one, as I've mentioned. Men's and women's buttholes are the same, and they both look like 'immitation vaginas' as I've also mentioned, after you phlooch out the butt hole of either the female or of the male. Once you phlooch out the butthole of a man or of a woman, it will poof out, and expand, and the butthole entrance and cavity will become relaxed, and easy to insert your clenched fist into, to then push up your fist into the butthole cavity, and massage it, once the person has cleaned out the butt hole cavity and once it is clear and free from debris matter, or food matter, and rotting food particles, and fleshy foods, or hamburger meat and so on. Phlooching out the vaginal caivity takes a little longer, but with patience, you can phlooch it out, and then fist, in this manner. If you phlooch out the butt hole, and rectal cavity, you can fist your male friends, and your female friends, and every one, once they have cleaned out their poop hole, and made it free from rotting debris, will enjoy mutual, and reciprocal, fisting. Fisting in this way, for sexaling, is alright. Fisting in the other way, for beating people up, is not nice, and you are given poor marks for your actions of nautyness, meaness, and cruelty towards others.

Over the long course of time, you all have been naughty at one time or another. I have many ways to fix you, and to retrain you, and to rehabilitate you, but you always go bad, and sour, again, as that is your main drive, or driving internal force in your lives.

The Importance Of Kindlyness And Teamwork

Why have all of my guppie kids all gone south, or in other words, gone down the road towards unkindlyness? Because, as I've explained, you forgot what the Love Of GOD is. My religion will help people to understand what the Love Of GOD is, and that will help keep them on the correct path of kindly actions towards others, and it will help them to understand and remember that teamwork to help my working, unionized kids to keep our universe healthy, strong, durile, standing up, stable, a safe and happy place to live, and a wonderful place to live, is very important.

Doing things that support my kids working efforts, will be rewarded, and doing things that detract from the harmony and syncopation of the metered pace of my kids who are working, and that slows them down, and that causes dischordance, will not be favorably rewarded, and you'll become a female schmuck, or a male schmuck over the length of time, as you live on in my universe. A schmuck is an unlikeable person. Sexaling is the most important thing there is for us to do, other than feeding ourselves correctly to keep us healthy, and excercising, and leading a balanced, well regulated life, listening to your mama and to your papa. My religion is based on sexaling, as sexaling is the most holy and pure activity we can participate in, or do by ourselves.

All the bullshit propaganda of the Lesbianists, that Jesus said this, and that Buddha said this, and that God will save you if you do this, and so forth, is pure balooney, bullshit, and made up nonsense. I, GOD, will not do any thing for any body, unless you help me and my children to make this universe, a more kindly, and a more wonderful and prosperous universe for all of us. If you do, I will have my kids, bless you with angle dusts as they daub them on your forehead, and then pour barrels of angel dusts over you, as they dump barrels full over your head and body, for your extra good work, sexaling, in syncopation, with my kids working rythyms, and in rythym with their syncopations, flux, and their phenomenal elegance.

Phenomenal Elegance

What is phenomenal elegance? It is their keeping harmony with each other as they work and keep every thing in order, in my universe for me, GOD.

You can not escape from this reality of your good actions and your bad actions being recorded, as my kids keep records on every one, and we make certain every one is rewarded for their good actions, and we make certain that every one recieves as close to what they deserve, to help balance things out, in accordance with their markups, for their bad actions. If they are bad, they will not meet nice people, and they

will meet naughty people, and not so nice things may begin to happen between them. If they are good, and if they try to help my kids, as I've explained about, they will get rewarded, and they will slowly begin to break away from keeping company with bad people, and they will gradually ascend to higher rankings or status, and then they will begin to lead a better life, and they will begin to escape from meeting with bad people, and the good kids' lives will become blessed by my kids, as my kids begin to sprinkle angel dusts on the good kids, and daub the heads of the good kids with purifying energies, and then dump purifying energies all over the bodies of the good kids who listen to their mama's and papa's, and sexal with them, and as they sexal with their mama's and papa's, and sisters and brothers, relatives, neighbors, and others, the good kids help my kids keep this universe running smoothly, in harmony, in flux, perfectly meshed, and in perfect syncopation. Mama's, papa's, sisters, brothers, relatives, neighbors, and others, all get their heads blessed with angel dusts, purifying energies, for their good actions along with the good kids, you, I hope, of course, too.

Plurlbalescent / Plurablescent Nature Of Negative Punishments And Positive Rewards

This is very important for every body to understand. I have my working, unionized kids reward the good people, and I have my working, unionized kids keep records on every action of every one of you, and I have my kids make sure the bad kids, meet with what they deserve, or some thing close to it, which may not be too nice, most of the time, and I have my kids make sure that the good kids, all meet with what they deserve, or something close to it, and that is usually always something nice. It may sometimes not be something conspicuously nice, but it is nice, usually, or positive in nature, always. The bad kids will get rewarded by something that is negative in nature, always, usually, or plurlbalescent. What does plurlbalescent mean? It means, it might not be noticably negative, but it is still negative, in nature, in essence. This is a topic we can discuss, another time, or you can ask my kids for more information on it, when you go in and visit them, with your mama's and papa's, sisters and brothers, relatives, school teachers, principal, costodians, janitors, school workers, and others.

We have had too much chaos of late, and for quite some time, and it is now time to slow it, and bring it to a halt. We are going to produce positive harmonic concordances that will assist my kids as they work, and that will help them to stay working in harmony with each other, with your fucking, sucking, eroteming, orgasming, your shooting out of purifying energies as you orgasm, and erotem, and with the increase of the oooohs, and aaaahs, you help to produce, with your practice of my religion.

We have to bring an end to the moronic violence of the Lesbianists. If that requires a lot of my children, making lots of babies, and lots of

energies, and percussive forces, when you set off a fracturable rock bomb, then that is what it will take, as you blow Washington DC and the Baltimore metro area off its ocean ledge, and into the Atlantic, with that fracturable rock bomb, if it is big enough. Yes, there will be lots of painful, ouches, and screams, and so forth, but it is trite, compared to the violence these idiots have been perpetrating, over the long span of time that they have been in my universe.

We have been here for a very long time. It is nearly impossible to figure out how long, other than with mathmatical computations. Our brains will burn out, if we try to figure it out in our heads. It does not matter how long we have been here. It does matter what we do while we are here. You are not going any where else, and you are all staying in my universe, so you will all drop your pants, and your dresses, remove your shoes, socks, clothes, underwares, panty hosees, and panties, disrobe, and begin helping others to make lots of ooohs, and aaaahs, and lots of eroteming and orgasming energies. That will be the begining of your getting into line with the rest of us, here in my universe, my kids who work for me. As you eroto with each other, you'll get graded on your performance, and you'll get paid by my kids, once you join our country, as I've explained about, before.

Timed Persuasive Mosture

What is a timed persuasive mosture? It is just keeping every body in synch with each other, persuasively and accurately moving along, orderly, in an ordered fashion or manner, and with every body in rythm and syncopated with each other.

Mosture is a type of motus, or motion or fluidity of movement. The timed fluidity or fluidness of my kids working along in synch with each other, is critical to having every thing in my universe, standing up and sturdy, with every thing holding together, as it should be. Otherwise, if my kids and their work get out of synch, things can come crashing down, and things can come falling apart, and we do not want that.

This is a big universe, and we have a lot of people in it, my kids, and you wouldn't believe how many kids I have. Anyway, they all have to stay in syncopated, fluid motion, with their paces of life perfectly meshing with each other's paces of life, to accomplish their jobs and tasks, in an orderly, and in a fluid movement, harmoniously, and without delays.

The persuasiveness is accomplished with the help of your sexaling, and by your keeping pace, and synching your sexaling activities, and the movements involved in your sexaling activities, and by your spraying out your energies, as you erotem, orgasm, and phlumett. The persuasiveness is also accomplished by your keeping pace in unison with others while you are praying the syncopated phrase, Nam Myeo Ho Ren Ge Kyeo.

Every thing is timed, and so as you activiate, or carry out these activities of sexaling, eroteming, orgasming, phlumetting, as well as the movements involved in sexaling, and as you pray, your synching of your movements and sounds in time and in pace with the syncopated and metered metronome click, click, click, at the timed pace of one thirty seventh and one fifth, on the metronome, approximately, helps to persuasively move, or persuasively drive and push, every body about, and along, as they do their work for me, in their many syncopated paces of life, or life spins. I have many children working at different life spins, as I've mentioned before, and each group of them has a different pace of life, or time spin. Your activiating, as explained, helps drive them along, each at their own pace of life, or time spin, perfectly meshed with every other child of mine, also in his or her, and at his or her own particular time rate of speed, time spin, life spin, or, pace of life.

Every one and every thing must move along in perfect flux, or perfectly meshed with every body, and with every thing that is going on in my universe, on every possible level. There are many levels where activities are going on, and many people are working at different life spins. Every one, no matter what level they are on, and at no matter what life spin they are living at, must stay in flux, perfectly meshed and in perfect harmony, perfectly syncopated with every one, else.

You are rewarded for your helping to move my kids along, in perfect flux perfectly meshing with every one and with every thing that is going on in my universe, with your efforts at sexaling, and with your praying, as explained, earlier.

In our new society, which we will create, you will score earning points, and every thing you do, as you sexal, and so forth, and as you pray, is scored, and a record of your capabilities, or excellence, or lack of excellence, is kept. You are paid according to your work performance, as you sexal, activiate, pray, erotem, orgasm, and phlumett. Also, you are graded on how well you get along with others, and on how well you try to harmonize and then sexalate with others. You score earning points, accordingly, and you get paid, according to how well you perform.

Keeping Every Thing And Everybody In Harmony And In Synch

Explaining how this works, how praying, fucking, sucking, dicking and hugging, etc., helps keep every thing in synch and in harmony and how your efforts are rewarded, is a tiny bit more complicated than my simple explanation, but that is it in a peanut shell.

For those Lesbianists hiding among you who do not wish to surrender, you Lesbianists will find we are not going to be acting kindly towards you. All of you Lesbianists, where ever you are in Washington DC, or hiding underground, or in Paris, or in Rome, Peking, and so forth, you will be dealt with harshly, as we need to put a stop to your activities, and a "maybe" is not acceptable in this case. We are not

going to allow you to continue your chaotic, nonsensical, violent activities one moment longer, and we will blow you up flying high up into the sky, and off the ocean ledge down below you, in Washington DC, as we sink your Washington DC area into the ocean, along with all of Northern Virginia, and the ocean coastal area of Maryland and Baltimore, along with large parts of the states of Virginia and Maryland, out to West Virginia, as that area settles down into and below the waves of the Atlantic Ocean, after we bomb it with one or more of my fracturable rocks weapons for mass removal of Lesbianists from the face of the earth and from their hiding places under the surface of the earth. The Lesbianists in the Washington metro area and hiding under it, had all better surrender to my kids, or they will all get their pants and clothes blown off and shredded from their bodies, if they do not, as they are given a free ride out and up into the upper atmospheres of our planet, and then, beyond. All other Lesbianists had better surrender, too, or they risk getting a free ride out, as well.

Deep Sea Ocean Trench Off The East Coast Of The United States

There is a trench that extends south wards from Washington DC, some times reaching 25 miles out in some places, and in other places, it reaches out to eight hundred miles from the shore. In the north, it reaches out in some places, 85 miles out to one hundred and twenty five miles out, to three hundred and fifty five miles out, to eight hundred miles out in some places, in the south.

It is fifteen miles deep when you go out forty five miles off the coast from Washington DC and from the Chesapeak Bay. The ledge bottom is found about three and one half miles down, and the mouth of the opening continues for ten miles, approximately, downwardsly, on the western side of the trench. The It has a gaping mouth, and it opens up and lets ocean water inland, under the continent, eighty five miles down below Washinton DC, three to six to eight miles wide, from top to bottom, from the underside of the top of the mouth, the bottom of the ledge, to the bottom of the mouth. From under the nation's capital, to the south, it travels to over eight hundred and eighty five miles. To the north, it travels three hundred and thirty five miles, to six hundred and fifty miles, to about nine hundred and fifty nine miles, inland under the continent, depending on where you wish to locate the edge of it under the continent, northwardsly. It travels to the west, inland, three hundred and thirty five miles, to just over eight hundred miles, depending on where you find the edge of it. It travels inland further westardsly, the further you travel north. It is slightly over one thousand and eight hundred miles from north to south, in total, as you'll discover, once you explode enough, and after you explode large enough fracturable rock bombs, over Northern Virginia, Maryland, Washington DC, Baltimore, covering the metro area vicinity.

The U.S. Navy, and the U.S. Coastguard know about the trench, or parts of it. They are not allowed to discuss it with anyone. No one is allowed out there, to research it as it is off limits to just about every one. Some navy personel of high rank, and coast guard personel of high rank, are allowed out to take soundings, every now and then, with their Lesbianists' staff members, and Lesbianists' personel in the Navy, and in the Coast Guard. The Soviets, at least, Boris Yeltzin, Vladmir Putin, Mikhael Gorbachev, and Zelda Gorbachev, know about it, and so do all the other Lesbianists. They can confirm it, if they wish to play ball with me, and if they wish to save their asses, after they decide to surrender to my children.

The Shelfs Systems And Trenches Systems

The shelf estends to under Lexington Kentucky, at about ten miles below it. It is five miles up under Chatanooga Kentucky. It is five miles below Washington D.C., in some areas. It is three miles below Baltimore Maryland, in some parts of the city. It is eight miles up below Pittsburg, Pennsylvania. It is fifty five miles up below, or under, West Chesterfield, New York. It comes up to eighteen to thirty miles below McLean Virgina. It is eighty eight miles below Norfolk, and the mouth, downwardsly, is five to ten to fifteen miles wide open, in a downwardsly direction. It some areas, it can be found below Ohio, and under Indiana. It crosses under the West of Kentucky, and into the south of Illinoise, five to ten, to thirty miles. It is a variegated trench system. It extends to Tennissee, parts of North Carolina, Mississippi, Alabama, Georgia, South Carolina, and to under parts of Northern and Western Florida, and is open out and into the Gulf of Mexico. The whole area of Eastern U.S.A., is sitting on an open shelf, trench system, and there is water passing below it, and out into the gulf, in several areas, over to eighty five miles west of Corpus Cristi, Glen Garden, population eight hundred and fifty, which south of Galveston, and north of Corpus Cristi, between the two cities. There is a mouth eigty five miles south of Tampa Bay, Florida, in the Gulf of Mexico. There are several openings or mouths to the underground fault line system, and deep sea ocean trench system, and shelfs systems, and water is passing from the Atlantic to the Gulf of Mexico. There is also a trench system in the north, under Niagra, that extends southwards, several hundred miles, and it has many branches to it, and it extends into this system of shelfs, trenches, and under continental water flows.

Side Bender Currents

What is a side bender? It is a current comeing out of the mouth of an opening, from under a continental shelf system, that allows waters to flow out. As the water flows out of the mouth, the outlet current of water, it flows very forcefully in an outwardsly direction, and it pushes the water out with great force, generally. If a submarine is traveling in the vicinity of a side bender, the submarine may get hit broadside, and that will often turn the submarine topsy turvy, and around facing the opposite direction it was traveling in, or another

direction, not the one it was traveling in, most often. The crew will get swung about inside the submarine, and they will fly through the cabin, and pounce off the floor to the ceiling, and hit the ceiling, and then hit the sides of the corridor they were walking along in, and finally end up on the floor when the submarine rights itself, with its balast, and you'll get many sprained or stretched ligaments, and broken bones, arms, wrists, fingers, legs, knees, ankles, feet, toes, necks, backs, hips, spinal injuries, and other injuries. It can leave a crew of a submarine nearly one hundred percent, injured and in a ship's hospital, or a Navy or military hospital for recovery. Side benders are often called upwellings of currents by the Navy, but that is not generally the case as they are not upwellings, but they are side pushing currents, that come flowing out from under continental water flow openings, horizontally. There may be some upwards lift involved, if there is a reason, such as a mouth is angled at a slight sloping angle, as it releases the flowing waters out from its tube like cavity or hole.

Crew members and military passengers of Naval submarine vessels are generally told not to talk or discuss any thing about side benders with non Navy persons, and with persons unrelated to their ship or unrelated to their ships voyage, as the governments of the world, do not want any one to find out about side benders, and they do not want people, geologists, marine geologists, undersea deep sea ocean studies researchers, or others, to research and investigate side benders. It's a big secret, these side benders, and that's what the marines, and the navy personel are sworn to keep, or face a fireing squad, on insubordination, or on some trumped up charge of spreading naval secrets, acting as a foreign spy and receiving money, or something like that. Naval personel will generally obey orders, and not discuss side benders, or other 'secret' information, with any one, as they risk losing their job, and they might face a fireing squad, or a hanging patrol, sometimes called a marching platoon, or a hanging platoon, a group of soldiers commissioned to carry out orders to hang some one who is in the military. If you pay a naval officer or enlisted person, or other person with Naval submarine duty, such as some marines, and others, enough money, they may be willing to share some information on side benders, and information about what they know about side benders. Some persons who have had Naval submarine duty, may genuinely not know any thing, such as crew members who are never assigned to submarines that travel near side benders, on a regular basis. Some times family members of enlisted persons and of Naval officers, are allowed to travel on submarines, for fun and excitement, as a special reward for their papa's or mama's duty on a submarine. Some of these family members have also had some experience with side benders, such as those who have traveled on submarines along the Marianna's trench, or other trenches, not listed, neccessarily on global maps, but none the less, which are there, and that are near shelfs systems under sunken continental shelfs, or under sunken continents, but that eject streams of water, nonetheless.

Our maps and globes of the world are incorrect, the ones we buy through bookstores, or from map publishers, as nothing that would indicate sunken continents, large sunken islands, and related trenches, or other related features, are not going to be indicated on them. The Lesbianists do not want you to find out information that could provoke you into researching, under water features, that they do not want you to know about, as your fictious understanding they have taught you, of the surface of this planet, and its history, is bogus, and any thing that would conflict with that, is certainly not going to be indicated on a map they would publish, and the map will be wiped clean of all traces of any thing that conflicts with the 'global' history of the earth, as the Lesbianists teach it, in geology courses for high school students, and below, and above. The global geological history they teach must coincide with their fictious propaganda about Adam and Eve, and "Lucy" the ape woman, the supposed mother of all people living on this planet, and about this earth being only 9 billion years old, or thereabouts, which is a bold faced lie, and other such bullshit notions they have fed every one to swallow, and have forced them to accept, and that they force people to use as primal notions to base scientific research on. The geology of our planet is much more complex than the Lesbianists are letting on to, and there is much to learn about planetary geology, as these planets have been around a very long time, and many things have happened, over and over again to them, and many things have happened to our 'solar systems', and star formations, and star systems, that people need to know more about, to get a realisitic understanding of our universe, its history, and its many complexities. In time, we will learn much more about all these things, and you can attend courses that my children have set up for every one, to teach people about our universe. You need a day pass to visit, as I've explained about, before, and then you should swear in, and become a citizen of our country. We have yet to declare this planet ours, but in time, we will, once we have finished and put an end to the problems associated with the Lesbianists, all of their shenanigans, and their malarkying around. One day we will declare this planet ours, and my kids will take charge of everything, and they will appoint people to posts of duty, and to positions of responsibilities.

Making A Large Swimming Pool

People should begin moving off and out of the area, around the Nation's capital, Virginia, Maryland, Pennsylvania, West Virginia, and North Carolina. We'll have a big swimming pool there, with lots of, mostly uninhabited, tiny islets, or hill tops and mountain tops, after all of the current residents die, and pass on and transel over to my Epcot Center, after one of our compatriots, or groups of them, detonate enough of my fracturable rock bombs. People will have to watch out for hungry sharks, after they swim inland, above the sunken landscape, looking for corpses to eat, and to scavenge, as lots of Lesbianists' corpses will come floating up from underground hangouts and cities of the Lesbianists, under those parts of the U.S., and from under the Gulf of Mexico, from under the sea floors of the Atlantic,

from under the Niagra trench systems, and from under other trench systems in the Eastern U.S. This is not a joke, by the way.

Stagnasis

Salts kiddies in stagnasis is when the salts kiddies are in their salts kiddies crystals cages, in a hibernative state, in perfect equilibrium, to keep them alive and well, for as long as possible. Salts kiddies crystals cages sciences help you to understand many things about how things work in nature. Please read over my notes on my bulletin board.

Black Powder 'String' Fuses

Take a spool of sewing thread, and use Elmer's glue to coat the string, and run the string with a thin layer of Elmer's glue coated on it, through a bucket of black powder gun powder, which you can order in the mail, over the internet, or pick up at an antique musket or old style 'cap and ball' musket rifles and pistols retail stores.

Elmer's glue and gunpowder will combine to form a minor plastiques explosive, after the salts kiddies mix it up, eat each other up, pee and poop out lots of stuff that is highly explosive, as they get busy making babies, except when gunpowder is used in large quantities with Elmer's glue, to form a major plastiques explosive. Benzine will help this along, with diesel fuels, as well, and with chlorine, we can see some major plastiques explosives in the making, as mama's and papa's begin making lots of children, as they begin mixing it up, and as they all begin pooping and peeing out body fluids that is food for others, that will contribute to the powerfulness and explosiveness of the mixture.

After you make your string fuse, and let it dry out for a couple of weeks, then coat a rag or muslim cloth in oil, or grease, or a mixture of turpentine, gasoline, diesel fuel, and grease, with benzine, and make a paste, and use that paste to coat a thin cloth, such as a muslim cloth, and then let that set and dry for a few days, and then wrap a few sets of 'string fuses' together in a bundle, and place them inside the cloth. It will become a very powerful explosive, in itself, the more gun powder you use with it.

Test it, to see how fast it burns once it is wrapped in a cloth coated with a mixture of grease and fuels. The thicker the grease, the slower it will burn. The thinner the grease mixture, by adding more turpentine, or benzine, or paint thinner, the more rapidly the fuse will burn. You will have a very powerful explosives cocktail, with this mixture, so be careful. You have to be very careful with what you combine, as you'll be bringing together very explosive elements, when you mix these fuels and liquids together with gun powder on a string.

A few string fuses, wrapped in a well soaked cloth, with a mixture of these liquids and the axel grease, will make a type of plastique explosive, that can be used as a shape charge, or a mouldable, or

shapeable, explosive, that is good for blowing doors off hinges, such as at pharmacies, or banks, and for blowing locks on private homes' fences to pieces, such as can be found at the White House, at 1600 Pennsylvania Ave. Washington, D.C., at the entrances and exits gates of the White House where guards are on constant duty patroling the area for security purposes. An initial explosive, a detonated fracturable rocks bomb, small in size, may cause a concusive force to cause the guards to black out, and pass out, and then sleep for a while. Be very careful with the size of the bomb, as we do not want to level the homes and buildings surrounding the White House, or across from it in Layfayette Park. After you put them to sleep, with your initial blast, you can test the shape charge on the nearby fences, at the White House.

Black Powder 'Cap And Ball' Pistols

Most black powder cap and ball pistols and rifles, muskets, sellers and retail outlets can be found on the internet, and some gun shops carry black powder, as well as the detonating fireing caps, for black powder rifles, and pistols. Many of them do, and you can purchase the black powder and copper detonating, ignition caps, for useing in your cap and ball pistol, or musket, or other, more modern, hunting rifle, that allows you to use black powder, and detonating copper caps that slip on a small round fireing ignition nipple that is made out of steel, and has a hole in it, to allow the percussive explosives in the firing copper igniting cap to ignite on impact with the hammer on the weapon, when it slams down on it, and the flames from the igniting explosives mixture, glued to the inside of the firing copper cap, then ignite the black powder, that was rammed down the barrel, or packed and tamped down in a cylinder of a percusive black powder cap and ball pistol. The caps are fairly useless, unless you wish to add them to a fuel oils, chlorine formula, and let them sit in the fuel oils mixture, and that will help develop plastique, as well.

Higher Temperatures Develop More Useful Energies For Making Babies

The copper in the cap will also allow for a higher temperature in burning, when the fuels mixture ferments after a few weeks. Magnesium in the cap as well, will also help to raise the burning temperature of the fuels mixture, and with some black powder added, and with some chlorine added, your plastiques recipe will become even more useful. These higher temperatures will help to produce energies that will be conducive to baby making among the fracturable, or rupturable, and percussive, rocks radiological salts kiddies. You can then add a handful or more of powderized amethysts, or turquoise, that you can purchase in bulk, on Ebay, for some small bulk quantities, and also emeralds are useful, as they all have fracturable rocks kiddies embedded in them, and fast asleep, in stagnasis.

Zircon Diamonds, And Other "Radio Active" Gem Stones, Etc.

Zirconium is a mineral that they use for the fake diamonds they sell with the trade name, Zircon diamonds, or Zirconium diamonds. You can powderize them, and use them for a good amount of fracturable rocks explosives, large and fast family making, salts kiddies, for a 'nuclear' party, and a send off to the eastern coast of the United States, before it is blown off the coastal ledge it sits upon, and then sinks below the ocean waves, if you strike it hard enough, with one or more of my fracturable rocks babies making, "nuclear" salts kiddies bombs. You'll need a few handfuls of Zicon diamonds, powderized, to make a nice fracturable rocks, babies making bomb. You can mix turquoise, emeralds that are mined and sold in bulk quantities on Ebay, amethyst, and the other rocks that I've mentioned, along with powderized 'sand' from the beach. Argentina, and Venezuela, Baha, and Southern California are good places to collect useful sands, full of fracturable rocks, salts kiddies, that a geiger counter will detect, if it is a sensitive enough geiger counter.

Geiger Counters And Their Usefulness

They are not too hard to build, but you will have to look in your Popular Mechanics magazines, for the details on how to build a "geiger counter". Some mining stores, and mining outfitters stores, may be a useful places to order or purchase a geiger counter, if you are on a family budget. You might find one on the cheap, on Ebay, that is still useable.

There are some kits available, if you look hard enough, to use to build your own geiger counter. A mining outfitters store, in South America, or in Central America, or in Utah, or in Nevada, may be able to help you locate a kit, to put together, if you go in there, and pretend you want to go out and look for interesting rocks, and you need some information on where to look for interesting rocks, so go to a mining outfitters store, or to a rock hounding club, or rock hounding retail store, for looking at beautiful stones that rock collectors, or rock hounds, have found, and made available at the store. Usually the store owner will have his or her suppliers, on name cards, and you can get in touch with them to get more information on where to look for interesting rocks to test with your geiger counter, since you are facinated by radioactive elements in rocks, and you are interested in finding some, for a collection you wish to start.

You might want to pick up some primer books, on minerals and rocks, gems, and gemstones, from Amazon online, or from a local book store, such as Barnes and Nobel book store, which has a few useful books on rocks, mineral rocks, gems, and gemstones, that you can find when you are out rock hounding. Desert Outfitters in Las Vegas, a miner's outfitters store, that also provides useful tools to rock collectors, such as rock hammers, and hand held pick hammers, for chipping away at rocks, to see what is under the surface of the rock, or under the peel of it, the outer layer, as well as terrain maps, and outfitting supplies, tents, and sleeping bags, and so forth, has these types of books, and lots of maps, and maybe they can help you find useful kits

to purchase, to build yourself a geiger counter. They also sell geiger counters for about three hundred and fifty dollars or so. Sears used to sell Geiger Counters, and they still can order them for you, I think, through their catalogs. On Ebay, you can find many reasonably priced Geiger Counters. How well the geiger counters work, the ones people sell on Ebay, I can't say, so you'll have to talk with sellers, and see what they say about the geiger counters they are selling to others on Ebay, or read about them in old copies of popular mechanics, and in trade publications for the mining industry.

Novice And Amateur 'Rock Hounding' Rock Collectors Clubs

On Sahara, east of Las Vegas Boulevard, there is a rock shop, which is about two and one half, or so, blocks down from the intersection, on the north side of the street, and they have information, as well as lots of primer books, on rocks, and on geiger counters, and where you can find them. They are well connected to the local rock and gem, minerals and gems finding, or rock hounding clubs. You can meet their members, and go out with them, on excursions, as they know where to find just about anything.

There are similar clubs in every major city, and in lots of smaller cities. Mining towns of course have lots of mining outfitters stores, and they probably have geiger counters for sale, so you can use it to find some very nice, fracturable rocks, along coastlines, or in ancient dry lakes and seas, sediments filled, rock hounding areas.

Decontaminating Your Self With Ocean Salts

Acidic ocean salts in ocean water will help eat up the radiological kiddies that find their way into your bodies, and that make you feel ill. It might take several weeks for initial recovery, with you taking large amounts, several teaspoons or more, as much as you can handle, in your diet, every day, for up to three to eight years, to thirteen years, for severe contamination, and for full recovery. Other things, such as nutmeg, and oregano, in a salty tea brew, will also help you, and marijuana in the salty tea brew, will further help you. Berries can also be of great benefit for recovery from radiological salts kiddies contamination.

My kids have a recovery kit, that will help you recover from an overdose of radiological salts kiddies, after a major birthing event, and that kit will help you fully recover. You need to join our country, and swear in, and become a citizen, to be given one of these kits to help you for your recovery. They can provide you with information, of various kinds, once you swear in. They have you swear in as full time citizens, now, except in special cases.

Ancient Dry Lakes

There are many ancient dry lakes, up north, in the colder areas, of Manitoba, and around the edges of wet lakes, you'll find areas that dried out, a long time ago, and you'll find interesting things in the

sediments deposits under the surface soils of the earth, that have covered most areas, and that come in to our atmosphere, and then deposit themselves onto the surface of our planet, as they are blown in on the solar winds. A few feet of top soil may cover the dry lake areas, around the edges of these lakes, and the soils depths may reach to twelve feet, to fifty feet, to sixty or to eighty of more feet, in some areas.

Once you hit the sediments layers, around the edges of these lakes, outwards to eight to fifteen miles, to thirty miles or further, out to up to eight hundred miles, as in the case of Lake Erie, and that lakes region, the Great Lakes, that all use to be one large salt water sea, but is now, a fresh water set of lakes, you can begin looking for the radiological bullets of the previous catastrophes in my universe, that shot out radiological salts kiddies, into the sediments rocks of mineral stones, and sand. Gravels might contain some "radioactive" fracturable rocks, and you can tell which are the useful ones, with a geiger counter. There are still salt water lakes up in Manitoba, Lake Huron, and some others, that used to be part of Lake Erie, and all part of the Great Lakes, when they were a large, salt water sea, but which are now, no longer part of that lake region system of lakes, as fresh water now fills up the Great Lakes from under ground water systems of fresh water flows.

Hydrolific Pressures From Water Falls

Hydrolific pressures, from water falls, primarily, help to erode and carve out and build the under continent open areas of water flows, that flow under the continents, and that dump their waters by traveling underground, in culvers, and channels, and in trenches systems, and then flowing out and into the oceans, resulting in side benders currents and flows.

Underground Lakes

Hydraulisis is one type of water pressures. Hydrolific pressures are those pressures created by water beating down, steadily, as water falls from higher to lower places, creating underground holes, and large open underground cavities, and water holding vessels, aquafirs, and underground lakes in the underground rock layers. Lots of cities sit on top of such underground lakes, on the crust of the surface of the earth, or very near to them. The lakes are often ovular and rounded in shape, from top to bottom. Many former water falls, are now low lying, and flat, and there is no water fall on the river, except for minor, cascades, such as found in the Grand Canyon Rift Valley down the Colorado River, and out into the Baha area.

Baha Mexico

Baha is a good place to go looking for interesting, "radio active", or radiological rocks, fracturable rocks with radiological salts kiddies sleeping soundly, embedded into other rocks, after colliding with

them, in a hail of radiological rocks bullets, after a planet or a galaxy, or a large nebular star system, or a cluster of them, were detonated, by some fool with a huge and powerful, home made bomb. This happened, often, in the past, and still, today, it happens, now and then. Bits and pieces of the radiological rocks will come flying in, and then embed themselves into other rocks, as I've explained about, before. We've had so many catastrophes in my universe, that our ancient rocks, are peppered with radiological rocks that are embedded in them. Off the coast of Baha, is a good place to go diving, looking for rocks that were washed off shore, as waters flowed down the Colorado River, trinities of aeons ago, when this planet was still a young planet, maybe about one fifth the way through its infancy, after reforming, again, after its last major impact that shattered it to pieces, for the umpteenth kazillionth, plus more, time. This shattering and reforming, has been going on too long to count, and obviously, there is a large amount of mixturing going on, with debris from other star systems, galaxies, nebulas, and so forth, floating in, and becomeing part of our planets, all around and about, on solar winds. You'll find rocks on the inside of the Baha coast, and on the outside, as well, and along the Baha coasts. You might have to dig down thirty of fifty feet, to a few hundred feet to find them, maybe eight hundred feet, or sixteen hundred feet, or further, but you'll eventually find something useful with lots of radological bullets embedded in the rocks.

Finding Good Rocks With 'Radiological' Salts Kiddies Bullets

You can find interesting rocks, also on high hilltops, such as in the Andes, the Himalaya's, the Swiss Alps, high mountains in Austria, and in Germany, high hill tops and mountains in Iran, maybe in Afganistan, and the very high hill tops, that are generally old hills, in many countries. They will usually have, if they are very old hill tops, lots of rocks scattered about that are very old, and that have lots of fracturable 'radiological' salts kiddies 'bullets', from previous detonations around my universe, and other related kiddies in them, as well. You can also find them along ancient river beds, and along dried up desert gulley washes, in the valleys between the mountains, in areas where tall, old mountains exist. You might have to dig down into the underlying layers of rocks to find really ancient rocks loaded and peppered with ballistic radiological 'bullets', tiny fragments of radiological materials that went shooting out upon detonation of nuclear materials, elsewhere in my universe. Geiger counters will let you know if your sample rock material is pacted full and loaded with the tiny radiological 'bullets', or just partially loaded with them, depending on the response from the geiger counter. Many types of radiological materials, the bullets fragments, may not register on current day geiger counters, as they are not set to the correct radiological energies frequencies and currents settings to be able to detect them in the rocks. There are many types of radiological rocks in my universe, and current day geiger counters are set to pick up the currents and frequencies of the energies from only a few types of

them, and there are thousands of types of radiological materials, so the older the rocks that you find, the more likely that the loads of radiological materials in them will be high in not only the types of radiological materials the geiger counter can detect, but also, in the types of radiological materials the geiger counters are not set to the frequencies and energies currents of. Such samples of rocks materials with large amounts of fracturable rocks, radiological 'bullets' inside of them, will yield massive explosive potentials, if you raise the heats energies of your explosives formula, to near solar temperatures, as I've mentioned about.

Plastiques, Explosives, Radiological 'Bullets', 'Nuclear Detonations', And Decontaminating Yourself Of Radiological Salts Kiddies

Please see my web pages for information on making plastique, along with metals fragments, and high temperature burnoff minerals mixtures explosives to produce the energies needed to produce nuclear detonations. Field chemists and explosives experts should be consulted, as they will probably know more about the temperatures at which different metals and minerals burn at and they will be more helpful in providing you with accurate information on different alloys mixtures, and the temperatures they burn at, such as the new US Mint US dollar coins, that will burn at extremely high temperatures, at about one fifth to one third the temperatures of solar temperatures, when ground into fine dusts fragments, and then after fermenting them, and then mixing the fermented particles in with the petrol fuels, chlorine, and gun powder, etc., plastiques explosives formulas, as I've explained about, to some extent, in my notes on my Gurkian Age Gurkian Way bulletin board. Be very careful when testing, as you may find the results extremely hazardous. See my kids, for more information, as I've explained about, on my bulletin board. Ocean salt will help to decontaminate you of radiological salts kiddies. A two hundred pound man will need about three pounds of ocean salt on a daily basis, to live healthfully. To decontaminate yourself, you will need more than that, to properly get rid of the radiological salts kiddies in your bodies, after you've been working with radiological salts kiddies, and testing the explosives potentials, for some time. See my bulletin board for more information on the 'salts kiddies sciences' to help you to understand what is going on in so called, 'nuclear detonations'.

Sledgehammering Continents And Land Areas Where Lesbianists Live, Hiding Below

Here are a few places to place some other fracturable rocks bombs on, to make them fall in, and collapse down onto the layers of rocks, below, and then puncture the ceilings of the cavernous cities the Lesbianists have made, down below those lower rocks layers. Topango in the South Pacific near the Marianas, the area midway between the Ryukyu Islands and Haha Jima, Chichi Jima, and Iwo Jima, where you will find a sunken continent, Wellington New Zealand, Peking,

Falklands, Urals Mountains, Chile thirty miles north of Concepcion and eighty miles east of it, near the Argentina border, and the Kamchatka pennisula, which will split and collapse in the center of it, midway down the penninsula, if you hit it hard enough. Lesbianists will come floating up, if their bodies can fit between the tons of debris that will fall in on them, as you smash the land sites that sit on top of ocean shelfs, and on open lakes below the land, some miles down from the surface, in some cases, and further down, in other cases.

It may be hard or impossible to deliver a nice bomb below the ocean above or onto the top of the sunken continent below the ocean, between the Ryukyu Islands, or Okinawa, and the islands of Japan, called, Chichi Jima, Haha Jima, and Iwo Jima. If one can be delivered there, you'll crush the continent below the surface of the ocean, and that will cave in on the cities, there are more than one there, that are below the protected shelf layer of rocks, above the cities the Lesbianists have there, below the sunken continent, to live comfortably in. The other places aren't so hard to hit. It is just a matter of local interest, and urging of the people there, to take the correct action to help us to resolve this problem, of Lesbianists living below us, all around the globe, in their honey comb, bee hive like canival of cities.

A canival of cities, is a large collection of cities that is located in such a way as to make it easy to get from one place to another. They are conveneint for them to live in as they are well placed, and spread out evenly, using the full extent of the area, as efficiently as possible. The Lesbianists have a canival of cities under the lower rock shelf layers, that are above them, and that help to keep them protected, warm, dry for the most part, but not always, and that are conveniety located each one in a bee hive like, configuration, well placed, with a well designed, layout, with central cities, and with satelite cities. It is well designed and resembles in part, Melbourne Australia, which was laid out, planned and designed as a modern city. The Lesbianists of course, think Melbourne is puny compared to their accomplishments, and of course, with the technologies they had and have available to them, from time to time, they made good use of every inch of space they have available to them, under the lower hard rock, but leaky rock layers above them.

My kids have places and locations maps of all the best places to locate your home built fracturable rock bombs, and so please pick up the information from them, after you have sworn in, as citizens of our country. Also, please see my earlier notes on the sciences that support a correct understanding of radiological particals based fracturable rocks explosives and other helpful and useful explosives you'll need to set off the fracturable, also called, rupturable rocks bombs, i.e., the so called 'nuclear' detonations.

Topsoils

Did you know that nearly 99.9999+ percent of the earth's crust, or mantle, is formed from space debris that has floated in on the solar winds? It's true. Only about 0.000001 percent of the top soil is from local vegetation, globally speaking. The rest of the top soil comes in from above, blown in on the solar winds, as debris from other planets that have been destroyed, crushed, or blown to pieces by idiots with very large bombs, that demolished whole galaxies, or multiples of galaxies, in a few milliseconds, as the instant they blew up, they were so well made, or constructed, and so powerful, they instantly blew up the whole area of galaxies the planet was located amongst.

If for instance, you fill up one third of the large tourist attraction, the meteor crater in Arizona, with one of these fuels and rocks bombs, and ignite it, you'll disentegrate all of the Milky Way, and some what more than that, in one attempt, by my estimation, if the fracturable rocks bombs were made well enough with the fuels bombs, to burn at near or close to, solar temperatures, and if there were enough materials in the fracturable rocks, to get lots of mama's and papa's making lots of babies, relatives, and others. There are lots of different types of salts kiddies in fracturable rocks, and there are other types of kiddies, the radiological kiddies, which are sometimes, but maybe are not always, grouped with the fracturable rocks kiddies. There are many types of kiddies living in radiological rocks. When we send high heats waves energies, and other types of energies into the fracturable rocks, we can get many types of kiddies to begin making babies. If we get enough of the different types of kiddies to begin making babies, we will have one fine and dandy, explosive shower of baby making events. You can get further information on this topic from my kids, and if you tell your friends to check in with my kids, and to swear in, and become citizens of my and my kids' new country, along with other people who are swearing in, and becomeing citizens of our new country, my kids will make certain that every one is protected, and no one is caught outside, when the bombs go off, as my kids will tractor you and all the other citizens in, with my kids advanced teletransportation technologies, before any one can get hurt by the bomb or bombs blowing up, locally, or in their areas. That means, my worker unionized kids are very quick on getting people into the encapsulated living environment every one is living in, below the ground, that my kids built for every one to live in, until we get this problem straightened out, and until it is safely over with. People can continue to live in the encapsulated living environment, after it is over, as we are going to start a new economic and social system, and we are getting started, down below, where my kids are keeping the encapsulated living environment, well taken care of and well managed.

Later on, we'll worry about who comes out, and when, as we have plans for every one, to begin working inside the encapsulated living environment, which is very well designed, and bomb proof, of course. Once every one gets accustomed to the new way of living, in accordance with my religious principals, and in accordance with our new working and living programs, when people have saved up enough money, they can pool their money, and acquire a lease for land up above, on the

surface, and then with more money, they can have nice places designed for them, and built for them, with your input and with your instructions. You will need to study designing homes, and layouts of homes, for large numbers of people, as you will be required to live in groups of people, as the old systems of living, one husband, one wife, and so forth, is out the window, and now we are going for group living, with many members to your groups. When you have got the maturity together to live in large groups, and to sexal with many people in large groups, then you will qualify, and then with lots of earned income, pooled together, you and the members in your group, can then move up and live on the surface, in your well designed home, which my kids will use their technologies to build for you.

This is how we are going to clean up our planet, and get started with a whole new system for living and working with each other, as GOD's children working and living together, begining here, and spreading, slowly, across and throughout my universe, as we bring others into our program, all across the universe, from end to end, from top to bottom, and from side to side, and in every nook and cranny of my universe. All of my kids, you, who I am speaking to, will learn to live and work together, supporting my worker unionized kids, in our new global, united, and universal society, we will begin to build, on this planet, first, and then later, every where else. I am the mother and father of all of you, and of all of my worker, unionized kids, as well, all of my kids who work for me, of course, and of all of my living beings, and of all of my animals. We are going to get this big family of ours, together, and we, the human beings, will begin to clean up our universe, by sexaling for a living, and with many other living by the points systems programs, and other projects. We will also begin to get our heads on straight with religious activitiating, in other words, by participating in religialing, in groups, or by oneself, in the encapsulated living environment, first.

As we move along, in time, we will develop our working strengths, and character, and some people will qualify, eventually, for working in my religious brigade, once they realize and understand who I am, i.e., GOD. Others, who do not give a darn about what I am doing, may do as they like, as long as they are citizens of our country, and as long as they enjoy what they are doing, and as long as they add to the welfare of all people in our society, universal wide, as we build it, larger and larger, for all of my children, no matter who they are. We will one day have all of my children, working for me, and if they do not like working for me, they still have to pay the fees for the resources they use, just as I have to, and that means, there is a charge for every thing we use, and it is detucted from our pay checks. Every one gets a pay check, if they work, and if they are disabled, they will get earnings to support them, for as long as they need to be supported, until they are regroverated, healthy, fit, mentally prepared, and willing and able to participate. Those who do not wish to participate, will work in jail cells, and prison cells, sexaling for a living, with animals, as I've mentioned before, and at carnival

and entertainment centers and districts, we will eventually set up, first on and also inside of this planet, in 'encapsulated' carnival and entertainment parks, and later on and within, other planets.

We are going to have all my children working for me, eventually, as I've spoken about before, and in time, most people will wish to work, and when they are mentally prepared to work, they will enjoy their working, most likely, as sexaling for a living, is not a unwholesome way to earn a living, and it is a pure and holy way to earn a living, and a pure and holy way to spend our time, as part of our new working ethics environement. For more information on this, please see my worker, unionized kids, who handle the information hot lines, in our, and your, and their, as well, encapsulated, living environement, which they have built, maintain, and manage, for all of you, and which they are continuing to build and expand on, for the rest of you, who have not checked in with them, yet. My worker, unionized kids have their own places to live, inside of the molecules that are used in building your living environment, and in your bodies, and in the molecules outside your living environement, as well. They live in all of the molecules, all over my universe, and they work in them, as well. They have their own universes, that they live in, which are all contained with in the molecules in my universe. It is a little more complicated than that, and so see them for more information on it, if you are interested in learning more.

Disintegrating The Milky Way

The Milky Way is made up of not one galaxy, but of several thousand, of different sizes. We don't have the technologies to see too clearly to distinguish the different galaxies that are within the borders of the Milky Way, nebular star system and nebular star cluster system, another way of saying that the Milky Way is a collection of many nebular star systems. Nebular star systems can be considered similar to galaxies, but maybe not always, as there are exceptions to every thing in most cases, any way. We are of course part of the Milky Way, I suppose you could say that, but we are far out on the outer fringes of it, and we are not any where near the center of it, and we have our own galaxy we are a part of, and it is not part of the Milky Way, so technically, we are not part of the Milky Way, although we might like to think we are, since it is an expansive set of star systems, and star clusters, nebular systems, and other types of solar bodies systems, and it covers over us, and beyond us, sort of over layering us. Be that as it may, we do not want to blow up or disintegrate the Milky Way, as we are in a way, part of it, or at least, we are encovered by it. Encover means to be covered over by something and encased within it, or to be encircled or surrounded by it.

Retraction

Tom Selleck is not a Lesbianist but he was a Lesbianist, until the Lesbianists killed him, after expelling him from their group, and after torturing him with their many heinous torture methods.

Lay Order Of People

I have no lay order of worshippers, who participate with me, in any thing, or in any way. Why? Because, that's like me, the captain of the ship, coming into a town of persons who I don't know, and then saying that I'm the authority over them. No one is going to listen to me, and no one should be expected to listen to me. I wouldn't attempt any such thing, and so as the captain of my ship, my religious order, I have no authority over lay persons. I have nothing to do with lay persons, what so ever. I will never have any thing to do with lay persons, unless they realize that I am GOD, and that I am the mother and father of all human beings, and all animals, and all living beings. No one is going to recognize me as GOD, for a long time, as no one has the karma to recognize and understand that I am GOD. Lay persons are free to do as they like, and I have no regulations concerning them, in my religious order. My children may have many regulations, for non religious order people, but I don't have any thing to do with that.

Donations For The Sake Of My Ministry

The only thing is, that, as I said before, if a person recognizes and understands that I am GOD, and that I am the Mother and Father of all human beings, all animals, and all living beings, then they are free to donate cookies to me, or clothes, or wearables, socks, and scarfs, or coats, sweaters, or slacks, neckties, and so forth, cakes, or cupcakes, baked items, or financial contributions, or chairs, and furniture, beds, linens, tables, office furniture, phones, phone lines wiring, electrical wiring, plumbing items, housing items, for building up a house, paved drive ways, mason or rock walls, surrounding the property, or a set of dormitories, or a prayer sexaling room, or a prayer ceremonialing room, or a swimming pool, sauna, bath house, toilet facilities, bathing facilities, laundering facilities, a root cellar, a molds and funguses workshop, a brewery workshop, or any workshop for helping to educate others, the land to build these things on, or money, or whatever. If some one recognizes and understands that I am GOD, then it is perfectly alright, to donate any types of items, or any thing of value, that would assist my ministry to get up and get running. As yet, no one has understands or recognizes me as GOD, and that I am GOD, and the mother and father of all human beings, all animals, and all living beings, so as yet, I have not heard from one person, not a letter, or a phone call, other than an occasional wise cracking person, mischief maker, or a person or persons who are worried, and then complain to me, or rather, to my answering machine, typically, as I don't pick up the phone, now, as I had one person calling who was a bad kid of mine, and he was just looking for trouble, and since that, I just ignore all complaints, or wise crackers, or mischief makers, and so on.

Nollicking Foolish People

Some people do not like me wearing my GOd cap, that is one of those specialty base ball caps, but with 'GOd' written across the front of it, and they might hate me, especially some South American or Central American Hispanic types, who have primitive and backwards religions

and filled with local lore and ancient tales of demons, and goblins, and gooney bears, or ghostly ghouls, or other superstitious ideas and notions of things that go 'boo!' in the night, and try to scare or hurt people, as there are plenty of folklorish tales of such things, in primitive cultures, that thrive, even at the current time, nowadays, in large cities, even, and these types of people might want to kill me, and when they knock on my door, with their gun in their pocket, or in their hand, machete or knife behind their back, I just ignore them, and I don't even bother to get up from my work bench, i.e., my bed, to see who is knocking at the door, as I know already, they have nothing to do with my monastic order, and because they have nothing to do with my religious ministry, or with my setting up my religious ministry.

Just last night, some group of people droped by, and banged on my door, with the tip or barrel of a weapon, and it was rather hard sounding, and I just ignored them, and after a few minutes, or so, they went away, and they haven't come back, yet. I don't think they will, and even if they do, I don't think it will amount to any thing, as I may have occaisonal visitors or harrasment calls, now and then, but that's all they are, and I just won't allow my self to be bothered by them as they are unimportant, and my goof ball kids, are just too nutty to figure out that I am GOD, and that they are my kids. Nevertheless, these goof ball kids are here or there, and I get lots of compliments about my hat, and usually, if not always, the person giving me the compliment wishes to steal the hat from me, and then rob me, in any other way, he or she can, and then beat me up, if he or she can. Well, I can't let these types of things get to me, and I just ignore them, as I walk by them, and I don't reply or return any statements to them, except a polite, 'thank you' if they gave me a compliment about my hat, but that's about all, and I might mutter something, like, and well, so that's just another one of my goof ball kids, or something to that effect.

Nollicking And Nollygaging

Nollicking means idiotic and foolish people who are wasting their time, for accomplishing nothing. It's like, nolly gaging, but nollygaging, is just wasting time, foolishly, and while you are nollygaging, you are looking for some way to make a profit, from your use of your time. Scanderously, you try to extort money from others, or force others to give you money, you do not have any right to. That's nollygaging, as I can recall, at the moment.

Goof Ball Kids, Their Mischievousness, And Maliciousness

Well, I have all kinds of kids, and many of them are malicious, if you give them a chance, so I just stay away from all of them, as I know most every one of my children, is malicious, from time to time, if given the chance, and I think that applies to all of them, regardless of their age, at some point in their life, they will commit crimes of one kind of another, against others, and not think much about it,

except that, they just had to take care of that, as they wouldn't be happy, if they hadn't. Okay, so every one of my kids, at one time or another, will do goofey or goof ball things, and not think much about it. That's the way it is. There is nothing to be surprised about, as every one, and I don't care who they are, every one, does things they shouldn't do.

Me, personally, I get angry, and say nasty things, and make myself sound gruff, now and then, and maybe I shouldn't, but I just feel compelled to do that, when I have a righteous conviction that some one deserves my speaking up and telling them off. Well, you feel sorry about it, afterwards, if you hurt some one's feelings, but then that's the way it goes, and no one is perfect, so it's just. Let's try to live and let live, and live together in peace, and cut out the naughtyness, and stop the mischiefness, if we at all possibly can, and apologise if the opportunity presents itself. That's always the best way to handle things. Most people, after they kill someone, can't appologise, and young girls and boys, and older girls and boys, think nothing of killing people, or having some one killed, for them, and then of course, there is no way for any one to appologise to the dead person, since that person is in my Epcot Center. Well, we can't do too much about that, can we, but we can try to be kinder, and not kill as much as we feel we must to be happy.

More Than Ninety Five (95) Percent Of The Homicides In The World, Some Times As High As Ninety Eight (98) Percent, Or Even Higher, Go Unreported, And Are Therefore, Not Investigated

It's too bad that we kill others, and torture others, but that's the way my goof ball kids live in my universe, and despite what people might wish to think, to the contrary, it happens every day, in every city, town, hamlet, county, district, or where ever. My goof ball kids are killing people, right and left, and there are just so many deaths, the police don't hear the ninety five (95) percent of them, or so, as they never learn about it. The percentage of homicides the police do not hear about, is perhaps just a little higher, but in any case, no one should be surprised, as that is how my goof ball kids get along with one and each other, and they have been getting along with one and each other, that way, for a very long time, already, so it will not stop, any time soon, and that's just the way things are, for now. The Lesbianists are responisible for just about eighty five percent of those homicides.

Labrynthine Cities Below Us Where Lesbianists Live, And Laugh At All Of Us

The Lesbianists living below us, in their cavernous, labryinthine cities, that are below the hard rock layers, well below the oceans, and other bodies of water, far below the continents, go around, and mess with every one, and they play with people, and they think they have the right to amuse themselves by useing the citizens of this planet, any old way they like. They go around, and set up phoney wars,

and they watch the citizens of each country, kill each other, on their commands. The Lesbianists enjoy playing these kinds of games, and they set up civilization after civilization, and they bring it along, and help to develop it, and when they get it to a high enough level, they feel a sense of accomplishment, and then they watch and amuse themselves as they destroy what they built up, and the people who are living, unawares of them. The Lesbianists think it is funny, that the Lesbianists feed the lies about our universe, and the lies about science, to every one, and the Lesbianists think they have the right to bafoonerize every person who comes into our world, as a tummy baby, who is on his or her way in, and in fifty to eighty or so years, is on his or her way out.

Why Do Continents Sink? Why Do Land Masses Rise?

Load transference technologies, and partical transference technologies, redistribute the loads on the internal network of underground cities the Lesbianists live in, to keep them perfectly centered, when ever there is a major uplifting, or down plunging, of continental mass, rocks, and earth, that would cause continents to sink and continents or land masses to rise. Movements of 'earthen matter' or rocks and dirt is accomplished with load transference technologies, and other technologies, such as partical dismissive technologies, and partical remissive technologies. This way, a planet can move, inwardsly, as a continent sinks, after the underlying rock layers are washed away due to hydrolific pressures, and not destroy the underground labrythine cities. My kids also use the same technologies, and other technologies, for maintaining the integrity of their underground encapsulated living environment.

The sinking of the continent pushes downwardsly, and as it falls, it exerts high intensity pressures on the underlying layers of rocks, stones, pebbles, sands, sediments, clays, metals, minerals, and so forth. The pressures will normally push downwardsly, and outwardsly, and shifting of materials, occurs, and land masses rise, as a result. When you have an underground city, or collection of them ringing the planet, when the pressures occur, and when the materials begin to shift, you redistribute the materials, using advanced sophisticated technologies, that will shift the particals in the directions they need to move, and distribute them so that they will not interfere with the structural integrity of the undergound labrynthine, and perfectly, geometricly laid out city dwellings and living habitats. It's high tech stuff, and so if you don't understand how partical dismissive technologies work, or if you do not understand how partical remissive technologies work, you will have a hard time understanding how this is accomplished. There are other technologies, that also must be employed, to work in an integrated manner with the partical dismissive and partical remissive technologies. All of these technologies, working in an integrated manner, will perfectly redistribute all the particals of rocks, and so forth, that need to be redistributed. The technologies keep the ring of cities perfectly centered within the

earth. If there is a need for downsizing of the interconnected labrinthine layout of cities, that is also accomplished with these technologies. Downsizing may occur for any number of reasons. I've briefly explained what can happen as comets and asteroids pass by our planet, at amazing speeds, and that we can lose some or part of our planet, mountains, terrain, and lakes full of water, with a pass by, by a solartoid, or planetary sun, as it wizzes by at a phenomenal speed. Once the planet restabilizes, the downsizeing process begins. Even though there may be continental shifts, of uprising and down plunging events, and large, cometary passbys, with the technologies that are available to the Lesbianists to use, on a 'for lease' option, the integrity of the underground labrynthine layout of cities, is kept in tact, as best as possible. The technologies that accomplish this for the Lesbianists, that keep their cities perfectly situated, are not on lease, any more, and they have lost their lease on the technologies that would allow them to keep their cities perfectly protected, and perfectly centered. Some areas may not be too livable, for them, as leaky ceilings cause waters to accumulate, below, and they must trudge through salty ocean water, knee deep, in places, and in other places, the water is too deep to allow them safe passage down one tube, or trammel system transportation pass through tube, to a city or to cities which were previously accessable.

The Leases On Their Technologies Are Expiring

The leases on the technologies that they have been using, and that were assigned to them, after they swore in, and pledged to live on this planet, and pledged to sexal for a living have been expiring for some time, already, and will continue to expire for some time, to come. Because this was a newly formed planet, before they arrived, but after it recongealed, after it was shattered to pieces by a passing cometoid that ran smack into it, as I've explained about, or touched on, a couple of times, before, see my notes on the web, once the planet stabilized, and became a livable planet, they first needed to live underground, where they could live, and slowly over time, adjust to the types of solar radiations, and other factors that they would need to adjust to to be able to one day come out from down underneath the surface of the planet and begin to live above ground. The rock layers, land, and bodies of water above shielded them from potentially harmful radiation. The living area below, also had built in protection systems to help protect them from the radiative energies that could harm them. After they adjusted to the conditions of the planet, they could come out, and as they continued to sexal for a living, other technologies would allow them to build large cities, for them to habitate in, as they continued in the sexaling for a living program. The cities that my kids built for them, that my kids have the permissions to use for these programs, are now down under the rock layers, all crumpled up, or they have passed into the molten core, and have been spewed out, as basaltic lava, as the Lesbianists did not hold to their pledge, and they broke the law, and the maintenance of their above ground cities, was terminated. With continental

uplifitings, and downplungings occuring, over the long period of time, they lost their cities, and now they have only the underground, initial landing zone area, dwellings and habitats, that have down sized, some what, since their initial landing for occupation of this planet, in the sexaling for a living program. They broke all the rules, and they developed their own sham governments on this planet, and they went about, causing mayhem and destruction, every opportunity they got.

The leases that they signed on to, and that were assigned to them, that they had on the initial landing zone technologies, as well as all their other leases, that were assigned to them are now in the process of being cancelled. That means, that, their underground cities are being shut down, slowly over time, - thus the leaky roofs - and they will have to move out, and move to the surface, as the underground systems, begin to falter, shut down, and fail, one after another.

This happens to them, repeatedly, life after life, and the end result is they destroy them selves. The hideous, hungry animals they illegally brought from other planets will get lose, and then they will help to hurry the demise of their world civilization, which means, every one of the Lesbianists will die on this planet. After the Lesbianists destroy themselves, they will end up in my Epcot Center, and they will come back out as tummy babies, to tummy mommies and to tummy daddies, who have karma that matches up with theirs, and then they will repeat their old mistakes, again, and again.

As the usefulness of the Lesbianists' underground labrynthine cities declines, as leases expire on the technologies that were assigned to them, and as other leases, will also be expireing, over the next few years, to ten or twelve to fifteen years, to thirty eight years, to fifty nine to sixty to eight five years, and then finally, when the last of their leases expire, some time, not too long after that, up to two hundred to eight hundred years, or so, and then there are still a few that will remain active, until every one is expected to move out, within a few thousand years, eight to eleven thousand years, as they must be given time to build up their own new civilization on the surface of the planet, where they can all live, together, now that the facilities below will be totally closed off, and shut down, and no longer useable to them, as they will be locked out, and prohibited from entering them. Once they are completely out, my kids will then remove all traces of the underground cities and underground facilities, so that there is no chance of any one ever useing them again. The Lesbianists will then begin living on the surface, full time.

Late Night Amusement Activities For The Lesbianists

Currently, as a regular sport or preoccupation, the Lesbianists go out regularly, at night on hunting parties, after exiting from below up through secret stairways, that lead up through police stations, and through fire departments, and through some military barracks, and

through National Guard barracks, public buildings, government buildings, and through banks, hospitals, morgues, cemetary parks, national forests, BLM lands, private residences owned by Lesbianists, and through businesses owned by Lesbianists, and through twenty four hour a day businesses owned by Lesbianists, Walmarts, K-Marts, 'Toy's 'R Us', Wendy's, Jack 'n The Box, McDonald's, In-'N-Out' hamburger chains, sushi restaraunts, late night restaraunts, hotels, motels, churches, mosques, synagogues, military bases, public and private museums, BINGO establishments, pachinko parlors, billiards halls, gaming and gambling establishments, and many other Lesbianists' controlled facilities, buildings, and so forth, above ground, and they capture and abduct people, then bring them back into their underground lairs, and then the Lesbianists torture them, barbecue them, and then cannibalize them, for food, in their underground lairs. The Lesbianists enjoy torturing people, and eating them, and these abductions go on, regularly, all around the world, and the torturing, barbecuing, and eating of the above ground residents, below ground, goes on all around the world, beneath the surface of this planet.

There are over thirteen billion of them, and the number is even higher, still, as I did not have that number correct, either. It is higher than that, and that means there are a lot of hungry mouths to feed, in the future, after they lose their leases, unless they get a new civilization built, which they never do, as they do not like to work.

They will come out, at night, regularly, and abduct people, and then carry them into their underground lairs, and then cannibalize them. This will grow more and more busy, as they strive to remove every one they can from the surface of the planet. After they have removed enough people, they will begin to live on the surface in the homes, and cities that are there, already. There are too many Lesbianists to live comfortably on the surface of the planet, and they are too lazy to build their own civilization with homes, an economy, and so forth, so they will inevitably begin warring against each other, until there are only a few left, and then they will meet their end, when their exotic and deadly animals that they brought here for their personal amusement, strike at them, and kill them, for food.

The only way one can find a way out of this predicament, is for each one of you to join my country, swear in, and become a citizen. The Lesbianists in turn, must surrender. If they do not, at a certain point in the future, we will begin to dismend them, and sent them to my Epcot Center. When that will occur, I don't know, but it could be as far off as a few thousands of years from now, as we have to give them the time, and a chance to build a new civilization, with homes, and parks, etc., working together with the people who already live on the surface of the planet. We cannot cut short the allowance they must be given, in fairness - as the leases continue to expire, and the leases protect them, to some extent - to make efforts to mix with the people on the surface, and to come clean, and to tell it all, and to

appologize, and then to work in peace and harmony with the people who currently live on the surface of the planet. They will have to share their knowledge of the sciences, and they will have to help to educate every one, and they will have to teach the people who are living on the surface, the sciences that will allow people to regroverate their amoebes, and other cells in their bodies, and to rejuvenate their bodies.

There is not much chance of that happening and of gaining their cooperation, so we will have to be on our guard, and we will have to look out for ourselves, and make sure none of us are abducted by them as they attempt to diminish the population living on the surface of the planet by reducing the numbers of normal people living on the surface of the planet, as the Lesbianists begin to get busier, abducting people, and eating them, one after another, to make room for them selves, on the surface of the planet.

Never the less, my kids are not allowed to act prematurely, and my kids are not allowed to begin dismending them, just to stop them from doing what they typically do, after they lose their leases. So, it will be several thousands of years, before this topic comes up for discussion, and action is taken. These are not normal circumstances, and so the dismending of these people, may begin some time after their final leases expire, if they present them selfs as a problem to the rest of us, living on the planet.

Our War On The Lesbianists Must Continue

This means, we have a few options, here, and the best option is to just get rid of them, and destroy their underground cities, and destroy the Lesbianists, world wide, before the Lesbianists get much more of a chance to abduct, torture, and cannabalize the citizens living on the surface of the planet. Thus, our war is now only begining, and we must continue to eliminate them, as they will only cause mayhem, and destruction, for those of us, living on the surface of the planet, as the Lesbianists abduct, and capture people, then torture and cannibalize them, in coordination with their Lesbianists friends, who run this planet. The Lesbianists' activities aimed at destroying the populations of the planet, is guaranteed to increase, as the years pass. That means, we must continue with our campaign to destroy the Lesbianists, and we must continue to work to bring an end to the control that they have, over every one on this planet. We can also concentrate on destroying the Lesbianists, underground, by dropping the home made 'radiological' explosives weapons down into the ocean depths, and down into the depths of the deeper lakes, onto the leaky ceilings below, where the Lesbianists are living, to crush them, and to drown them all. In the meantime, every one must join my country, and swear in, and become citizens of our new country, as I've explained about, before.

The Valderizing Lesbianists

The Lesbianists do not teach real science, or real geography, or real history, or real mathmatics, or real chemistry, or real anything, and they fool every one with their bogus religions that they either made up or corrupted, and valderized. Valderized means, they vandalized it, and sprayed grafitti all over it.

Well, that's the way the Lesbiansts get their kicks, and they are just a bunch of grown up children, valderizing every thing they can, and disrupting every thing, and every bodies' lives, just for their own amusement, and cruelish fun and games, such as feeding former Lesbianists to my abominant kids, who are need to be fed, and who are smart, and devious, and who destroy humans, and eat them up, and spit them out, and treat them terribly, while the Lesbianists watch on, in amusement, as they see people like Bill Gates, or Steve Irwin, and others, eaten up and then tortured, as I've mentioned about before. Valderize all they may, and be cruel all they may, we are all now finally finding out about their treacherous and horrid behavior, and now we are going to put a stop to it, permanently, and that means we will kill every one of them, and send them all to my Epcot Center, as I've explained about before.

Now we know we can cave in their cities, below the leaky hard rock layers, way down below, if we hit certain areas, hard enough, with a nice big hammer, such as one or more of my 'nuclear' bombs, the fracturable rocks kids bombs, with fuels oils, burning at extreme high temperatures, and with percussive shock forces, these, mixed together, will get my fracturable rocks kiddies, making lots of babies, and with a large enough fracturable rocks fuels chlorine, and metals that burn at high temperatures, nearing solar temperatures, we will see some very explosive 'family making' adventures, among my fracturable rocks kiddies, and their radiological relatives and friends.

We know where to hit some of their locations, to drop a few miles of more of continental shelf down onto the tops of their ceilings that will then fracture their ceilings, and cause massive damage, as oceans of water fill up their labrynthine and very well laid out cities, below us.

Who Do We Kill, First?

Mr. George Bush, Jr., Mrs. Barbara Bush, Jr., Mr. George Bush, Sr., Mrs. Barbara Bush, Sr., Mr. Ronald Reagan, Mrs. Nancy Reagan, and lots of their friends, and nearly the whole crew of politicians in Washington DC, are all Lesbianists, and I want you to kill every one of them, and send them to my Epcot Center, and I want you to place the fracturable rocks bombs, in the right locations, and then drop a thick layer of continental shelf, down onto their ceilings, their ceiling that are below the water that is between us and them, and that is below our continental shelfs that we live on.

We can hear the water down below, if we have the right types of listening devices, and if you find the right places to place your fracturable rocks bombs over, then it may be easier to drop your

continental shelf, down through the water, below you, and down further onto their ceilings, the hard rock layers below the water, that is below your continent, swirling about.

Now I want you all to study this, and find the right places to drop your continental shelfs, down through the water layers below you, and onto their ceilings, so as to smash their ceilings. I've given you some hints, already, as to where you can place the fracturable rocks bombs, and my kids also have given some people more information on that, and so we have lots of people, who are interested in solving this problem of the Lesbianists toying with you, one life of yours, after the next life of yours. It is time we brought their mischief, and non sense, and cruelty to a halt, and it is time we put on the brakes, and slammed down on the brakes real hard, and at the same time, slam down on the ceilings of the Lesbianists labrynthine cavities, below you, their cities that they have laid out in perfect symetrical, geometric shapes, like perfectly shaped, honey combed behives, with central cities, placed symetrically around the globe, in a perfect geometric layout, and with spokes or corridors reaching out symetrically, to other central cities, and to satelite cities, that they have well planned out, and have well laid out, perfectly, below you.

Hydrolific Pressures And The Labrynthine Cities Below Us

Because of the hydrolific pressures, they can never keep the ceilings, perfectly dry, and they are always in trouble, trying to fix leaks, here, there, and every where. Now it won't take too much to bring the whole place down on them, flooding them like rats in a cage, below the water line, as a boat slowly sinks with a rats' cage on a table, with rats in it, slowly into and below the ocean waters.

The ones above, such as George Bush, Jr. the current president of the United States of America, and his wife, and his supposed family and relatives, and all his close Lesbianists' friends, should now all be killed, point blank, with your fracturable rocks bombs. I hope that is perfectly clear, and I hope you all understand what the situation is, and that it is an intolerable situation, and we are not going to allow them to toy with us, any longer, and we are not going to let them amuse themselves, any longer, and we are putting an end to their games, now.

DO YOU UNDERSTAND ME? I HOPE SO! AS A 'NO SIR!' WOULD BE UNACCEPTABLE.

Now that we know where we stand, we have nothing further to argue about, and so let's get to our tasks, as soon as we are ready, and prepared. Okay? Good.

Local Area Prayerful Collection Site

A collection site is where people gather to pray, and to sexal and to purify each other. It is not a site where people ask for offerings, or where people as for any thing else, involving money. It is a sexaling

park, and a prayerful sexaling park. That is the meaning of collection site. A collection site is where people collect together, to sexal and purify themselves, and while they are at it, they make sexaling efforts to help to purify others, by shattering and showering out megawatts and tons of radiating, purifying energies.

We have a local area park, at the corner of West Tropicana Ave. and South Decature Blud., a local BLM piece of land, that some people like to camp out in, that I go out to, to bless, and to purify with my religious ceremonies, now and then. I claimed that area, and all other BLM lands that I could claim under Gurkian Law, and all other land on this planet, that I could also claim under Gurkian Law, such as other parks and forests managed by other government agencies, or private lands, supposedly owned by rich people, and lands around the world, that I have a right to claim, under Gurkian Law, and all that land, is now mine, under Gurkian Law, and I can use it in any way that I need to use it, regardless of what other people, think.

Aerobic Taichi Practice

I am busy, now and then, purifying that parcel of land, at the corner of West Tropicana Ave. and South Decature Blvd., with my religious ceremonies, that I conduct with my religious prayer hand signaling statements and with my use of my ability of arerobic Taichi, for religious ceremonies, as I seem to have recalled a lot of areobic Taichi, as well as some other forms of Taichi, that I knew, before, in previous lifetimes, but I am only interested in using it for practical purposes of religious hand prayer signaling.

I'm very clumsy when it comes to aerobic Taichi, but any way, I enjoy it, and it is good excercise for me, and the more I practice, the better I get, but it will be zillions of years, before I get any where near good at it. I practice the arerobic Taichi while I make my religious hand prayer signaling statements.

I don't teach Aerobic Taichi. I only use it for my prayer ceremonies, when I am on my feet, and not on my back, mostly, even though, I do use a short version form of it, while lying on my back, or, while I am on my side, I use a very short form of it. Anyway, it is fun to do Aerobic Taichi, and that makes my prayer ceremonies, for me, more fun. When other people learn to prayer signal, they will naturally pick it up, as well, as every one has studied to some extent, Aerobic Taichi, and other forms of the martial arts, and my kids will release the knowledge that is stored in your memory banks, as you need it, once you begin practicing, for women, as a priestess, or for men, as a priest. It is not like the Taichi you see people doing in China, or Taiwan. It is a specialized form of aerrobic Taichi for use while performing hand prayer signaling. It is not used for fighting, but it is the basis for Taichi, and you can train in martial arts, while employed as either a priestess, or as a priest, and it will be useful to you to know, before hand, as it will make practicing your martial arts, that much more interesting.

I'm not hiring any one, now, or just yet, or any time, soon, as far as I know, as my kids do all the interviewing, and I have nothing to say, about who comes knocking at my door, to be interviewed.

Campers, Camping, Sexaling And Purifying The Area, And Useing The Parcel Of Land That I Publicly Claimed For My Setting Up Of My Ministry

Now, on that parcel of land, there may be campers, now and then, who want to camp there, because they want to find out more about my religion, and so they come out to Las Vegas, now and then, and they camp out there, on that parcel of land, at the corner of West Tropicana Ave. and South Decature Blvd. Since that land is where I am going to set up my initial ministry, when the time for that comes, I am preparing it, with my religious purification ceremonies, and there doesn't seem to be any troubles, with any one telling me not to go up to my property, that parcel of land, and there is no one trying to tell me that I can not bless my property, that parcel of land.

Now, if other people wish to come to that parcel of land, and wish to sexal on it, and thereby purify that parcel of land, they are more than welcome to come to it, with their camper trailer, or caravan bus, and they can maneuver into the area, and set up a tent, and campsite, but there is no water, or any thing else, so you have to come prepared to rough it, if you wish to come in your camper van, or caravan bus, or in a camper trailer, or with a tent, or with other types of sleeping and living gear.

Straightening And Cleaning Up The Area

You can straigten up the area, and clean it up, and make it nice, for many people to pull into, to join together, and to sexal together, and with your purifying energies from your sexaling together, you are more than welcome to stay there, as long as you like, and as long as time permits, and as long as finances permit.

I have nothing there, except for my now and again, Aerobic Taichi practice and the energies that are imbued into the area, there, from my religious hand prayer signaling ceremonies. There are no structures of any kind, and I am sometimes there, busy purifying the area, with my religious ceremonies, so if you and your friends would wish to come to that area, and also help to purify it with your sexaling energies, than you are more than welcome to come and visit there.

Donating Your Sperm, Sexaling Spittle, Perspiration, Vaginal Juices, Titty Juices, And All Your Sexaling Juices

You men and boys may by all means, donate your sperm juices, sexaling spittle, and other sexaling juices, your perspiration you generate while you are sexaling, to the site, and you women and girls may by all means, donate your vaginal juices, your titty juices, your sexaling spittle, your perspiration you generate while you are sexaling, and all of your sexaling juices to the site, as they all will help to purify the property that I intend to set up my ministry

on, as they all contain many, holy, pure, sacred, powerful cleansing energies, and GODLY energies in them, and they will help purify the land, and the environment for ages and aeons to come. All of your eroteming and orgasming energies will go shooting throughout your bodies, and they will find their way throughout your bodies, and out of your bodies and brains, and into the environment, and into your bodies' sacred and holy spillages, as I've discussed about before. Your bodies' spillages, as well as your perspiration, your pee, and your poop, not to mention all of your other juices that are produced as you sexal, erotem, orgasm, and phlumett, become pure, sacred, holy, powerfully cleansing, and GODLY, while you are sexaling, eroteming, orgasming, and phlumetting. Your pure, sacred, holy, powerfully cleansing, and GODLY energies find their way into all of your bodies' spillages, and so please donate them to the site, in appropriate manners.

Building A Latrine

Please employ some one to dig a latrine, and to fashion benches to sit on so as to be able to dump your poop, and pee your urine, into the latrine trenches. Manage the latrine, with care, and employ healthful, tactical, and sanitary techniques to use it safely. Provide hand rails, to grasp, so that no one will slip off and fall into the latrine. Provide barriers so that no one can accidentally fall into the latrine. Use your common sense when providing 'tactical' safety measures.

You need not fashion an over hang, as there is no rain to speak of, in Nevada. You do not need a supported roof, or enclosure, as they will only become stench ridden, and no one will enjoy useing them. There are to be no enclosure walls, or sides, or backs, so as to enclose the odors of the latrine, and confine them to an air tight area, where they can accumulate, and cause explosions, accidentally. They need only be deposited into a safely dug, latrine, and then allowed to filter down into the soil, and then allowed to vapor up into the atmosphere, freely.

No doors should be used, and no barrier walls should be employed, when fashioning the outside framing of the latrine facility, itself. That means, there are no hiding places in the latrine, where people can hide, and be prevented from entering, or exiting from the latrine. Only hand rails need be supplied, and only barriers that are suitable for keeping people from falling into the latrine, need by provided.

Steps may also be provided, to a raised platform latrine, which is more sanitary to use, than a level to the ground, latrine. There should be no walls, and no blind spots when either ascending up the stairs or when descending down the stairs. Women, girls, men and boys, should all use the same facility, and there is to be no fraternizing. Fraternizing is playfully tearing up at the opposition, or at people who you do not like.

Tearing up at the opposition means, you are trying to over throw the person, and dispose of that person, into the latrine. Over throwing the person means to be using reckless abandonment when dealing with another. Reckless abandonment means to be recklessly risking the life and limb of another.

There will be no frolicking at the latrine site. Frolicking is when little boys, and big boys, and little girls and big girls, play around and provide possible hazzards to others. You will not behave in a hazzardous manner towards any one, at any time, or you will be asked to leave, and to not come back.

There will be no play time allowed for children, as this is a collection site, and that means it is a holy site for holy activities, so leave brats at home, and do not bring any one who drinks alchoholic beverages, or who acts unwholesomely, to the collection site. This is a private site, and a prayerful collection site, and that means, you are coming there, to pray, and to make love, and to sexal, as GOD's children, so as to purify the site. You are not allowed to act randomly and with reckless abandoment. Randomly means, without proper self control and restraint. This is not a gay fashion, show or parade, and we will not tolerate reclusive, or unwillingly unwholesome behavior.

Reclusive means, unwilling to participate for the stated purpose of purifying the area. Reclusive means, caution and carelessness is thrown out the window, and you are acting in an irresponsible manner.

Unwillingly unwholesome means, first, unwillingly means, non cooperative, private, or sordid. Sordid means you are acting in a selfish manner, and you are not acting in a responsible manner for self and for others.

Unwillingly unwholesome means, thusly, that you are acting in a selfish manner, irresponsible manner, uncaring towards others, and unwholesomely.

Unwholesome means, you do not care about the life and limb of others, and you would just as soon shoot a person you argue with, as talk to them for a friendly chat. Many of my kids, are very unwholesome, and will just as soon, talk to a person, as shoot the person. You will not act in any such manner.

Any unsafe or prohibited latrine construction will be ticketed on detection, by me, and you will be asked to rework the facility. That will be on the ticket, and please comply, if you and your friends who built it, will be so kind. If you do not rebuild it, you will be asked, with your friends, to leave the site, as you are acting in an irresponsible manner. You will not be allowed back to the site, without your showing proper repensive behavior. Proper prepensive behavior is an attitude of appology, as well as the acts of appology which means, you will take appropriate steps to see that the work is or has been redone, in the manner as required by safety laws, as

stated by my children, under Gurkian Law. Either me, or my children, will leave the ticket, and you will be required to fix what ever it is you need to fix, or you will be asked to not stay and conspiriate at the collection site.

Conspiriate means, to participate freely with caution and care for the sake of others. Conspire is also the same, as conspiriate.

You will be asked to not stay and conspire at the collection site, means, the same thing. It means, you will not be permitted to participate freely with caution and care for the sake of others. That means, you will be asked to leave, and you will not be allowed to come back, if we, my children and I, and other attendents, as well, can at all help it.

Attendents are people who participate in the collection site activities, and they are people who take responsibility to make sure every thing is done, properly, and safely, with the sake and safety of others, in mind.

The Home Depot has many nice and useful janitorial equipments, and so it will not be difficult to build a safe and luxuriously clean, and handy, latrine, that is safe to use, for all people, of all ages.

Luxuriously clean, means, it is kept sanitary.

How do you keep a latrine, sanitary? You keep it clean and sanitary by venting the air out, freely, with no blind spots, either underneath or above, where pockets of air, and vapors can accumulate.

No partitions will be installed that will create a blind spot. A blind spot is an area where light can not penetrate. Therefore, your construction materials, must be perforated wood, or grated steel. You can weld together, if you know how to weld, a very nice, grated steel, latrine, that will be safe to use, by every one, of every age. You will need the correct strength of supportive steel poles, to handle the weights of the persons accessing the latrine, and of the latrine, as well. You will make certain to build it well, and to support it well, with firm foundations, of concrete or steel plates.

Any deviation from safe practices for building latrines, will be torn down, disassembled, and the persons or person responsible will ethier be asked to leave, or will be asked to appologise to the memebers of the collection, sincerely. If the person acts in a responsible manner, and appologizes, sincerely, and appropriately, then the person will be excused, with out further, charges being leveled. Further charges will be leveled by my children, if my children detect further, reckless abandonment on the part of any person, participating and acting in a reclusive or recklessly abandoned manner.

Glue People Begun 'Cleaning' Agents

Cleaning the toilet seats of the latrine, will also help to keep the latrine luxuriously clean, and sanitary. You should clean the toilet seats and parts of the latrine, with common household detergent agents, as at this time, we have no choice but to use the unwholesome, Lesbianists' manufactured, ajax, spic and span, lysol, and other such 'glue people begun' agents. Glue people begun agents means, aerosols, and other unwholesome petrol fueled compacted or pressurized sprays, or detergents, that help the Lesbianists to begin the process of turning human beings into glue people. Glue people, in this instance, does not refer to glue, but it refers to tar. Tar is an adhesive substance, and their intent was and is to turn every human they can find into tar people.

We have no choice but to use the local distributors selection of cleaning agents, but in time, we will one day, have all that straightened out, after we demolish the Lesbianists' hideouts, under ground, and after we kill them all, or welcome them in, as 'surrenders', with appropriate, remorseful, penentant attitudes.

Removal Of Latrine Wastes And Disposal Of Latrine Wastes

Latrine wastes materials shall be removed, and supplied to local pig farmers, who can then use the materials, for feeding the animals. Pigs and hogs love to eat away at latrine wastages, and no one knows that. Chicken also enjoy eating human wastages, as well as ducks, geese, and other fowl. Horses and burroughs also enjoy human wastages, if it is healthy enough, with large amounts of vegetable mass in the diets of the human beings, whose wastages are carried to the farms for spreading about in the hogs and pigs, barrels. A barrel is a place where wastages are loaded, up into trucks for delivery to a sewage farm, or a place where farmers can use the wastages, that the hogs are finished with, as fertilizers.

Hogs and pigs use a roped off area, for eating wastages, and employees keep track of the unloaded wastages, and the spilled wastages from the hogs, and then the spilled wastages from the hogs, are then moved to a separate area, for pickup by carriers of farmers. Foods grown at farms using hogs and pigs wastages are useful and nourishing to humans, and other animals.

No fees of any kind for loading and for carrying away wastes to hog and or also pig farmers, should be levied by truck drivers, as drivers will earn a tokenous gratitude tip from the hog and or also, pig farmer. An appropriate payment to the driver and deliverer of the human wastes to the hog and or also pig farmer, should be paid by the hog or also pig farmer, unless the farmer is cash strapped. Cash strapped hog and pig farmers may be given money compliments by the people at the collection site.

Money compliments are small awards, or minor payments, out of gratitude to the hog and pig farmer, for his or her useage of the human wastes from the latrines. Money should be collected, regularly, if hog and pig farmers are cash strapped, and then given to the hog

and pig farmer, out of gratitude to him or to her, and presented, tokenously, or as a gift payment. How much should be paid, depends on the expenditures of the driver, for his or her services, and for the use of his or her, vehicle, and for its whollyfied maintenance.

Whollyfied means, the regular maintenance that will allow the truck or vehicle to run at tip top conditon or shape, for the life of the vehicle, figuring it proratively.

Proratively means, spaced out, and paid proratively, or over the period, at regularly spaced points in time, over the given span or the useful life of the truck.

Discussions regarding this, and discussions for compensations, should be held at the collection site, and at the delivery site(s) for delivery of human wastes, by all parties, concerned, regarding all of this, and the primary collection site attendants, the persons elected by the attending or participating persons, at the collection site, who show the greatest interest and sense of responsibilities, at the collection site and with regards to the collection site, and with regards to the collection sites' safe, healthy, and wholesome management, must attend the discussions, and must deliver their sound judgements as to who is to be compensated payments for their participation in the removal and distribution of the wastes from the collection site, to the hogs and pig farmers, and as to how much should be dispensed, per each removal and delivery of human wastes.

Participating persons at the collection site, should elect attendants, and the attendants should regularly check on all points for the safe management of the collection site. Participating persons means, persons who are there for sexaling, and for depositing their holy, pure, sacred, powerfully cleansing, and GODLY sexaling juices at the collection site.

Nevada Power, and all other vendors, are not participating persons, and should not be construed as participating persons, regardless of what they might wish to think, and if they have any complaints, I authorise the killing of all persons who disagree, and persist in arguing that they are valid participants, despite their not participating in your holy sexaling, activities, as individuals, and not as company employees. No company employee, or personel of any kind, may participate, except as an individual, lone, and wholeseome, participating, sexaling agent.

A sexaling agent, is a person who is participating at the collection site to assist in the purifying of the parcel of land, on which I will build my ministry, with the assistance of my children, by their participating in sexaling activities, and by their depositing of their sexaling juices upon the grounds of the parcel of land.

How To Disperse Your Juices

Sexaling outdoors will normally require that persons are naked, and juices will naturally find their way to and into the ground. Men, boys, women, and girls, all must be naked, while sexaling outdoors, except for those persons who need to be on the move, such as male attendants, who will need to go around, periodically, checking on the points of interest, to maintain the soundness and integrity of the collection site, and of all things related to its operation and management.

Clothing

Clothes may be worn, at times while not sexaling, as particapating persons, decide.

Scarves, hats, and minor shawl like garments, Roman, Turkish, or Russian togas, or other comfortable sexaling apparel, for women and girls, to protect the dermal surfaces of the wearer of the scarve, hat, minor shawl, or other apparel, are allowed to be worn, while sexaling. We need every inch of dermal surface, bare and naked, if possible, or at least, accessible, to allow for maximum eroteming sensitivity, touching, massaging, tickling, and so forth, to heighten the erotic levels of excitement, and thrills, eroteming, orgasming, and phlumetting.

Men and boys may wear light weight garments, such as Roman, Turkish, or Russian togas, or other garments that do not interfere with access to sexaling buttholes, dicks, and so forth, for men and boys to be able to maximize their sexaling enjoyments, erotic attachments, their purposeful eroteming enjoyments, orgasming thrills, and pleasures.

Erotic Attachments

Erotic attachments refers to their titties, dicks, buttholes, mouthal holes, tounges, and other touch sensitive, eroticable and orgasmicable body parts.

Purposeful eroteming enjoyments means, their steady minded, determined, and sustained sense of attaining to the highest levels of eroteming enjoyments possible.

Leveling The Area

Some minor leveling of the area, for maximum use of the area, as an automobile and camper trailer, caravan bus, travel trailer, campsite park, will need to be done.

There are many tiny hills, and a few large ones. There is much dirt that can be removed, from the middle of the site, all the way back to the rear edge of the site.

There is a hilltop trailor park, past the edge of the rear of the parcel, and there will need to be built a very durable, and strong retaining wall, to keep that hillside, shored up, and to keep the trailor park from crashing down the hill side, after slide begins, and creep causes the trailor park to fall into the open area, that will be

needed to be excavated, all the way to the rear of the park.

The grade or slope of the hill, need not be steep, but can be at a relatively low angle of ascent. An angle of between ten to twenty five, to thirty degrees, in graduations, from front to back, can be accomplished, with little difficulty, and with no disturbment to the trailor park, or disturbment to the integrity of the trailor park.

We need not seek any permits for construction, as I do not recognize the Lesbianists' governments, on this planet, and if any person shows up who says he or she is a county or city planner, inspector, or whatever, you are to immediately kill the person, and deliver three fivers to the persons' head, as that person is a Lesbianist attempting to interfere in my religious activities.

All activities at the site are to be done, without any interference from any public or other authority, and all costs for all changes and alterations to the site are to be financed by the local construction companies, who are working on the hotels industry, and they will cease immediately their work on all construction, private housing construction, casino construction, and all other towers construction, or work construction, other than the basic infrastructure needed to support the present population of Las Vegas, Nevada.

We are taking over this town and you all will begin to prepare to vacate this town and hand over all of your construction equipment, now, or face your companies and your private persons destruction with my fracturable rocks bombs, begining with the New Orleans Hotel, and all related hotels, and casions, bars, and restaraunts. That means, every gambling establishment is to shut down, stop construction, and vacate this town, now, immediately, post haste, if you wish to live.

You will be destroyed if you refuse to follow orders. We are putting a stop to the non sense of the Lesbianists begining with Las Vegas, Nevada, Henderson, Pahrump, and all parts of Nevada and the Southwest.

You will disband your operations and hand over your companies, such as the water bureau, the power company, the gas utility company, and every other company, including all supermarkets, grocery stores, malls, and so forth, every last business in Nevada, and the south west, to the participants at the collecting site, to take over and then properly manage, until all residents of Las Vegas, remove themselves, to my kids facilities.

Is that understood? You are all resigning and moving into my kids place, underground, surrendering, and moving on for those who are not Lesbianists, but who wish to vacate this area, as this area is in whole, now, a religious grounds.

That means, that I will require the participants at the collection site to take over every thing, and to bring the news reporting stations to their knees, and force them to report the news, that every one is to retire to my kids underground, fortress, and they are all to

remove them selves from Las Vegas, now, post haste, immediately, other wise, we will have a fractuable rock bombs throwing contest, to see who we destroy, first.

You must surrender all your holdings, owned property, equipments, and every thing else you call your own, and hand them over to the participants at the collection site.

Is that understood? "YES SIR!" had better be your answer, or you will find yourself on a one way ticket to my Epcot Center, with no return ticket, guaranteed, for however long it takes, to find you tummy mommies and tummy daddies.

I don't think there will be many volunteers, in the near future, as you are all abominant kids of mine, and the only kids people will ever bare, for some time to come, are abominant kids, and animals, and animal humans abominant kids, so I do not think you'll be leaveing my Epcot Center any time soon, if you resist and if you force us to kill you.

Is that understood every body? Good.

The penalty for not complying is death. Do you understand what I am saying? I hope so.

The Party Is Over In Las Vegas, And In The World

The party is now over, in Las Vegas, and at all casinos and gambling establishments, as we know you are all cheating, and we will kill every single last one of you to close you all down.

Who Is Staying And Who Is Leaving, Etc.

You will close down all of your establishments, world wide, and lock the doors on them, and then demolish them, post haste. Is that understood? I hope so. Either you do it, or we will do it. Do you understand that, now? I hope you do, because we are going to demolish every one of your establishments in this town, if you do not demolish them, yourselves. Every last one of them, all houseing, except for those noted in my children's compliance statements, which you are all to recieve, all trailor parks, with some exceptions, all every thing is to be removed, with only the basic infrastrastructure for heating, lighting, water, sewage, medical, hospitals, medical clinics, pharmacies, and so forth, food markets, services industry, HUD, Welfare, SSI, and other operations for the welfare of persons who are here, who can not leave, or who will be staying for some time, and who will be needing the services of those agences, construction companies, lighting companies, electric infrastructure installation and maintenance companies, as well as gasoline supply and distribution vendors, diesel fuels supply and distribution vendors, restaraunts, and telephone. That means, all humans are leaving, except for those person who are to stay on, as indicated in my childrens' compliance statements, and except for those who wish to stay on and participate

in spilling their pure, holy, sacred, purifying juices, and those wishing to participate in purifying my area, all of Las Vegas, Nevada, the valley and beyond, in time.

Rules For Hospitals And Clinics, Etc.

There will be new rules for hospitals, and clinics, and my kids will see to it, that the new rules, are followed. There will be other rules, as well, and my kids will see to it, that they are followed, as well, or persons who wantonly disregard them, will end up in prison, underground. My kids have not only a living environment, they have prisons, as well, jail facilities, and many other things. Check with them for a fuller list, of what all they have in the way of facilities, as many are very nice, and there are great possibilities for improving your health, and rejuvenating your bodies, etc.

My kids have a full list of who is to be leaving, who is to be staying, and by when people are to be leaving, and where persons staying, are to be moving to, as we clean up this area.

All of you had better check with my kids, especially, you Lesbianists, but not only them, you religious fanatics, as well, and every one else, of course, or you, especially the Lesbianists and religious fanatics are at risk here, but not too much, the others who are to check in with my kids, risk dying, perhaps, prematurely, and then ending up in my Epcot Center.

My kids also have lists of who the people are who will be recieving all the properties for taking them over, which properties need to be demolished, who will be demolishing things, and how to remove those things that you must remove, and to where you will remove them, and dispose of them, and in what manner you will dispose of them.

You will hand over every thing, and you will all comply, and those who are required to hand over their properties, after complying with removal demands, will hand them over, and then will move out and into my kids place, in accordance with the time schedule that my children have for you to follow. You are required now to check in with my kids, get every thing sorted out, and learn all the details, and then comply.

Those who do not follow these orders risk an early and, fortunate for us, timely meeting with death, and entrance to my Epcot Center for a long stay.

Erecting A Partition Blind On West Tropicana Ave.

The roadway, West Tropicana Ave. runs east to west, and west to east, and it is advisable to erect a pertition blind, so as to not disturb traffic, that comes down the side of the road, the parcel of land sits on, at very fast speeds, with people rubbernecking to see what is going on, as many people will possibly end up flying into the area, with their automobile, truck, gravel carrier, or eighteen wheeler

spinnning and turning over, out of control, and then sliding off the roadway and into the collection site.

The traffic is very fact on West Tropicana Ave., and with the interest of the local area residents, who will learn about the collection site, and the activities at the collection site, there will be many hazzards arrising as a result. Some persons may decide to stroll through the area, to steal purses, or wallets, or cameras, and so forth, as there are many poor, indigent, or hopelessly poor, persons, in the area, who do not have any work, and who can not feed themselves, and they need to steal things, to sell, to earn a living.

Such people should be spoken to, and fed, and then warned not to act in an unrighteous manner, which means, please do not steal things, or damage the property, or any thing on it, and please do not get into fist fights, over insults, and disagreements with participants, about who is GOD, and so forth. There are many impoverished persons from South America, and Central America, who only know their local area witch doctor's teachings on voodoo men and voodoo women, and who know nothing but folklorish stories about gouls and ghosts, and people, or ghostly gouls, i.e., people immitating 'gouls', or mean and rotten people, who go 'boo!', or try to scare and rob people, in the night.

Electricity, Lighting, Etc., To Be Supplied By Nevada Power Free Of Charge, Or Else

The partition blind should be sturdy, tall, and break proof, so that vandals can not break it down, or climb over it. Lights for use at night, with the proper permissions for an electrical hookup from the Power Company, Nevada Power Company, will be granted, and provided by Nevada Power, along with all other neccessary, needed, safety lighting hookups, to illuminate the area, fully, at night, so that it looks just like, or nearly like, daylight, or a well lit soccer areana at night, or a well lit professional baseball field, or football field, at night, and it will be given for free, lest we burn down Nevada Power, and kill all of their Lesbianists employees, and meter men, and all of their tawdry workers, who we do not wish to deal with. That means, we will blow up their buildings, and kill them all, unless they give us the electricity that we require. If we need to kill them all, we will then acquire all of their holdings, and we will operate all of them, ourselves. Fair Warning has been given, and consider that as a done deal, unless you wish to visit my Epcot Center.

Meat Vendors And Hispanics From Central And South America

An air of friendlyness, but caution, should be used. Men and boys are there to protect the women and girls. So, please work in teams, and do not let individuals, who might get kidnapped, and sold off to meat vendors, for a few dollars, or pesos, as it is, in Las Vegas, as the majority of such kidnappings and sales of human beings to meat vendors, the Lesbianists chain stores, such as Colonol Sander's Kentucky Fried Chicken, Burger King, MacDonalds, Jack 'n the Box,

Wendy's, In-'n-Out, Fat Burger, Taco Bell, Dell Taco, and all the other, fast foods vendors, is by the locally landed hispanics from Central and South America, who need money, to stay alive.

Erecting A Partition Along South Decature Blud.

South Decature Blvd. also has much traffic on it, and there will be lots of people, rubber necking, to see what is going on, so a high, partition wall, made of lumber, should be erected down the side of South Decature Blvd. to prevent all such incidents of rubber necking, and reckess abandonment, from occuring.

The partition should be about ten to thirty feet high, and should be well constructed. Why so high? We do not want people climbing over it, to sneak into the area, to steal things, and to fight with people, and to cause trouble, and to come looking for young girls, and young boys, and helpless, elderly folks, and uneducated to the whims and ways of the downtrodden, brutal, abominant kids of mine, walking the streets of Las Vegas.

Yes. They are abominant kids of mine, and the proof of that is that their children come out as monkey people, and orangutan people, and chimpanzee people, and if possible, the hospital whisks the baby away from its mother, and disposes of it, in the prep rooms, used for killing incoming, abominant kids of mine.

Drawings On Demolition, Construction, Etc.

My kids have construction drawings for constructing all the facilities needed at the collection site for all the facilities that will be needed. They have electrical drawings for lighting, etc., health, fitness, and wellness facilities drawings, latrine facilities drawings, showers facilities drawings, food and beverage eating and drinking areas drawings, and all other drawings related to all things that will be needed to be constructed, or altered in any way, for our project to proceed, including but not limited to, demolition of the cliffs, leveling of the entire area out to Harmon Ave. and up to Flamingo, and back to Tropicana, as well as what is to be removed and leveled between Jones and Decature. There are a few minor exceptions, such as the building that I am living in. Who will move where, to consolidate staff at this project, and who will be moving out, at this project, and what will be leveled at this project, are all detailed in the program specifications, my children have. My present quarters, will be my place of residence, as things move along, and in time, in accordance with the schedule for construction, a temporary facility for me will be constructed near the area but between Flamingo and Tropicana, and somewhere between Jones and Decature. Please see them for details. After the area is purified sufficiently, and after all the areas to be purified, are purified, and my children will decide on when that is accomplished, my children will then activate the technologies, and acquire the resources they need, and then they will build a more permanent settlement arrangement for all people

concerned, who are staying on, if they decide to stay on.

The partical dismissive technologies and remissive technologies, for foods, and medicines, and other items that are needed, for continued survival, and for all other required purposes according to the specifications for the sexaling for a living programs, will all be provided to the participants who wish to stay on, and houseing for them, as well, will also be included. Parks will go up, and so will many other locally needed facilities. Many things will disappear, as my kids will partical dismiss the things and structures they need to remove, as they construct the new area, for all persons staying on in Las Vegas. My kids have a list of all the names of all the persons who may, if they decide to, stay on in Las Vegas, and not all of them, are local people, so you should all check to find out whether you name is on the list or not. All other persons, who are to be moving on, and all persons who do not wish to stay on, here, will be required to move into my childrens' present facilities, which they will continue to expand as we continue our program on this planet. We will eventually clear every one out of the area, inside and outside of Las Vegas and the Valley, and surrounding areas, and the world over, except for the persons whose names appear on the list, as houseing can be provided above ground, for participants in the juices spilling and areas purifying operations, by my children, if those persons wish to stay on and participate.

All other people will be required to move into the facilities my children have, and are continuing to upgrade, and expand, in their encapuslated living environement, in which, many people currently live. Persons in the encapsulated living environment, may also attend the collection site area activities, and future clearing activities, for purifying the areas with their pure, holy, powerfully cleansing, purifying, cleericating [cle-er-i-cating], and GODLY energies filled, sexaling juices. Cleericating means, the same thing as clearifying. It is just a slightly different but related word from another a variant language of English, and to cleericate basically means the same thing as to clearify. When we get the areas, cleared enough, and purified enough, my kids will then start building things for the participants. All others will move below ground, and live in the encapsualted living environement, until they have earned enough money, with their friends, as talked about earlier, to purchase a lease on land, and acuire the lease on resources needed, to build a home, etc., for a large group of people, who will be living together, and working together in the sexaling for a living programs, and so forth.

When Will This All Begin?

As soon as people begin to comply, we will begin our efforts to clean up Las Vegas, to begin with, and then, the rest of the world, and then, the rest of our universe. It will take a long time, as we need to spill our juices, the lay persons, anyway, for some time, to come, as our universe is quite large, and so is the rest of it, that we are

going to be recovering.

My Spilling Of My Purifying Sexaling Juices, And My Spilling Of My 'Prayer Time' Purifying Juices

I spill my juices, only for religious ceremonialing activities, during certain relgious ceremonies, and I don't spill my juices, on the properties, as I'm not set up to spill my juices, on the property, now, and will not be set up to spill juices, until I find an excuse for that, and an excuse for performing a religious hand prayer signaling ceremony that will require my spilling of my juices. It's pretty hard to spill juices, when there are no other persons working with me, and I do not work with lay persons, unless they are confirmed by me, and so there will be maybe, some confirmations, but not neccessarily so, as I do not know who is going to wish to be confirmed, and by the way, who ever it is I confirm, must realize that I am the Mother and Father of all human beings, animals, and living beings, and the Creator of my universe. There are not that many people who understand that, except for my kids, my working, unionized kids, and so it will be some time, yet, maybe a few hundred or more years, before some one realizes, 'Hey, he IS the Mother and Father of all human beings, etc., etc., etc.,"

Spilling 'Prayer Time' Spittle Generated While Praying

Until then, I'll use my spittle juices if I need to drop or drizzel any juices, that I generate while I am religious hand prayer signaling, as I don't like or care for the idea of jerking off in public, to spill purifying juices, in public, regardless of the fact, that I am GOD, so it ain't going to happen, any time soon. When I find a authentic 'believer' who realizes and understand that I am GOD, and so forth, I'll begin my public spilling of sexaling juices. I don't mind it in private, but it is not going to happen in public.

Monkey Babies, Jimmy Carter, Oliver North, And The Lesbianists' Conspiratorial Bullshit Stories Of Adam And Eve, And "Jesus Saves"

Most people do not know this, but many births end in tragic loss of the child, because Jerry Falwell, Oliver North, Jimmy Carter, Ronald Reagan, George Bush, Jr. George Bush, Sr., and the rest of them, order and expect all the Lesbianists doctors to kill all babies born to people which do not look human. Doctors at birthing hospitals also comply, quietly, as it is hospital policy they can not break. If they go against it, they risk losing their job, and possibly losing their life. This is not a joke, and it is the Lesbianistgs policy of having all birthings in hospitals exactly for this reason, for disposing of non human looking babies, at birth, so that their bullshit creation by God, of a 'pair' of people, Adam and Eve, and that "Jesus Saves all good Christians", can not be contested, by logical proof of non human births to human being couples, or single parent women or girls. Abominant kids are born every day to my kids, on this planet, and they are all executed, or killed off by the local citizens, by their fright

and fear of 'ghouls and ghosts' and 'goblins' in the night that go, 'Boo!'. These idiots, both the abominant South Americans, Central Americana, and all my other abominant kids, North American, Europeans, Russians, Chinese, Japanese, Thai, Philipine, and so on, must ask them selves why they are blessed with babies which are either not human or are abominant humans, or part animal humans. If they ask them selves these questions, they will find out the only answers are that these people born to them, are my children, and my children are born to them for reasons that have not been disclosed to them, before, by the clergical societies, i.e, the religions of the world, and by the other societies, set up by the Lesbianists, or by societies nurtured along as part of the Lesbianists' 'tragic comedy' of their toying with your lives for their humoring themselves, and for their amusing themselves. Once we get rid of the Lesbianists, and their ways of doing things, we will begin to see babies that are either not human, or are only part human, in animal bodies, and they will be born to all of you who are tummy mommies, and tummy daddies, if you birth enough children, to find out. How many is enough? About one in forty or fifty by my estimation, but depending on the person, it may be between thirty to eighty, from one person to the next. Take that to your pastor, and tell him or her, to stick it up his or her ass. It is the truth that animals are born to humans, all the time. Not only that, but abominant kids of mine, usually of the apey kind, but not always, are born to the 'normal' looking humans on our planet, and in our universe. We need not be afraid of these children, as animals, can be collected and put into zoos, and animal humans can be raised by the parents, or parent, in the case of a single parent. In time, we will adjust to this reality, and we will raise fine children, abominant animal humans, or human appearing abominant children. That means you are all abominants, and the Lesbianists are laughing at you, and at themselves as well, as they go around and kill and cravenly torture every possible person they can. We will put an end to their craven ways, and we will make a wonderful universe for all of us to live in, in peace, and serenity, once we get started practicing my religion, and once we begin erasing, sufficiently, our karma and our karmic markups, with your purifying sexaling energies, prayers, and other activities, such as syncopated dance, syncopated excercise, syncopated sexaling, and so forth. You time it to the metronome at one thirty seventh, for now, and that will be fine. In time, we will get accurate metronomes, and then we will chance the pace, just ever so slightly, to push my kids along, as I explained about, for our wholesome and healthy universe, for all of us to live in, together with each other.

Punishment For People Who Practice Voodoo Religions Is Dismendment, I.E., Death

We will not be killing or executing children any more, at hospitals, or at homes, or in primitive, backwards towns and villages, or rural hideaway villages, where voodoo religions muster the people into peculiar states of mind, where they become entranced, and then begin mindlessly, acting like chickens, and birds, or fowls, or hippos, and

so forth. There are too many of these types of so-called 'religions' in this world, and we are out lawing all of them, and punishment for adhering to them, will be a trip to my Epcot Center, as I have my children particle dismiss their bodies, and then dismend them, bit by bit, into their base components, and then have my children whisk them into my Epcot Center. We will bring every one up to the level of education every one needs to be at, to better understand my universe, and those who persist in abandoning their obligations, will be dismended with out further notice, after they are sent their last warning ticket, from my kids, in accordance with Gurkian Law. That also applies to the Lesbianists, and to every one else, who is unable to get the picture here, and get with the program. There will be no exceptions. And, this is not a joke. My kids have courses for you to educate your self in, to pull yourself out of the past Lesbianists' way of life and thinking, and into the new and current, reality, that we will be living in, for ever, from now on.

Local Businesses Will Have No Problems At All With The Collection Site And Will Have No Problems At All With The Activities Of The Faithful At The Collection Site

Walgreen's is across the street, on one corner, and Home Depot is on another corner. I don't think Walgreen's will have any problem with you using the site for your camping, for your meeting with others, for your sexaling with others, and for you and your friends' purifying sexaling activities in that park, i.e., the collection site. Home Depot, I don't think will have any problem with your use of the parcel of land, either, for those purposes.

What To Do If The Police Come?

Now, if the police come, and I'm there or not, I don't know what they'll say, but they have not got any right to say any thing to any one. Is that clear, Mr. Mayor of Las Vegas, and every one else in the area. I hope it is, as I am not going to stand for your interference or any one else's interference in my religion and in the relgious activities of people who wish to participate in my religion, sexaling to purify my universe. IS THAT UNDERSTOOD, MR. MAYOR AND EVERY BODY ELSE? I HOPE IT IS! AS A 'NO SIR' WOULD BE UNACCEPTABLE!

Now that we have an understanding, I think there will be no problems, and if there are, I will see what I can do about it, by calling my kids up, with my religious hand prayer signaling ceremonies, to see what they can do for you, to help you out, and to break the backs on law enforcement officers, and the Mayor of Las Vegas, and every other person, Lesbianist or not, who tries to interfere with me, or who tries to interfere with the people practicing my religion. I will not stand for any interference from any one, including Mr. George Bush, Jr., the current president of the United States, or any one else, such as the Mayor of Las Vegas, or the Governor of Nevada, or the Nevada Highway Patrol, or the Nevada Sherrifs Dept. or the Las Vegas Metro Dept. or with any other persons or parties, such as the Las Vegas

Gaming Commission, or any other Lesbianists' or Lesbianistic organization set up by the Lesbianists, and that means all you church goers, parochial school teachers, and students, and others, and if any one interferes with any one who comes to my ministry's claimed parcel of land that I am purifying for setting up my ministry, and if any one hassels any one there, than who ever is visiting the collection site, to help to purify it, you have my permission to kill the persons attempting to interfere in any way at all, on sight, with what ever you have to kill them with. Please dispose of their bodies in the nearest trash dumpster.

DO YOU HEAR ME? MR. MAYOR. YOU ARE A DEAD MAN IF YOU EVEN TRY TO SEE WHAT MY RELIGIOUS FAITHFUL ARE DOING, AND SO IS EVERY OTHER PERSON ON EVERY SCHOOL BOARD AND CHURCH OR OTHER LESBIANISTS' COMMITTEE. IS THAT CLEAR, EVERY BODY? GOOD!

You will not interfere with my religion, and with my religious faithful, and they will come to Nevada, and they will come to Las Vegas, and they will start sexaling on that property as they see fit. Does every body understand that? I hope so. Now. Non responsive persons, who ignore my statements, will find themselves in trash cans, and trash dumpsters, every where in Las Vegas, and any where else, where there is a convenient trash can or trash dumpster. There are lots of them around, and people are throwing dead people into them, every day, across the country and around the world, and they all end up in landfill sites, and so there will be no added charges for our using the statewide Nevada Silver State trash retainers and containers, for however many others who need to be killed, and for my religious faithful to then place them into the trash cans and trash dumpsters. No charges should be levied by any other Lesbianists' trash collection company, around the world, as they are all owned and operated by the Lesbianists, and we will not support them, in any way, what so ever.

If Mr. Mayor would like to be the first guest inside of one of the Nevada Silver State trash dumpsters, then he will try to interfere, in person, and he will be shot, point blank, in the center of his head. You will then kill him with three fivers, to make certain he is on his way to my Epcot Center, for his next trip out as a tummy baby. If the Governor of Nevada wishes to interfere, then he does so at the risk of being shot, killed, and made certain he is dead, with three fivers, and then after that, he will be deposited into a local or state trash dumpster, either here, in Nevada, or in California, or Arizona, or where ever it is convenient to dump him into a trash can, trash container, or trash dumpster.

Lesbianists Enjoy Eating People, Who Are Alive, As Well As Eating The Bodies Of Those Who Are Dead

You should let the state's vice mayor of Las Vegas's office know, who was shot, killed, and confirmed dead, after depositing three fivers into his or her head, and then where the body is, and generally when

the body was dumped, so that they can get an idea of how decomposed the body is, and whether or not the body is in a land fill site. They can then check on it, and verify that the body will make it to the land fill site, if it isn't already, there, where all the other bodies, are ending up, unless they have already happened to have beeb eaten up by the Mayor, or by the friggen Governor, or by the Sherrif, or by another Lesbianist.

All persons are free to travel to Las Vegas, and they are invited to stay at the parcel of land that I described, and they are invited to make it into a nice camper trailer area for recreational vehicles, or for what ever other types of outdoors camping vehicles, travel trailers, caravan buses, or any other types of camp site temporary stay, housing and living arrangements you would like to use the area for.

Every Game Of Chance, Gambling Machine, Or Slot Machine Is Rigged, In Every Casino Around The World, With Only A Few Exceptions

If you will all sexal, regularly, to the best of your abilities, and help me to purify the area with your sexaling, undisturbed by any one, and clean it up with your purifying energies, you are more than welcomed to come and enjoy the area, and see what fine attractions, will be leaving Las Vegas, in the not so distant future, including the gaming commission, with all their phoney, rigged gaming systems, that the Lesbianists control.

The Lesbianists' Articles Of Participation

The Lesbianists have every game that you can possibly rig, controlled by electronics devices, or by slight of hand, mechanics, who control the gaming rooms, and gaming halls, so that only Lesbianists win any money, that is worth mentioning about, and so that the Gaming Authorities, and the Mayor's office, and every other Lesbianist organization in Nevada, who has any one in their office, can then go and get the money the Lesbianist won, and get a percentage of it, given back to them, as they have arranged to do that, as that is part of their oath, and part of their sworn promises to do, as that is written out in their articles of participation, their rules for living upsite, not down below, in the labrynthine cities, and every Lesbianist must follow those rules, and when they win the Megabucks, and every Lottery in the world, they must give back money to the Lesbianists, as every game of chance that is run in this world, except for bingo, is rigged. However, even Bingo is rigged, in some ways, by people switching cards that look like winning cards, while players are not looking, and by other naughty tricks.

Every Lottery In The World Is Rigged

Every lottery in the world, performs the drawing out of the balls before a live audience, in most cases, before they actually air the show, and they have illusionary tricks they play, with the

technologies they have, and they sucker people out of their money, daily, around the world. Las Vegas is no different, and they sucker every one out of their money, except for the Lesbianists, and they let some people, win now and then, small jackpots, on the gaming machines, and then after a winning streak, they set the machines the person uses, so that the person can not win a dime. They have the technologies for rigging every machine in Nevada, and across the country and around the world, so next time you visit one of their casinos, be sure and detonate one of our bombs, you can make, and destroy that casino. Is that understood? I hope so, as every day, millions of people are being suckered out of their hard earned money, they pay taxes on, through the nose, till they are practically choking, and the Lesbianists take it, and support their folley and games. They also support their folley and games with your revenues, that they make sure you lose, at every casion, and at every gas station, with a convience store, that has gambling machines in it, for you to deposit you money into. Every lottery in the world is rigged, and so if you spend money on it, if you are not a Lesbianist, you are just throwing your money away.

No Fair Play In Nevada, And No Fair Play In The World

There is no fair play, here in Nevada, or any where else, in the world, and I would like you all to know that, and become aware of that, and then I hope you will tell your friends about it, and then I hope you will destroy every single last one of their casinos, and gaming machines. We are not going to allow them to continue their frolicking at your expense, and we are going to destroy every last one of the Lesbianists, as soon as we can. If they prefer to surrender themselves to my kids, than we can allow them to live. However, if they do not surrender themselves to my kids, then we will kill them all. And there are no 'maybe's' about that.

Sniper Shooting, And Miscellaneous Information

You have my permission to sniper shoot any police officer, park ranger, sherrif, or other person, plain clothesed police officer or detective, with or without a gun, on sight with your scoped rifles, and targeting assistant who will determine range, from your bunkered in the hillside, shooting site. Any hotel in the area, which might harbor shooters from local police, sherrif, or SWAT team operations groups, you have my permissions, and blessing, or go ahead, and my 'okay, and 'approved for action' sight of appeal. Sight of appeal means, my blessings, based on your determination as per your good judgement.

One hotel that is clearly the most convenient, and the closest with in shooting range, at close range, is the New Orleans Hotel. Hotels within shooting range, at a distance, are the Palm's Hotel, The Rio Hotel and Casino and its seperate tower wing, and a few others, off in the distance. You'll have to come and look at them from the approximate location of the site after you determine where every thing

is, to locate and determine for your self which hotels and towers need to come down, and what you will need to bring them down. There is a tower off in the distance, a new hotel, that is going up, that I do not know the name of, but is clearly within shooting range, and needs to come down, and people are on it, daily, welding, and you can't miss it, if you look in the north easterly direction from the site. There is the Stratosphere Hotel and Casino, which also needs to come down, which is further over to the west from the new hotel wing that is going up. There are many scaffoldings in the area, that also need to come down with explosives, fracturables rocks, fuels, chlorine, and high temperature minerals particles ignition, and particles burnings bombs. There are probably a number of other landmarks, hotels, casinos, bars, restaraunts, trailor parks, trailors, houses, apartments, condominiums, near or off in the distance, that also need to come down, and need to be demolished with my light weight explosives fuels, gunpowders, metals particles, and chlorine plastique explosives bombs.

You will destroy them all, and you will come prepared, or be prepared to acquire all the demolitions needed to destroy them all, as well as to destroy all the local police and sheriff's many Metro offices, SWAT Teams offices and units, Fire and Rescue Ambulance units, Lesbianists' Hospitals, and other Lesbianists facilities, throughout the Las Vegas Valley, Henderson Nevada, North Las Vegas, Pahrump, Mesquite and the whole Southern Nevada, westward to San Diego, California, northward to Los Angeles, northward to San Francisco, California, northward to Berkely, California to Oregon, and Washington State, and back down to Reno Nevada, Arizona, New Mexico, Albequerque, Houston Texas, Dallas Fort Worth Texas, and all areas where there are tactical SWAT team units, military units, militia units, as all militias are organized and operated by Lesbianists, despite popular beliefs that they are independent of the government, and anti government, as we often see on the "TV for the Brainless", as they are often refered to, i.e., the general public.

You will destroy all law enforcement offices, and personel, and all military and militias. All governments, their offices, and employees, are to be destroyed, and all personel are to be executed, except for those who take it upon themselves to execute the Lesbianists among them. My kids have a full list of all the places and structures that need to be destroyed, and demolished, and so please see them for that information.

Your Orders Are To Kill The President Of The United States And His Wife

And to repeat, your orders are to kill the president of the United States, George Walker Bush, Jr., his wife, Mrs. Barbara Bush, Jr., and all of his and his wifes' Lesbianists' associates, pretend relatives, and friends.

We are not going to let this stand, another moment, and if they do not surrender to my kids, you are to execute them all. My kids have a list of names, of those, who have not surrendered, as yet. Please see them for and ask them for that list of names of persons who have not as yet, surrendered, and who need to be executed, post haste, immediately, or, ASAP.

United States President George Walker Bush, Jr., is no exception to this, as he has not surrendered, as of yet, and that is confirmed. Neither has any of his colleages, or congressional office holders and diet or congress members, except for Ted Kennedy, and one or so others, and maybe a cabinet member, one or there abouts, but I haven't confirmed that, yet. There are some members of the congress who are not Lesbianists, and you can get their names, on a list from my kids, as well.

Captain Off The Bridge.

Texas's Lesbianists' Latest 'Vaccine' And Texas's Attempts To Destroy Women's And Girls Vaginal Lining And To Destroy Cervical Lining, Causeing Stillbirths To Increase, And To Prevent The Successful Birthing Of Children

The latest attempt by the Lesbianists' governments of the world, near by my computer window, on the internet news services, to destroy and toy with the human population of this planet, has been launched in Texas, and is targeted at women and girls, and their ability to have children.

See the article at the end of this post.

The new vaccine, which is mandated by Governor Rick Perry, who signed it into law, and is now obligatory, unless you protest it, and go to

court, and spend years fighting it, as an individual or small group of claimants, will destroy the vaginal cervical collar and the lining that holds every thing in place, and supports the interior of the vagina, thus making it impossible to carry a fetus to term. The vaccine is also targeting the brains fibers throughout the human body, and the fibers of the brains in a woman's or girls' body will slowly rot, and decay as they are eaten up by tiny animals that eat these energies conducing fibers, synapses, relay switches, and other related energical brainal related things and dings thoughout the body.

Latest Lesbianists' Vaccine Will Cause Numerous Problems

It will also speed up the eating away of the enamel of the teeth, and of the bones in the woman's and girl's body, her fingernails, and her skin membranes NS membraneous tissues throughout the body, and on the exterior of a woman's and girls' body, making the women and girls grow older looking at ever more younger ages, and making women and girls susceptable to skin cancer, melanoma, herpes, genital warts, other infestations of animals in the skin, and other skin related membrane destructing colonies of animals, that they use from out of their Bio Chem War encyclopedia of how to destroy human beings, with poisonous and health problems causeing crystals cages animals of all kinds. Especially numerous are the Bio Chem Warfare crystals cages animals of the petroleum industry's based kind.

The vaccine is no different from any other of the Lesbianists vaccines aimed at destroying the health of the people who live on this planet. It is compared to the 'polio' vaccine, in the news article, and that was similarly an attempt at destroying the health of the human being, by making the human being incapable of haveing any sexual orgasming capabilities, by killing off all the sex related animals and bugies in the body, which make sexaling juices, that make eroteming and orgasming possible.

Thus, this latest attempt at destroying the health of the people who live on this planet, locally, in Texas, and that I know of, anyway, is nothing more than the Lesbianists toying with the people who they are here to amuse them selves with by destroying them, little by little, over a long period of time.

Execute United States Of America, State Of Texas, Governor Perry And Family

This will not stand, and you will all destroy the capital of Texas, and Governor Perry's mansion, and the Governor and his wife, and their family, pretend or otherwise with my fracturable rocks and fuels chlorine and explosives, etc., bombs, that you will make in your home's garage, or workshop, safely.

Underground Books Distributor's For Militia Types Folks

Use the delayed timer invention, that is a workable time delay detonator, that I've explained about, especially if you use black

powder gun powder, mixed with axel grease, turpentine, benzine, chlorine, using also some Elmer's glue, prior to mixing with chlorine, and then set it in a warm cupboard, to ferment for a few days, to then turn into a nice plastic explosives mixture for detonating with the string of flash bulbs wired to the alarm clock trick, as described by Ragnar or by one of the other bombs making specialists, in their sub culture literature for militia types folks, who wish to destroy the government.

They find the list of names of all the people who request the literature, by mail, and then they go and watch them, with their surveilance technologies they have, and then they either capture and torture them, and then kill them, or they just make sure they are die, in a fatal car accident, or whatever.

Paladium Press is one of the Lesbianists' book publishers, and there are others, and this one is affiliated with the National Rifle Association, a Lesbianists organization.

This publisher has titles sold to underground books distributors, and you can find a number of underground book distributors on the internet, which carry more titles than Palladium press.

Delta Press, who publishes their books and paraphenalia distribution listings magazine, 'Delta Force' is one of these distributors of interesting underground literature.

http://www.deltaforce.com/catalog/page30dp.html

'Home Made Fireworks', is one web page to look at, if you have the time.

http://www.deltaforce.com/catalog/page28dp.html

'Booby Traps, Explosives and Black Medicine', is another useful page to look at, as well.

http://www.deltaforce.com/catalog/page30dp.html

There are a number of other distributors of underground literature, and some have better selections than does Delta Press.

In any case, with a little research, there are plenty of 'timed detonation devices' drawings, and explanations, for you to view, and learn from, that will help you to construct a timed detonator, that will allow you to safely set off one of your plastiques bombs made with my explosives formulas.

Paladin Press, you can find their books at Amazon Books on the web, another Lesbianists owned corporation, is another publisher of interesting underground literature, that can be useful for you to study and learn from.

Paladin Press can be found at, http://www.paladin-press.com/

Books for supposed 'Professionals' who are anti terrorists professionals, that allow them to detect the different types of bombs people can make, and then use to destroy others, is sort of a tounge in cheek joke of the Lesbianists, for luring in people who wish to find information on bombs and explosives.

There are many useful books published to help beginners understand the basics of bomb making. The idea is to use the information for professionals who wish to understand the craft of making bombs, and detonating devices, and then use that information to build your bombs and your detonating devices.

The flash bulbs wired to an alarm clock with matches and ignitable phosphates glued to a string of flashbulbs, wired properly together, then crushed, so as to expose their flash and heat ignition coils filaments, for your detonating heat energies ignition needs, is one of the basics and you can find it in one or another of the underground books on bombs making and detonation devices making for 'professional' anti terrorist's private investigator or bombs detection professionals types.

This is one of the ways the Lesbianists lure in persons who know nothing about weapons, and then they find out who they are, and then they make friends with them, and toy with them, and introduce them to their Lesbianists' friends, and hang out with them, and pretend they are all friends, then one day, they all attack the person, and torture the individual, and get their kicks, amusing them selves, by ripping the person up, or by hanging, and nailing the person to a wall, with a nail gun using, approximately, three inch nails, and then hammering in longer, seven inch to twelve inch nails, or larger ones, or other similar nonsensical, childish, but fiendish behavior.

The "BRUTAL ART OF RIPPING, POKING & PRESSING VITAL TARGETS"
"by Loren W. Christensen"
http://www.paladin-press.com/detail.aspx?ID=1441

Is a beginners guide to ripping people apart, one arm, or leg, at a time, or with team work, one half of a person can be ripped from the other half, if you hold the right bones in place, and then, using teamwork, rip the person into two or more pieces. This book gives a person a preliminary sense of what he or she can muster, as an individual who attempts to rip at a person, and tear the person apart, one limb at a time, or with friends, how to rip a person up, one piece or more, at a time. Ripping people up is accomplished best, if they are unconcious. If they can not fight back, or resist, it is easy to rip a person apart, if you have the needed strength. Since many people have ancestors who were monkeys, chimps, orangutangs, guerillas, and so forth, with tremendous muscles strength, there are lots of very tiny persons, with phenomenal strength, and they can easily rip a person in two, by them self, if they try.

Books on booby traps for law enforcement personel, are simple descriptions of bombs that they may or may not encounter, and there

may be some useful information in some of them such as,

"BOOBY TRAP IDENTIFICATION AND RESPONSE GUIDE FOR LAW ENFORCEMENT PERSONNEL"
"by Tony L. Jones"
"This manual teaches cops and other law enforcement personnel all they need to know to recognize a booby trap and respond properly. Find out where booby traps are most commonly employed; the 11 physical signs that most often signal a trap; what to do (andnot do) if a trap is suspected or found; how to safely search a building, outdoor site or vehicle; and the one indicator that practically guarantees that a building has been booby-trapped. Shows more than 90 different booby traps in place. For academic study only. 5 1/2 x 8 1/2, softcover, photos, 80 pp."

There are others, which you can also find, that will provide schematics, and drawings of useable ambush related devices, and detonators for them.

"Contingency Cannibalism", sold through Paladin Press, and other 'underground' book distributors, is one of the Lesbianists' favorite books, that help them to track persons who they would like to later, cannibalize, themselves, as a joke on the person.

"CONTINGENCY CANNIBALISM"
"Superhardcore Survivalisms Dirty Little Secret"
"by Shiguro Takada"
"This twisted, tongue-in-cheek look at cannibalism as a last-resort survival option analyzes real-life case studies and historical episodes of cannibalism. Then it examines the hard-core decisions and gruesome details one must know in order to partake in this grisly practice. Recipes included. For entertainment purposes only. 5 1/2 x 8 1/2, softcover, 160 pp."

The Rusksack, "Survival Information Clearinghouse", is just one club of members of mainly Lesbianists, who have fun toying with the people who live on this planet.

http://therucksack.tripod.com/survival.htm

Information On Bombs Making And Detonators On The Web

For information on making detonators, and other bomb related stuff, please see this web page as it costs nothing.

http://www.bombshock.com/archive/Homemade_Bombs/

Solar Flares And Flare Igniters

A solar igniter as talked about in the article on page,

http://www.bombshock.com/file9/crtrmkr.txt-Crater_Makers-932.htm

'Crater Makers', is a solar flare igniter, a device that is used in solar flares, or night time distress signal flares, that ignite the flare, by sending an electric battery current into the flare phosphates holding tube, down a wire, on an ignition circuit, and then igniting the distress signal flare.

You can find solar igniters inside of distress signal flares that are used on boats, for shooting up into the air, with a flare gun for maritime use, that will send the distress signal flare up into the sky, if you have the flare gun pointing in that direction, and then at a certain altitude, a trip switch circuit is activated, due to air pressure, or due to timing from time of departure of the distress signal flare from the flare gun barrel.

You have to exhibit extreme caution, when taking a flare apart, as it can detonate, accidentally, and they are not made in a way so that people can safely take them apart, and people who try to take them apart, are accidentally injured, on a regular basis. Do not use this, if you do not know any thing about demining, as a professional mine deactivating specialist in the military, or with military training. This is best left up to the professionals, and is not meant as something the average house wife, business man or business woman, or chemistry or other studies, school student, should attempt.

You can use a flash bulb, and get the same results, if you glue some gun powder and phosphates to the flash bulb housing, and then crush the glass, and then wire it properly to a common house morning wake me up, alarm clock with a striker bell and a striker that moves back and forth. The circuit is simple, and you can figure it out with little difficulty.

The Lesbianists' Balooney On Minus Charges As Opposed To Positive Charges

Remember the minus sign on a battery is where all the activity of the little energies kids is going on, and the Lesbianists purposefully teach that the positive side is where the current is moving out of, and around towards the negative side of the battery. The Lesbianists teach that the active side of the battery is the plus or positive side, or the side with the plus sign on it, when you look at a common house hold nine volt battery, and that the non-active side is the negative side, or the side of the battery with a minus sign. This is false. The side with the minus sign on it, is the active side, and that is where you do not want to wire any thing to, unless you know what you are doing. The positive side has no activity going on, and is safe to touch, but the other side is not safe to touch, and the testing meters are wired to show you that the reverse is true. They have tampered with the design of testing meters, so as to support their allegation and falseity, that the minus side is where there is no activity, contrary to the truth.

That means, that, the flash bulb igniter system and the flash bulb itself should indicate that one side is the positive side, for the

positive wire to be attached to. You had better check carefully, and make sure there is no mischief here, as you do not want to detonate your igniter, accidentally. Ask a qualified electronics specialist to do all your wiring of your detonators, as he or she is the only person qualified to wire these types of detonators.

The Lesbianists' Maps Of The Brains

It's rather confusing, the way the Lesbianists have reversed things, and have messed around, so as to thwart your attempts to make nice detonators that work every time, unless you have a normal set of brains, which unfortunately, I have not got a pair of, or triple set, or more of. That's sort of a joke. On a magazine, yesterday, I saw how the Lesbianists teach that one part of the brain is for speech, and one area of the brain is for speaking, and one area of the brain is for sight, and one area of the brain is for logical thinking, and one area of the brain is for signing, or one area of the brain is for artistic inventioning, and so forth, but that's a lot of hog wash.

The brain is not partitioned in that way, and they know it, and they are misleading every one, and laughing at all of you while they are doing it, with their 15th to 17th century style drawings, that they have plastered on all the Time magazines, or what ever magazine cover it was on, that I saw in the check out lane, at the super market, yesterday. You have kazillions, and more of parts to your brains, and there are so many, it is unlimited, nearly, and your brains are so complex, and you have got brains in lots of other places in your bodies, other than in your head, and I'm not going to go into that one, now, but the Lesbianists are lying through their teeth, when it comes to this type of pseudo historically backwards, archaic, or cave dwelling human's notions on science, that should insult a first grader, or kindergarden school student, or preschool student.

In any case, ask your local electronics' specialist or house hold electricians' specialist, or handy man repair persons, who work for house hold water heating devices installation companies, or other electrical home appliances sales and installation companies, who also get confused, from time to time, as I've witnessed them, personally, blow up breaker circuits.

Get a qualified, and that's hard to find in so far as I've witnessed them at work, electronics' specialist to wire your detonators, or go take a course with my kids, as they have courses available on wireing such devices.

There is no minus charge, and there is no positive charge, and that is what you should understand. There is a side to the battery where there is lots of activities going on, and that is the minus sign side on the battery. The positive sign side on the battery is where there is little to very little or nearly no activity, but no activity is not the truth, either, as there is activity, you just can not measure it with todays' electronics measuring devices, as they are not

technologically sophisticated enough to be able to detect the activity, though I'm sure there have been intrepid scientists who discovered that both sides of the battery have activity, and then they were shot and killed, after that discovery, by a Lesbianist assasin, or by a hired assasin, assigned or paid to kill the scientist who discovered that there is activity at the 'minus' side of the battery as well as at the 'positive' side.

That means, that you need only concern your self with the 'minus' side, since you will not be able to detect any thing at the positive side, unless you use the reverse wired electronics and electrical energies detection devices that the Lesbianists market through Tandy, or Radio Shack, and at Sears, and so forth.

It gets confusing, a little bit, doesn't it. Anyway, go and take a course at one of my kids classes, after you sign in, and swear in as a jr. member to our new country, which I haven't sworn on to, as yet, or joined - but though I am the boss of, regardless - since my kids do not speak to me, on a daily, or weekly, or other basis, and I just happen to be able to know what they are doing as they tell me what they are doing, through some secret port hole in one of my brains some where, in my toes, or nose, or who knows where, as they telegraph or some how signal in, using semiphore signaling, or probably hand signaling, that my brain then catches, and then passes on to me, their messages that they signal in to me, and the news, as well, about what they are doing, and about what is going on with them, and about what is going on with some other things, as well.

Since I am GOD, I happen to have a right to know this stuff, what they and every body else is doing, on a daily basis, but they haven't told me how my brains catch their information, yet, or the other information that gets there, some where into my one or more of my brains, and I haven't figured it out, yet, myself, either, though I think I know something, a very little something, about how it works.

This does not mean, that my brains are unreliable - except for my memories areas of my brains, in particular - but that I am just waking up to what is going on, here, and I have a few kazillions of years to work out every thing, or some of the basics, any way.

In any case, you have all been snookered by them, with regards to their non sense sciences, and you are being laughed at, and toyed with, daily by them. That happens to be the truth, whether we find it pleasant or not.

Execute The Current President Of The United States Of America, George Walker Bush, Jr.

In any case, the Lesbianists are a twisted group of individuals, who toy with the people who live on this planet. Mrs. Hillary Clinton, Bill Clinton, George Walker Bush, Jr. President of the United States, his wife, Barbara Bush Jr., George Bush, Sr., former president, and

his wife, Barbara Bush, Sr, are all gagsters, or jokesters, who wish to only toy with you, and eat you, or deprive you of your life, and of your rights, in fiendish and horribalistic ways and manners.

They are all to be executed, especially George Walker Bush, Jr., President of the United States of America, currently residing at 1600 Pennsylvania Ave. Washington DC, in what they call the White House. You are to kill them all, and send every last one of them to my Epcot Center, as soon as is convenient for you.

Lesbianists Who Decide To Sexal In My Religion With Lesbianists And Non-Lesbianists' Persons

If any Lesbianists decide to sexal in my religion, with their friends, and their friends may include other Lesbianists who decide to sexal, as well, as well as, other people they know, then they may begin sexaling with their friends in my religion, however, they must have a pentative attitude, and they must say they are sorry, and they must now and then, when they feel they wish to, and feel emotionally and mentally capable of speaking about it, they can talk with their friends who they are sexaling with, and with others who wish to listen as well, and they can denounce the Lesbianists by telling people about the things the Lesbianists do, and did.

If they decide to do this, this is the same as surrendering, and my kids will protect them from other Lesbianists who might want to harm them. They have not sworn in, as a citizen of my and my kids' country, and as citizens of our country that every one is swearing in to as citizens, but it is sort of a promise to swear in, informal gesture that they are committed to, once they begin sexaling with their friends, and with other Lesbianists, who also wish to sexal and in time, denounce the Lesbianists with them.

Citizens By Proxy

By denouncing the Lesbianists organization, and by telling people about what the Lesbianists do and did, they are essentially stating they are sorry for what has happened, and that is a pentative attitude, and with that pentative attitude, they are accepted as citizens, by proxy.

Temporary Full Time Citizens

Citizens by proxy means they are accepted by my kids as pentative persons, who wish to join our country, and who there with, qualify as citizens of our country, in an informal manner. Citizen by proxy means, they give up their old citizen ship, to whatever government they used to belong to, and they are taken in, as temporary full time citizens.

Temporary full time citizen is a term that means they are full time citizens, but on a temporary committal agreement, and that will be made permanent when they have the chance to meet with my children, and

then can swear in, as a permanent full time citizen.

They can then participate at the collection site, in the activities that will be going on, with others, who wish to participate, as they spill their juices, and purify the area with their sexaling juices.

What To Do About Untimely Pregnancies, Health Issues, Medicines, And Regroverative Formulas

My kids will deliver to them, to the men and to the women who surrender and become citizens by proxy, and temporary full time citizens, the needed medications that will help to make their bodies, wholesome and well, and regroverated, as well as the medications that are needed to prevent untimely pregnancies.

Medical And Housing Benefits, And Other Health And Work Related Benefits

My kids will make certain that they will be given the right medications, and my kids will also provide all the same medications for each individual who participates in the collection site activities to purify the area where we will one day set up my ministry with my kids assistance. My kids will also set up other facilities, as well as the ministry facilities. The other facilities will be scattered through out the valley, and they will be the houseing units and other facilities for people to use to become physically fit, well, and well nourished, and healthy, such as gyms, aerobic studios for practicing aerobic dance, and aerobic excercises, as well as sauna and health spa, and swimming, tennis, badminton, cricket, and other sports facilities for baseball, rugby, foot ball, for those who wish to play a friendly game of foot ball, now and then, with the needed bleachers, lighting, and other supportive facilities for allowing persons to attend and watch the games that are going on, not only for foot ball, or for base ball, but also for tennis, soccer, rugby, and all out door sports facilities that will be needed.

When will my kids set up these facilities? They will set them up at the same time or shortly there after, as my kids begin to set up my ministry facilities, and the needed facilities for living and working in the valley area, sexaling for a living.

At that time, the citizens by proxy, and all other persons who have not yet sworn in, but wish to, will have the opportunity to swear in, and then they can enter and use the facilities full time, twenty four hours a day, without any further discussion about it.

All people who participate in the collection site activities, are also citizens by proxy, and as such, will automatically qualify for all medicines, all health supportive medical formulas, and all youthfulness prolonging, or regroverative formulas, that will feed all the amoebes, and other cells, or living beings in your bodies, and that will feed all the living beings in your bodies, that will then allow you to enjoy full regroveration of your body and rejuvenation of

your youthfulness, youthful energies, and of all the other health benefits that accompany a youthful body, such as more energy, a stronger libido, a more healthful body, and so on.

When do people begin this participation in the collection site activities? As soon as they come out here, to Las Vegas, and arrive in their camper trailers, or caravan buses, or other vehicles, or with their camping gear such as tents, and cooking grills, and so forth.

When Can People Begin To Come So As To Be Able To Participate?

How soon can people begin coming to participate at the collection site in the activities that will be on going at the collection site for some time to come?

They can begin coming to participate any time. My kids will watch out for the safety of all the people who come to participate in the collection site activities. My kids will prevent accidents such as current Lesbianists shooting at people at the collection site, from high rise towers, scaffolding, tall cranes, or from hotel and casino properties owned by the Lesbianists, and from other tall condominium and also from tall apartments buildings and also from normal sized, two or three storey, to eight or so stories, apartment buildings, in the area. Of course, my kids will prevent accidents from happening such as shootings, from all possible locations, and not just from those named structures and locations.

Sniper Points, Places Where Snipers Shoot From

There is no need to blow or destroy them with explosives, in Las Vegas, as there will be no way any one can use those hotels, and other structures, as shooting or sniper points, places where snipers shoot from, to harm any one who is participating at the collection site, in the collection site activities.

In time, every thing will be worked out, and all the people who must hand over their companies, or disolve their companies, and sell or get rid of the assets of their companies, all of that will be in compliance with my childrens' instructions with regards to it, as I've stated about it, already, in brief.

Once the facilities are set up by my kids, and people swear in formally, then my kids can begin to pay people their earned income, for the work they did as they sexal for a living, and for their work, as they spill their fluids, to purify the collection site, the collection site area, and the general vicinity.

Pocket Knives, Construction Tools, And Miscellaneous Daily Life Management Tools And Equipment

No one needs to bring weapons to the collection site area, or to Las Vegas, as they will not be needed, and pocket knifes are okay, and construction tools are okay, but they will be for daily use

activities, only. Daily life management tools are forks, knives, spoons, chopsticks, plates, dishes, glasses, coffee cups, can openers, bottle openers, cork pullers, and these types of things, as well as all the other types of kitchen use tools for cooking food, for eating food, for drinking beverages, and for the collection of garbage, and food wastes, and for cleaning up their eating and cooking utensils, such as portable wash basins, and portable gas stoves, or fixed stoves, fixed wash basins, fixed showers in camper trailors, and in caravan buses, and so forth.

Hookups For Travel Camping Vans And Similar Vehicles

We have no hookups at the site, for water supply, electricity, or sewage, as yet, but the instructions that my kids will make available to persons who come in to my kids' underground facilities - the protected and encapsulated living environment - those persons who go in to recieve the instructions, and other information they must recieve on companies and assets, and persons moving on, and on persons staying, and other information needed to successfully carry out the removal of hotels, and the demolition of buildings, etc. which my kids will handle with the technologies they have available to them for their use for these purposes, and for other purposes.

Cleaning Up The Area And Throwing Away The Garbage

My kids will also handle the required steps for clearing up of the litter and garbage in the area, all of Las Vegas, Pahrump, Henderson, Laughlin, Mesquite, North Las Vegas, Arizona, New Mexico, California, Utah, and beyond, above ground and below ground, and for cleaning up the areas, and for removing the underground and above ground garbage, or city buildings and Lesbianists' structures, and all structures that are no longer needed, train tracks, airports, roadways, bridges, parks, hospitals, medical clinics, and so on, all of which will no longer be needed.

Schedule For Leveling Of The Ground And Hills In The Area, Removal Of Unsightly And Smelly Garbage

Initial leveling of the grounds' areas, leveling of the uneven surface areas, and leveling of the sloping areas, and of the tiny hills, and other uneven and unuseful features to the area, such as hills, low cliffs, and removal of unsightly, smelly garbage, will be done by my kids, with the technologies they have available to them, according to the schedule for making these types of changes, and cleaning up of the area, so as to make the area, one hundred percent, useable for collection site activities, for people to then come in and use the area as a collection site.

Setting Up New Facilities

My kids will take care of all of that, and they will take care of all of the work and tasks for setting up a private collection site area - for spilling purifying sexaling juices, to purify the area - in

accordance with my kids' schedule for these works and tasks for setting up a private collection site area, with tall side walls, and barricade walls, to prevent people from rubber necking as they drive by, so as to prevent car, truck, automobile, motorbike, and bicyle accidents. My kids will also set up the latrines, and other needed hygenics facilities, sleeping accomodations, eating facilities, rehydration facilities, co-opted bathing facilities, sports and excercises facilities, and other facilities.

Co-opted facilities means facilities used co-optively by men, boys, women and girls. Co-optively means, in cooperating measures with each other. Cooperating measures means, each of the four groups of people, men, boys, women, and girls, will work together, to keep the facilities sanitary, clean and healthful, neat and tidy, and safe for use, keeping young children from playing on the stairs for the elevated latrines, and keeping young children from getting in the way of asscending and descending users of the co-optively, or cooptively managed facilities.

Fountains And Showering Lamponeers

My kids will also use their high tech teletransportation technologies for removing toddlers from the stairs, and for placing them in a much safer location, such as in a near by sand garden, or play area, with sandy areas, and with toys to play with, and with cold showers, or showering fountains, people can refresh themselves under, and with fresh water to drink.

Lamponeers are showers that shoot up from sprinkler systems embedded in the paved surfaces, or concrete like surfaces, that shower water up and over the area, up and above and over persons who are there, to cool every one off.

Restaraunts, Clubs, Lounges, Eateries, Cafeterias, Bars, Pubs, Bicyle Paths, And So Forth

Bicycle paths, mini bike paths, walking paths, with rest stations, for refreshments and food, will be set up, and restaraunts and other facilities will be set up, nearby and they will be accessable by following these foot paths, bicyle paths, waling paths, and so forth.

All needed facilities for all parties, such as accomodations, living quarters, health clinics, excerize facilties, swimming pools, saunas, spas, and clubs for eating and mingling with persons, either in light weight evening wear and garments, or partially naked, or in the buff, will also be set up by my children for the use by all legitimate collection site participants. Gurkian Laws apply, and no other laws, such as local area laws, will be enforcable. Police and others will be turned away, and the rights of participants at the collection site area, will be protected one hundred percent, as we begin to change over to the new Gurkian Laws we will all be living by, from now on.

Dealing With Criminally Minded Persons

Any violators of the Gurkian Laws, codes, statutes, and so forth, my kids will arrest, and detain, and then place into prison cells, and then sentence them, in accordance with the sentencing requirements under Gurkian Laws, etc., and they may end up doing humiliatory punishments, or community clean up activities. In any case, they will be arrested by my children, who will use their high tech, biometrics and teletransportation technologies, and their other integrated technologies that they have, to swiftly remove the violators of Gurkian Laws, from the collection site and from the collection site area, and vicinity, and that will effectively cancel out their participation, until sentencing has been given, and until penalties have been leaned.

Penalties have been leaned, means, they have undergone sentencing, and the penalties have been enforced upon the violators, i.e., the guilty parties.

Alterations, Modifications, Changes, Clearing Up And Removal Of Garbage In The Areas, And Additions Time Schedules

These modifications, alterations, changes, and additions, etc., will occur over a period of time, as my kids have a schedule for all of these changes, modifications, alterations, clean up, and additions, etc., and they must stick to the schedule, so after you arrive, if you do not see some thing you feel should be there, by then, it is not there because it is not on the priorities facilities and priorities changes, etc., schedules lists.

Captain Off The Bridge.

Texas requires cancer vaccine for girls

By LIZ AUSTIN PETERSON, Associated Press Writer

AUSTIN, Texas - Bypassing the Legislature, Republican Gov. Rick Perry signed an order Friday making Texas the first state to require that schoolgirls get vaccinated against the sexually transmitted virus that causes cervical cancer.
ADVERTISEMENT

By issuing an executive order, Perry apparently sidesteps opposition in the Legislature from conservatives and parents' rights groups who fear such a requirement would condone premarital sex and interfere with the way parents raise their children.

Beginning in September 2008, girls entering the sixth grade - meaning, generally, girls ages 11 and 12 - will have to get Gardasil, Merck & Co.'s new vaccine against strains of the human papillomavirus, or HPV.

Perry, a conservative Christian who opposes abortion and stem-cell research using embryonic cells, counts on the religious right for his political base. But he has said the cervical cancer vaccine is no different from the one that protects children against polio.

"The HPV vaccine provides us with an incredible opportunity to effectively target and prevent cervical cancer," Perry said in announcing the order.

"If there are diseases in our society that are going to cost us large amounts of money, it just makes good economic sense, not to mention the health and well-being of these individuals to have those vaccines available," he said.

Merck is bankrolling efforts to pass state laws across the country mandating Gardasil for girls as young as 11 or 12. It doubled its lobbying budget in Texas and has funneled money through Women in Government, an advocacy group made up of female state legislators around the country.

Perry has several ties to Merck and Women in Government. One of the drug company's three lobbyists in Texas is Mike Toomey, Perry's former chief of staff. His current chief of staff's mother-in-law, Texas Republican state Rep. Dianne White Delisi, is a state director for Women in Government.

Perry also received $6,000 from Merck's political action committee during his re-election campaign.

Texas allows parents to opt out of inoculations by filing an affidavit objecting to the vaccine on religious or philosophical reasons. Even with such provisions, however, conservative groups say such requirements interfere with parents' rights to make medical decisions for their children.

The federal government approved Gardasil in June, and a government advisory panel has recommended that all girls get the shots at 11 and 12, before they are likely to be sexually active.

The New Jersey-based drug company could generate billions in sales if Gardasil - at $360 for the three-shot regimen - were made mandatory across the country. Most insurance companies now cover the vaccine, which has been shown to have no serious side effects.

Merck spokeswoman Janet Skidmore would not say how much the company is spending on lobbyists or how much it has donated to Women in Government. Susan Crosby, the group's president, also declined to specify how much the drug company gave.

A top official from Merck's vaccine division sits on Women in Government's business council, and many of the bills around the

country have been introduced by members of Women in Government.

Morals For A Sane Society - It Is Now Time To Destroy The Lesbianists - Destroying The White House, Balitimore, Maryland, And Virginia, Killing The President Of The United States, Mr. George Walker Bush, Jr., And Sinking The Eastern Coastline Of The United States Into The Atlantic Ocean - Chaos Every Where In My Universe - Bringing An End To The Chaos In My Universe - Surrendering And Repentance - Lesbianists With Non Repenentant Attitudes Who Will Not Surrender - Orders To Kill All Presdential Candidates, Etc. - New Coins Ready And Are The Ever Useful To Us! - Public Nudity And Public Sexaling - What Does The New Moralicity Mean, In Plain Language? Sexaling Is An Absolute 'Good' And An Aboslute 'Right' - Free Action Sexaling Updated: 13-02-07 Rev.a. 00.a PST 23:25

Morals For A Sane Society

To not fuck a person when you can fuck a person is a wicked act.

Not to fuck a man or a woman in the mouthal hole, or in the buttal hole, or to not fuck a woman in the vaginal hole, when you can, and when you are healthy, and when you have the time for it, by refusing, for what ever reason, other than mental illness, or 'gayist' reasons, you are committing a cheap and wicked act, when you refuse to fuck the other person, and use your dick, or your tounge to felate or kiss and tickle, and lick at the ladies' groinal area, and her vaginal cleavage, and vaginal flaps, or labial flaps, or labial tissue, and also her labial throes.

To not suckal a dick or a scrotum or tickle the males' groinal area, with your tounge, or with your fingers, and so forth, when you are able, and ready, and capable, is a cheap and wicked act, whether you are a woman or a man, girl or a boy.

You are given demerit points for not sexaling when you can and are able to sexal, and your time permits it.

To not participate in sexaling when you can participate in sexaling, is a wicked act. To prevent others from sexaling with you, or prevent a person from sexaling with you and your friends, these are both wicked acts.

A kindly and goodly person is a person who sexals all he or she can and who participates in sexaling with people, all he or she can, when ever he or she can to help those people, and one self, to erase the negative karmic markups each person has, and to help to create the wonderful energies that you can create by sexaling, and to change our universe into the nice place we need to change it into for us to live in, prospering with each other, in kindly loving embraces with each other.

If you stand or sit, talking, drinking, eating, with your clothes on, arguing, and discussing football, or baseball, or the local news on TV, or whatever, and you if you are not sexaling, as a result of your actions, when in fact, you could be sexaling, and helping to purify all the people around you, and yourself, as well, you are commiting an evil act, and an immoral act. It is immoral to behave in an uninterested manner, towards sexaling, and towards helping others by sexaling to purify their karmic markups. You are engaging in wicked, unkindly, and evil behavior, by non chalantly staring out the window, at a restaraunt, or in your car, with others around you, thinking about your miscellaneous thoughts, and by your not attempting to purify others, with every ounce of energy you have got, by sexaling with them, in a safe manner.

We do not want you to drive down the road, sexaling, and not paying attention to the traffic, and thereby causing accidents, and there be causeing harm and injury to self and to others, thereby preventing one self and others from their being able to freely mobilate, or move around freely, or ambulate, as they say in modern English, and then freely participate in sexalating activities of fucking, sucking, tounging, massaging the bodies, and the titties, and buttholes of women and girls, and massaging their kissing lips, and their vaginal lips, their facial cheeks, and their butt cheeks, and so forth. You must drive safely, and make it home, to a safe place, where you and your friends can freely sexalate with each other, without others interefereing with you.

A wicked or evil person is one who prevents a person from sexaling, and who destroys or ruins another person, physically, mentally, morally, emotionally, psychologically, or psychically, so that the other person can not participate freely and fully in holy and pure, GODLY sexaling activities.

This type of person who prevents others is a ruinous person, who will invite ruin and disaster to his or her doorsteps, and into his or her life.

There are many ruinous people, who execute others, and who torture, and cause pain, and suffering to others, and who disfigures others. These people who execute others, and who terminate their ability to sexal, prospering with others, making our universe into the kind of nice place we all want to be living in, together with each other, are wicked and evil people.

It Is Now Time To Destroy The Lesbianists

However, when we have a problem of the size and the magnitude of the Lesbianists, that we have, today, in this period of chaos, across my universe, and the Lesbianists' who are toying with humanity, and with all human beings who are not Lesbianists, it is time for us to take action, to prevent them from toying with us, and put a stop to their amusing themselves with their toying with us, any further, and it is now time to destroy them.

"I am Arjuna, a wickedly angry man, and I come to protect those who can not protect themselves. I will kill and thrust my sword and lance through the hearts of men and women who evilly try to prevent people from being prosperously good and bekindly to others."

This is a stanza or sentence from one of my writings, of old. 'Wickedly angry' in this sentence means, outraged, and furious, so much so, every one is scared and afraid of me.

I am 'wickedly angry' and I am here 'to destroy' those who would fuck us up, and ruin our lives, and make our lives miserable, as they toy with us.

My name is GOd, but in my Buddhist scriptures, I am referred to by many names. One of my many names, as I appear to people, in many and various personas, is Arjuna.

I have many sides to my character, as I am GOD, and I am here to protect my children, no matter what the name is people use to refer to me by, and that I am known by, and no matter how it is and no matter who it is among my many children, who I will protect from wicked and ruinous people.

Destroying The White House, Balitimore, Maryland, And Virginia, Killing The President Of The United States, Mr. George Walker Bush, Jr., And Sinking The Eastern Coastline Of The United States Into The Atlantic Ocean

There will not be any further Lesbianists living in Washington DC, or in Baltimore Maryland, or in Northern Virginia, and that vicinity, above ground, and below ground, if some one will be so kind as to place a very large explosives, fuels, chlorine, high heat burning metals fragments, and fracturable rocks bomb, outside the gates to the Washington DC White House, where the number one enemy, Mr. George Walker Bush, Jr., President of the United States, lives, and works, and then detonates that bomb, out side the gates of the White House, where the president lives, currently, and then destroys him, and his

White House, a lair for Lesbianists, with multitudes of torture rooms, i.e, lots of them, below and inside of the White House.

You will destroy and kill the President of the United States, Mr. George Walker Bush, Jr., and Mrs. Barbara Bush, Jr. and every one else who lives at 1600 Pennsylvania Ave. Washington DC.

Why are we going to throw all these people into my Epcot Center. Once in my Epcot Center, they can freely sexal with each other and they can earn merit points.

That will help them straighten out their karma, and it will help them to have a nicer life, when they are born as tummy babies. There are many tummy mommies who will match up with these people, and when they come out as tummy babies, they can start their life, with us, out here in my universe with us, again.

Am I a wicked wrongful person for terminating so many people's lifes? No. Why not? Because that is the only way we can over throw the vastly wicked and evil Lesbianists who practically rule my universe, with their perverse friends, and there are many groups of perverse friends, who we are going to get rid of, and send into my Epcot Center, one after another, as we move ahead, in our efforts to clean up our universe, and in our efforts to stop this nonsense of senseless killings and torturings of people, for amusement, and for game playing.

The Washington White House is one of the homes for these perverse people who game play and toy with all human beings who are not Lesbianists, who live on this planet.

We have many Lesbianists to trash, and to say good bye to, before we can begin to get our world, straightened out, and started up again, with a new culture, with new morals.

We will throw out their old cultures, their Lesbianistic cultures, and we will replace them with our new culture, and our new civilization, that is based on my religion, and on the sanctity of sexaling as a common sense value.

Sexaling is a sacred and holy act. Even if you sexal with a kangaroo, or a chimp, it is still a sacred and holy act.

Why is that? It is because every body is made of something, and that something comes from me, GOD. That something from me, is pure and holy, as I am pure and holy. I designed every person, and every animal, and every living being, with sexaling capabilities that allow that pure and holy GODLYNESS to come out once they begin sexaling.

That GODLYNESS begins to radiate out, as each person begins sexaing, and as each animal begins sexaling, and as each living being begins sexaling, eroteming, orgasming, and phlumetting, and it purifies each and every living being, and washes away the karmic markups every

person, and every animal, and every living being, has in them, and has stored in the molecules that are stacked up in my universe, out side the boundarary walls that hold this universe up, and that keep us in side of the area we are in, and that keep the rest of my universe standing up, stable, making this a safe place to live, at least, safe in so far as nothing comes crashing down on us.

My kids are expert builders, and it is thanks to them, that we have such a nice and safe, and well built universe to live in. It is also thanks to them, that we have these bodies to live in, and to sexal with, since my kids put us together, one molecule at a time, as we need to have our parts put together, along with all the anmials, and living beings, who are inside of us, that my children also assemble for me, and for us.

What is this GODLYNESS? It is a purifying force, that is of me, and is me. It is inside of every one, and inside of every creature, animal, and living being, in my creation.

This is woven into the fabric of your being, and it is of me, and is always a part of me, and is always connected to me. Since I am always pure, and GODLY, you have a possibility of becomeing pure, and holy, like me.

Right now, we are filthy, and grimey, and all gunked up, with sludge, and residues of our karmic heritage. We have done many things that contribute to who we are, and to what we experience, day to day, and if we are not happy with our life, that is because we have the karmic records and markups that dictate that we must be in this miserable and suffering condition, that we are in, today.

There is always sufferring, and unwholesomeness, in our lives, and around us, every day. There are many wicked things that go on, every day. People perpetrate wicked acts, daily, and they go on, unpunished, for a long time, until their karmic markups begin to add up to sufferings coming out, in that person's life.

Sufferings are your payback for your wicked acts, and they help to keep our universe in balance, as I've spoken about, a little, before.

It may seem unwholesome that I ask you to kill my kids, and put them into my Epcot Center, where they can sexal, and where they can get retrained, and where they can be taught to be nice people, after they are retrained, but my asking you to kill my kids, this is merely an expedient, or a means to an end, and it is permissable, given the circumstances, and given the situation, and given that we are at the begining of our new Age of Gurkian Englightenment.

The result we wish to see by killing them, is an end to the activities of the Lesbianists, and and end to the activities of other people like them, in my universe. The Lesbianists are ruining my universe, and ruining the lives of every body in my universe, and though this was the way things were balanced out, prior to now, we are starting out,

with a new method of 'payback' and a new means to balance out the karmic balance book. This is all to be governed by my rules and regulations, that my kids will enforce, in our new, Gurkian Age of Enlightenment, begining about now.

Our killing the Lesbianists, will help to control their ruinous and heinous behavior and activities, and it will help us to get them out of the picture for a while, until we are able to set up our new government, globally, or universal wide, across our universe, in a one universe government, over seeing the activities of all of my kids. It is the only way we have to begin to get our selves straightened out, and onto our new path, that we will follow, for the rest of eternity.

This marks the begining of the Gurkian Age of Engligtenment, and it marks the end of the previous period, or random, or just about nearly random, chaos.

We went through a very long period of decline, untill we got to the period of chaos that we are in, now. This period of chaos, we call, the 'melt down' period.

The 'melt down' period, came after the 'run amuck' period, when my kids began their severely ruinous activities that led to the period of chaos that we are now in.

Chaos Every Where In My Universe

We are going to begin to pull ourselves out of this period of chaos, with the help of my religion, and with our religious activities, and it is going to take us a very long time to pull ourselves out of it, as this 'chaos' is going on every where in my universe.

It will take us a long time to begin to be able to erase our karma enough, based on my religious principals, and the ethics of the Gurkian Age of Englightenment, and our religious activities of sexaling, dancing and excercising, and sexaling in syncopation with the metronome, at one thirty seventh and one fifth, or so, to then some day be able to have erased enough karma, to be rid of, completely, all these horribalistic people, my horribalistic kids, in my universe. When I say, be rid of them, I'm not saying, to trash them, completely. I am saying, we will put a stop to their activities, by changing our karma, and by purifying ourselves with my religion and our religious activities of sexaling, keeping time, in synch with my children, as we sexal, and as we activiate, playing basketball, tennis, or as we swim, or as we pray Nam Myeo Ho Ren Ge Kyeo, and so forth.

Bringing An End To The Chaos In My Universe

We are going to bring an end to the chaos, and to the chaotic behavior, and abberant, ruinous behavior in our universe, as we bring this period of chaos to a close. We will, as we steadily move forward, open the way for the budding and flowering of the Gurkian Age of

Enlightenment, and to the budding and flowering of the new age of friendship and loving care, among all of my children, who participate in my religious, social, economic, and karmic revolution, as we sexal with each other, lovingly, and strive to clearify and erase our karmic markups, sexaling, and synching our activities to one thirty seventh and one fifth on the metronome. Later we will fix our metronomes to keep exact pace in synch with my children, and after we fix and reset the timing scale of the metronome, the timing will be one thirty seventh, exactly, on the metronome.

Our sexaling will produce all types of wonderful, purifying energies, that will revive our universe, and that will revive us, and that will help us to reclaim our universe, and that will help us to live, prosperously, and prosperingly in our universe, together, with each other, and with every one of my children, as we reform the bad and naughty ones, who are wicked and unkind to others, and who prevent people from sexaling, together, with each other.

That means, we are going to kill all the bible thumpers, Pat Robertson, Orwell Roberts, Billy Grahm, Tammy Faye, Jim Faye, and all the other Lesbianists of every religious faction, or group, whether they are Lesbianists who are christians, islamists, judaists, shiites, hindus, buddhists, black moslems i.e., afro american black muslims, or whatever.

We are going to destroy them all, all who would try to prevent us from what we are attempting to accomplish, a global, universal wide, government, run by me, GOD/GOd, as I am the Captain of this ship, and then we are going to begin our new age of Enlightenment, hand in hand with each other, and when they come out of my Epcot Center, again, next time, to be born as tummy babies, to tummy mommies, and to tummy daddies, we will teach them the new rules, ethics, and morals of our new universal wide society, and then we will begin again with them, and raise them in accordance with the new rules, laws, regulations, ethics, and morals of our Gurkian Age of Enlightenment, led by me, GOD/GOd.

Surrendering And Repentance

Those who will surrender, will be allowed to be repentantent, and they will be forgiven for their misgiven, misbegotten, and ill minded ways, once they begin sexaling with the rest of us, and participating in our religious, economic, and social revolution, and once they begin following Gurkian laws, rules, ethics, the codes and norms of behavior, and our righteous, and correct morals, acting and exerting one's efforts for the sake of others, never sparing a moment of energies, wastefully on trivial and trite activities of gossipping, mischiefing, or other harmful, and potentially ruinous, wicked, and evil behavior.

Lesbianists With Non Repenentant Attitudes Who Will Not Surrender

Those who will not surrender, we will send to my Epcot Center, as that is the only way we can get them out of the picture, temporairily, so that we can then get things in order, before they return, once again, as tummy babies, into the lives of tummy mommies, and tummy daddies.

Orders To Kill All Presdential Candidates, Etc.

You are hereby authorized by me, GOD, John Francis Ayres, to kill all United States Presdential candidates, including but not limited to, Barack Obama, Hillary Clinton, and Mitt Romney. They are to be executed on sight. Also, you are ordered to kill all non repentent Lesbianists, such as, Vice President Dick Cheney, Tony Blair, Butros Gauley, Oliver North, Colin Powell, Oliver Poindexter, Casper Willard Weinberger, United States Supreme Court Chief Justice John Roberts, Associate Justices, John Paul Stevens, Anthony Kennedy, David Souter, Clarence Thomas, Ruth Bader Ginsburg, Stephen Breyer, Samuel Alito, Antonin Gregory Scalia, Arnold Swarzneggar, Sylvestor Stallone, Robert Deniro, Gary Busey, Kevin Sorbo, Timothy Dalton, Michael Jackson, Matt Damon, Bruce Willis, Mila Jovovich, Peter Jennings, all members of the United States Congress who are Lesbianists, and all other Lesbianists, whether in politics or not, and in whatever government you find them, around the world. There are many Lesbianists in local and metropolitan police departments, and in SWAT Team units, and in fire departments, and in the National Guard units throughout the United States, and Lesbianists own every news media organization, television corporation, cable television corporation, satelite television corporation, major radio station, transportation corporation, chemicals corporation, petroleum corporation, coal mining corporation, as well as every other major corporation around the world. You are to kill every last one of them, and spare no one. We will then destroy every underground city they are hiding in, and force them to surrender. If not, we will kill them all, and I authorize you to do exactly that, kill every last one of them, all thirteen billion plus Lesbianists, hiding under the surface of our planet, or out walking about, pretending to be an ordinary citizen on this planet. Nothing is further from the truth, and you are authorized to kill each and every one of them, and send them all to my Epcot Center, using what ever means available, including my tactical, powerful, home made radiological explosives bombs, i.e., nuclear explosives. Please study my notes on my web site for further details regarding radiological fracturable rocks, and my notes on how to make an explosive weapon to detonate nuclear materials, you can find along beach shorelines, in sediments deposits, and on old mountains, every where on our planet, if you have a geiger counter.

New Coins Ready And Are The Ever Useful To Us!

http://money.aol.com/news/articles/_a/new-dollar-coins-enter-circulation-this/20070211095409990001?ncid=NWS00010000000001

"Updated:2007-02-11 15:20:31"
"New Dollar Coins Enter Circulation This Week"
"By WILL LESTER"

"AP"
"WASHINGTON (Feb. 11) - Maybe Susan B. Anthony and Sacagawea should not take public rejection personally. It's not easy overcoming people's indifference to dollar coins, even those honoring such historic figures."

See also,

http://news.yahoo.com/s/ap/20070211/ap_on_bi_ge/money_ap_poll

The new coins reportedly have many fracturable rocks in them, as the metals used, were mined from deposits of minerals that contain large amounts of fracturable rocks.

They also have high heats and high temperatures burning minerals in them, that will level up your thermal temperatures to near solar temperatures, if grinded up and mixed in, and allowed to ferment, in sour berry juices, slowly, with tiny amounts of salt, and large amounts of raw sugar.

The high heat temperatures, and the energies produced at these higher heat levels, will reach near solar heats energies temperatures, and that is very important for developing the energies needed to wake up every body, in the fracturable rocks - or 'fissile' materials, in Lesbianists' speak, or Lesbianists' mumbo jumbo language - to get them to begin making children and families.

Please see my notes on 'Radiological' crystals cages salts kiddies, and other related energical animals kiddies, of various, and hard to imagine, types, unless you're a kid and unless you have the mental flexibilities and typical mental gymnastics capabilities of a normal child, unhindered by brainwashed thinking and brainwashed patterns of thought the Lesbianists have caged, and closeted in the dark, our brains with.

Public Nudity And Public Sexaling

Public nudity and public sexaling is now a way of life for all, in our, now, Gurkian Age of Enlightenment. We will begin broadcasting live sexaling events, and other entertaining and informational, educational programming,, as soon as I get my new quarters, a unit to live in, where I can eat more properly, sleep more properly, recieve the medical health aides and regroverative formulas, that I need, and where I can practice my religious ceremonies, with others, daily.

The public broadcasting of various informational programing, educational programing, sexaling entertainment programing, sexical, hygenical i.e., sexaling hygene, and sexical educational programing as well as sexical training programing, as well as my religious ceremonial sexaling activities, and my general, more typical day to day, religious ceremonialing, for now, until I get my health up to a level of youthful vigor, and robust wellness, as I religiously interact with my students, and train them, the disciple priestesses,

and disciple priests, will all help to set the basis of normative, and expected, social behavior, for all people in our universe, to learn about, now in our Gurkian Age of Enlightenment, so that we can all get along, with one primary set of customs and standard of behavior, and with one primary language for communication, as we will all be sexaling with each other - all of my children who are now just begining to get with the program, at least, anyway, will be sexaling with each other - from now on, and for all eternity.

We need this exposure, as well as alternative programing, for laundering up to, and for begining to expose ourselves to, and learn about, the reality of the universe, my universe, that we live in.

Laundering up to, means, exposing ourselves to the mischievous antics of the Lesbianists, to launder their filthy, garbagical, and tormentuous ways, so that all may learn about them.

This will be coming up, in the near future, possibly, as far as I can determine, any way, after we have the spilling of the sexaling fluids campaign under way for purifying the area where I will be setting up my religious ministry, on the parcel of land, on the north west corner of the intersection at West Tropicana Ave. and South Decature Blud., Las Vegas, Nevada, and possibly on confiscated properties to the north, as well as to the west, for now. This is a public service, informational bulletin, on what you are to expect, in the near future. Prepare yourselves, accordingly.

What Does The New Moralicity Mean, In Plain Language?

Our new moralicity means we are going to learn we can and should sexal with every person, and even with animals, when we have a chance or opportunity to sexal with people and animals, and that we can and should sexal with every person we see, so long as we have a mutual reciprocical understanding of the truth to sexaling, that it is a pure, blessed, and holy act, GOD, me, made possible, to purify you of your blemishes. It is the most significant and powerful way to purify you of your blemishes and karma

You can also clearify your blemishes, your karmic markups, by praying Nam Myeo Ho Ren Ge Kyeo, and by your keeping syncopated and in rythm with my children, helping my children to work smoothly, syncopated and in rythm with each other, perfectly fluxed, meshed perfectly with all my other children, working at different life spins, as I've mentioned about, as my kids will reward you by sprinkling faerie dusts, purifying energies, and other types of related, purifying things and dings, all over you, as a reward for your cooperation in keeping my universe, humming, and running, smoothly.

With your syncopated rythms, your syncopated pace of movement, and actions, as you time your motions, and stay in synch with one thirty seventh on the metronome, plus one fith of a mark on the metronome we currently have available to us, here, on our planet, during your

activitiating, sexaling, playing sports, dancing, excercising, and so forth, you will purify your life, and you will purify the lives of those around you, with your actions, as you get rewarded by my children.

Our new moralicity means we can and should sexal with each and every person possible, in free association with each other, no matter what the age of the person, and no matter what the gender of the person, no matter what the tribal background is, no matter what the tribal heritage is, any place no matter where we are, any time no matter what the time of day or the time of night it is, in public spaces or in private living spaces any and all places, no matter who else is around us, as sexaling is a blessed act that my kids reward you for, any time, every time, no matter where you are sexaling, and no matter with who you are sexaling with, or even no matter what type of animal you are sexaling with.

It means there are no bullshit, propagandists' Lesbianists dreamed up taboos, any longer, regarding sexaling, and that sexaling is a blessed act, and not a 'forbidden' act, as the bullshit Lesbianistic Christians, Muslims, and other religious 'pious' bullshit assholes, who would want us to believe that sexaling is forbidden by 'God', which is complete and total bullshit, and a lie, as they base them selfs on their 'holier than thou' pious 'ignorance' of the truth.

So long as you and the person or persons you are with are equally, mutually, and reciprocally interested in purifying your lifes, and interested in clearifying your karmic markups, and interested in helping my children work in synch with each other, and interested in helping to push my children along, with your energies, and efforts, and so long as you can sexal together with one and each other, without damaging either or any of the participants, it is morally correct behavior, and any person or actions to prevent that morally correct behavior must be condemned, and punished.

Some people, especially young participants, do not have butt holes, mouthal holes, or vaginal holes that are large enough to swallow a dick, or mouthal holes that are large enough to swallow a tittie and suckle it fully, without straining.

You need to spend several hours phlooching out the butt hole, or phlooching out the mouthal hole and throat, and phlooching out the vaginal hole, with generous massage over several hours to the muscles and tendons in the neck, mouth, nose, eye ridges, ears, throat, face, chest, tummy, back, arms, hands, fingers, shoulders, titties, thighs, hips, waist, groinal area, labial folds, vaginal lips, facial lips, male genitals, and the entire torso, back and front, the legs and feet, ankles, and toes, as well, and all parts and areas from head to toes and in between, with continued efforts to massage all these places, until the body begins to respond, and until the body responds fully.

The butthole will loosen up, and the throat hole will loosen, and the mouthal hole will widen, and the vaginal cavity and vaginal mouth will widen and expand in size, and the groin in girls will spread apart, allowing for more room for access to the vagina, and for smoother access to the butthole, as the hips loosen up, and begin to spread apart in response to your efforts at massaging the body, to prepare it for sexaling.

No matter how old a girl is, and in the case of a boy, no matter how old the boy is, baby, child, adolescent, or adult, phlooching out the sexaling orifices, is easy, if you spend the needed time on preparatory and thorough massage, sufficiently enough.

That's how I designed your bodies to respond to massage efforts to loosen up the muscles, ligaments, sinews, cartiladges, so as to allow the bones of the body to move and spread apart, freely, and loosenly. Your body is like a rubber band, and if you massage it, well enough, it will begin to respond like a rubber band, and it will loosen up, and spread apart, where it needs to spread apart, so as to allow you to sexal, thoroughly, and continually, for as long as you continue your sexaling activities.

After you finish your sexaling activities, your body will begin to stiffen up, as all the ligaments, sinews, cartiladges, muscles, and fiberous threads throughout your body, begin to tighten up, for returning to daily life, working activities, where you need a hard, and tough body, to survive, as you work in the field, or work in the rice paddies, or work on the farms, to labor for producing crops for feeding you, your families, your children, relatives, tribal village friends and tribal villages neigbors, who are, or who used to be, traditionally, as life used to evolve for us, all related to all of those concerned in the area, or on the planet, for that matter, or in the entire galaxy, or spread out over many galaxies, and even spread out over even larger, and wider areas of my universe in the large, familiies that used to be the norm.

You may need to spend several hours, or even several days, or maybe even longer, a number of weeks, or even a number of months, before the body will begin to respond, and begin to flex, and bend, to help all the ligaments, sinews, cartiladges, tendons, muscles, and all the body parts, and supporting, interwoven parts of your bodies, as I've briefly talked about, before, as well as all the lubing stations, that will eject fluids to assist in the loosening up of your bodies' ligaments, sinews, cartiladges, tendons, muscles, and even the bones, to allow them to be more flexible, including the jaw bones, facial bones, neck bones, spinal bones, leg bones, thigh bones, hips bones, pelvic bones, buttal bones, groinal bones, back bones, and all the bones of the body. Every bone in your body will loosen up, and become more flexible, and pliant, durile, durable and tensilely strong, as you massage all the parts of your body, and the bodies of the people you are sexaling with, very young, young, adolescent, adult, middle aged, elderly, and even the ancient, or the extremely very old.

This is the truth to this matter, and you can find out for your selves, if you try and see how your bodies respond, to daily, rigorous, continued massage, over various lengths or periods of time.

This is part of the ancient and old art of sexaling, as I taught in my religious teachings, in every religion that I taught, and I have taught a lot of religions in my time, to lots of different peoples in my universe, from the begining of our time, here, together, in our universe, after we arrived, which I've talked a little about, before.

Sexaling Is An Absolute 'Good' And An Aboslute 'Right'

Even the veryest oldest and the veryest youngest have a right, duty, and obligation to sexal and produce holy, sacred, sanctifying, i.e., to make sacred, holy, and pure, harmonious, purifying energies.

It is an 'A B S O L U T E' RIGHT as in, a 'right' to free speech.

It is also an 'A B S O L U T E' RIGHT as in, 'this is right, correct, upstanding, laudable, commendable, proven to be always right, correct, true, holy, graceful or GODlYNESS and GOODLYNESS gracefilled, morally right, morally correct, morally absolutely right, and morally absolutely correct', as opposed to, right and wrong, i.e., as in the opposite of wrong, as in, that is wrong, that is incorrect, evil, hateful, sinful, morally inaccurate, morally wrong, morally defunct, undoable as it will not stand, and useless,'.

It is also an 'A B S O L U T E' GOOD and an 'A B S O L U T E' GOODNESS.

Free Action Sexaling

Anything that counters, or runs contrary to this, is an 'A B S O L U T E' WRONG, and an 'A B S O L U T E' EVIL. It is absolutely wrongful to deny or to prohibit or to interfere with, in any way, with any one who wishes to sexal, as THAT PERSON IS CLEANING UP MY UNIVERSE WITH HIS DICK, OR WITH HER VAGINA, BUTT, AND TITTIES, AND WITH HIS PURIFYING ENERGIES, OR WITH HER PURIFYING ENERGIES! DO YOU UNDERSTAND THAT?

Any body who even attempts to impede, to deny, to prevent, or to interfere with, in any way at all, with a person's absolute right to sexal runs counter to Gurkian laws, regulations, codes, ethics, morals, standards, and you will serve jail or prison time, for prohibiting, or interfering, or impeding, or violating in any way, a person's absolute right to free action sexaling, which is, the act of freely chooseing who one wishes to sexal with. DO YOU UNDERSTAND THAT, SOLDIER? GOOD! BECAUSE A "NO SIR!" WOULD BE INAPPROPRITATE AND UNACCEPTABLE!

To learn more on these subjects, swear in, and become a citizen of our country, and begin studying, and working in the many programs my children have for you to study and work in, to score earning points, and to earn a living in our new, Gurkian Age of Enligtenment, where

and now that we work, and we pay as we go.

Those who refuse to work, in time, will be required to work, to pay off their debts and to pay off the fees that are owed for the use of my resources, all the molecules in my universe, and all the resources, energical, or otherwise.

Even though I am GOD, in our new system of working in my Gurkian Age of Enlightenment, even I have to pay for the resources that I use, as I work as chief priest of my religion, spiritual director of my universe, and boss of my universe.

I'm the mother and father, the creator of all humans, animals, and living beings, as I've explained, every thing in my creation, and people will begin to understand that, that I am GOD, as they practice my religion, over the years, and over the aeons, and over the millenias.

The people who refuse to work, will be required to work in prisons, sexaling with animals, to produce sexaling energies that will restore the supplies of energies in our universe, as I've mentioned about, before, as they work and learn their new trade of animal husbandry, and animal wifery, in the animal habitry industry, as I've also mentioned about, in earlier notes.

No matter what the age of the person, every person can participate in our Gurkian Age Of Enlightenment, sexaling, dancing, excercising, and syncopating their movements, in rythm, to assist my kids as my kids, work to keep my universe, strong, durile, flexible, safe, and a nice place for every one to live in.

DO YOU UNDERSTAND THAT? YOU HAD BETTER, AS A "NO SIR!" WOULD BE UNACCEPTABLE, SOLDIER! DO YOU HEAR ME? I HOPE YOU DO! NOW, GET TO WORK AND SEXAL TILL YOU DROP, SOLDIER, AND I'M NOT JOKING!

We will build a nice and comfortable, safe place for every one to live, now, in my universe, and we will follow the Gurkian Age of Enlightenment Rules and Regulations, Codes, Morals, Ethics, and behavioral norms, that you are required to live by, now that we are going to become, one, very big, happy, harmonious, in synch, prospering family.

You will not forget to wash out your butty butt holes, and to flush out your vaginas, and your mouths, and to practice proper and health promoting sexaling and love making hygene, with the medical formulas that my children will be providing to you, and that you will pay for, out of your earnings, and they are very reasonably priced, now that I am making every thing available to every one, at a set, yet, flexible, and low cost for the use of my resources, once you citizenize your selfs, and swear in, as a citizen of our new, global, i.e., universal wide, one universe, family of GOD's, that's me, children.

The costs are flexible, in the sense that you do not have to pay, yet, as you will be learning about the ways to work, and you will be learing and preparing your selfs for a new working life, in my universe, for some time, and so we have no hurry to have you pay for the resources you use. We can collect the fees, and costs for resources, in the future, when you are a big money earner, once you learn your new work requirements, for sexaling for a living, as that is the only job opportunity open to every one, and the only job opportunity, that you have a choice about.

My working children, though they do have many different jobs, they have basically the same set up, or arrangements as you now will have, and so you will be joining my children, and you will be working, i.e., sexaling, excercising, aerobically dancing, and so forth, in synch, and in rythm, for me, just as all of my children are doing, at least, those of my children who are able to work, and who are bright and intelligent enough to work for me, to keep my universe, healthy, safe, solid, durile, strong, wholesome, and a nice place to live in.

That means, I have a lot of burnouts kids, and rampant, vagarous, dangerous children, who are not really very bright, and they do not work for me, yet, but they will, in time, regardless of the fact that they may at the present, be abominants kids, or not.

As I've mentioned, all my up until now, non working children, are abominants. What does that mean? It means, they do not give a darn about killing another person. They kill for selfish reasons, and for fun and games, and so forth, and you are all guilty of that, though you may not remember that you killed for fun and games, and for selfish reasons, in previous lifes, in my universe, but you all have, and you are all abominants, of varying degrees.

So, welcome to the Gurkian Age of Enlightenment, and welcome to my workforce.

Captain Off The Bridge.

315. aprspoint 4.2 released!

Newsgroup: rec.radio.amateur.equipment
Date: 2007-02-16 16:35:45 UTC
From: "hxc98@yahoo.com" <hxc98@yahoo.com>
Message-ID: <1171643745.857790.287830@l53g2000cwa.googlegroups.com>
Source record: 5735

APRSPoint 4.2 is uploaded,

1. This new version has improved tracking support by adding separate track lists for stations to be tracked over either RF or TCP link.

2.It also added a new reject field in the filter dialog, where you can specify a list of stations to filter out using multiple strings that can contain wild card characters.

3. It allows you to selectively remove stations from the tree view list. This combined with improved filter operation, enables you to dynamically adjust what gets displayed on the map.

Please visit http://www.aprspoint.com for details and download.

Thanks, Michael KF6ZDM

325. Best under $1000 rig on receive?

Newsgroup: rec.radio.amateur.equipment
Date: 2007-02-21 21:42:13 UTC
From: gil <gi1pi@yahoo.com>
Message-ID: <1172094133.423756.160830@q2g2000cwa.googlegroups.com>
Source record: 5745

Im looking for an all around rig with good receive on AM shortwave,
SSB and CW capabilities for under $1000. I had an Icom 718 a couple of
years ago and must say it had a very good all around receiver and I
thought it was a good rig for the money.
There are a couple of others like the TS-570DG and the FT-897 and was
wondering if I can get opinions on this subject.

Thanks....Gil

HURRY...you only have a few hours left before the Techs invade 10-meters!
Remember, you said you were going to sell all of your gear and get out of
the hobby if CW was ever removed from the test(s) because ham radio will be
the same as CB.

Hurry, sell/give away your stuff NOW !!!!

I for one welcome the Techs to 10M. You are probably too young to remember
that Amateurs once had 11M (now the CB Band) -- some say we lost it because
we didn't use it.

The same thing could happen if we don't use 10M (even at the bottom of the
solar cycle)

We need to encourage new folks and new licensee privileges to be welcome in
Amateur Radio. Your post doesn't help a bit.

330. IF Filters for IC-706MKIIG

Newsgroup: rec.radio.amateur.equipment
Date: 2007-02-22 22:49:47 UTC
From: Eric <reply.in.group@nospam.no>
Message-ID: <pan.2007.02.22.22.49.45.496642@nospam.no>
Source record: 5650

Man, HRO and Icom sure are proud of their IF filters for the IC-706MKIIG
... average more than $100 for each filter.

Anyone know where I can get a 500-Hz CW filter and a 1.9-MHz SSB filter
for something approaching a reasonable price?

Are there any third-party manufacturers that make replacement filters that
are compatible with the Icom gold-and-platinum ones?

331. ar3500 ebay relist ebay took it off again

332. Now that CW is gone there will be more ham to non-ham conflicts.

Newsgroup: rec.radio.amateur.equipment
Date: 2007-02-23 01:16:23 UTC
From: Retard Invasion <goodbye.H@m.radio>
Message-ID: <HfrDh.5510$JI.1186@newsread3.news.pas.earthlink.net>
Source record: 5652

The code hating losers were too stupid and lazy to learn and use CW,
they're also probably going to be too stupid and lazy to solve TVI
and interference problems with their neigbhors. There will be more
amateur to amateur and amateur to non-amateur conflicts. Hams will look
bad and the FCC will regulate the service more because of all the retards
we let have HF privledges. CQ Breaker, CQ Breaker.

Welcome to CB everybody.

You're in the wrong newsgroup, just like the posts about CW.

There is rec.radio.amateur.policy and rec.radio.amateur.misc to
ask in, and of course now there's yet a third newsgroup for this
stort of thing, rec.radio.amateur.misc

For most people, one newsgroup would be enough, but instead we
have not two but three.

ANd that's still not good enough, people have to come to the
"riff-raff" newsgroups to ask questions that belong in one
of those three newsgroups. Yet the rest of the hierarchy would
be in fine shape if they could just keep their junk contained in
those two or three newsgroups.

Thanks for the lecture, but no help on my question

As for "Yet the rest of the hierarchy would
> be in fine shape if they could just keep their junk contained in
> those two or three newsgroups."
YEAH BUT THEY DON"T

I am neither for or against a moderated NG, just wanted to know if it is up
and running? Thought I'd take a look and see what's there.

Have you refreshed your list of newsgroups from your news provider?
Depending on how your news reader works and how your news provider
handles things, you might have to download their complete list of
newsgroups. If it's still not there, you'll have to complain to your
news provider and tell them to add the newsgroup.

> Anyone using it ?

Yes; there's currently traffic in the group.

FS Icom IC-PW1 Amplifier
HF/50 MHz All Band Amplifier.
This amp needs power supply.
Was sent to Icom and everything is fine except power supply.
Serial Number is above 1400
You can add an external power supply. Or fix the one in it.
All other componets are fine,Just the power supply.complete with
Owner's Manual and Schematics of the RF section and all cables are
included as supplied from ICOM.
Have the original box and remote head.
Best offer or trade. Ready to sell. Nice condition.
Open to all types of trades. Or as I said make offer.
ritchi50@optonline.net

Hard to say without knowing more about your setup. I will say that
the HT1000, being part of the early 'Jedi' series portables, is very
picky indeed about how it's programmed. I can at least provide a short
checklist.

(1). Your computer should be "old and slow," preferably not faster
than a 486/100, and should be booted under true MS-DOS 6.22.

(2). DO NOT, if you value your radio's codeplug, attempt to read or
program it through the fake "DOS Window" provided by any late-issue
(Windows 98 and up) Windows system.

(3). Your RIB should be either a genuine Motorola RLN4008 series,
or one of the Sandy Ganz designs.

(4). Your programming cable should, again, be genuine Motorola, or
a third-party copy that has been tested with another radio and known to
work. Many of the so-called "RIBless" cables on Greed-bay are nothing
that I would ever trust to program anything important to me.

Those are the basics. See http://www.batlabs.com for more handy
hints, programming cable diagrams, etc.

If you get frustrated to the point that you want a second opinion,
I can program and test your portable at my normal rates. See
http://www.bluefeathertech.com/rf.html for details.

Happy tweaking.

Really nice, Jack. Did you use the Ranger audio system to
drive the 813s?

Such a project is never really "finished", because there are
always new ideas and parts to be tried out.

I cannot confirm this. Maybe someone else can. But leaving the rig
on while in the drop in charger isn't beneficial to the operation of
the rig, is it? I've the VX2R and somewhere it mentions in charging
proceedure that the set should stay off until charge is complete. The
charger is just that, a charger, not a power supply. It could just be
the radio freaking out. Just my thoughts, I could be wrong.

Roger. I started a thread earlier on using 813's as triodes and it was like falling off a log. The modulator consists of a very small chassis with a fil trans, tube sockets and a meter. This sits next to the mod iron on a wood deck. I like the idea of the mod iron isolated from ground.

> Such a project is never really "finished", because there are
> always new ideas and parts to be tried out.

Roger again. I want to eliminate the Ranger for one thing starting with the audio. I bought a 4W audio pre-amp and when I get tired of playing with the new rig I want to see if this will drive the 813's. I need some ideas on interfacing the two... some sort of interstage audio transformer I suppose.

Then, a simple xtal controlled exciter would be fun.

No end is there?

Let's honor it for its historic value and the impact it had on our ancestors.
It was the world information highway for many many decades.
Let's keep the tradition as Amateur Radio operators do to this very day and will continue to do so for many years to come.

Before you bash the code, read URL:
http://www.unesco.org/courier/1999_08/uk/connex/txt1.htm

You don't have to learn it or like it or even pass an Amateur Radio exam requiring it, but all reasonable persons should respect it.

Your WWII Fathers and Grandfathers certainly did. As well as your WWI and Civil War ancestors. The passengers on the Titanic would have appreciated Maritime Laws concerning its mandatory use at sea.

And what does this have to do with amateur radio equipment?

There are now three newsgroups for this kind of stuff, .policy .misc
and .moderated

Keep it in those ones.

This is just more proof that the problem wasn't just with the obvious
posters, who spew the newsgroups with their corss-posted junk. People
who should know better aren't keeping it contained either.

Don't forget, this newsgroup, rec.radio.amateur.equipment is for
discussing amateur radio equipment. It's not for discussing other
things and it's not for buying and selling said amateur radio equipment.

Bjoern -

Well you have the schematic. Do you think someone changed (replaced) the
microphone pre-amp in the base of the microphone?

My club, the Roseland (NJ) ARC, has the original Yaesu FT-1000 as our HF station. Recently, the autotuner will not find a satisfactory SWR, and a suggestion was made to perform a reset. We do not have the technical manual for this rig, so if anyone identify the keys to hold on power-up to do a reset, it would be appreciated.

Processor reset: hold SUB and ENT then hit the power switch. That
will also clear all memories.

I asked about "good" receivers for broadcast radio a while back, and the GE Super Radio was highly recommended here and elsewhere. So, I got one for Christmas and it does seem to be good at pulling in and separating many stations. Thank you. However, there is one annoying problem: The indicator on the dial is "offset" by some distance. Since the printed frequency scale is non-linear, one can not simply remember a simple rule like "Station plus 500 kHz". The manual that came with the radio doesn't say anything, really; it's very short.

So, any ideas?

Dial inaccuracy is usually caused by poor tracking of the oscillator. Is the problem evident on both AM and FM? If so, both oscillators will have to be adjusted.
To set the oscillators, locate a moderate strength station towards the low end of the dial and then set the tuning dial to the setting that corresponds to the frequency of the station. Then slowly tune the oscillator coil until the station comes in strongly.
Do the same with a station near the high end of the dial, and adjust the oscillator trimmer capacitor.
Repeat until the dial tracks accurately.
You might have to tweak the RF stages, but the IF should be OK without adjustment. Adjust the coils on the low end, the trimmer caps on the high end.

If you're not handy with electronic equipment, it might be best if you let a friend who is handy do it for you.

Put a piece of markable tape under the actual dial, and then put markings
for the stations you regularly listen to.

Or if you are actually listening to distant stations (which may not
reliably be there) start working on calibrating that new "dial". Wait for
a station to ID, then look it up, and you'll find it's actual frequency. So
that takes out yet another point on the dial. Do this enough times, and
you'll have it all right.

This applies to a lot of radios, whether or not they have a serious problem.
A lot of low end analog radios have big spaces between the calibration marks,
so the dial isn't particularly helpful. But marking it as you desire (or
with that tape), you can tune to a given frequency so much faster. It's
easier to tune that boombox I have by looking at my bit of tape than trying
to read the original dial.

Has anyone attempted repair of said YIG Ocsillator sealed assembly ("A6")?
in the HP 8558B Spectrum Analyser? If so, were you successful?

My copy is putting out -32dbm (spec is +15dbm); otherwise seems fine: sweeps
OK, freq is right on, etc.

I suspect the 3 transistor amplifier inside the sealed assy.

Any suggestions?

These are sealed, and even if you could open them,
you don't have the tools or parts to repair. Check
the power supplies and contacts on the bias board,
but this is a common failure mode (blown power amp).

The simplicity and directness of this approach has a certain appeal,
aesthetically displeasing though it may be.

Does the tuning procedure described upthread improve reception? I.e.,
do I give up any of the capability of my superradio by leaving it as is
and using a masking tape scale?

Source record: 5637

For Sale: Demo MFJ-403P Travel-Keyer in MINT condx. It's a full-featured CW keyer with a built-in Iambic paddle. Ultra-compact size perfect for traveling or for home use with QRP or "big" rigs. Thumb wheel control lets you adjust speed on-the-fly; 3 to 65 words-per-minute. Dot-dash weight is adjustable 25% to 75% . Sidetone w/ speaker. You can select fully automatic Iambic or semi-auto "bug" mode. Reverse paddle. RF proof. Positive keying output. Battery saver. Specifications: Voltage requirements: internal 9-volt transistor battery. Keyer speed: Typically 5 to 60 WPM. Sidetone level: 50-mW max., adjustable internal trimpot. Sidetone frequency: 727 Hz default, adjustable 300 to 1000 Hz. Keying limits: positive keying, 50 volts at 100 mA max. CW generation: Iambic A or B, Automatic or Semi-automatic. Memory: dot-dash memory. Weight: 50% default, adjustable 25 to 75 percent.

Photo is available at QTH.com. We can accept Visa, Mastercard and Paypal.

$80 new. My price ONLY $49.95 plus $5.95 shipping. First e-mail gets it! 73, Bill - WA8MEA - http://HamRadioFun.com

This is a unopened kit from RF Electronics, Maker of solid state amplifiers.Paid $50 asking $35 plus shipping.

Filter Specifications:

Cutoff frquencies: 2, 4, 7.3, 14.4, 30 Mhz

Operating range: 1.6-30 Mhz (for freqs. between bands select the next higher filter)

Band switching: 6 position rotary switch with bypass

Design type: low pass Pi 7 pole Chebyshev

3rd harmonic attentuation: 64dB+

5th harmonic attentuation: 83dB+

Maximum RF power: 1KW SSB, 1KW CW (50% duty cycle)

Impedance: 50 ohm

RF connection: SO-239

Dimensions: 3"H x 8"W x 6"D

Weight: 3 lbs.

```

No, if the procedure is done correctly and thoroughly, the performance should not be affected unless by virtue of component tolerance build-up, one of the tuned circuits just doesn't have the range it's supposed to have. The procedure given in the manual is pretty standard alignment technique for a superhet radio. Nothing unusual about it. If you have a signal generator that is pretty accurate on the frequency setting, the whole procedure shouldn't take more than ten minutes, including the time to open the radio. The signal generator will make the alignment possible even if there are no stations to use for alignment.

Another thought occurred to me... how is the dial pointer arranged in the radio? If it's on a string, like radios of days gone by, just move the location of the pointer on the string so its position agrees with the station frequencies. That would eliminate the need to realign the radio.
Cheers!!

434. Puyallup hamfest report

Newsgroup: rec.radio.amateur.equipment
Date: 2007-03-12 18:52:14 UTC
From: Ken Finney <kenneth.c.finney@boeing.com>
Message-ID: <JEt0F2.8vv@news.boeing.com>
Source record: 5554
Cross-posted to: rec.radio.amateur.equipment,rec.video.satellite.tvro

The Puyallup hamfest was this past weekend (biggest hamfest in Washington State). For the second year in a row, it seemed about the same size as the year before. In previous years, it was shrinking about 20% a year or more. Lots of boat anchors and other stuff that is expensive to ship, the lighter stuff seems to all be going to Ebay. Impressions:

1. There is only one store in attendance (HRO), and they were doing a lot of business. Other stores should consider coming as well. I guess the last "local" ham store has gone under, they weren't there.

2. A couple of ham related from previous years organizations weren't there.

3. Most of the heavy smokers from 20 years ago, who were pushing their oxygen carts around 10 years ago, aren't there anymore.

4. A lot of people were looking for newer stuff. Some "new technology" vendors could make a killing. The first that comes to my mind is MPEG FTA satellite TV. If someone had set up a demo outside, when would have been sold out. There needed to be seminars like there was in the past. ICOM is local, and while they had their normal nice booth, should have a D-Star traveling road show.

5. The crowd lines up about an hour before the opening, the line winds back and forth, and when the doors open, there is a mad rush from different parts of the line. They really need to set up "velvet ropes" to organize the line; one person saying "please stay in line" doesn't cut it.

6. The snack bar needs to improve. People are often travelling several hours to attend and probably leaving early because they are hungry. They probably should be selling coffee and doughnuts to the people in line before the opening.

7. The "talkin" repeater was pretty quiet. I think this is a bad sign for future growth in ham radio.

I always enjoyed the Puyallup hamfest when we lived in Spokane.

It's hard to read the future of ham radio. I think it depends greatly
on how a community works to develop the hobby. Where I live in
northern Arizona, we have a lot of growth. We have been testing from
5 to 15 applicants at each VE session, and we have three sessions just
this month alone! And not just technicians. At our test session last
Friday we passed 3 new generals and 2 new extra class. Also our local
ham radio club is bigger than ever.

Much of this is due to very effective local training, frequent
demonstrations at places like art fairs, good leadership at our radio
club, and a very active ARES/RACES emergency communcation group. On
the other hand, I have also lived in communities that don't have these
things, and the ham population is stagnating or even decreasing. If
you want the hobby to grow, it takes work and dedication, but it is
still possible.

Dick - W6CCD

Speaking as a long-term buyer/vendor there, I would like to offer
some observations of my own.

> 1. There is only one store in attendance (HRO), and they were doing a lot
> of business. Other stores should consider coming as well. I guess the last
> "local" ham store has gone under, they weren't there.

Regrettable, but true. The fellow who owned the place was running
it out of Bremerton for a while, and then finally retired.

> 2. A couple of ham related from previous years organizations weren't there.

??? Did you check upstairs? Seems like all the club tables were up
there.

> 3. Most of the heavy smokers from 20 years ago, who were pushing their
> oxygen carts around 10 years ago, aren't there anymore.

Also ??? I don't ever recall seeing more than 1 or 2 folks with
portable oxygen in the 12 years I've been attending the thing.

> 4. A lot of people were looking for newer stuff. Some "new technology"
> vendors could make a killing. The first that comes to my mind is MPEG FTA

> sold out. There needed to be seminars like there was in the past. ICOM is
> local, and while they had their normal nice booth, should have a D-Star
> traveling road show.

Agreed. Icom didn't seem to be doing nearly as much with their
booth as last year. Only two people staffing it, too.

HOWEVER -- The downside to this trend is that it feels like the art
of tinkering is struggling for life. I had a pair of serial data
analyzers on display, and I got several questions about "What OS they
were running," and more than one assumption that they were simply odd-
looking computers.

That would not have happened, say, ten years back. Anyone skilled
enough to know about such gear would have recognized them for what they

were.

There are other signs. Boxes of parts that normally spark much
digging and probing barely rated a glance, and I saw a lot of sellers
going home with much of what they brought. Even I found myself (finally)
giving stuff away that would have easily sold, for at least a minimal
amount, some years ago.

Did you suggest this to the Mike & Key club staff? The best
suggestions on the planet (and I think this is a good one) won't ever
get a tryout if you keep it to yourself.

> 6. The snack bar needs to improve...

Essence, no argument there! $3.75 for a questionable hot dog? $2.75
for a bottled drink?!

FWIW, this has always been a sore point for the event.

> 7. The "talkin" repeater was pretty quiet. I think this is a bad sign for
> future growth in ham radio.

I'm surprised you would make such a broad assumption from so little
evidence. The talk-in channel was very active early Saturday morning, at
the crack of dawn. I would also point out that the Puyallup swap has
become well known enough that many folks already know where it is.

Also, a clear map is provided on the flyer. Most of the hamateurs
I've met are pretty good at basic navigation.

I will say this much. I've noticed that the overall quality of the
Puyallup event, in terms of quantity and quality of stuff, tends to run
in three-year cycles (first year phenomenal, second year good, third
year mediocre), and 2007 was at the bottom end of one of these cycles.

With that said -- It wasn't actually as bad as the one in 2004
(which was another bottom-of-cycle event). In fact, this one reminded me
more of the mid-cycle swaps.

If the cycle continues to run true-to-form, 2008 should be amazing.

In conclusion, I would add that amateur radio is like a mirror. You
get back exactly what you put into it. If you truly care about the
hobby, do whatever you can to help it grow. Teach a license class,
volunteer at a club demo booth, participate in an event that's using
amateur radio for communications, etc.

Keep the peace(es).

> Tks JCB, N9JB

The biggest issue with LEDs is the dispersion angle -- even the wide-angle types are pretty narrow for backlighting a display. A friend who runs the service department for a commercial sound company says to grind/file off the lens of the LED(s) you intend to use.

What kills the lifetime of incandescent lamps is inrush current. If you stay with that type, you could use a constant-current regulator (an LM317 configured as a current regulator comes to mind). You may need to use lower-voltage lamps, to offset the regulator's 1.2V drop.

I have this Courir PA (with 2 ea. 811A) but need info about how to repair
the broken tuning wire
or tuning string to be able to read the scale on the frontpannel that shows
the position on the PA-coil.
Hope this info can be scanned and sent over, or is the manual available
somewhere?

Micheal

You have a good memory. MHZ Electronics was dumping
5.9XX USB, LSB and CW filters in full page ads in Ham
Radio Magazine back in the late 70s or so if my memory
holds. I remember buying several of each for future projects
that never have materialized.

Pete

The best hamfest I ever attended was at the Charles Wright Academy in Tacoma. They let the sellers unload right outside the door, had free coffee and doughnuts for the sellers when they showed up and all morning long. They might have even fed them lunch, too. The sellers were in such a good mood/sugar high that the deals were really good.

I should have elaborated more. In the past, I've heard a lot more out-of-towners/first-timers on the talk-in repeater, which I tend to think of (perhaps wrongly) as new blood (or maybe potential new-blood). When the talk is more of "Hi Charlie." "Hi Mel." "Gonna be 15 years in a row for me." "Ten for me." "Ok, see you there." it makes me think of "preaching to the choir".

You are doing it correctly. Hold the PTT and press the DTMF buttons.
I have right beside me an Icom IC-28H using that mike, which should be
wired exactly like the IC-48A at the microphone jack. Could be
something wrong with the HM-14.

I'm interested in getting into HF PSK-31 and RTTY. And maybe I'll try some of the other sound card based modes too. Comes the question of how I should configure the dedicated ham station Winbox. Is there anything to be gained by spending money on say some Creative Labs or Turtle Beach sound card or another or are the usual generic motherboard "sound cards" good enough . . ?

Thanks,

Brian w3rv

Kelly:

The quality of your sound card beyond a SoundBlaster 16 is wasted.
The effort is better spent in a better quality audio interface between
the radio and the PC. The transmit and receive audio MUST be
transformer isolated for best results. I also like to keep D.C. off of
the transformer windings by using a .1 uf series capacitor. Your PC is
ground referenced to the A.C. main electrical system and your radio is
ground referenced to something else. Use a lot of ferrite beads to keep
the RF out of the audio and the use of transformer coupling cleans up
the rest.

If the card or on-board system is "SoundBlaster Compatible," and made within the last 5 or 6 years, it should be OK. I have used PSK with many computers and cards and have never had one that didn't work because of the sound card. Put your money toward a good interface. It's hard to beat the RigBlaster line. I have never used one, but I have heard good reports about the the MFJ interfaces.

Want to buy a manual for the AZDEN PCS4000 2 meter transceiver.
For some reason I cant retain the stored freqcys even though
I substituted the original tiny 3 volt battery thats supposed
to keep the memory channels alive. I brought out the leads
(after severing the old battery) so can substitute nicads
or LION rechargeables externally but still cant figure out
why it will only hold the memories for maybe 1 or 2 days.

Did you try measuring the current drain on the battery?
Some of this old stuff was designed to be plugged into power all the time.

Hello,

can someone please send me a digital picture of the kenwood TS-940S
power amplifier board (the one under the rear cover on the left when
looking at the rear of the rig. I have one which seems very abused
and I don't see any diode in thermal contact with finals and drivers
so I was wondering if they have been removed perhaps.
The email address is valid of course.

Thanks in advance

Francesco IS0FKQ

Well I could'nt imagine that the On/Off switch must remain on all the
time. If it was in a Vehicle instead of in my ham shack who would
want to leave the darned rig on all the time. I use it in the
home shack, and all I did was substitute the tiny 3 v (rechargeable)
cell and gring the +/- leads out so could use Lithium Ion or other
longer lasting rechargeables. You gave me an idea however so will
crank in 5 freqs and leave it on for a few days to see what hapens.

Read it again. Plugged into power is not the same as having the on/off
switch on all the time.

FWIW, a typical car radio these days draws about 1/4 amp when the power
is off. Vendors will deny it, but get out your meter and measure the
current thru the power wire when the radio is off.
There's a second wire that keeps the memory alive when your
ignition switch cuts the main power. Learned this the hard way
when I hard-wired a modern car radio into a motorhome. Battery
went flat in a hurry.

Dear All,

My kenwood TL922 has developed a strange fault. When I switch it on (via an Ameritron Soft Start module) I get a negative reading on the Ig meter of -50mA and a positive reading of around +100mA on the Ip meter with no key down.

Keying the amp has no effect and the relay does not energise. I have checked the ALC and relay connectors and the coaxial cables

I've tried starting it directly bypassing the soft start box and this has made no difference. Obviously I do not leave it on for more than a few seconds as there is clearly a fault. I have had the covers off and can see nothing untoward in terms of burnt components and there is no burning smell and the fuses don't blow. Also both valves (3-500zs) light up.

Any suggestions as to what may be up before a trip over to Castle, has anyone else seen similar

thanks

Jim G7NKS

Easy diagnosis: one of the two 3-500Z tubes has developed an internal grid-to-filament short (quite a common fault).

The short causes the tube filament to effectively stay at ground potential even during stand-by, and that is the reason why the tube conducts and the plate meter then shows some idling current.

The grid shows negative current because, due to the short, the positive DC voltage applied to the filament to keep the tubes interdict during stand.by founds a path to ground through the grid.

WARNING: you are running the risk to blow the service transformer (T2). This is a Kenwood design fault: when a grid-to-filament short occurs, the 80 Volt generated by T2 is shorted to ground. DO NOT SWITCH THE AMPLIFIER ON AGAIN until you have replaced the faulty tube.

Jim, I agree with Antonio's diagnosis of a shorted tube. However, you can also post at http://groups.yahoo.com/group/ham_amplifiers/

The Yahoo amps board is a good place to ask for info about improvement mods for the TL 922.

Dloyd

I'd also recommend the amps reflector. There are a lot of very
knowledgeable people on there.

Taking a quick look at the schematic I'd guess the control-voltage power supply, also used in the bias circuits, isn't working.

It would be interesting to measure the voltage across the keying jack. ("RL CONT" on the schematic) My guess is it will be very low or zero. I'm not entirely sure what it *should* be but my guess would be on the order of 100 volts DC. (so be careful, it may be enough to give you a shock!)

If this voltage *is* very low or zero, I would be suspicious of D1 or C3. (or the transformer T2, but I hope not as the transformer will be difficult & probably expensive to replace...)

I *doubt* it has anything to do with the Soft Start module.

You have described the classic symptoms of the heater-grid short inside the 3-500 [at least one of them].

The heater is tungsten. Tungsten grows crystal 'whiskers' over time. It is well documented physics. These whiskers are thin as silk thread [or thinner]. In many instances they can be removed with a simple application of 110 VAC between the heater and the grid. Some people will charge a 10 uF capacitor to several hundred volts and discharge it into the grid/heater short circuit. This will 'cure' the 'whisker' issue [pop the fuze] in about 90% of the instances.

A second option exists. When you first power up the 922 don't panic over the current being drawn and jump to turn it off. Wait for 10 to 15 seconds to see if the filament heating and resultant thermal expansion will eliminate the short for you. [This is much less expensive than buying a matched pair of 3-500Z's]. I have been running my AL-80B with a transient [heating] grid/heater short for over a year. Once the transient state has returned the circuit to normal operation, the amplifier works 100% as designed. [BTW: I have a spare 3-500 that I will use if the short eventually becomes a 100% hard failure].

Hi Dave

Wouldn't the 15 second run burn out the filament supply transformer though?

I'm not aware of the 922 design details that contributes to the 'transformer' issue.

The normal filament current is about 14 amperes at 5 volts. The grid/filament short generally draws less than 100 ma of grid current and less than 300 ma of plate currnet. An abnormal current of less than 0.5 ampere is not a problem for the major floating secondary winding of a filament transformer.

The design of the bias circuit can be a totally different circumstance. In Ameritron amplifiers it is a self bias through a series of resistors and/or zeners. My Al-80B uses about -15 VDC as cutoff bias. In the 922 ... I have no data.

Restated, remove the tubes and 'pop the short' if there is a concern in the 922.

In the TL-922, the filament transformer would burn after a short while because on that same transformer there is another secondary (80 Volts) which gets nearly shorted to ground when a filament-to-grid short occurs in a tube.

Dear All,

Update:-

Had the case open and indeed 1 of the 3-500zs was showing a grid/fil short, however a little inadvertent rough handling cured this and when reassembled the amp worked fine for an hour or so. Then it was switched off for lunch and after lunch the problem had returned and this time is persisting despite removal of the valve. I haven't yet tried the mains blast across the pins as I'm not that confident!

good news is that the filament transformer seems fine and hasn't been apparently damaged by the few very short excursions into short territory.

A new valve will be ordered. May try the whisker zap if feeling brave at some point

Learnt a bit today, I now have better understanding of the innards. Interstingly the previous owner had done some but not all of the Measures mods, e.g. cathode and low Q VHF parasitic suppresors.

thanks for all the advice

You can use a charged cap to "blast" the short, might be less
dramatic than the unlimited current behind the mains.. This
sometimes vaporizes part of the grid structure and affects
tube operation..

Source record: 5512

Do any of you know the characteristics of the cigarette lighter adapter that is used with the Yaesu/Vertex VXA-700 2 meter and airband HT?

Does it just convey the 12 volts (or 13.8 volts or 14.2 volts or whatever it is at any moment in time) directly to the HT, or is there any kind of filter or voltage limiter that's internal to the adapter?

In other words, can I just feed 13.8 volts directly from a car battery to the HT to run it and charge the battery?

Looked on the Yaesu and Vertex Standard websites for information and couldn't find any reference at all to the VXA-700 ... wonder if it has been discontinued...

The first pre-production pcb has been built and put into service.
Pictures of this board are now available at
http://www.telstar-electronics.com/default_files/NewProductDevelopment.htm
Several other additional boards will be built and put in service
within the next two weeks. After this pre-production pilot... final
adjustments will be made to the pcb to allow for easier/better
manufacturing before the final pcb is released.

P.S. I may be looking for several radio techs in the next few months
that would agree to do some beta testing. Email me with your
qualifications to be considered. The beta units will be free of
charge... and I would only expect a detailed performance report in
return.

Real Compaq Pro Signa Server. THIS IS a oldly Pentium 75 running NT 4 Server.

I was told these vintage machines were good for a Linux reload and to run them for IRLP.

9 gb SCSI drive. 64 mb or ram.

The computer is on Long Island. I am willing to trade for something I can use.

Maybe a kick around 2 mtr HT. something I can throw in my back pocket.

Mike WB2GLW

499. TS-930s transmit problem

Newsgroup: rec.radio.amateur.equipment
Date: 2007-03-27 01:11:10 UTC
From: Tim <Tim@KQ8M>
Message-ID: <Oa_Nh.1867$QT2.402@fe188.usenetserver.com>
Source record: 5519

I have a TS-930s That has been in storage for 13 years. I fired it up and it receives fine. Everything seems in good shape except there is no RF output. In the tune mode the VC reads almost full scale where the IC reads low at about 1a. On CW there is no output and I get the same meter readings.

It has been so long since I have used the radio can anyone tell me what I am missing? Oh Yes, the carrier is all the way up. hi hi

I am getting real frustrated. I have been off the air the same amount of time the rig has been and really want to get back on. I can use an old 830 I have here but it's controls are so corroded I am going to have to go inside and attempt to clean them.

Any help would be appreciated. Many thanks,

Tim, KQ8M

Why do you sell a rf amplifier that covers "26-30MHz Coverage"
It sounds like you are selling a CB amp which I thought was illegal.
Just curious, Thanks

OK using a bit of 'sideways logic' I see that the 12V 'adaptor' (E-DC-5B DC Cable with Cigarette Lighter Plug) listed for this radio also cross references to a yaesu handy (VR500) I've got that, quite happily, takes a 'neat' 12V in to charge the 2 'AA' cells that are in the radio. So I would say the 13.8V from your car would be fine.

I just repaired a TS-930, that had the RF PA driver transistors blow up due
to overheating of the power supply.

your VC goes full scale ? ? ! ! ! ! ! ! up to 42 votls ! ! !
it should go to 28 Volts.

it sounds like the power supply pass transistors failed, and shorted out, (due to heat)
and put the 40 volts to the RF Final PA. This will blow the driver transistors.
A common problem in this radio.

are the fans working? it is important that the fan to the power supply comes on,
or the power supply will over heat, or results I just mentioned will happen.

what is the serial number to your radio ? ?

Kenwood added to the power supply circuit, later in production,
but it will not help the overheating problem.

Good afternoon, Brian.

The point of my question was, I want to fabricate a DC power cord for the VXA-700 with a Powerpole connector on one end, and I need to know if I can just feed 12 volts into the side of the VXA-700, or does their cigarette lighter adapter have some kind of voltage reduction or current limiting circuitry in there?

The Yaesu adapter which I bought for use with my VX-5 apparently
contains a surge suppressor (a varactor or zener, I suppose) and a
fuse.

I believe that the intent is to make sure that a high-voltage spike on
the car wiring (triggered by "load dump" - e.g. turning off the
headlights and thus abruptly reducing the current load on the system
when the alternator is running) doesn't reach and burn out the radio.
Automotive electronics for "12-volt" systems are normally engineered
to be able to withstand a short spike of as much as 50 volts above
ground... that's the magnitude of what you have to be concerned about.

I've fed my VX-5 power directly from a 12-volt gel cell which was not
connected to a car electrical system, and it was perfectly happy with
it. If that's all you're planning on doing, you can probably just use
the PowerPole arrangement.

If you plan to have the radio plugged into the lighter outlet when the
car is turned on, however, it'd be safer for you to provide some
voltage clamping and filtering, just as Yaesu does.

I have just brought a second hand VX7r black model about 1.5 years old and
the transmit audio is fine so I have been told and I asked one ham who would
have told me if it wasn't

AFAIK noise suppression and spike removal is all thats in the box, and maybe
a fuse.

For current limiting, use a 2 amp fuse in the supply.

Also note that they sell a lead with no plug on the far end to connect the
radio to a shacks supply.

511. New MFJ-998 Auto Tuner

The MFJ-998 IntelliTunerï¿½ has been advertised on the cover of MFJ's 2007 Catalog since late 2006. Orders have been placed at several major equipment vendors/dealers for several months. Production was promised in March 2007! But that date has not been met. I am sure that there are many folks out there that would like to know the latest information of this new product. Many are waiting to hear how it works and when they can add it to their systems. Feedback is requested.

I have the old MFJ "Differential T tuner which has served me well.
Only thing that irritates me a bit is that the roller inductor
is not gear driven. It handles 3 KW power, but slippage with
the belt driver is a nuisance. MFJ had a later version that was
gear driven, but I just accept the slight irritation of my slipping
belt coming up with different readings on the counter dial.

Tim -

Kenwood released 15 service bulletins for the TS-930S, while it was in
production.
Here are some of them:
http://www.qsl.net/ki4nr/kenwood/

Original soldering and power supply issues are often mentioned in repairs
for this radio.
Personally, I would perform a close 'visual' inspection of the electrolytic
capacitors and components in the power supply section.
Some additional resources and reference materials:

W6NL/HC8L, D.B. Leeson's TS-930 notes (2001) - Adobe Acrobat
http://www.kkn.net/~k5tr/ts930fix/w6nl930.pdf

N0SS, Tom Hammond - TS-930 digital board
http://www.kkn.net/~k5tr/ts930fix/ts930doc.pdf

Piexx has an upgraded microprocessor board for the TS-930
http://www.piexx.com/index.p....s_id=25

KI4NR, John Bolduc (LPC Wireless) - Phone 386-774-9921
http://www.eham.net/reviews/detail/5210
was performing TS-930 and TS-940 repairs,
BUT check with him (he may have stopped recently, due to health).
http://www.qsl.net/ki4nr/index.htm

Clif Holland at Avvid is a good resource -- and is again accepting radios
for service.

The output power is not adjustable in SSB.
For carrier modes (cw, am, fm) it is adjusted with the CAR control (outside ring on Mic gain control).

I have some paper copies of the S-Comm 7K Repeater Controller manuals. All I'm asking is $5.00 + shipping which will be around 1.50 media rate or if it can't go media rate then $4.10 for flat rate envelope. The $5.00 is to reimburse for the copy cost.

FOR SALE: RADIO RECEIVING SET AN/GRR-5

JAN DESIGNATION: AN/GRR-5
NOMENCLATURE: RADIO RECEIVING SET
CONSISTS OF:
CABINET, ELECTRICAL EQUIPMENT CY-615/URR (1)
RECEIVER, RADIO R-174/URR (1)
POWER SUPPLY PP-308/URR (1)
FREQUENCY RANGE: 1.5 - 18 MHZ
MODES: AM, CW, MCW
OPERATING POWER: 6 OR 12 OR 24 VDC OR 120 VAC 60~ 1�
POWER CABLE PROVIDED: 120 VAC 60~ 1�
ANTENNA PROVIDED: 4 THREADED MAST SECTIONS
OTHER THINGS PROVIDED: TM 11-5820-284-15,
ORGANIZATIONAL, DS, GS AND DEPOT MAINTENANCE MANUAL;
SPARE POWER SUPPLY PP-308/URR
REMARKS: I USED THIS RECEIVER FOR YEARS. UNFORTUNATELY,
IT NO LONGER FITS INTO MY OPERATING PROFILE AND IS
EXCESS TO MY NEEDS. OVER THE YEARS I ROBBED A VIBRATOR
FROM THE SPARE POWER SUPPLY AND AT THIS POINT THE
RECEIVER PROBABLY NEEDS A NEW TUBE OR TWO BUT THE
EQUIPMENT IS OTHERWISE COMPLETE WITHOUT CATASTROPHIC
FAILURE FOR THE TIME I HAVE OWNED IT WHICH HAS BEEN A
BUNCH OF YEARS. PRESENT OPERATING CONDITION UNKNOWN;
SOLD AS-IS.
PRICE: $75.00

Unless you plan to have every single one of your team members get
their amateur radio license, or you have authorization from a public
safety agency to use their frequencie(s), I would suggest FRS radios.

With that said: I don't believe that Motorola is a good choice
right now. Overpriced, bad support after the sale, and steadily-
declining quality in terms of getting spare parts. They also sold off
their major service depot to another company, who promptly relocated it
to Guadalajara.

I would, assuming the proper licensing, suggest you have a look at
Kenwood, M/A-Com, or Icom.

Happy hunting.

I am looking for a good used SG2000 the PowerTalk model, the one with
the tuning knob. Either Ham version or Marina version is OK.

It can be WORKING or NOT WORKING.

It should be in good physical condition.

If you have one available, please contact me at: 73w7gsa@gmail.com

Thanks,

Bill
W7GSA

I suspect that unless the fugitive hunting is done as a charitable
event, that Amateur radio wouldn't be allowable as a useage anyhow.

I envision that you would want GMRS radios, and probably would want to
use a repeater for reliability. I don't know if mobile repeaters are
allowed, but would allow you to put an antenna up a little higher on say
a Van, then transmit with a little more power to the "satellite radios
carried by the bounty hunters.

http://en.wikipedia.org/wiki/General_Mobile_Radio_Service

is a good place to get started.

532. Help! Schematic Needed Technisonics Model TFM-403 UHF FM Air to Ground Radio.

Newsgroup: rec.radio.amateur.equipment
Date: 2007-04-06 03:21:41 UTC
From: **THE-RFI-EMI-GUY** <rhyolite@nettally.com>
Message-ID: <4615bc9a$0$8983$4c368faf@roadrunner.com>
Source record: 5452

Schematic Needed Technisonics Model TFM-403 (Or TFM-30 or TFM-138) UHF FM Air to Ground Radio.
I am trying to troubleshoot an early serial number radio (25 KHz BW) that has a display multiplex problem. Only the upper left quadrant works and only briefly for about 30 seconds. The other 3/4 of the LEDS have all segments illuminated. When first turned on the upper left quadrant works and I can see and use most of the main radio functions. Then after 30 seconds, the upper left quadrant either fades away or some segments light up like the rest of the display. I am suspecting physical damage since the front lens is cracked and a keyboard button (#2) is popped off. Otherwise the radio seems to TX and RX OK!.

I need help finding a schematic of the control board and display. I have a TFM-403 UHF radio but I think the other two models mentioned above probably are similar.

I would also appreciate hearing from techs with familiarity of this model. Also need some cosmetic parts if you can help. I want to fix myself. not to send to a depot. Its for my ham shack! Thanks!

537. What does a Q Multiplier do?

Newsgroup: rec.radio.amateur.equipment
Date: 2007-04-09 18:16:33 UTC
From: Rick <Nospam@reply.in.gp>
Message-ID: <pan.2007.04.09.18.16.32.474832@reply.in.gp>

I never could quite figure out exactly what a "Q Multiplier" does.

There is a Heathkit model QF-1 Q Multiplier on ebay and that got me to wondering.

I know what "Q" is regarding inductors and capacitors ("Quality factor", reactance divided by resistance) but I don't know exactly what a Q Multiplier does or how it connects (I assume it connects to a receiver but am not even sure about that). Obviously it "multiplies the Q" but of what component(s) or stage(s)?

Any of you boat anchor enthusiasts know about this?

Well this isn't the boatanchor newsgroup, though you'd often be
confused by the recent equipment that gets posted about over there.

A Q-multiplier is a regenerative stage.

You might be familiar with the regenerative receiver, where positive feed
back is introduced to a stage so the same signal is amplified, fed back to
the input, and amplified again. This re-amplification allows for far
more gain than if the stage only amplified the signal once, and it
increases the selectivity of the tuned circuit involved. There is a means of
controlling regneration, so you can limit the amplification, or kick it up
so the receiver goes into oscillation, providing a beat note for reception
of CW signals.

A Q-multiplier is the same thing, though it doesn't bother to demodulate
the signal. Generally, the point is to increase selectivity in the IF
section of the receiver. It connects to the plate of the mixer with
a single connection, in parallel with that stage. INcrease the regeneration
of the Q-Multiplier, and it increases the selectivity. It gives a nice
peak, though does little to improve the skirt selectivity.

It's prime was in the days of the 455KHz IF, where the improved selectivity
would actually make a difference. At a higher frequency, it would still
increase the selectivity of the tuned circuit, but not enough to narrow
the passband for voice or CW.

It was often an add-on for low end receivers, because for the cost of
a single stage, you'd boost selectivity. Sometimes it was included
in the receiver (and sometimes the effect was done by adding some positive
feedback to the IF stage, so it could go into regeneration).

It was sometimes seen in more expensive receivers, where a variant was often the reason. A rearrangement of the circuit, and it could be used as a notch filter, to knock out a nearby signal, which was often more useful in receivers with good IF selectivity where the peaking was less of an improvement.

One early use for the Q-Multiplier, which never saw that much use, was for boosting the received carrier in reference to the sidebands of an AM signal. This peaking of the carrier made sure it was strong relative to the sidebands, and made for better AM demodulation. The Q-multiplier was good for this, since it peaked up the carrier but the bad skirt selectivity didn't attenuate the sidebands too much. The same basic notion that is the point of synchronous detectors for better AM reception today.

For a brief while in the sixties, there'd be construction articles with Q-Multipliers at the front-end of receivers. Someone described an early single conversion receiver with a 9MHz IF, and put a front end Q-Multiplier in to improve the selectivity of the single tuned circuit at the front end, to improve image rejection. (Though, it never fully made sense, since image rejection was much easier with the high frequency IF.) The scheme was continued in a few other receivers, basically because it had been done. And that was the end of that.

Q-Multipliers faded as IF frequencies increased, and good filters such as mechanical and crystal came along to replace a string of IF transformers.

So what about audio Q-multipliers? Do they function on the same principle?

Yes. The idea of a Q-Multiplier is to increase
selectivity. They use regeneration (positive feedback) to
decrease the bandwidth of a tuned circuit. The frequency can
be whatever is desired. Q-Multipliers were popular at a time
when most receivers had inadequate selectivity. They are
relatively cheap and, with some limitations, work pretty
well. As receivers with more sophisticated filters (like
mechanical filters or multi-pole crystal filters) became
available the Q-multiplier fell out of use.
BTW, the old regenerative receiver works on the same
principle. In fact, one can see a Q-Multiplier as a sort of
regenerative receiver working at the IF or audio
frequencies.

Originally yes, though I've seen "audio Q-multipliers" described in
construction articles that are more strictly average audio filters.

They may even come out of the same place. The selectoject was described
in QST in the late forties, by O. G. Villard, and it uses the principle
of regneration to get better selectivity at audio. And O. G. Villard is
the name I'd associate with the use of the Q-Multiplier for better
reception of AM (there are references to a QST article by him on that topic
in an early ARRL SSB manual). But I've never seen a specific link between
the selectoject and the Q-Multiplier at the IF of a receiver, so I don't know
if he came up with the IF Q-multiplier as we know it, or someone else did.
Certainly O. G. Villard, who died only three years ago, came up with
quite a few things important to amateur radio, including a lot of work
in SSB in the early days.

Interestingly, this month's QST in the 50 Years Ago column lists a
variable band width Q-Multiplier by Ronald Ives (April 1957.) The
article references the original Villard article in the April 1952
issue of "Electronics" magazine.

Source record: 5466

Among us kids who were licensed as teens in the mid 50's, the Q
multiplier was a hot item. Most of us could not afford the latest
and greatest receivers so the Heathkit Q-Multiplier was a desired
accessory . I believe is could also do a notching function. I never
had the Heath version myself, but many friends did. I had a
Hammarlund HQ-100 immediately upon its introduction and as far as I
can recall that was the first commercial radio to have a Q-Multiplier
built in as opposed to an add-on accessory. More expensive radios had
crystal filters and the Cadillac of the era, the Collins 75A4 had
mechanical filters. The $500 price tag of the 75A4 put it in the
"dream-on" category to those of us who only had part-time jobs or in
my case (I was 13 when licensed) too young to even work at anything
legally. It actually was pretty effective once you got to learn how to
use it. As I remember it was far more effective on CW than phone
(which was still heavily standard full carrier AM phone.) The
Hammarlund version only had a "peak"
function. I believe the Heathkit version's notch function could
be used for reducing heterodyne squeals although I have very
liitle experience with that. I believe the Heath also had a
third function, but I don't remember what it was.

<snippety>

Best advice I can think of is to use a high-quality microphone,
designed for either teleconferencing or broadcast (Shure has some nice
ones -- I use their 503BG myself), and adapt that to your radio. You'll
probably be best off using a low-impedance dynamic.

Happy hunting.

hi all,

i have been out of amateur radio for a good number of years.
i have finally got the room (garden and house!) for a few rigs,
and i'd like to get back into packet.

I would like to have the capability to do packet on V/UHF and also via
satellite (if I can get an antenna up for it).

I am also very interested in aprs (looks very useful) so the TNC
would have to be usable with GPS/etc.

I run a Icom IC-207 V/UHF, a Kenwood TH78e handie, and a Yaesu FT707 for HF.

I mainly use Mac OS X, or at times Windows XP, so the TNC would have to be supported
by Mac TNC software.

any help greatly appreciate,

BERNARD,
I too am still active in PACKET however I use a Commodore 128 for
all my uses. One for internet use and another setup for Packet
on VHF only. I use GERMAN software called DIGICOM V5 which uses
the worldwide compatible software. I built my own TNC strictly
for PACKET/VHF. In Hawaii we have a statewide packet digiptr
setup, with the digi on top of Mt Haleakala. I can easily reach
that. I think its APRS which has a lot of addnl cmds I am not
familiar with. As to TNC'S that will work with PC's and or
COMMODORE computers the following commercial TNC's are all suitable.
MFJ (makes several versions)
Packrat PK232's with latest upgrade ROMS also (useable with
Commodores if adapter is also included.
KAM+ Kantronics also with latest ROMS is MBX and fully compatible.
Hope this helps. I was handling all MARS traffic via Packet between
Ft Huachuca Az and Schofield Barracks in Honolulu for many years till
I finally resigned last year. After 70 years with pre WW2 then
MARS till last year I decided I better rest and take it easy.

A TNC can be operated from a dumb terminal through an RS232 port. You can use any terminal program with your computer--I've used
Windows HyperTerminal. You tend to need to keep the TNC command line book handy when using a terminal program. Software specific
to TNCs (e.g., HostMaster) make operating the TNC more user friendly.

Hope that helps.

Check Kantronics and also the AMSAT and TAPR websites and bulletin boards. Some of the digital satellites required a manchester modification to the uplink, but I think that is passe. Bob Bruiniga is the guru on these so you might look him up and send an e-mail to him.

Hi Greg,

In addition to Joe's suggestion, Linear "Amplefire" guru Richard Measures talks about rectifiers here: http://www.somis.org/D-amplifiers3.html
For reasons of heat-dissipation (and I expect also cost), he's not too fond of the epoxy-encapsulated HV rectfiers -- he prefers to build his own stack on perforated circuit board. If you want to heed his advice, you could build a reasonably tidy bridge with a dozen 1N5408 (3A/1KV) rectifiers.

It would be wise to NOT use load-sharing (aka equalizer) resistors &
capacitors. With modern rectifiers, if more than one diode is in a string,
there will be no problem as long as they are of the same type number. See
http://www.somis.org/D-amplifiers3.html.

Just curious how many out there still have active 2m packet radio in their area? Aside from APRS, I don't think anyone is listening... and even that seems to be fading here.

I've been rather inactive for the past 7-10 years and it seems packet has dissapeared in that time! Anyone have any creative ideas?

I honestly can't come up with any use for it that I can't already do over the internet... My laptop even has built in EVDO on two cell networks (redundancy!). What more can I ask for? :(

PS. 3 month old TH-D7A for sale ;)

I am not sure about that (aprs I mean). In Ireland there seems to be alot
of activity. Maybe its only by a small number, but it looks busy.

> I've been rather inactive for the past 7-10 years and it seems packet

I remember going to a radio meeting(probably the only meeting i went to!)
, dunno, about 7-8 years ago.
I argued that Internet was good for ham radio, while alot of people (waay more
experienced than I) argued the opposite. It'll kill DX, Packet etc.

I argued the opposite. It'll give people opportunity to find information, access
to other sides of the world, as if they were in their backgarden.

A little bit of both seems to have happened. Is that a bad thing?

> PS. 3 month old TH-D7A for sale ;)

I wish I could find a use for it, but all good things come to an
almost-end, I guess :)

I can't say the internet has been bad for amatuer radio... look at
IRLP, echolink, etc. success. It seems everything comes back to voice
traffic.... look at VoIP on the internet, we have a big fast data
network, and guess what? we want to TALK on it :D (or download p0rn.
lol)

I guess my voice capable HT will never be obsolete! And that's why i
keep it up and running...

Actually, no that is not a bad thing for the masses. It is the end of
ham radio for anything other than talking about your guns, cars, or
aliments to other old farts. I am one of those old farts who has no
illusions about the worth of ham radio in this world of modern
reliable instant inexpensive world wide communications.

Packet Radio has been reduce to APRS and a few DX clusters. I got rid of my packet station in favor of Internet based DX clusters 4 years ago. APRS is a completely useless waste of radio spectrum. The only real use of Packet is as a means of accessing and gathering remote data. However, there is little ham interest in this type of activity due largely to the fact that most sites that have power from the grid also have Telco access which means Internet. Most repeaters are idle now, even during drive time. SoCal used to be jam packed with repeats on 2 meters and 70 cm during drive time. There are more cell phones in use at the TRW and other local swap meets than hand helds. During the evening there is more activity on 2 meter simplex than there is on the 2 meter repeaters.

The Internet and Cell phones have reduced ham radio to an old guy's hobby. The Internet provides reliable world wide communications for a low monthly price eliminating the need for ham radio's traffic handling system. Even the slowest dial-up Internet access leaves packet radio in the dust. Chat rooms make random world wide conversations with people possible by anyone without requiring a test to prove that you can memorize a bunch of answers to questions without having to understand anything. Portable Cell sites have eliminated the need for ham radio emergency communications. Internet connections in concert with portable cell sites have eliminated the "Health and Welfare" traffic as well. Both portable cell and associated Internet access allow anyone to be trained to handle emergency traffic as well as health and welfare - no license needed. Cell phones have eliminated any of the freeway accident reporting needs formerly provided by hams through repeaters at "drive time".

In summary, Ham Radio has joined the model trains, boats, planes and other old guys hobbies as something to pass time away but which contributes nothing of value to the advancement of knowledge or humanity.

There is virtually no interest in ham radio by the current generation of kids and young adults -- hand held radios and repeaters are archaic to them (and rightly so) since they walk around with world wide reliable telco and internet access for pennies a day without having to prove that they are worthy of some arcane title.

About three years ago I retired and moved from California. Packet activity there seemed "sparse" at best. I had been deeply involved in packet radio in the beginning, but my interest faded, as did packet radio, with the growth of Internet activity.

When I moved to Oregon, I was surprised at the extent of Packet activity in the Pacific Northwest. Oh, it isn't like it used to be in the early 90's, but it exists, and the networks are pretty good.

The domimnent reason it still survives is probably emergency services. ARES and RACES groups are pretty strong up here, and apparently Packet radio is one of the key portions of ARES communications.

In fact, I'd say that the newer TelPac nodes are the primary reason Packet remains a viable communications use for emergency services. The mere fact that now we can easily send, and receive packet radio messages from areas without any other communications services, and route them to the Internet, and receive them from the Internet, makes it a pretty neat resource.

Add to that APRS and Weather watch using packet.

I think I am willing to try using them without caps and resistors.
I allready have 1KV 3 A HER308's. And I have a bunch of thermal
epoxy. I just might purchase some of these to make things easier.

I for one am still useing Packet and run a beacon on 145.07 vhf.
We have a statewide system with the main digiptrs on tops of
Haleakala and Maunakea so coverage is near statewide. They
use APRS, but all the worlwide params are effective as the params
settings etc are standarized all over the world. Different
types of software and different types of TNC's are not a problem.
They may offer addnl cmds in the params, but the essentials
are still standardized!

The parallel resistors and capacitors in parallel with series diodes
dates from the early days of semiconductor diodes.

The resistors were there to "equalize the reverse voltage drops".
The diodes back then weren't particularly great, and there were worries,
I can't remember if real or imagined, that the diodes couldn't handle
the reverse voltage they'd see. The diodes were there to make sure each
saw the same reverse voltage.

The parallel capacitors were to protect against spikes. Again at a time
when there was real or imagined worry that the precious semiconductor
diodes would be easily damaged.

This was the same period that would always warn about heatsinking the
leads of semiconductors when soldering them, to protect them against
heat.

YOu'll see this talk of parallel resistors and capacitors with the
use of series diodes in older handbooks and magazines, and then it fades
away. I doubt it will hurt anything, but either the diodes got better (in
those early days one often had no choice but to put some diodes in series
just to handle average B+ voltages, let alone outright high voltage), or
the whole thing was an illusion, and wasn't actually needed.

Series resistors limit the current, to protect the diodes against current
surges. The 1971 ARRL Handbook says you need them if the winding resistance
of the transformer are too low to do the limiting itself.

Most of the time when people make statements like the above, they have spent little time in actual emergency communications. Nor do they understand why we still need amateur radio in emergency situations.

Emergencies in our part of the country, as well as many other areas, are usually forest fires. Telephones, cel phones, public service, television, the internet, etc. rely on telephone lines and mountain top locations. When there is a major fire, those things are toast. I have yet to see any portable cell towers available in our county. Even when the phone lines manage to stay alive, they are soon taken down with too many calls to and from the area trying to calm relatives. This has happened time after time in major emergencies. So you have no telephone, no cellular telephones, no internet and no communication between public service entities like police and fire.

Our county, the largest in the state, has state-of-the-art public service communications with links all over the state. But guess what, every single police department, sheriff's department, Red Cross, Salvation Army etc. has an amateur radio station permanently installed in their facilities because they know some day they will need us. Why do you think the Office of Homeland Security is currently spending millions of dollars equipping ARES/RACES stations throughout the country? It's because the government knows that all the expensive equipment in the world can be taken out with a major emergency. That's also why amateur radio continues to hold on to a major portion of the frequency spectrum. It's sure not so a bunch of old farts can play radio and talk about model trains.

With regard to packet radio. Yes, it has seen better days. Most ARES/RACES organizations are going to WinLink 2000. But APRS is sure not obsolete. If you send out several Jeeps on a search and rescue mission, and want to know their exact location at all times, what else will give you that information?

No young people entering amateur radio? How do you explain all those that are testing for their license every month? Last week we had two 11 year-olds, and a 13 year-old all pass their technician licenses. And their father drove them 100 miles to get to our testing location! It's true there are more older people in the hobby today than young, but there is still a steady stream of teen-agers and even college students coming into the fold. It's a matter of how the local amateurs present the hobby to them. If you don't work at getting people interested, then you aren't going to get new hams. It's as simple as that. We use things like IRLP and balloon flights tracked with APRS to interest young people. If the only thing you show them is how to use an HT, they will just show you their cell phone and smile.

Some day, when ALL communications are via satellite, and nothing on the ground can be destroyed by flood, fire, earthquake, tornados, terrorist attacks, etc., then amateur radio will lose its value to the country for backup emergency communications. Until then, people will continue to depend upon amateur radio even when they don't realize it.

The HER308 looks like a 1N5408 with a specified reverse recovery time. I
like specifications those FFPF04F150S damper diodes. Digi-Key has them
available in only large quantities (non-stocked) but Mouser shows them
in-stock in small lots. Not knowing the dielectric capability of the plastic

TO-220 case, I'd probably mount them (with heatsinks) to an insulating base.

Bryan

Dick,
I do not follow your ranting and theorizing of Ham radio nor
useage of Packet, PSK, and other forms of msg handling.
As we all know by now, the WWW is not infalible, nor the
CellPhone industry nor many of your other theories.
After 70 years with AARS/MARS etc I for one am proud to be
a member of Ham radio and all its requirements. And yes
Hams have access to the Space Ship as I understand it.
So accept my dissent to your comments!!!!!
Joe/KH6JF

I'll chime in, too, on the opinion that "no caps, and no equalizing resistors is OK." I've built a lot of full wave center tap diode strings and full wave full bridge diode strings and with a lot of diodes. I _would_ recommend, however, that you put in lots of diodes (eg. all 1 kv). I put in enough in each leg so that my PRV sum for the diodes is *at least* two times the peak AC volts. So, for a 1 kv DC output, I would have at least a sum of 3 kv of PRV diodes (or, three 1 kv diodes in series, preferably four, for each leg). If you get spikes going up that high, they are usually going to be very transient and the diode will act like a zener diode and start drawing zener current in the reverse direction. As soon as that happens, it puts a _load_ on the transient and, unless there is a ton of energy in the transient and it is quite long, this will keep the voltage from going higher. I've seen lots of gear with lots of diodes in the HV legs without balancing resistors or capacitors, and I've been using big diode strings in 2-3 KV DC supplies (kw level) for decades, and no problems. Also, the inductance in the primary of big transformers should tend to limit current surges anyway. You might get bigger voltage surges when you turn the power switch off.

------A total SNIP of everything and on to a better idea.-------

Consider using avalanche rectifiers and it makes all the stuff about the
caps and resistors a mute point. There are some good application notes
out there on this subject and the whys and wherefores of it all.

For your needs the BYM36E might be a good choice. At around 30 cents a
piece hard to beat.

I perused the datasheets of both the BYM36E and 1N5408. Of the
specifications that could matter (that differed):

Reverse Current:
1N5408 = 5uA @ 25°C Ta, 500uA @ 100°C Ta
BYM36E = 5uA @ 25°C Tj, 100uA @ 150°C Tj

Reverse Recovery Time:
1N5408 = Not Rated
BYM36E = 150ns

Nonrepetitive Peak Forward Surge Current:
1N5408 = 200A
BYM36E = 65A

While the BYM36E shows better Reverse Current figures at elevated temperature (and the measurement point isn't the same), I think it unlikely that the OP is going to operate them at such temperatures. Considering the application is 50/60Hz (Period = 20/16.6 ms), Reverse Recovery Time is not a factor. However, when it comes to Nonrepetitive Peak Forward Surge Current, the 1N5408 is clearly better. Allied shows 23 hits for 1N5408, the least expensive being $0.092 each in 1-24 piece lots (stk #568-0554).

OK Guys. Let me lay it out for you so it is perfectly clear.

"Blue Box Thief" said that ham radio is ending because the internet and cell phones have reduced it to an old guy's hobby, and it contributes nothing of value to the advancement of knowledge or humanity. He also said there is virtually no interest in ham radio by the current generation of kids and young adults.

I responded with the following points:

1. The internet cannot be relied upon in an emergency.

2. Cellular telephones cannot be relied upon in an emergency.

3. The telephone system itself cannot be relied upon in an emergency.

4. Packet radio is losing favor for passing messages, but WinLink 2000 is taking its place.

5. APRS is not a waste of spectrum, and is very important for use in tracking emergency vehicles.

6. Ham radio is still very important to the government as evidenced by the millions of dollars being pumped into it by Homeland Security.

7. Young people ARE getting into ham radio as evidenced by the number in our area currently testing for a license.

8. Interest in ham radio is dependent upon how much work the local hams are willing to expend on young people.

9. Ham radio will continue to be important for emergency communications until satellite communications are fully developed.

Please point out to me which of the above are theories or involve ranting.

After many years of inactivity, I'm resurrecting the old ham shack but I want to keep it simple. I think one of these new fangled 100W HF, 2m, 70cm would fit the bill nicely. Here's a couple of features I'm looking for:

A real squelch KNOB for 2m & 70cm FM. (IMHO, the squelch control should not be buried in some menu!)

I'd like to set up a 2m priority channel that will interrupt any band or mode I'm in. I've seen this demonstrated on a Yaesu Ft-857D, but unfortunately this rig puts a substantial 'hole' in the audio every 5 seconds when it checks the priority channel for activity. This hole is long enough to swallow complete words and is very annoying!

AM/FM broadcast and shortwave would be nice but not necessary.

You know, I would use a dedicated transceiver for that.
A good used 2m rig can be had any where from $100 and up,
and it doesn't have to be a new one either..

I use a Kenwood TR-7950 for just that purpose. The audio
and selectivity is much better than on a lot of newer rigs,
and it does have a squelch knob, and an easy to read display!
It's hooked up via LMR-400 to a home made j-pole made out of 1"
thick-walled copper tubing.. This rig is also used for packet.

Good day all,

There are other factors that make avalanche rectifiers a good choice
over standard types. Of course he should not exceed the specifications
on the data sheets for either. Comparing apples to oranges here and
overlooking the advantages of the basic behaviors of an avalanche device
in an application that can be plagued with spikes.

Here is a couple references on the subject. There are many more out and
about.

http://www.dynexsemi.com/assets/DNX_AN5370_Jul02.pdf

http://www.highvoltageconnection.com/articles/avalanche-diodes.htm

The "non-snappy" behavior, minimizes circuit ringing and can reduce RFI
too! They are rugged and able to withstand reverse energy much better
than conventional diodes.

If the OP was actually thinking of using resistors and caps as has been
batted around relentlessly in this group and others, and when compared
to other avalanche class devices, the .30 cents is a good price.

I have no doubt that if he decides to slap in 5408's with or without all
the extra stuff, it will give him years of service taking for granted he
has the PIV and "I" requirements properly. I simply wanted to offer him
an alternative that eliminates the compensation network argument and
adds another layer of protection.

Best regards to all,
Paul
WD8OSU

It is up to him as to how he wants to approach and remedy his situation.
He is the engineer on the project.

586. Problem with Kenwood TS-570 Low Power on CW.

Newsgroup: rec.radio.amateur.equipment
Date: 2007-04-15 00:58:07 UTC
From: Gus <gusrego@comcast.net>
Message-ID: <1176598687.860505.145440@w1g2000hsg.googlegroups.com>
Source record: 5406

I am having a perculure problem with the 570, when i tune up on all bands i get full power out put on all modes except for CW. When i switch to CW i can only get (typically 10 watts) out I can get 20 watts out on the higher frequences. I am wondering if this is an operator problem. I have done the full reset (a=b while power on) and the rig reset okay... but the low power on CW mode remains.

ANY HELP WOULD BE APPRECIATED... thank so much in advance.

Gus

587. A question on tube rigs in general, Kenwood in particular

Newsgroup: rec.radio.amateur.equipment
Date: 2007-04-15 03:49:07 UTC
From: billcalley <billcalley@yahoo.com>
Message-ID: <1176608947.203813.293270@y5g2000hsa.googlegroups.com>
Source record: 5407
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.boatanchors

Hi All,

I have a Kenwood TS-530S, but I'm sure this question applies to most other tube rigs: Why is there even a TUNE setting on the MODE switch? I know that with this switch engaged the "input power to the final section is reduced to prevent tube damage during tune-up", but why not just adjust CAR (CAR LEVEL CONTROL) downward for this step, since CAR also controls "carrier level during CW operation". Is it simply a matter of convenience, or do these controls actually do somewhat different things?

And while I'm on that subject of carrier level, I need to lower my 100 watts to about 10 watts. Is the best way to do this by simply lowering the CAR control? Does this technique give all the advantages, such as more protection to the finals (with a high VSWR) and generally longer tube life?

Another quick question for anyone who is familiar with the Kenwood TS-530S with the 500Hz CW filter installed, but I noticed that unless I move IF-SHIFT counter-clockwise, the audio output is not centered on 800 Hz, but more like 1200 Hz or so. Is this normal for Kenwoods?

Thanks for any help!

-Bill

Bill,
Do you have the correct CW filter installed?
Kenwood offered the C filter and the C-1 filter.
The difference is the center frequency.

I remember on my 930, there was a pitch control.
Do you have one? If so, how is it set?

Hi Ed,

Thanks for the response! Yes, I have the proper YK-88C filter installed. And it is not the actual CW pitch/tone that's off, but the filtered passband output into the rig's speakers. The audio output, unless the IF-SHIFT control is moved counter-clockwise to center it, has the CW signal at 800Hz, as it should be, but the 500Hz passband itself is not centered on it and extends too high from about 800 Hz to 1300 Hz...

Best Regards,

-Bill

Bill-

I haven't worked on the TS-530. In other similar models there are typically three crystals associated with the product detector, one for CW, one for USB and one for LSB. If the crystal is off frequency, it will cause a signal to be offset from its correct place in the IF filter passband.

For the TS-520, these crystals appear to be on the carrier unit along the left side of the radio on the bottom. Each crystal has a parallel trimmer capacitor. As you adjust the frequency of the detector's CW crystal, the background noise will sound different as you tune across the filter's passband.

You need a counter and a diagram to set the crystal frequencies correctly. The TS-520 service manual I downloaded does not seem to have directions to do it. I would connect the counter to the output of the carrier unit, and adjust each crystal to its correct frequency, selected with the front panel CW/USB/LSB switch. The IF-Shift control should be centered when making these adjustments.

If you can't read the frequency marked on the crystal, it should appear in the parts list.

hi bill,

join other ts-5xx/8xx hybrid fans here

http://groups.yahoo.com/group/TS-520_820_530_830/

When in tune the power level is reduced to under 2 watts.

if you want to lower your power out the car control will do
this only for CW mode. If you want to use reduced power for SSB,
in the files section in the above yahoo group there is a small
external circuit that will use ALC to lower the power out.

Hi Fred,

Thanks for the tip! So that I don't FUBAR this up, please tell me if
I have this right (changed from your original description to take
advantage of my very limited equipment):

1. Set the MODE to CW and the IF-SHIFT to center detent position of
the TS-530S.

2. Find the single trimmer capacitor located near the 500Hz CW filter (the trimmer capacitor will be able to shift the 500Hz CW filter center frequency by some small amount).
3. View the TS-530S's audio speaker output noise on my audio spectrum analyzer.
4. Adjust the TS-530S's trimmer capacitor until the audio (mainly noise) output is -centered- on 800 Hz, according to the audio spectrum analyzer's screen.

Would the above technique work?

Thanks!

-Bill

You can't shift the CW filter, so you must shift the xtal oscillator
that provides the BFO injection signal for the CW mode.

That is correct, you must adjust the xtal BFO trimmer so that the IF noise
shows up centered on the desired CW note frequency.

Hi Bill,
The carrier oscillator frequency used for CW(Rx) is the same as for USB. Because you want to have 800Hz difference between RX & TX, it would be best to just ensure the carrier oscillator frequencies are correct (and adjust as necessary). My TS120 & TS130 (same IF & filters) use:

USB = 8.8315 MHz
LSB = 8.8285 MHz
CW (Rx) = 8.8315 MHz
CW (Tx) = 8.8307 MHz

By the way, I have the narrow (270Hz) CW filters in my rigs. They're VERY sharp!

Vy 73,
Bryan WA7PRC

MILITARY AUDIO CABLE ASSEMBLY FOR SALE

NOMENCLATURE: Cable Assembly (Audio)
AN DESIGNATION: CX-1334/U
QUANTITY: 1 Each
LENGTH: 6FT-4IN
CONNECTORS:
Cable End 1: Frank U-77/U
Cable End 2: WHC JJ-026 (mates w/ PJ-054)
PINOUT:
U-77/U Pin A = JJ-026 Tip
U-77/U Pin B = JJ-026 Sleeve
GENERAL CONDITION: Very Good
PRICE: $20
PAY BY: U.S. Postal Money Order
SHIPPING: At Buyer's Expense
AVAILABLE TO: U.S. addressees only. No third-party
arrangements entertained.
GUARANTEE/WARRANTY: None expressed or implied
other than the representations in this announcement.
RETURN POLICY: No returns on this item.
PICTURES: Ask
CONTACT: BOB W5BTC
EMAIL: dc2light[at]md[dot]metrocast[dot]net

602. Horrible, Horrible HF reception with IC-R3 and VX-7R

Newsgroup: rec.radio.amateur.equipment
Date: 2007-04-16 02:15:58 UTC
From: "Bob D." <bobmgtd@insightbb.com>
Message-ID: <1dKdnc55NeWNQb_bnZ2dnUVZ_hOdnZ2d@insightbb.com>
Source record: 5422

I recently bought an Icom IC-R3 (hand held communications receiver) and a Yaesu VX-7R handy-talky (can tune .5 to 1000 Mhz). Both of these devices can't pick up a single shortwave signal. And this is on a long wire antenna, not the rubber duckies. (They both receive great on VHF/UHF. The IC-R3 even manages to pick up fringe TV channels.) The same antenna connected to my old Kenwood 599 receiver brings in plenty of HF signals, both shortwave broadcast and amateur.

How can these two new receivers be soooo bad????? I live within a mile of an AM broadcast station, could that be the problem? (It doesn't bother my old Kenwood though!) Is anyone successfully listening to shortwave stations with either of these radios?

I'm was going to buy a new HF rig, but now I'm scared that it might overload on the broadcast station.

From: mike boersma <mike.boersma@gmail.com>
Message-ID: <1176693523.168714.8020@d57g2000hsg.googlegroups.com>
Source record: 5423

Does anyone have information on the Radio Shack HTX-10 10m radio? I am looking to get into HF on a shoestring (and before I get flamed 1) I know that 10m will be at best sporadic for the next several years; 2) the HTX-10 is a 10m only (and so I will not be able to access other HF that are open now; and 3) apart from a hack, the HTX-10 is phone only) and a used radio, power supply, and antenna seem to be inexpensive.

1) Are there known equipment problems (the mysterious silent transmitter)?

2) What is a good price for one of these?

3) Is there anything else that I should know?

My preference would be to purchase one at a Hamfest rather than ebay, but if the price was right...

thanks

Mike (KD8EIB)

604. Help with a Kenwood TM-G707A

Newsgroup: rec.radio.amateur.equipment
Date: 2007-04-16 04:21:27 UTC
From: wa6ilq@gmail.com

Source record: 5424
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc

I was handed a TM-G707A this evening to use
on a business trip / rental car ... complete with
a cigarette lighter plug and a mag mount.

I am totally unfamiliar with this radio.
I'm sure that I can figure out the beast but if
my own experience holds true it will take
a good while before I am totally comfortable
with it... and being a loaner I won't have it
that long.

Hence my next question... rather than reinvent
the wheel...

Does anybody have a pre-prepared cheat sheet
that they can email me?

I will be using the manual that I downloaded
from Kenwwod's web site to preprogram a
half - dozen frequencies that were emailed
to me...

Hi Glenn,

well thats the main reason why i was looking for a tnc - i could run it with any os, and a rs232 prt.

the tnc i managed to pickup (pk232) comes with manuals so it should make things easier for me!

thanks

I remember reading about a little project in the 70s in hawaii called
aloha-net (maybe?)..

this did not *specifically invent* the internet, but I don't think
you can say that ham radio has no worth in this world of reliable instat
inexpensive comms.

granted, the internet is cheap and relatively instant..but as someone who works
in mobile telephony, i can tell you when the shit hits the fan, i would have
no problem to fall back onto ham radio.

you show me a UMTS phone that works 500Km when every radio mast has been ripped t
shreds by some storm.

> the need for ham radio emergency communications.i

I dont agree with you on that.
If the cell sites have connectivity to the switching centre by E1/T1, uwave links
its quite possible that the infrastructure is dead after a storm/emergency situation.

Internet connections
> in concert with portable cell sites have eliminated the "Health and
> Welfare" traffic as well. Both portable cell and associated Internet

And hea, thats fine. Radio hams is not the answer to everything.
Just the same as Internet is not the answer to everything.

> In summary, Ham Radio has joined the model trains, boats, planes and
> other old guys hobbies as something to pass time away but which
> contributes nothing of value to the advancement of knowledge or
> humanity.

No, I can't agree with you here.

Soccer (insert sport here)doesn't contribute value to humanity, does that mean soccer is
a useless hobby?!

> There is virtually no interest in ham radio by the current generation

> to them (and rightly so) since they walk around with world wide
> reliable telco and internet access for pennies a day without having to
> prove that they are worthy of some arcane title.

As someone who uses the Internet every single day on my life, I agree with the last bit.

But, also, on the Internet everyone can be an expert (or a dog, depending..).

The Internet has its places, but so does amateur radio.

ta,
bernard

When/If all comms is via satellite, then that will give a target/one place
of insecurity in comms.

Amateur radio works, in emergency situations, because if its unorganised
(in the best sense of tha word!) nature.

Much the same way as the Internet was/is intended to operate.

The only way to knock out amateur radio would be some EMF pollution (that
and kill all the old farts:)).

On 2007-04-14, Dick <w6ccd@k7yca.org> wrote:
> OK Guys. Let me lay it out for you so it is perfectly clear.

I think its me that has to lay it out for eberyone.

I said I had argued that Internet was actually a good thing
for Amateur radio:

"
> I remember going to a radio meeting(probably the only meeting i went to!)
> , dunno, about 7-8 years ago.
> I argued that Internet was good for ham radio, while alot of people (waay more
> experienced than I) argued the opposite. It'll kill DX, Packet etc.

> I argued the opposite. It'll give people opportunity to find information, access
> to other sides of the world, as if they were in their backgarden.
>
> A little bit of both seems to have happened. Is that a bad thing?
"

"Nobody" <rock_sci@hotmail.com> then argued the counter, that in fact,
amateur radio was dead, and nothing more than an old guys hobby:

"
Actually, no that is not a bad thing for the masses. It is the end of
ham radio for anything other than talking about your guns, cars, or
aliments to other old farts. I am one of those old farts who has no
illusions about the worth of ham radio in this world of modern
reliable instant inexpensive world wide communications.
"

I then agreed completely with what Dick had said about the value of
amateur radio.

I did however disagree with him about the demise of amateur radio
when all communications go to satellite.

Now, to carry on with the conversation..
> "Blue Box Thief" said that ham radio is ending because the internet
> and cell phones have reduced it to an old guy's hobby, and it
> contributes nothing of value to the advancement of knowledge or
> humanity. He also said there is virtually no interest in ham radio by
> the current generation of kids and young adults.

I hope this is now fixed. :)

> I responded with the following points:
>

> 1. The internet cannot be relied upon in an emergency.

There will be times when the internet stops working, partially somewhere in the world.

> 2. Cellular telephones cannot be relied upon in an emergency.

Again, pretty much same as point 1.

> 3. The telephone system itself cannot be relied upon in an emergency.

This I might not agree with, but essentally correct.

> 4. Packet radio is losing favor for passing messages, but WinLink 2000
> is taking its place.

I don't knmow much about winlink 2000 so i can't say.

> 5. APRS is not a waste of spectrum, and is very important for use in
> tracking emergency vehicles.

Yes I agree. If this is a waste of spectrum, so is wifi, gps, etc..

> 6. Ham radio is still very important to the government as evidenced by
> the millions of dollars being pumped into it by Homeland Security.

This may be the case in America. No idea.

> 7. Young people ARE getting into ham radio as evidenced by the number
> in our area currently testing for a license.
>
> 8. Interest in ham radio is dependent upon how much work the local
> hams are willing to expend on young people.

Yes, I mis-quoted you. It was "Nobody" that I was quoting. Sorry
about that.

My point about satellite communications was not that it would do away
with ham radio per se, but that it would make ham radio much less
important for emergency communications (ARES/RACES.) When technology
advances to the point where all telephones communicate directly with
satellites, with no earthbound connection, then the only thing that
could knock them out would be to take out the satellites. Much less
likely than an earthquake, fire or flood here on earth. I know there
are services available today like Iridium and Globalstar, but it won't
be practical for everyone until the price gets down to current cell
phone costs.

There are a nr of TNC'S commercially available such as the MFJ
series, the KAM+, the PK-232's. etc. The limitations involved.
depend on whether the KAM's and PK232's have the upgraded ROM
chips in them. Make sure they do as the features are vastly improved
if the Upgrade chips are in them.
Joe

Yes, but it that happens we won't have to worry about communications.
We need to find a deep cave.

It depends on the area. Some are very active and other's are like a
desert.

I use a TM-D700 in the car, an all band all mode 897D in the shop and
an old Alinco DR610T in here for VHF and UHF. I also use a pair of
VX-7RBs and often run locked cross band.
>>
>>Well the only thing that hasn't been sent is pr0n..that seems a money-spinner

>>
>>> I honestly can't come up with any use for it that I can't already do
>>> over the internet... My laptop even has built in EVDO on two cell
>>> networks (redundancy!). What more can I ask for? :(

Emergencies. If there is a major disaster and the power hasn't failed
yet, the cell towers become overloaded, often by the press and
therefore useless for any thing else. Nor can they remain on
emergency power indefinitely. The same is true for the Internet. No
power, no Internet. Strong storms can also render satellite
communications unusable as can solar storms. Of course those storms
take out GPS as well.

Storm chasing around here makes good use of packet/APRS and voice over
much wider areas then WiFi or WiMax

>>

Bill-

You may be able to accomplish your goal without a counter, but the trimmer you need to adjust is one of a group of three next to three crystals on the carrier unit. It is probably not on the filter board unless the two boards are combined in the TS-530.

I don't know for sure if the TS-520 manual is applicable. Although it shows the crystals and trimmers in a photo and on the circuit diagram, I couldn't find a procedure for their adjustment. It would help if you could find a copy of the TS-530 service manual.

I have for sale two pieces of used Andrew 7/8 hardline for sale. One is around 110' and the other is around 220'. Both sections have the N connectors installed. The price is a dollar a foot and pickup only. I am located in central Iowa. Please email me with any questions. Remove nospam from my email address when replying. Thanks

I'd have to agree with most of your observations...

I am in the southern california area, so yeah I see the lack of packet and even APRS use. In the real world for day to day use, it apparently has no value. Why should I care were some guy I don't know is driving? Do I need to know where there hams are in a disaster? I can just ask them on the radio.

I can basically dump any kind of data I want (voice, telemetry, messaging, file transfers, remote control) on the internet. Heck, I was instant messaging and watching myself on google earth via gps in literally the middle of nowhere, Wyoming last summer (nothing but freeway and a few cows) via Verizon 1xRTT/EVDO. I don't see 1.5MB speeds on ham radio at the moment ;) I have Verizon's EVDO in my laptop, a Sprint EVDO card from work (talk about dual-band!), and a cell phone from Cingular. Oh and an old-school 2-way pager. Other family members have Verizon cellular, and 1 has a 2-way pager on a different carrier than mine. Our main house has 2 electric feeds (#2 to a guest house) on reasonably seperated ciruits and 2 phone lines, 1 with DSL. I maintain a generator/UPS for my computers, refrigerators, microwave oven, and of course radios. We also have a vacation house 80 miles away with its own DSL. That is the only place not covered by simplex ham radio. We'd have to rely on repeaters and quite a distance at that... Or get some HF stuff, but why bother...

So why do I need a ham radio????

Well, cause I expect 80% of that stuff to fail when we have our next large siesmic event. I have a mobile 2/440 unit in my car and the other two have $99 cloned 2m HT's programmed both for repeaters and simplex. So amateur radio does serve as the last backup in case that long list of things all crap out.

However, our family expects to be out of communication during a large event. Our need to communicate really will just be for "health and welfare", just to see how everyone is. I don't expect to have anyone listening on the other end if stuck under a building. One of us will be working at the hospital, one at home, and myself will either be in

school (at a different hospital) or at the local police dept. (volunteer) as soon as I can get there. We know to stay off the phones. "Yes dear, we all felt the same earthquake!"

Our local city fire dept does have a team of amateur radio operators, organized at the county level, which is the only way to go if u want to be successful. They have been used in the past in real conditions. During the fires in so cal, they used them mostly for fire watch patrols in the arson prone canyons around here. During a disaster, they're primary purpose will still be "eyes and ears". There is an HF station at our EOC for talking to "the state OES" but I dunno how that would really be used. They also have sat phones, so unless the chinese shoot us down, I guarantee you the emergency officials will pick that up first. Our local 800mhz trunked system is very robust with multiple sites for each system, with the abillity to run local in failsoft at each repeater site in case the main controller goes away. And don't forget everyone has a "Nextel" lol.

So yeah, I still see ham radio as the last resort. But honestly, I don't expect to use it much during a disaster. I will be doing my job/volunteer work. But I still keep everything charged and tested just in case!!!

As for the future of the hobby, yeah, keep getting kids interested in it. Since they all have cell phones now, it will be a challenge however to find some reason to use these "antique CB radios". I heard a QSO on the winsystem the other day between a local and a guy from Australia and then one from Japan a few minutes later. via IRLP of course... It's this kind of integration with other services that *might* keep the hobby alive. You more creative types out there may have to some up with something new! And no, showing up to a modern school with a dirty t-shirt, greasy beard, Yeasu hat, and 6 radios, speaker mics, and oversized antennas hanging off of your beer gut will not inpress the kids. (Yes, I've seen this!!) One suggestion is to integrate with local public safety and present the hobby in this light; as an adjunct to police and fire. I wish I had more ideas as I think we can still be a valuable resource, but it may not be in the traditional sense that's been the "standard" for the past 50 years.

OK, enough ranting... back to the real world.....

Joey

Mike-

The Radio Shack HTX-10 is nearly identical to the Albrecht AE485S. see
http://service.alan-germany.de/Amateurfunk/AE485S/
for some more information.

If you search the web, you will find a CW adapter for the HTX-10. I
wrote up a mod to add a lithium backup battery to keep memory contents
alive when disconnected from power. (There are mods for the AE485S that
do not work with the HTX-10.)

The HTX-10 was sold at a discounted price after Radio Shack discontinued
it. I don't recall, but it may have been around $49. I've seen them
selling for close to the original price at Hamfests. If it was over
$100, you might find a better rig for just a little more. (Examples
might be the Kenwood TS-520 and TS-130, which are around 20 to 30 years
old now.)

The HTX-10 should work quite well when the band is open. The way things
are now, the band could be wide open but you don't hear anyone. Nobody
is on because they don't expect the band to be open! Learn to listen
for the CW beacons.

Something to keep in mind is that, if the President declares a
national emergency, no one will be able to use ham radio for anything
unless they are a member of RACES. So the decision will be made for
you unless you are a member of that organization.

i was trying to get an order together and ordered all parts from Digikey. I got into discussion with support, and I said the catalog could be a lot smaller and easier to hold if they listed stocked parts. From the very beginning I always had problems with DigiKey with stocked parts. Ordered the diodes from Mouser. Nice that many companies have no minimum orders. That was a big deal years ago.

That, and most of the repeaters, especially on 440, are all
closed/private around here and therefore useless anyway. Of course,
none of them are ever used expect for about 4 of the systems, and
therefore just tie up empty bandwidth so people can feel special about
themselves..

What's up with Santiago pk? Is there a secret society you have to
join first to put a repeater on that mountain? It's the best site in
so cal for north/south comms, yet 95% of the things up there are
"private"... Talk about pretentious...

I was, well technically am still on the county ECS team, but I became
inactive cause no one really did too much. They still do their thing
which is good, but I just didn't have time. Of course being a local
RACES (does that still exist?) member does u no good if a high-level
machine is taken over and you want to use it for 1 minute...

630. Need suggestions for configuring the Ottawa PI packet driver

Newsgroup: rec.radio.amateur.equipment

From: Gregg C Levine <drwho8@att.net>
Message-ID: <lmnf23l45elssfed9gf5mi3e9qc2qpon1r@4ax.com>
Source record: 5349

Hello!
I have downloaded the PI driver kits from both the FTP repository at
UCSD, and of course from the Packet driver kit that Russ Nelson
created.

I also have the KA9Q software, both from his site, and from the FTP
place.

Problem-- When starting the NOS program with its default autoexec.net
file, it complains that the PI driver has an unsupported "type 9" set.
This is with the PI driver straight from the FTP site, not with the
binary from the Packet driver kit.

Can someone supply or point to a location, a known working binary for
the PI driver? (That the most recent KA9Q application won't complain
about.) And while I am at it, also a location for the schematic for
the board that the individual in Ottawa CA built.

I confess that I am not "frocked" that is I do not have my license to
make use of the transmitter functions, I am planning on studying how
the device decodes packets. I do hope to obtain that license RSN.

Hi Greg,
Just to satisfy my curiosity, what is this power supply for? Mouser &
DigiKey have pretty good reputations. My company orders a lot from
both (for prototypes). I prefer to use their online catalogs, because
they show available stock -- you can't do that with a paper catalog.

637. FS - Ten-Tec JUPITER with Extras

Newsgroup: rec.radio.amateur.equipment
Date: 2007-04-21 03:31:47 UTC
From: iamw7gsa@gmail.com
Message-ID: <1177126307.333812.150050@q75g2000hsh.googlegroups.com>
Source record: 5356

We are in the process of down-sizing the house so I am selling some of my HF rigs.

I am selling the following as one package.
""A Ten-Tec Jupiter model 538 - The matching 705 Ten-Tec desk mic - The Ten-Tec model 310 external cooling fan which is installed - A KLM model 09 external speaker - and The original Ten-Tec manual (NOT A COPY)""

The Jupiter is in perfect operating condition. There are a couple small scratches on each side. The front and the top are perfect. There is a small piece of velcro on the top at the rear or the case which can be used for holding something in place. I am not sure what it was used for, but I never removed it. I am the second owner of this rig

. For more information on the Jupiter model, please click on this link. http://radio.tentec.com/Amateur/Transceivers/TT538

I will double box and ship the Jupiter, and insure it for full value. The cost of shipping & insurance will be the actual UPS shipping charges from my zip code to yours. My zip code is 80439.

The Price is $975 plus shipping.

For payment I can accept: Post office and bank money orders. Cashier's checks. Or, Cash (Please send in a registered letter) With these forms of payment I can ship the radio immediately.

I can also accept personal and company checks. These will have to clear my bank which should take about 14 days.

I can accept PayPal ONLY from International buyers with a 3.5% added fee, which is what PayPal charges me.

If you have any questions, please email me at: iamw7gsa@gmail.com or give me a call at 303-674-0510, I am in Colorado (Mountain daylight time).

638. A Kenwood HF rig's "real" frequency in CW

Newsgroup: rec.radio.amateur.equipment
Date: 2007-04-22 18:24:21 UTC
From: billcalley <billcalley@yahoo.com>
Message-ID: <1177266261.605966.106570@o5g2000hsb.googlegroups.com>
Source record: 5358

Hi All,

This may sound like a very silly question, but what is the "true" frequency of, lets say, a Kenwood TS-530S? What I mean is, when it is said that a particular CW calling frequency is exactly "7.040MHz", then should I set the TS-530S' frequency display to 7.040MHz (in receive mode), or to 7.0392MHz (for a display of 7.040MHz during transmit) to be spot-on a designated Calling Frequency? I obviously would like to make 100% sure that I'm exactly on frequency, and not off by 800Hz, when monitoring for any CQs!

Thanks for any clarification,

-Bill

Hi Bill. I will be interested to hear the replies to your question since I have a similar problem with the TS-570DG. When I work CW it seems that stations (as in your example) that are supposed to be on 7.040 MHZ always sound better to me on 7.040.10 MHZ. I seem to be able to work them fine but I always wonder if I should move back to 7.040 for transmit.

Regards,

Pat

Bill is referring to the fact that older Kenwoods display at one frequency while listening and the offset frequency when transmitting (the offset being equal to the sidetone of 800hz). I used to operate a Kenwood TS-130SE when I was new and it took me awhile to figure out what was going on. In this case, one should set the monitoring frequency to read as transmit minus 800 Herz or 7.0392 in the example above.

On the other hand, Pat, your radio is one of the newer ones that displays the transmit frequency at all times (i.e both receiving and transmitting) when in CW mode. Therefore on your radio, the issue could be one of several

things: the default pitch used doesn't appeal to you, the radio is out of adjustment, or something else entirely.

Hi Bill,

It sounds silly, but it isn't.

I don't know the answer with high confidence, but maybe I can help you
to get it.

I "believe" that when you tune in to a station with 800 Hz beat, you
will transmit on exactly the same frequency as the station that you
are listening to. Make sure the RIT is in the middle or off.

You can check it yourself.
Do you have a separate frequency counter (or other receiver)? If so,
try to tune to a source with a known frequency (with the TS530S, for
example a broadcast station or). Now you can compare the actual
frequency with the reading on the TS530S and you know the difference
in reading and actual transmitting frequency of other station.

Now the transmitting case
Press the key (check frequency in use or use dummy load) and read the
frequency from the counter, or tune with the other receiver to find
out the difference in the transmitting frequency of the other station
and your frequency.

I hope this will help you a bit.

I had several problems with adjusting old equipment to make sure that
SSB receive and transmit (carrier) frequencies are the same.

Best Regards,

Wim

Thanks for the info Wim. The TS-530S's actually show you only the RX frequency on the digital display dial while you tune around or sit on a frequency waiting for a CQ, and then -- but only when you transmit -- they shift the dial display (and I assume the TX frequency too) 800Hz higher. Frankly, I had thought most other radios did *exactly* the opposite (I.E.: Their BFO's shifted the RX frequency by 800Hz or so, while their TX frequencies where as displayed on the dial -- but I must be incorrect about that!). But I'm still hoping to understand if it is correct to set a Kenwood to "7.040MHz" on the digital display when listening to the 7.040 MHz Calling Frequency (but it then shifts 800Hz higher on TX...), or set it to 7.0392MHz (for a display of 7.040MHz during transmit with its 800Hz TX offset)? With all the Kenwood rig's out there, you'd think that someone would have the answer -- but maybe no-one has really thought about this? (Hard to believe!!).

-Bill

Did you read my answer??? You have an older Kenwood radio. It displays the transmit frequency only when you transmit. It displays the receive frequency the rest of the time. So set your receive at 7.0392 in receive mode. When you transmit it will then be transmitting at 7.040 as shown by the readout.

NEW radios (including new Kenwoods) display the transmit freq. at all times whether receiving or transmitting.

Cool Dee -- thanks for clarifying that! It was confusing the death
out of me (I've been on the wrong darn frequency all this time too!).

I didn't see your original post on my Google newsreader under 'sci.electronics.design' because, for whatever weird Google reason, your response didn't cross-post).

Thanks again!

-Bill

Hi Bill,

You can think of the displayed receive signal as that of a signal that is *zero-beat*. In CW mode, the pitch increases as you tune up-frequency from the zero-beat frequency. 800Hz is the defacto "standard" for Morse, which is the difference in your rig's carrier oscillator frequencies for receive and transmit. While in a QSO, if you find a different pitch more acceptable, use your RIT (and IF Shift if necessary and so-equipped). RIT keeps QSOs from walking up/down the band. hi!
As noted above, the carrier oscillator frequencies should be different between receive and transmit, but in *only* CW mode. In all other modes (LSB, USB, AM, FM), they should be the same between rx & tx.

Vy 73,
Bryan WA7PRC

PS: Dee's response wasn't crossposted to sci.electronics.design.

647. Icom IC-P7A covers UHF aviation band (receive-only, obviously)?

Newsgroup: rec.radio.amateur.equipment
Date: 2007-04-23 20:16:29 UTC
From: Heath Roberts <htroberts@gmail.com>
Message-ID: <1177359389.864917.221190@d57g2000hsg.googlegroups.com>
Source record: 5367

The manual for the IC-P7A says that it covers 495 KHz to 821 MHz, in both AM and FM modes, but doesn't list any sensitivity specs and isn't not real clear on how one would tune a frequency from 225-400MHz in AM.

Does anyone know for sure whether this radio will receive in the (US) UHF aviation band?

Thanks,
Heath

Another consideration, particularly for VHF operators, is what happens when you switch from SSB to CW. For example, the TS2000 says that it always displays the carrier frequency regardless of mode. If you are on SSB and need to switch to CW becaue you have a weak signal look at what happens. If the displayed frequency is the carrier and does not change when you change mode you are now transmitting zero beat with the receiving station and he won't hear you. You actually have to tune off a bit (by the sidetone amount) so the receiving station can hear you. The TS2000 actually has a menu choice to allow the frequency to automatically make this correction if you wish.

649. S-meter circuit HQ-145

Newsgroup: rec.radio.amateur.equipment
Date: 2007-04-23 23:40:01 UTC
From: Dave <W1MCE@comcast.net>
Message-ID: <_qmdnZjORspQ3rDbnZ2dnUVZ_j-dnZ2d@comcast.com>
Source record: 5369

The circuit as designed is subject to significant drift.

Has anyone found a mod or knows of a link to a mod? I prefer NOT to get into matched 6BA6s.

I am a retired EE and before I jump into the circuit I was wondering if someone jumped in ahead of me.

I have posted a similar request to boatanchors.

650. FS - SG-2000 HF SSB/CW/AM 150 Watt Transceiver

Newsgroup: rec.radio.amateur.equipment
Date: 2007-04-24 04:11:29 UTC
From: wmtell@gmail.com

Source record: 5370

We are down-sizing the house so I am selling some of my HF rigs.

I have two of these and I am keep one as my primary HF rig, and am selling the other.

It is an SGC model SG-2000 ADSP PowerTalk HF 150 watt Transceiver. It is operates SSB - CW & AM.

This unit covers 2Mhz to 30Mhz on transmit and .5Mhz to 30Mhz on receive. This is continous transmit and receive coverage. It is ideal for MARS work.

The power range is selectable from 50 watts on low power to 150 watts on high power.

The ADSP stands for Adaptive Digital Signal Processing. You can read more about this and the SG-2000 on the SGC website: http://sgcworld.com

This unit is certified for Marine use as well as ham use.

It appears to be in normal working condition. I used it this afternoon on 40 meters. It comes with the SGC mic, the SG-2000 book (240 page book), the ADSP PowerTalk book and the SG-2000 PowerTalk quick start card.

These radios are built like a tank. They are very sophisticated and will equal if not out preform any of the Japanese Ham radio units.

These are used primarily for Marine, Government, Commercial and Military communications.

If you have any questions, please contact me.

I will ship this radio Internationally.

Shipping will be actual cost from my location to yours. My zip code is 80439.

If you have any questions, please email or call me. I am located in Denver, Mountain Daylight Time zone. My email address is: iamw7gsa@gmail.com

The price for everything is $975.00 plus shipping and insurance.

As with all electronic equipment, this item is sold as is but is quaranteed not to be DOA.

Click here to see a photo of the rig: http://imagehost.epier.com/44487/sg-2000-1.jpg

Thanks, Bill

After a 20 year hiatus from activity, I'm getting the shack going again. I dusted off the old Icom 22S and discovered no one could hear me because the rig doesn't have sub-audible tones. Even the old simplex watering holes are using tone squelch.

Is D-STAR going to be the next 'tone squelch'? Should I get a D-STAR rig to stay ahead of obsolescence, or would it be a waste of money?

655. How to set/hack Sony car stereos from Japanese tuning to US tuning?

Newsgroup: rec.radio.amateur.equipment
Date: 2007-04-25 06:10:45 UTC
From: gggoattt@aol.com
Message-ID: <1177481445.355315.314700@t38g2000prd.googlegroups.com>
Source record: 5375

I need to set the tuning on my Sony car stereo from Japanese to US tuning; service manual?

Hi there...

I was wondering if someone has any idea if ANY of the Sony "WX" series of double-din car stereos (japanese or usa models) can be "hacked" so that their tuners can be changed from japanese fm tuning to us/uk or world band tuning and vice-versa???

I recently purchased a Sony WX-C88REC double-din cd/md recorder from eBay. This is a japanese market deck and is factory set for japanese fm tuning. However, the design and physical layout of this deck is very similar to other US models (such as the WX-4500X and the WX-C5000, as well as the WX-C55 which looks nearly identical). I'm nearly convinced that there MUST be some way to hack the japanese models so that their tuners can be "switched" to us or world tuning. I find it difficult to believe that Sony would design two distinct different tuner hardware modules for japanese and american versions. Problem is, I have no clue HOW to "hack" this feature. I don't have a service manual for ANY "WX" series stereos, but I'm thinking that it may possibly be an option in a service manual for ANY of the "WX" decks. Again, I find it difficult to believe that this isn't "set-able" some sort of way.

Does anyone out there have an idea? Does anyone out there have ANY service manual for ANY "WX" series Sony stereo? Or, for that matter, does anyone have a service manual for ANY Sony car stereo that addresses in ANY way setting the tuner for different bands?

I realize there are adapters available to transpose the FM frequencies. I've used them before, always with poor results (stations usually overlap and are weak). I mainly record off the radio with my MDX-C800REC's in my other cars, but always thought it would be cool to be able to dub cd's quickly in-dash digitally without having to mess with a cd changer. But, radio recording is my primary concern...and the adapters don't provide the quality I want for recording.

PLEASE help ANYBODY if you can steer me in the right direction or help in ANY way. If anyone has ANY Sony service manuals for ANY stereo, please let me know...perhaps if setting the tuner IS an option, maybe it is a standard procedure to set ANY Sony stereo's tuning in a similar fashion.

Thank you VERY much!
Jeff

Ken, this is a great idea!

From the manual on your web site, it appears that the audio channels
are brought out to the DB25 connector and that the baud rate could be
jumpered for 9600 thus making your board compatible with the Harris
RF-352 (C-11329/URC) Remote Control Unit. (At least in RS-232 mode,
obviously two/four wire or RS-422 would not be supported.)

Is that correct? Is your board compatible with the Remote Control Unit
(with those restrictions) or is it intended for use strictly as part of
a software solution?

Either way, this is still a great idea and it must have been a
significant engineering effort. Very commendable -- thank you!

Thank You Hank.

I don't know. Maybe someone in the MARS community has a Remote Control Unit to test it. If the
C-11329 can get by with RS232, it should work. It looked to me like Harris used the 300 Baud Audio
Modem to connect various units like tuners and amplifiers. I used four of the RS422 pins for RS232
Handshaking and there are no provisions for the Telephone Modem. I also left out the connections
for AUX TXD and AUX RXD because they don't go anywhere. We found that some of the commands did not
work when the jumpers were in the non-ADAPT baud settings. The radio would return its status and
would change frequency but there was no control of Mode or AGC. There are also differences in
Command vs Response between the V601C and V604M EPROMs. Our intended use is as a CAT opertion.

Thank you for your comments.

==========
The likely reason is that the FCC considers the device a CB power
amplifier . Lately this federal agency has stepped up its combat against
the sale of these illegal amplifiers.

Some time ago a US road side truckers-centre selling illegal devices
was heavily fined.

Considering his retail outlet, Ebay, has blocked every attempt to sell
the product, His sales has probably been rather low. Thus not
profitable. Also the fact that the amp is rather low powered for most
"competition" CBers and with the plethera of older 100+ plus ham rigs
out on the market, there is not a large market for his amp. Who needs
an five watt radio, and a 100 watt amp to drive a big competion amp
when you can get a Kenwood TS440 or similar and use it.

I have and use the RF-352 remote and will test it with this board. (I
have one board and two sets of the V604M eeproms on order.)

Assuming it can be made to work, my intention is to use an RS232 A/B
switch to switch the RF350K between computer control and the RF-352
controller.

I'll be happy to post my results..

I just listed a nice, clean, working Wavetek Sweep Generator
on e-Bay. 1 - 1,000 MHz coverage.
Got an HP 8350 so this one is surplus.

Take a look:

I'm looking for these Ten-Tec items for my 546 Omni-C:

#217 500 Hz CW filter
#218 1.8 KHz SSB filter
#280 power supply with DC power cable
#243 remote VFO

I also need pages 3-3 and 3-4 from the owner's manual.
Mine is missing those two pages. A good clear scan is
fine, in any "normal" IBM PC format (PDF, JPG, etc).

Thanks and 73,
Dean K5DH

I think solar storms would prove to be a far greater danger to both
satellite invigilation and communications. Just one major X class
solar mass ejection pointed right at us and it's going to get mighty
quiet down here. The GPS signals have been interrupted a couple of
times and we weren't even in a direct path.

Its long past time for me to replace the Lithium CR 1/3N memory battery
in my old FT-757. I am considering just removing the old one and tacking
in a pair of wires which will run to a nearby Lithium AA cell in a holder.
Can anyone think of a reason why I wouldn't want to do this, assuming
there's a reasonable place to mount the holder?

Rule number 1. If it ain't broke, don't fix it.
Is the AA cell the same volts as the existing battery?
Does the risk of the modification outweigh the rewards?
What's gonna happen when you install the cell backwards?
Before you answer and tell us how smart/careful you are
...nobody ever said, "hey, I think I'll
put this in backwards..."
As I recall, there ain't much room in there.
Rule number 2...see rule number 1.

The radio/battery is 21 years old. You figure it out.... <<grin>>

> Is the AA cell the same volts as the existing battery?

Yes.

> Does the risk of the modification outweigh the rewards?

No risk. I've spent 35+ years working on far more sophisticated gear
than this....

Thanks for the info. I see Radio Shack carries this battery, too.
Problem is, Yaesu's version comes with spot-welded tabs. Now that I'm
retired, I'm lazy and don't want to go to the extra effort in removing
the board the battery is on so I can do a proper job of unsoldering it...
I intend to snip the battery tabs from top side and just wire a new
(wired) substitute battery to it. Also, I don't like soldering to the
stainless steel type cases on such batterys as the one suggested above,
which is why I'm considering the option I posted here.

Thank you again, though.

Ed

All,

Our Signal/One MILSPEC 1030 transceiver is now for sale on eBay:

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=230123960885 .

This is the 150 Watt version. I recently made several QSOs with it, on all the bands that were open at the time, so we believe it to be completely functional and know of no performance problems. It has only minor scratches on the sides and top, and comes with the manual, AC power cord, and 12 VDC power cord.

Sales notices are supposed to be upbeat, but it's difficult being upbeat when you are selling such a wonderful rig!

73,

Ed Callaway, N4II
Motorola ARC, W4MOT

I just heard that a K3 is about to hit the market. I put together the K2 last year. IF it lives up to expectation, it could find a place in many many shacks. A true rival for top-end Yae-Ken_Com? Cost is under $2000 I think...it comes as a kit or pre-assembled.

What do you think?

Oh Ed......my...my...my.....

Only $2000 for an OLD obsolete HF rig. Anyone can do better than that with a phone call to a dealer on a NEW rig.
Your ad says "No reserve" but it STARTS at $2000........uh-huh....That's called a "Reserve" Bunkie.
You say it works perfectly, but NO GUARANTEE once it leaves your hands.....yeah right....
"Such a wonderful rig"...oh please....give us SOME credit......were not THAT stupid.

Typical HAM radio operator....Wants to STEAL it when HE buys it..then wants "Top Dollar" for it when he sells it.....

Have you checked the current price of an OLD, obsolete 1956 Mercedes
Gull Wing these days? Just because it is old, doesn't mean it isn't
worth a great deal of money. Like a new ham radio, you can buy a
brand new 2007 Mercedes today for a lot less than the 1956 would
bring.

The "gullwings" were a classic....the Signal/Ones are not. Read the CURRENT reviews...
They are a short run trouble prone pain in the ass. Support was poor when they were in business...non-existent now.
Would you rather have a Heathkit SB-104 instead?

No, I would rather have a Signal One. The reviews you referenced
don't support your view at all. In the first one, the guy was trying
to get an Icom 781 converted to a Signal One. He got hosed. The
radio up for auction has nothing to do with that conversion other than
it has the name. In the second one, the guy loves them. In my
opinion, it is a classic radio in the truest sense of the word.

I don't even get how you can turn an Icom into a Signal One.

But obviously for collecting purposes, the Signal One is a standout.
I can't imagine that many being made, so that makes it collectible.
It was a great leap forward when it came out almost forty years ago.
Most rigs were still tube based, and the Signal One comes along all
solid state except for the PA, and featuring things that would take
some years for the competition to put into equipment. It was also
an American company, when the balance was shifting away from those
and to Japanese radio manufacturers.

It's always interesting to do some math when looking at old things.
The Signal One came out in 1969, which is 38 years ago. Go back
38 years before 1969, and that would be 1931. Very few people were
using rigs from 1931 in 1969 (though oddly some of the early Signal
One ads did have a comparison along those lines, and at least one
ad used 1920 style typeface in the headlines), and some might consider
the 1931 rigs collector's items in 1969 (though, there seemed far
less interest in collecting old radios then than now).

Hi from Ken in the UK,
It looks really great and I am sure it will be a winner for "ELECRAFT".
Just one thing though, it comes fully assembled or you can buy it in modular form, no kits has such though.....cheers, Ken, G4KIR.

I remember very clearly the night a new Signal One was brought to our
radio club at General Dynamics for a demo. It was simply amazing. I
can't imagine any other ham radio ever manufactured that created such
lust for ownership. Of course the price made it only a dream for most
of us,

This is an extremely high quality 150 watt HF SSB, CW and AM Transceiver for Marine or Ham use. This is the ADSP1 model. It tunes continusely from 2MHz through 30MHz on both transmit and receive.

Click on this link to see all of the current model specifications of the ADSP2 model which are just about identical the the model I am selling:

http://www.sgcworld.com/Publications/Brochures/PowerTalk.pdf

Click on these links for picture of the SG-2000 PowerTalk I have for sale:

http://imagehost.epier.com/44487/sg-2000-1.jpg

http://imagehost.epier.com/44487/sg-2000-2.jpg

http://imagehost.epier.com/44487/sg-2000-3.jpg

The radio is in Excellent condition both cosmetically and electronically. It comes with the SGC mic and the manuals.

I have two of these. I am selling one. The other one is my primary HF rig.

The price is $950.00. Plus insurance actual UPS shipping costs from my zip code to yours. My zip code is 80439. Yes, I WILL SHIP INTERNATIONALLY.

For payment I can accept company or personal checks, a cashier's check or a post office or Wal-Mart money order.

If you have any questions, pleas contact me at iamw7gsa@gmail.com or call me at 303-674-0510, I am located in Denver.

Thanks for looking,

Bill

I'm looking for a Mobile/Base FM rig that will cover 6M, 2M and 440 MHz. I see the Yaesu FT-8900R fits the bill, but are there any other rigs out there?

BTW, how common is 6M FM anyway? Could I expect some interesting DX in FM mode when 6M opens up?

Rigs like the Icom IC-706 and IC-7000 come to mind. These give you
those bands as well as HF. The advantage to radios like this is that
you can operate SSB on 6-meters. I think you would be much better of
with SSB than FM if you are interested in DX.

FM is not allowed on 6m in many places. If you are looking for that rare east-west DX outside of the U.S. you find that although your signal reaches there, no one can reply.

Icom PCR-1000 Communications Receiver
Computer Controlled
Receives 100 KHz. to 1300 MHz.
Does 9600 baud packet.
There's even a program to connect to your
sound card to do trunk tracking.

Comes with a Palm PDA
to run it portable

Or if you'd rather use a full PC

And there are other programs with more screens
Scanning capability
Spectrum Analyzer-type Displays
Programs that run on a PDA, DOS
Windows...

This is a most excellent receiver with endless
possibilities using your computer.

Serial number 2046
It's reported that serial numbers below
3500 had frequency modification abilities
that the FCC didn't like. But I wouldn't
know anything about that.

SPECIFICATIONS
ï¿½Frequency coverage (MHz)
U.S.A. : 0.010000ï¿½823.999999*
849.000001ï¿½868.999999
894.000001ï¿½1300.000000
Europe : 0.010000ï¿½1300.000000*
*Specifications guaranteed 0.5ï¿½1300 MHz only.
ï¿½Receive system : Triple superheterodyne
ï¿½Mode : WFM, FM, AM, SSB, CW
ï¿½ Frequency stability : ï¿½3 ppm at 1300 MHz
(0ï¿½C to +50ï¿½C; 32ï¿½F to +122ï¿½F)
ï¿½ Frequency resolution :1 Hz (minimum)
ï¿½ Power supply requirement :13.8 V DC ï¿½15 % for receiver unit;
or, supplied AC adapter
(negative ground)
ï¿½ Current drain (at 13.8 V DC)
Power ON (PC power OFF) : 0.1 A
Max. audio : 0.7 A
Standby (squelched) : 0.6 A

ï¿½ Usable temp. range : 0ï¿½C to +50ï¿½C; +32ï¿½F to +122ï¿½F
ï¿½ Intermediate frequencies
1st : 266.7 MHz
2nd : 10.7 MHz
3rd : 450 kHz (except WFM)

You are correct. The FT8900 would fit that bill. A number of years ago, Standard (amateur) was bought out by Vertex yaesu. One of the absoluetely BEST rigs that has ever been manufactured and designed for ham use was the Standard C5900. I own 4 of them. It covered 6m, 2m and 70cm FM. They are not made anymore of course, however, the FT8900 looks very close in appearance to the C5900. From what I have heard though, the FT8900 does not have the receiver performance of the C5900.

My recommendation, if you can find one for sale (they show up on Ebay from time to time), is to get a C5900 that is in good condition.

I need to cut a square hole (1" x 1.25") in a standard plastic electrical box cover ... in this case, its the type with one hole for a TV jack. The new square hole will be to mount a chassis jack for Anderson Power Pole connections. (Powerwerx HS-4).

Can anyone advise of the best method and tool to do this? I am concerned about cracking the plastic if I don't do it right.

Melt the hole using a;
1) wood burning iron with flat blade
2) nichrome wire with power supply

Then using a fine file, trim to fit..

Thanks, Tom. I'd take you up, but I already have a "nibler" tool...
used primarily for thin steel and aluminum chassis work. I am pretty sure
it would be risky to use on plastic and possibly crack it.

Ed

Now that does sound like it would do the job.... just don't have any nichrome wire in this little town I'm in. Maybe I'll come up with an alternative similar to this for this project. Tnx.

It depends on the plastic. I used a nibbler on a Radio Shack plastic
box, and it was fine. It likely will crack hard plastic, but a softer
one will be fine.

You don't need to use a hot iron, you can drill plastic.

"Dremel tools" and the like are good, using the cutoff wheels. The
problem is that the mechanical arrangement limits the usefulness. Though,
they now have attachments that puts the cutting wheel at 90 from the shaft
and that looks pretty good for this kind of work.

Plastic isn't really so different from metal. People used to drill a bunch
of small holes close together around the perimeter of the area they wanted
out, and then it was relatively easy to break down the space between them.
Then use a file to smooth it out.

Of course, that trick was used if you didn't have a hole punch. I suspect
those hole punches would work on plastic too, if you were lucky enough
to have one of the right size.

Oh, the non-believers....
Well, anyone that knows anything about the Milspec 1030 knows that the
cx7 just isn't the same rig, and neither is the 1030ci.

The 1030 was a true mil-spec, hardened and wonderful radio. It operated
without fail over considerable range of conditions, and the remaining
examples probably do so even today. Built like a battleship inside,
with individual milled aluminum compartments for each subsection, it
didn't suffer from many of the maladies of later integrated rigs. For
the uninitiated, the 1030ci was an attempt to cash in on the superior
function and longevity of the original 1030 by taking a commercial 781

and "hardening" it. I am not aware of many individuals that actually loved the result like those that owned the original 1030. I owned one of the original 1030 radios with the high power option and multi-color led display and loved it, though succumed to it's popularity on the collector market and sold it around 5 years ago to a fellow on the east coast. To this day, I wish I hadn't, though it is hard to fault the icom 746pro and 756ProII I now have that were paid for by the proceeds from the sale of the 1030... If I thought I had a chance of winning the current auction with what's in my radio fund, I'd be in the bidding right now, just to have another one!

If you're trying to make waves because of a few bad seeming comments about radios that aren't even the model for sale, then just pleae go away. If you actually truly have experience with the original 1030, then come on, and provide just what you think was wrong with the one you had....

Thanks

Hmmm.... just had a thought... since I am only working with the
inexpensive plastic covers for electrical boxes, I'll just use an extra
outlet cover I have on had for testing. I have both a nibler tool, and
a Greelee chassis punch. Could use the chassis hole punch to just create
a large hole and file out the corners for square, I suppose. Will try
later today.

Mark out the required hole and then drill a series of 1/4 inch holes
inside your marking. Use a needle file to break out the waste and a
small flat file get the hole to size. Ten minute job in plastic.

Charlie.

Anybody happen to have the details of the dipper coils for the MFJ-259B Antenna Analyzer? Mine have become lost in a garage/workshop cleanout that went awry.

Need number of turns, coil diameter, coil length if possible. Think I can remember the rest of the details well enough to rebuild them.

Thanks for your help

hi ed,

Home Depot has Leviton Nylon blank covers
in white, medium sized about 88 cents a piece.

Very flexible and you can tool it, the regular covers will crack
once the adapter is mated to is and coax is tugged.

Just got back from NEAR-Fest in Deerfield, NH, and while I have to say it ain't no Hosstraders (yet), still it was a very welcome event and I enjoyed it, and it has the potential to grow in the full Hosstraders tradition.

Speaking of the "Hosstraders tradition", I was just wondering if anyone knows where the profits from this event are going.

Hosstraders was always held to benefit the Shriners Burn Center (or the Shriners organization in general, I don't recall which), and from all reports resulted in a large check to that organization twice a year. I'm sure they will miss it.

Anyone know which charity (if any) will benefit from NEAR-Fest?

Pre-drill round holes in the corners of your square hole. That way, any
cracking will stop at the corners.

That's what I ended up doing to the hard, brittle, faceplate I was using. Drilled the holes veeeerrrry slowly, with no resulting problems. Then I used my fine toothed coping saw to cut out the square hole for the Anderson Powerpole chassis mount jacks. Also put a BNC antenna jack on the plate. The whole thing will be my HF radio power and antenna connection in my motorhome. It is now done, looks nice, and should be very functional.

My thanks to all who replied on this subject.

Hi,

I have a Daiwa DK-210 CW keyer. I haven't used it in almost a year. Today I went to turn it on, and it wouldn't work. This was running off 13.8vDC (there is a connector on back for 13.8vdc input). I opened it and found it can also be run off 9v battery. I connected a 9v battery and it appeared to work, until I plugged it into my radio. My bencher paddle works with it, but it doesn't key the radio. I checked the two keyer output leads on the back of it and found no voltage coming out of them. I don't know what went wrong or what to do now.

What coils?

My MFJ-259B has all the guts inside!!!

MFJ makes plug-in external coils for the MFJ-259 that converts the
analyzer into a grid dip meter. They attach to the bnc connector.

Yep!!! My MFJ-259B has lots of guts too.
The dipper coils are used to make the Analyzer operate like a grid dip meter.
Extremely useful for tuning traps, tanks, etc. They are an accessory to the
Analyzer; I think the part number for them is MFJ-66.
There are two coils in the set, one for 1.8 MHz to 50 MHz, the other covers 20
MHz to 170 MHz.

Cheers!

I'm sorry I can't be more helpful, but someone pointed me to a German
version of the Manual that a ham wrote for it. I have forgotten the URL. :-(

It includes instructions that even a non German reader can understand
for making a set of coils that far outperform the MFJ ones. They
can be made for a few dollars assuming you have a source for small
white PVC pipe, BNC connectors and enameled magnet wire, none of which
I can get locally. :-(

Geoff.

Does your rig work with a straight key? If not, the problems in the radio,
or it's not really in CW mode.
You would be unlikely to see a voltage at the output since the keying
voltage comes from the radio. The keyer just uses a relay or transistor
switch to short the two lines from the transmitter. Since the keying lines
may have a positive or negative polarity, the keyers with transistor
switching have plus and minus outputs - make sure you use the right one. If
you need to check it out, use the ohmmeter to check for resistance change
and again, it is polarity dependent.
You did mention a voltage change, but don't worry - the keyers I am familiar
with run whatever they get through a +5v regulator so that probably isn't
the problem.

Solved the problem. For some odd reason the power jack on my keyer
has the polarity reversed (pos on outside, neg in center). I had
forgotten it was made that way. Switched polarity and it works fine
now.

Thanks..
Doug

This was discussed at the prize drawing at the end. First, the want to
build up enough of a reserve so they can still have another hamfest even
if they get two washouts in a row. After that, they will be
contributing to ham radio related causes. They plan to post all the
financial info on the web site once the accounting is complete.

==========
Assuming that these dipper coils are connected to a PL259 plug for
connecting to the MFJ259B 's SO239 socket , it should not be too
difficult to homebrew the coils .....I'll have a go at that.

Yeppers!!! I surely do remember the PRM-10. Almost bought one at a hamfest a
few years ago, but it looked like it had been through just about every battle in
```

WWII, Vietnam and Desert Storm.

They were good instruments; I used them while I was in the Navy as an ET during the 60s. I found them to be quite useful while overhauling old comm equipment while I was aboard the USS Vulcan (AR-5) during that period. Got a tremendous amount of experience on that ship.

Cheers!!!!

It also might not be obvious to some people but often an organization will have to pay rent to use some space for events like a hamfest. There may be other fees-costs, too.

This is not to say that the question could also be motivated by a genuine curiosity about whether anyone inside the club/sponsor might be benefitting in some preferential way that might be hidden from the average person. Sometimes these are acceptable, sometimes not. One example I know from the past, in a couple of clubs, had it that the raffle winners always turned out to be all of the club officers. In another club I was once in, it was interesting to learn that all of the club's radio gear (SSB HF transceiver, and a bunch of other stuff) was "stored" at one

member's house and was always used during all of the contests by the contest-freaks in the club. "That's the way we've been doing it for years" and no one dared to openly ask about this but there were private whispers about it. But, its _my_ dues and the dues of the others that is subsidizing the interests of a very minor fraction of the membership. Club members might want to pay attention to how annual finances are discussed at meetings; do they go into depth or gloss over things?

Just a couple of things for people to think about.

The organizers put up the cash.

The organizers assumed the risks.

The organizers paid the insurances.

The organizers signed the contracts.

The organizers did the work.

There is NO REQUIREMENT that NEARfest be charitable.

If there are profits, the American Way is that the people who put up the
original cash have the right [RIGHT] to return on investment.

What's your problem?

Need a little info please.

Have a Yaesu FT-990, no service manual. The light on the meter is dead.
Anyone ever change out one of these bulbs?
Is it a major undertaking or just minor surgery? Have changed a couple of
"grain of wheat" bulbs in dual band mobile radios before.
Just thought I would ask before tearing into the thing. If it is a real
major operation will send it off, other wise will dig in and do it myself.
Also, if someone has the service manual, perhaps you can pass along the part
number for the bulb, assuming it is a bulb and not a back lit meter of some
sort.

The USS Hornet Amateur Radio Station has aquired several Harris RF-287 Remote Control boxes. I
believe these were used by US Navy Ships for remote speaker-handset stations. I don't know what
type of transceivers they were used with. I haven't found any information about them by googling.
I am looking for a schematic. The box is about 4in. high by 6 in. wide by 4 in. deep and contains a
speaker, audio ower amplifier, power supply regulator, two relays, two small audio transformers, a
switch and a volume control. Connection to the transceiver or patch panel is through a 10 pin MS
connector. Does anyone have a schematic they can share before I have to trace it out? Thanks and
73.

It is a 12v lamp according to schematic,and you would be much better off
replacing it with a led and resistor...

FT-990 "Technical Supplement":

Exploded View (Front Panel Assembly):
Meter Lamp 14V 150mA, Q1000075. If I interpret the drawing correctly,
the meter lamp goes into fuse holder P2000003.

Pilot Lamp Replacement:
Disconnect all cables, remove top and bottom covers.
Remove 7 screws from the edges of the front panel (2 bottom, 3 top, 1
upper left, 1 upper right).
Loosen 2 remaining screws at the lower edge on each side.
Fold front panel forward and down to access the inside.
Remove 2 screws in the lamp reflector.
Remove reflector to access lamp within.

Hope this helps!

73, Markus HB9BRJ / AE6MG

LEDs tend to have a very narrow dispersion angle. A friend (service
'mangler' for a pro-sound company) gave me a tip: file-off the lens of the
LED.
If you want to stay with grain-of-wheat bulbs, and can't get the OEM units,
you can find them at well-stocked hobby stores. To make them last longer,
you can use a constant-current source (LM317L, etc) to limit the in-rush
current. You'll lose 1.21V across the '317, which may still be acceptable.

On a Motorola GM350 4 channel is there a way I can key the radio to
transmit through the microphone socket ? I know pin 6 is the PTT line
is it a case of shorting 6 to 0v ? The microphone has a circuit in
it ! I dont intend to use the fist mic and want a reome way of
putting
the radio into tx.

hi,

I'm trying to assemble a wireless network between two computers. The
maximum range is 300m. All the network will do is transfer data from a
GPS plus an additional 34 bits of data from one computer to another.
Can anyone recommend a cheap, easy to use product? Preferably
something that connects to the USB or serial port.

thanks,
Jon.

Pcmcia WiFi cards with external directional antennas, or USB WiFi dongles if line of site, or better yet, usb/ethernet WiFi game adapters with highly directional external antennas... Easily do-able for under $100.

Thanks for the quick reply. Are there any specific products you'd
recommend? I'd rather not utilize directional antennas as one computer
will be mobile and although it too will have an GPS having a
directional antenna means I'll have to move it in the right direction.
Is RF a better solution?

Jon.

You specified between computers, So, surplus wifi adapters with the drivers
are found cheaply most anywhere...
What could be much easier, as Windows and most all Linux OS have all the support
built in..

WiFi is RF, it's just how the data is transfered.

Use a high gain vertical whip (7-14") high, 3-9 db gain on the mobile.
The antennas can be any type of high gain depending on your particular
requirements.... A good setup would be a matched pair of pcmcia card to
high-gain vertical for the mobile, to either the same on the fixed, or on the
fixed a good WiFi router with high-gain antenna, all of the same manufacturer.

I use the Buffalo WLI-CB-G54HP card with external 7db mag mount vertical,
talking to a Buffalo WHR-HP-G54 WiFi router with a 7db external vertical,
and have gotten over a mile line-of-site data. Total cost was just under $100
for all a couple of months ago.. I wouldn't be surprised if it is less now..

What is the latest thinking regarding cleaning populated circuit boards. Such as the motherboard in a computer. Many of the things we used in past years are no longer available for environmental and health reasons. I'm thinking some liquid dish washing detergent in warm water applied with a paint brush, followed by thorough drying before re-assembly. Any better ideas?

I still use isopropyl alcohol .. without additives.
Many drug stores.

Have you look at WASSCO (based in California) -- as your cleaning source?
Excellent store/retailer/distributor for soldering/electronic assembly,
production and rework supplies.
http://www.wassco.com/

Elecraft uses and recommends for their kit builders, as well.

HRO in Denver area.

Techs that I do know in area -- have a backlog of repair work for over 8
weeks
(go figure -- finally people are emptying their closets of broken radios to
sell -- now that new NC amateurs want cheap equipment. OF course, so are
just emptying the closet onto eBay,

This would probably be best for a really dirty board. Some use dishwashers. It
even dries them. For sensitive circuits, water can seep into components
and can take a long time to fully dry. Baking is sometimes necessary
if you need it right away. For small areas I use pure alcohol, but the alcohol
attracts water vapor and creates water droplets. I make use of the heated
blower tip on my Weller station to blow around components and down the board.
Alcohol is not a good wash for some things like orange juice
or Coke.

Thanks Greg. I have also found that alcohol is not the greatest for
cleaning boards, although it works good for cleaning flux residue
after soldering. The problem I have always had with alcohol over a
large area is that is leaves a film on the board that looks messy.

787. Antennas too close for comfort?

Newsgroup: rec.radio.amateur.equipment
Date: 2007-05-20 16:18:09 UTC
From: "Bob D." <bobmgtd@insightbb.com>
Message-ID: <BbSdnQ-F-P076c3bnZ2dnUVZ_g-dnZ2d@insightbb.com>
Source record: 5207

I'm planning on putting up a Diamond V2000 (6m,2m,70cm) on a side arm with the apex of an inverted Vee HF dipole hanging underneath. The two rigs these antennas go to, overlap on two bands - 10m and 6m. With the antennas in such close proximity, is there any danger of one rig 'blowing out' the front end of the other?

My Kenwood TS870 is drawing too much current. At 50W CW output it is drawing 20A. If I go for 100W it just keeps going up and kills the supply at 25A. Specs say that it should take no more than 20A at 100W.

This excess current is when the rig is fed into a dummy 50 load as well when into different antennas when matched to 1:1. The current varies slightly band to band but only by a couple of amps or so. One clue: on 80M I can detune the external tuner antenna cap (to 2:1) in one direction and the rig current can be brought down to 14A with the power out staying at 50W. Under this condition I can then increase the drive back to a current reading of 20A and get 100W. I can reproduce this effect on 40 and 30M but to a lesser extent.

It has 2SC2879 finals. Is this a final problem? I don't have much test equipment or expertise but I suppose I could change the finals if I had to. Actually 50W is quite adequate for me (only 3DB down) and I have been using it this way for quite some time with no noticeable differences in the quality of my operation. Still it bugs me as to what is causing this excess current.

>Very expensive

When I bought the TS870 in 1995 it was expensive, I think around US$2500. But I doubt it is worth anything like that today.

>classic radio, to "tinker with".

If the TS870 is a classic then I'm more ancient than I thought. My idea of a classic radio has the name Collins, Johnson ect on it. Maybe even my old Heathkit DX-20 qualifies.

>I don't let my nephew (learning) touch my classic car --

I don't blame you not letting your nephew touch your classic car. But don't you touch your classic car?

>but then again maybe it has no value to you

The TS870's only value to me is in fun. And I think I have had as much fun playing around inside it recently as I do using it.

>and you are have the money to buy a TS2000.

Well I could buy a TS2000 but then I would be in the same position I am now someday.

>Service manual

I have the service manual.

>Give Clif a call at Avvid

One thing I've never done is to have someone else fix my ham gear. If I can't fix this I'll modify it. I've already figured a way to feed the TS870 VFO output to feed a set of tube finals (tube stuff I can fix). Some would be appalled at that idea. I call it hamming.

Thanks for your suggestions.

804. no audio on IC-706

Hello,

I'me Peter ON4HP from Diepenbeek Belgium.
Maybe, you could help me...
I have no audio on my Icom 706, no audio at the original speaker and
also to the external speaker, but sound is ok on the headset socket
on the face of transceiver.
the switch speaker/phone on the back of the display seems to work
(audio up or down on the phoneconnector).
Do you know a way to repair this?
I've noticed that there is a relay which switched between speaker and
phones.
When i put a connector a little bit in the phoneconnector the relay
switches and i have audio...
i've changed the internal phoneconnector but still the same...
Who can help me? please...
Thanks in advance

Geez Doug I have had an old IC751 for years and did'nt even know it had
a memory scan on it so I took close look at mine and yep it shows a
scan button right above the MIKE gain control. It scans on the stuff
in the Memory chnls (1 thru 30) if I recall correctly. I thank you
for bringing that to my attention

Licensing requirements have changed many times through the years. Recently
the big change is to remove the code requirement. So what? It doesn't mean
new licensees CAN'T or won't use CW, which is all none of your business.

You should enjoy your privileges and let others with different privileges
enjoy theirs. You were not given any ARRL or FCC sniping privileges with
that Extra.

The "frequency mode" scan functions under control of memory channels 1 & 2,
when both of these two memory channel frequencies are within the same
band ------ and the selected/activated vfo (VFO A OR VFO B) is also tuned to
this same band, repetitively scanning downward betweem the high frequency
amd the low frequency memory settings in memory channels 1 & 2..

My 751 continues to scan after the squelch is activated and stops when the
squelch is next closed.

Hope this may help.

> Think 6GF5 and a typo?

It is a good question, though. From the advertisement,
it is implied that what is being sold is an "enhancement"
for your CB radio.

If it is simply a NIB 6GF7 tube, then all of the supposed
benefits are meaningless, as a 6GF7 is a dissimilar section
twin triode that was made for use as a vertical deflection
amplifier in TV sets. A 6GF7 might have been applicable
in an old tube model CB, but old tube model CB radios are
pretty rare these days.

Perhaps it is a knee jerk reaction to the poster, and the
word CB? Doug Adair, or someone purporting to be Doug
Adair, seems to have a big interest in buying, selling and
using CB linears.

-Chuck

That's really an ignorant post. If you are one of the guys selling CB amps.
I hope they get you sooner than later.

I see from a recent eBay email, that they are working to make it easier to
catch people running scams or otherwise breaking laws such as those intended
to stop CB Amp sales.

10-4 good buddy.

834. AGC curve for FM Rx

Newsgroup: rec.radio.amateur.equipment
Date: 2007-05-26 04:48:53 UTC
From: Karl <wa7ycp@yahoo.com>
Message-ID: <1180154932.719146.105410@o11g2000prd.googlegroups.com>
Source record: 5154

I've been working on making a decent chart out of MS-Excel and still
trying to figure out the best "AVERAGE" syntax to use for the Y axis.
I've been browsing around the web, stopped by Tu-Cows.com to see if
they had any templates for excel. Any ideas for making a chart to
plot AGC curves? I have several (background) links on my voting
system and wanted to make some bench marks. At work we do it manually
in pencil, for our microwave RSLs.

Any input from you would be appreciated. It's for Amateur Radio.

Regards,

I didn't know FM rigs had an AGC curve. FM does not need any AGC.

Once the input signal is strong enough to fully drive the Limiter, typically 10 uV, the magnitude of the input signal is a don't care.

838. Motorola GP68 lockup problem

Newsgroup: rec.radio.amateur.equipment
Date: 2007-05-26 19:44:41 UTC
From: Bootcat <robert.smagala@arpenteurs.org>
Message-ID: <1180208681.738325.311520@u30g2000hsc.googlegroups.com>
Source record: 5158

Hello dear members,

I recently bought a Moto GP68 radio (with the dealer lock jumper
removed) and was using the well known AP73 manual to discover its
functions. I must have made a mistake at some point because my radio
is now locked:

- no more access to squelch mode change;
- no more access to frequency mode;
- SPM doesn't give me access to the Erase Channel option;
- the procedure for accessing or exiting Dealer mode does nothing;
- the reset procedure (the one with 1-3-5-7-9 dials) doesn't work;

I am out of ideas on this one. My guess is that I'm somehow locked out
of the normal operation mode.

Has anybody here encountered this problem? I would be very happy to
hear about a solution to this.

Regards,

Bootcat

840. SPE Expert 1K-FA Amplifier

Newsgroup: rec.radio.amateur.equipment
Date: 2007-05-27 11:18:20 UTC
From: laborkei <laborkeiNOSPAM@hotmail.com>
Message-ID: <FId6i.14219$px2.491@bignews4.bellsouth.net>
Source record: 5160

Hello,

I would like to invite you to a new discussion group on this HF Amplifier.
It was a big hit at Dayton 2007, and the reviews on eham sound very
positive.
The first shipment of these amps will be arriving in the US in June and it
has FCC Approval.
If you have been exploring the purchase of a Solid State Amplifier or if you
currently own one, please join this group.

Source record: 5161

Some FM rigs use FM Rx chips that have a signal strength output, Lke the
Signetics NE-605. These can have a dynamic range of more than 80 dB with
excellent liniarity and temperature stability. In fact some DIY spectrum
analyzers use these in the 'video' IF for the level detector.

On Sat, 26 May 2007 14:01:53 -0400, Dave <W1MCE@comcast.net> wrote:

Source record: 5168

Dave,

I guess I didn't explain myslef. Acually all FM receivers can and may
use the the IF to generat a DC
voltage depending on the strength of the signal coming down the IF.
This voltage can be used to drive
an "S" meter or other measuring device. If you calibrate this voltage
by plotting on a graph for the Y axis
with a sig gen in the into for the X axis you can plot an AGC curve.
Real handy for determing RSLs.
We do it in microwave work all the time.

Regards,
Karl

Source record: 5171

Ok, we have a terminology problem then. AGC (Automatic Gain Control) is found in AM receivers to control the gain of the RF amp stage and one or two IF amplifier stages.

FM receivers almost never use any gain control (some designs that have to work under very high signal strength conditions may use a simple AGC to keep the impedance constant at the IF filter), depending instead on the IF limiter(s) to produce a constant output. They may have an RSS (Relative Signal Strength) output to drive S-meters. It is usually derived from current changes in the limiter/last IF stages as the signal input rises. Any signal that falls within the IF filter passband can make this rise, be it spark/arcing noise from car ignition, broadband noise from computers, or spill over from nearby tranmitters.

In FM voting systems, this RSS may not be the best signal to use since any of these sorts of interference may cause this level to jump up without opening the squelch. The squelch circuit senses the audio noise level at the detector ouput (though some old designs may use the lack of audio noise on the last limiter RSS) and is a much better indicator of signal quality. If you can dig out of the receiver schematic where this noise detector is and use it instead you'll have far fewer false votes to a jammed receiver.

Now, to your original question, Excel and graphing. I'm not sure exactly what you're looking for. Simple instructions on how to produce a graph for print-out? Or something a bit more involved like curve fitting to get a smooth curve instead of straight lines through the data points? Excel ought to have examples of the former in the 'help' tab. For curve smoothing, look for 'statistical analysis' in the help also. My search on google.com for 'Excel "polynomial regression" ' yielded several good sources of more information.

I don't think that PS comes from an MSR or MSF unless Motorola recycled
the part number. I think it is a control station power supply sufficient
for intermittent duty medium power stations. You will probably find a
pair of 3055 type power transistors as the final regulator of this
linear supply.

>>PDF, jpg or U.S. mail is fine. I can do a little $ for the trouble.

Yes, the TPN 1136A is a 36A 13V DC power supply for the Motorola station, MSF5000. There currently is one for sale on Ebay. Can't help you with the schematic at present. Maybe confirmation of the station it is for may help you in your search. A station manual for the MSF5000 may have it. Heck, now that I think about it, I may have a station manual for that model in storage. Unfortunately I do not have time to get to it for a month or so. Good luck. If I see you post again in July, I may be able to help.

Source record: 5176

Karl, I think you misunderstand me.

My understanding of AGC [my college days were almost 50 years ago] is briefly described as follows.

An AGC [Automatic Gain Control] curve is a plot of the negative feedback to control [reduce] the gain of the rf amplifier and/or first i.f. stage necessary to maintain a constant audio level. Typical AGC dynamic ranges may easily exceed 90 dB of attenuation or more. In a modern receiver the MDS is typically -134 dBm. An average audio output may be +16 dBm [earphone]. With an input variation from -134 dBm [S0] to S9+40 [typically -34 dBm] the AGC dynamic range has to be 100 dB for 'constant audio output'.

In FM radios the constant audio level is typically determined by the saturation level of the discriminator/limiter. Any further increase in the input signal cannot produce more audio/output because the discriminator/limiter have saturated [assuming a TX/RX matched deviation system]. In amateur radio equipment a relatively low level rf signal will fully saturate the limiter circuit [10 to 15 uV]. This will indicate S9++ on a typical amateur receiver. [Note: 10 to 15 uV will produce an average S meter reading of S7 +/- in amateur SSB/AM/CW modes.]

I understand from your description that the measure of i.f. voltage amplitude is simply a measure of the open circuit gain and associated normal non linearities of the rf/i.f string before limiter saturation. Is this correct? Is there a negative feedback system to reduce the gain of the rf stages in your description?

Are you using the term in a manner that I am not familiar with? I am trying to understand exactly what you are saying.

SNIPPED

Lynn, sorry for my direct response to this thread. I posted it before I read
your response.

We are both making the same point. AGC is a negative feedback subsystem in a
receiver to maintain a constant output. I was wondering how the term was/is
being used.

Like the other poster said, it could be your power supply or weak
connection. Also make sure your coaxial cable is not inducing something
into the power supply leads. Check those first. If not it could be an
instability in the power control loop. Maybe a weak filter capacitor.
See if the high power is set properly and the current drain is correct.

Hello,

I looking for the Extendend TX mod on HF for the Icom IC7800 #03 EU-version.
I found on
http://www.dw.ham.dmz.ro/icom/ic-7800-general-coverage-transmit-mod.php
something but for which version ?
Can someone provide me such info ?

Met vriendelijke groet,
Kind regards,

Hans Pluijgers

Karl -

A quick examination of the power supply electronic components may reveal the common "723" regulator chip (originally designed by Fairchild Semiconductor in the 1970s as the ua723).
Most of the chip reference sites have the data sheet and applications notes, and the theory and design information you will find there is as true today as it was when the chip was introduced.
For your education, etc. -- these web pages:
http://www.kbt-dc-supplies.com/

http://www.repeater-builder.com/rbtip/mojoindex.html

Adobe Acrobat article
http://www.repeater-builder.com/astron/seits-astron-article.pdf

Several manufacturers have had Astron build supplies for them - for example a Kenwood KPS-12 is based on the Astron RS-12, the Motorola HPN1007A is an RS-10 derivative, and the Motorola HPN9041 is an RS20 variant.

What is the bandwidth of standard narrow band FM as we use it on 2 meters? Is there a rule of thumb based on deviation? (I don't want to get into the heavy math, I just know it's more complex than AM or SSB.)

As an old timer, I remember 2 meter amateur FM started out with 30 KHz channel spacing. Then, it went to 15 KHz. Then some deviants went to 12.5 KHz. New rigs have 5 KHz tuning. Is there an official channel spacing?

Message-ID: <nkht53t3u87s67qs6h3rthf60pstebo9kq@4ax.com>
Source record: 5187

There is a diffrence between FM bandwidth and channel spacing, though they can be related.

The original two meter FM gear used in the 60's were converted surplus land mobile radio service equipment. Due to the FCC imposed reduced channel spacing of 30 kHz in the VHF LMR band, the two meter band inherited the same 30 kHz spacing. The actual IF bandwidth of the receivers was 15 to 20 kHz, since the combination of crytal frequency drift over temperature, the poor IF filter quality available then and the signal bandwidth of a 5 kHz deviation transmitter would stay within that passband.

Later improvements in IF filters (ceramic compound filter blocks) and crystal oscillator temp stability allowed using 14 to 16 kHz bandwidth and that became the norm for 5 kHz deviation in the two meter band too.

At UHF, the situation was similar, converted LMR UHF gear was adequate for 25 kHz channel spacing since that was what they used. Same 5 kHz deviation and typically 20 kHz IF bandwidth since temp stability was less than VHF. Again, improved fitlers and xtal osc design allowed narrowing to the same 14 - 16 kHz IF bandwidth.

Now when you say narrow bandwidth, I wonder if you mean sliver bandwidth FM? That was the latest change to hit LMR. VHF channel spacing went to 15 kHz (or 12.5 Khz at the top end) in the VHF LMR band and deviation dropped to 2.5 kHz, plus 12.5 kHz spacing at UHF and 2.5 Khz deviation too. When I worked for Midland years ago, I came up with a dual mode modification for their LMR gear that used a compromise IF bandwidth of 9 kHz (four pole xtal filter in the first IF) and a set of audio switches to go between 5 kHz and 2.5 kHz deviation, programable by channel.

There is no specific requirement in the rules other than we must use
good engineering practice. 97.101 (a). For FM, 6 kHz (3 kHz in each
sideband) is needed. I.E. Don't use more than you need, and if you
do, other hams will quickly let you know about it.

Bob-

Although 5.0 KHz peak deviation has been a defacto Ham standard for around 30 years, equipment manufacturers frequently also have a commercial product line. They will often adjust equipment the same for both lines. Recent Ham equipment is being shipped with peak deviation ranging from about 3.5 KHz to 5.0 KHz. That represents a 3 dB range of adjustment, which is just noticeable to the ear.

A more appropriate question might be what should the average deviation be? Many people like to hold the microphone several inches away from their mouth. They may not like the sound of wind-blast resulting from holding the microphone next to their mouth. Unfortunately the radio may be set up for close talking, and might easily have 10 dB lower audio as a result of holding the microphone away from the mouth.

Ham Radio is not Broadcast Radio. To keep background noises low and voice level high, I would vote for close-talking and an average level of around 3 KHz deviation.

877. FT-ONE problems - ALC fault?

Newsgroup: rec.radio.amateur.equipment
Date: 2007-06-02 14:18:03 UTC
From: Andrew VK3BFA <ablight@alphalink.com.au>
Message-ID: <1180793883.415853.283170@n15g2000prd.googlegroups.com>
Source record: 5197

Hi All,
alas, I have an FT-ONE Yaesu on the bench to fix (its not mine, thankfully) and I have been stalling for literally YEARS on getting stuck into it. Its a cross between a small telephone exchange and an attempt to do things with micros they were not really up to at the time.......(4 bit micros meant some funny "rubberising on xtals to get it to cover the relevant frequencies with any resolution....) however, be that as it may, I need to fix it.

Searching groups show a common cause of problems is the ALC - ie, winds back PO too much. This one does it, too - but only on 40m. Rest seem reasonable, into a dummy load.

Anyone come up with a fix for this? - cant find any references besides frustrated calls for ideas (me too, I guess) I suspect its a design error, but the circuit with all its micro/pll stuff is mind bogglingly complex - the plug in boards don't help much either as far as in circuit troubleshooting goes.....

Funny - this was Yaesu's "top of the line" radio in its day, a bad idea from birth - wonder how many are still on air.....

Andrew VK3BFA.

878. Ferrite for spark plug noise supression?

I've had some luck reducing ignition noise on 2M in my MGB by putting a few 'clip-on' ferrites on the low tension side of the ignition circuit. (The tachometer uses a current sense rather than a voltage sense, so the raw coil current runs into the cockpit.)

Would ferrite also help on the spark plug wires? BTW, this is an old car with points.

Thanks, w9gb

I have the manual for the R3, and I think the variable capacitor/motor
is OK. The part that needs replacing is a small coupling block
between the actual SO-239 feedpoint and the stubs that go to the
ring. The parts list calls it a matching network assy., so it must
contain some series capacitors, or something. I contacted Cushcraft
with no success...too old of an antenna.

Anyway, I will probably be moving to a GAP antenna. This one has
served an OK life.

Thanks,
N4VBH

In the 'Olden Days' of my youth we installed 10K ohm snap on resistors to the plugs on MGAs, MGBs, TR3s and my trusty TR-4., They also worked on family sedans, pickup trucks, and station wagons.

I don't know if such devices are currently manufactured. But, the Autolite web page still lists resistor plugs. A 5K series resistance will work wonders for spark plug noise.

If you have a DC generator as opposed to an alternator you will need to bypass the high current connection at the generator with something like a 1 uF coaxial capacitor.

These two engine noise suppression techniques should cover 90% of your engine noise issues in the older vehicles.

/s/ DD, W1MCE [HF mobile for almost 50 years beginning with a 1953 Studebaker, followed by a Renault dauphine, followed by the trusted TR-4, followed by babies and station wagons.......]

per Joe

Hi Tom,

You're in luck. I have one of the largest (if not the most complete)
collections of Cushcraft assembly manuals etc. anywhere.

According to my notes, the lowest capacitor, the one closest to
ground is around 78 pFd and the upper one is around 138 pFd. I'm sure
anything near that value will be sufficient.

73,

Joe, W1JR

Source record: 5108

I have been away from fhe hobby several years. I am now disabled and want get some of my radios going again, and upgrade my license, N2NJK, to allow increased band privileges. I have a brand new HTX-100 10 meter unit purchased when they were discontinued. It was bought cheap as it had no microphone. If I am fortunate enough to rceive a heart transplant (I'm being evaluated for viability in 2 weeks), the period before and after surgery will be a perfect time to get back on the air. If anyone has one that works, and can let it go cheaply, please let me know.

Thanks & God Bless.

Raymond A. Miller, N2NJK

Two similar rules when you are losing an argument:

a) shout louder ... it clearly establishes that you are unreasonable.
b) use the language of the gutter ... it clearly establishes that you are ignorant.

/s/ DD

I'm looking for a good reference for amateur frequency 'convention', i.e.: were USB is commonly used, where LSB is commonly used, where AM is commonly used, where RTTY is commonly used, where FM is commonly used, etc. (NOT just what's legal on what frequencies.) Surely some one has come with some kind of chart or table.

Source record: 5111

Bob for SSB Convention: By tradition, 20M and up is Upper Sideband, 40M and below is Lower Sideband. An exception is the new 60M Ham Band -- use USB. This protocol came about as a matter of convenience in early SSB transceiver design and has remained to this day. And yes - you can operate either sideband legally where phone is allowed. And yes you can operate CW on the phone bands -- but best stay with the protocols.

As to useage several references- see URL's

Anyone know the style of 75 ohm FM coaxial jack found on several
FM tuners (JVC, Sony)? It looks like an unthreaded F connector
(female) but is larger. I'm trying to connect it to RG-6 coax with F
connector.

At first I thought it was a PAL (Belling-Lee/IEC169-2) socket. A
trip
to Radio-Shack for a PAL-to-F connector didn't work. The barrel is
larger than PAL and the stinger is more narrow.

Based on physical measurements the tuner jack seems close to a 'G'
style. If so something like an Amphenol 531-40010
(http://65.244.34.140/pdf/257.pdf) should work but no distribuitors
seem to have one.

Am I on the right track and/or does anyone have any ideas?

Thanks.

I have one of the CKB-74028 freg meters. With the manual that goes in the bottom. Seems to be in good shape. The "dial hundreds" window is cloudly and broken.. Looks like from age.

http://nj7p.org/history/lm.html

I have no cable. comes with the shock mount and manual.

Sherrill Compass Model AEG-1 U.S. Ordnance C121174 RESTRICTED Model M-6 U.S. Ordnance 7067878. Manufactured by Sherrill Research Corp. Peru, Indiana U.S.A. This is a military compass as stated in the instruction manual: "The Sherrill Model AEG-1 is a compass of a magnetic type designed especially to fill the rigid requirements which are encountered in combat and transport vehicles."

Includes - 10 magnetic director pins . Mounting screws & nuts. The . Instruction manual which shows an army tank in all illustrations. Compass deviation calculator. Comes in original box -

I was given this item in a estate clearout. I don't know any thing about it. Other than its new looking, in the box.

Please e-mail me at mkulyk@optonline.net

I would like to trade these items for things I need.

Here is my wish list

Nice HF SWR meter.

HF Tuner with build in SWR meter

Slinky Dipole

I am tuner poor, and don't run high power anymore, so this one is surplus to my needs. It is a high power tuner, with separate forward and reflected (SWR) power. I have not seen an antenna it will not tune. The unit is beautiful, only two little scratches on the top, otherwise it is like new. It has balanced output, 2 antenna coax connections, or will work straight thru for matched antennas. If you want a tuner that will works with high power, this is the one for you. $300.00. I will take paypal or a money order. What do you have for trade? Will consider trades.
Thanks,
James AD4VL

I'm retired and going to be moving across country to smaller quarters and have a lot of stuff that I'd like to take with but reality is reality. I'm not under any pressure to sell and am interested in getting a fair price. I think the best way to get a fair price is to put it on eBay or some other auction. I guess I could have my own. I'm not intersted in low ball offers (and may not respond) or trades unless it's an older US made acoustic guitar by Martin or Taylor or maybe a US made 5 string banjo. This stuff has been in storage for 10 years or so and I won't have the time to do much testing, describing will take enough time. I've fired up few pieces in the last few months and all worked and I know some have problems, but I would say like Fair Radio in Lima, repairable. This is a partial list, more to come as I get into the storage. On most of the stuff I have a fair idea of its hamfest value which is generally lower eBay. I'll structure my eBay posting based on the most requests for a certain piece. email direct to: kolesnik@sbcglobal.netski leave off the ski.

Sell it on eBay and you'll clear five figures easily. If this is what
you've had in storage I'd love to see the equipment you're actually using.

In article <DFGxnF.Cr8.0.bloor@torfree.net>
bu765@torfree.net "Mike Corley" writes:

>>> ##: There were also a few other things said at the trial
>>> ##: relating to this which I won't repeat here; it was in the papers
>>> ##: at the time anyway. This quote and others said by and about this
>>> ##: witness were repeating things that had been said by and about
>>> ##: me at around that time.

When, where and by whom ? Let's have some details
that can be checked.

I'm not going to repeat them. They're hurtful to me because they contained abuse that was directed against me by someone else at the time and which got picked up and thrown again in the trial. It is a matter of record but I won't repeat it here.

>>> PM: >Who's character is being assassinated? It isn't clear from the post.
>>> PM: >Are we talking about Grenville Janner? I thought he was a spook
>>> PM: >himself? He's certainly able to hold his own on the issue you cite.

>>> ##: Mine, mainly. The reason for putting that episode at the top
>>> ##: of the posting is that they tried to kill two birds with one stone
>>> ##: at the Beck trial - they simultaneously put words into the mouth
>>> ##: of their invented "witness" to smear Janner, and repeated exactly,
>>> ##: word-for-word, stuff which had been said by and about me.

Why would "they" wish to assassinate your character?

Well, let's put it this way - just because this is the first time it's happened in this way,
from these people, on this scale, doesn't mean that it hasn't happened before, on a lesser scale. At university there were people who quite overtly hated me and would have wished something nasty to happen to me. Because of where I went making the wrong sort of enemies is pretty deadly.

"They" would wish to assassinate my character because it had all been done before, and because they knew I would not be able to react in any other way than I'd reacted previously.

>>> ##: They invaded my home with their bugs, they repeated what I
>>> ##: was saying in the privacy of my home, and they laughed that it
>>> ##: was "so funny", that I was impotent and could not even communicate
>>> ##: what was going on. Who did this? Our friends on BBC television,
>>> ##: our friends in ITN, last but not least our friends in Capital
>>> ##: Radio in London and on Radio 1.

Please give details of when, where and by whom these
comments were made, so that they can be checked.

This was four, five years ago... sorry, I don't remember. I can remember individual incidents,
words which were repeated by different people at different times in different locations.

Around the end of 1992 Private Eye rtan a front-cover with John and Norma Major, with the title "Major's support lowest ever" and John saying to Norma "Come back norma" on the front cover. What can you read in to that? Not a lot, seems like standard fare for PE. The first time I saw it I was in the pub with some people from work. One was expressing doubts
to the other (let's call the first one Simon, shall we? and the second one Phil?) about whether what was going on was right. Phil's answer was that if Private Eye was doing it then it must be ok, "they're usually right".

A few days later, again near work, there were some students laughing in the street, "Were you COMING BACK later? But I thought you said you were COMING BACK ha ha ha?" Play on words, you see. Not very nice, either. I had start medication soon afterwards. Clever people, these chaps who think up PE titles. Just slightly lacking in any sense of morality.

>>> ##: How did they do this? I'll give you an example. About a year ago,
>>> ##: I was listening to Chris Tarrant (Capital Radio DJ among other
>>> ##: pursuits) on his radio morning show, when he said, talking about
>>> ##: someone he didn't identify, "you know this bloke? he says we're
>>> ##: trying to kill him. We should be done for attempted manslaughter"
>>> ##: which mirrored something I had said a day or two before.
>>> ##: Now that got broadcast to the whole of London - if any recordings
>>> ##: are kept of the shows then it'll be there.

What was the date of the broadcast ?
Out of 2 million plus listeners, why should you be
the only one that Tarrant was allegedly referring to ?

Sometyime in spring 1994. I can't remember the date, I heard the broadcast in the car - I was going into the office from London that day and just happened to snap on the radio, and hey presto! Mr Tarrant gives us the benefit of his excellent understanding.

>>> ##: That's exactly what we did. We went to a competent, professional
>>> ##: detective agency in London, paid them over 400 quid to debug our house.
>>> ##: They found nothing.

What was the name of the detective agency and their
address ?

I don't see why I should tell you that, but they're in Yellow Pages; they're a well-established outfit.

>>> PM: >What? Spend a quarter mil. a year to amuse themselves? And why not
>>> PM: >change every now and again? Why keep watching you? (Unless you _are_
>>> PM: >doing something, and I don't think you are, though you may have some
>>> PM: >deep, dark secret in your past.)

>>>
>>> ##: See the above.

Is there a deep dark secret in your past ?

Apart from "it's all happened before in a different way", no.

>>> ##: In a couple of cases people have even known my name - when I was in
>>> ##: London over Easter somebody (no idea who they were, just some bloke with

>>> ##: his girlfriend) called me by name - quite clearly, and my name is
>>> ##: distinctive.

Is your name truly Mike Corley, or are you using it as
an alias ?

It's an alias. I'm not English by ethnic origin. If someone manages to pronounce
my name as well as that guy did then they must have been really trying.

>>> ##: There's a little story behind this. First of all, in 1992 I worked
>>> ##: for a company where the people made clear they knew what was going on,
>>> ##: first of all directly (the very first evening I was there I went out to
>>> ##: the pub with them and the Technical Director said to another guy,
>>> ##: "is this the bloke who's been on TV?" "yeah, I think so")

Have you appeared, or been reported by name on TV ?
When, where and by whom ?

No. Never. Not directly.

>>> ##: Also, in summer 1992 I went on a trip abroad to Europe by coach,

What was the name of the coach company and your date
of departure ?

It was a national express coach. At dover we boarded a ferry for Holland somewhere.
The company that organized the trip went out of business some time ago, so they won't
have records of passengers - so we can't get any corroboration from anyone else
that way. We tried all that last summer, ran into a brick wall.

The other thing is in summer 1992 I was visibly ill, so other people in the
party might remember that more than anyone getting at me on the coach trip.

>>> ##: >>Yes, this gets me. I think the answer is that I was set up by
>>> ##: >>someone. I was very aware when this started back in 1990 that I
>>> ##: >>was being painted as a "threat" to which people had to "react"

Why were you being painted as a "threat"; is this related
to a "deep,dark, secret" ?

Aaaarrrrgh. I think I should make clear that that's their created justification
rather than the real reason. They started harassing first and then came up with the
reasons for it.

>>>
>>> ##: I think I know who set me up.

Who ?

Someone who knew me some time ago. Someone who would have been able to talk this little campaign into existence.

>>> ##: The bloke can't even control his own mind without medicine.

Is this true ? What is the medication and dosage ?

Yes, I'm afraid so. Sulpiride, 200mg a day. It's designed to stop people coming up with the sort of ideas you've heard here for the last few weeks. Give him a higher dose!!

In the long term it causes tardive dyskinesia, tardive dementia and general nasty stuff to your brain. So it's three years of sulpiride talking to you here.

I have used DXBase from Scientific Solutions for almost 8 years. Logs, does DXCC, WAS, 10-10, etc automatically. It has the ability to look up QSL addresses from a CD. You can track WPX, DXCC, QSL managers, etc. You can add/delete QSL managers to the data base. It calculates range and bearing to a DX station. It will tell you the QTH of a DX station based on the DX callsign. You can post from DXBase to the internet. And much more ...

It has a QSL design file, I have 6 self designed photo QSL s in that file.

It has the ability to maintain numerous logs. I have my basic log - W1MCE.mdb, my mobile log W1MCE_m.mdb, my 60 meter log, and my special callsign QSL [W1L.mdb], all available at the touch of a key. If you notice the file tag, *.mdb, it is a Microsoft Access Data Base core program.

It is NOT freeware. If I recall correctly I paid $50 for the CY2000 upgrade and have not had any reason for further upgrades, although they are available.

I cannot comment on it's usefulness in the contest mode. I don't contest! I'm a Minister and my weekends have other priorities :-)

I hope you get other responses that present more options.

I am selling my AL-811H Amp as I now have my DREAM PW-1 for the Icom Radios.
Asking $550...
The Amp has about 4 Months of use before I got the PW-1 All paperwork, box,
etc..

Hello Barry:

Most all of the ham amps have two 110 Volt AC windings in the power
transformer. These two separate windings are wired in series like two
batteries in a flashlight. This series connection allows for the 220
Volt AC use.

The two separate windings can also be wired for 110 Volt AC use. They
need to be wired in parallel. This is not a terribly hard thing to do.
I am sure the operators manual will show how both the 220 and 110
connections are made. Manuals can be bought off the internet, just type
in Dentron Clipperton into www.Google.com

Hope this helps

Hello,

I would like to invite you to a new discussion group on this HF Amplifier.
It was a big hit at Dayton 2007, and the reviews on eham sound very
positive.
The first shipment of these amps will be arriving in the US in June and it
has FCC Approval.
If you have been exploring the purchase of a Solid State Amplifier or if you
currently own one, please join this group.

Surprised no one has posted on this topic yet; here goes:

My Kenwood TM-221 has a problem with the intensity of its PL tone output level. Mine is too loud, generating frequent reports of "hum" from others.

I have the original manual with schematic and block diagrams, but no obvious information indicates where the output tone is generated or adjusted.

Not being wizardly and knowing there are wizards hanging around here, I'd like to know what pot needs adjustment to settle it down to the right level, if one exists. Anyone?

Bonus question: I have the same problem with an Alinco DR-590; if you can help me with that too, that would be nice.

TIA, KA1IOR

The TM-211 service manual can be downloaded from www.mods.dk - it has
the schematic and the procedures.

As I understand it, this mobile's tone generator is on a separate,
optional plug-in board, designated TU-3A. The board has a set of DIP
switches (which set the transmitted tone) and a small potentiometer.
It looks to me as if the TU-3A tone board plugs onto the "B unit" PC
board, which is on the bottom side of the transceiver.

The alignment instructions say to adjust VR1 so that the transmitted
signal deviation level (tone, but no other audio) is around .65 kHz
(650 Hz). This is consistent with recommendations I've read for other
radios and seems to be good practice.

>Bonus question: I have the same problem with an Alinco DR-590; if you
>can help me with that too, that would be nice.

I've been told that in at least some Alinco radios, the CTCSS tone
level is set by a fixed resistor on the PC board (it's not intended to
be adjustable via a pot), and that it's set too high.

How do you know that this reported hum is CTCSS (67 - 250 Hz) generated and
not 60 Hz from your power supply ? What are you using for a power supply?
A failed LM-723 IC regulator in a linear power supply can cause this type of
problem.

Could you be getting stray RF into your audio chain??

Your Kenwood uses the TU-3A tone board, and there is only one pot on it.
It is VR1 and adjusts the tone output.

All the info you need is found at : http://www.mods.dk/
Service manual included, plus schematic..

Dave & KA1IOR-

I've seen alignment procedures on older commercial radios, where there was no adjustment. The procedure was to merely verify that the CTCSS tone's deviation was between 0.5 and 1.0 KHz. I don't know the official spec, but 0.65 KHz would be a good choice if it is adjustable.

The key is to measure the actual tone deviation, not just rely on hum reports. Any given repeater may not be filtering out the tone as it is supposed to. (That same filter should reduce 60 or 120 Hz hum as well.) A repeater that transmits tone, should be regenerating it, not repeating the input tone.

It may be difficult to measure the exact frequency of a CTCSS tone, but you should be able to sync your oscilloscope to 60 Hz line frequency, and observe whether the received "hum" is drifting or not. (You could sync the scope to a CTCSS tone generator if you had one.)

$60.00 Each Midland 70-340 VHF APRS/Packet Radio [Plus Shipping]

I have a quantity of Commercial Midland 70-340 VHF Mobile Radios 25-30 Watts O/P comes with a Regular Power Connector, Mobile Mounting Bracket and a Midland 70-2301 Palm Mic (which you don't need if you are only using APRS or packet). These radios will work excellent as an APRS Mobile OR Base Radio Station. Using this radio is much cheaper to use for dedicated APRS use rather than spending Large Dollars for a VHF Amateur XCVR and dedicate it to One Channel APRS use. The radio is Programmed and Tested Operational on 144.390 Mhz.

IF you wish the Power Cable pre-wired c/w a DB-9 Male [ADD $20] > ready to plug into a Tiny Tracker APRS Unit or any External Interface < Schematic Drawing of the Interface Cable is supplied

Midland 70-340 VHF Service Manual available on CD with a Radio [ADD $10] Sold Separately [ADD $15] includes Mailing

These radios are capable of 36 Channels and comes with a CTCSS Board, should you need it. I can program them for other 2 Meter Frequencies for a charge. Please ask should you have any questions.

Thanks for looking....Norm VE3CZI

I used to have one of those rigs.....I am pretty sure that the TM-221 has encode capabilities out of the box. The optional board would be for PL decode. As mentioned earlier, there should be a pot for making this adjustment. If you have the schematic, take a look at the Tx VCO. There should be two pots that feed the audio to the varactor diode. One of them will be for setting deviation from the mic input, while the other one will be for setting the PL level.

I have to replace a rig that was stolen and I'm down to four radios to choose from. I haven't been able to get to a dealer yet to set down and actually try them out but have narrowed my choices down to four with preference of those down to two. If anyone owns some or all of the radios mentioned here I would greatly appreciate your input and experience with their operation. The two that I am closest to getting is:

Kenwood TS-2000 or the ICOM IC-746PRO. I do realize that the 746PRO does not have 440MHz like the TS-2000. I like the IC7000 but such a small radio that they fit so much into it with using so few knobs and buttons on front that I'm concerned about the learning curve with that one. I'm naturally concerned about durability, receive quality and the ability to reduce interference and pull out the weak signals in a crowd or busy band.

Right now the Icom 746PRO has the incentives on it's side with not only rebates, coupons and a free Power Supply.

I appreciate your input concerning these radios.

Gary,

It depends on what you want to do. The TS-2000 is a Swiss army knife sort of rig. It is great for satellite operations, and it is a favorite of people who do digital modes heavily. It is a good, but not great HF rig. For serious VHF and UHF operations, most people use a good RX pre amp for satellite or weak signal work. Lots of menus to dig through, though there are a few cheat sheets around to tell you how to do specific things. Also, the Sky Command, now legal in the US, is a very cool way to operate remotely from you HT or mobile.

Both of the Icoms will be better HF rigs, and will certainly do digital modes as well. There are a lot of IC-7000s out there due to some dealer incentives. As you say, it has a bit of a learning curve, with some of the locals forming what amounts to an unofficial users' group to swap ideas. However, it does work very well, though the stock microphone does, in the opinion of many, need to be replaced, or have a simple modification done to it. Two locals who replaced their 756's at Dayton with the 7000 are, after a bit of initial frustration, glad they did. They also like the modified microphones, which in A/B tests with the originals sound much better. http://www.7000mic.com/
So talk to people on the air, and if at all possible try operating.

FWIW

I skipped all four of these radios -- and will buy the Elecraft K3.
The Dayton interest by the "Big 4" was very interesting to observe their
representatives (and reactions) -- features and capabilities at this price
point -- they do not have -- and are not designing for.

A colleague bought the TS-2000 -- have not heard reports of his assessment
yet.

FOR SALE

HAMMARLUND HQ-100A General Coverage Receiver
w/ SP-100 Matching Speaker
SERIAL NUMBER: 24537442
FREQUENCY COVERAGE: 540 KHz - 30 MHz
MODES: AM, cw, SSB
BFO: Yes
PRODUCT DETECTOR: No
CRYSTAL CALIBRATOR: Yes, Model XC-100.
CLOCK: No
TUBES: 10 including xtal calibrator.
PHYSICAL CONDITION: 9.5 out of 10 (chassis isn't quite perfect and
s-meter plastic has a couple of very minor scuffs on far right).
The front panel, cabinet and speaker/cabinet are in unbelievably
beautiful condition. You are almost guaranteed to do a double-take
when you first see this receiver.
OPERATIONAL CONDITION: Works well. I have been using this as one
of my SWL receivers for several years now. Bandswitch is slightly
noisy on 20BS band - I ran out of contact cleaner/degreaser while
treating the bandswitch. S-meter drifts a little with time but it
has never bothered me.
OTHER THINGS INCLUDED IN THIS SALE:
Original Instruction & Service Manual, includes XC-100 Crystal
Calibrator supplement and schematic.
Repair Ticket dated OCT 9, 1970.
Owner's personal listening log from the sixties.
Original Hammarlund shipping carton for this S/N receiver.
PRICE: $265.00, Cash or US Postal Money Order.
LOGISTICS: Buyer to pick up equipment, located in St. Mary's
County, Maryland. I do not recommend shipping this equipment.
REFUND: This sale is final - no refund.

You are welcome to come by the house and test-drive this neat
little receiver. Drop me an email and we'll get you into the
restricted tech-control spaces.

963. antenna rotator cause hum in receiver

Newsgroup: rec.radio.amateur.equipment
Date: 2007-06-24 01:29:00 UTC
From: Ralph Mowery <rmowery28146@earthlink.net>
Message-ID: <wNjfi.267$Od7.255@newsread1.news.pas.earthlink.net>
Source record: 5083

I have a Ham IV that when I turn on the brake the receive signal takes on a 60 or 120 hz hum . I though it might be the control box too close to my Icom 746 PRO. I have a switch box connecting two lowband wire antennas and a triband beam to the Icom. If I listen to a signal on the wire antennas I do not get the hum modulation on the incomming signal when I rotate the beam. Those coax wires are not near the rotator wires. This tends to eliminate the transfromer of the rotator box from getting into the Icom by magnetic coupling. If I switch to the beam , then turn the brake on the rotator box I will get hum modulation. The triband is fed with some Davis Bury flex (foil and braid shield coax) and the rotator wires are taped to the coax for a distnce of about 100 feet.

The antenna does not have to ratate, just mashing the brake release button will make the signal hum modulate on receive.

The Icom is being powered by an Astrom 50 amp supply and the rotator plugs into the 120 vac outlet.

I made the same decision a few months back. The ts2000 will do many things
the Icom will not . The Icom has a beter receiver for the low bands. I
think the ts480 requires extra filters to be bought if you want them where
the others have them (or really the electronic equivelent except beter) .
I did not care about all the thinks you can do with the ts2000 and wanted a
good HF receiver so I went with the Icom 746pro. I do weak signal vhf and
uhf and have seperate rigs for those bands so not haveing the 440 band was
not big deal to me.
There does seem to be some problems with the back light on the display of
the Icom so if you go with that rig run the display brightness full on or
full off.

Source record: 5086

I just went through the same decision-making process and I chose the Icom 746PRO. I was apprehensive due to the problems rumored throughout the net, but I trust Icom and their ability to have already addressed those issues. So far, I made a great decision. I have never actually used any of the other rigs on your list, but I am not a fan of any Kenwood made in the last decade. The Yaesu was on my list, but a little out of my price range.

I, too, didn't really need 440 since I have that on another rig. one thing I will need to purchase is a duplexer since 144 MHz and HF are separate antenna connectors. The problem is my 6M antenna is part of my VHF/UHF antenna (tribander), so the duplexer is necessary in my case.

The rig was smaller than I thought, which is a good thing. I'm not impressed with the PS-125. It makes a slight high-freq while while on, and gets annoying. It's a cheap switching supply in a nice case. I had rather have a linear power supply. Oh, well! The rig is also built VERY well. Very solid feel to all knobs and controls. Not crazy about the display (rather have an IC-7000 type display on it-color!). One last complaint...comes with a cheesy hand mic.

Don't get me wrong. This is a great radio. I also have a Yaesu FT-757GXII, FT-767GX, and Kenwood TS-940SAT. This was obviously a step up from what I had, but I actually have likes and dislikes about each one.

Prentice, N4VBH

Source record: 5089

I'm looking for a 'one-touch' voice CQ caller to save wear and tear on my vocal cords. My Kenwood TS-570 has an optional 'Digital Recording Unit' available that I have a few questions about.

From the manual it sound like you have to manually turn xmit on, then push one of the 'CH1/2/3' buttons, then manually turn xmit off. Not exactly 'one-touch'. (Is this correct?)

But, if your in VOX mode, then pushing one of the 'CH1/2/3' will automatically activate xmit. (Is this correct?) This does sound like 'one-touch'.

Is there some Kenwood bulletin board where this question would be more appropriate?

You can run AX.25 packet and APRS. That's about it. Nice radio
though.

I responded to Ted by private e-mail. I forgot that the TH-F7 is the same as the TH-D6 in the U.S. I was thinking of the TH-D7A when I responded. The correct answer is that the TH-F7 cannot decode any digital modes, but it could of course be used as an ordinary SSB receiver with a computer soundcard to receive most digital modes as long as you could obtain an adequate signal on the TH-F7.

Is the optional YK-88SN-1 SSB filter worth buying?

What do the add-on filters do anyway? Are they an improvement over the original filter, or do they just give you an optional bandwidth?

Bob-

I have that filter in my TS-690S (A TS-440 with 6 Meters). I can't say it is an "improvement" over the original filter other than as an optional bandwidth. To me, it is worth having the narrower filter when the band gets crowded, and it helps a little with noise as well.

I understand the TS-570 has Audio DSP filtering. You may not need the noise reduction of a narrower filter, but Audio DSP won't remove interference from stations on an adjacent channel.

I am guessing that the diode bridge rectifier in the control box is
acting as a mixer and adding the hum to stray RF signals conducted down
the control wires. You might try placing .01 UF capacitors accross each
of the rectifier diodes inside the control box.

>I appreciate your input concerning these radios.

I finally replaced my trusty old Icom 735 with the Icom 7000. I can't
say that it hears signals that the 735 does not. However, the noise
reduction is great, especially on static-y bands like 160, 80 and 40.
The learning curve is steep -- so many menus everywhere. The manual is
very detailed, 150 pages, but it has no alphabetical index, which has
had me pulling out hair trying to locate instructions on this or that.
I love the digital filters on the 7000. Nothing extra to buy, altho'
the mike needs to be replaced if you want your audio to sound decent.
Glad I bought it, tho' I wouldn't mind a few more knobs and less
menus. Still, it's working out fine for a fixed use radio. I put all
the local 440 repeaters in one bank of memories, the 2 meter repeaters
in another bank, the 6 meter frequencies in another bank, and I still
had two banks left for various HF frequencies, including the new 60
meter band.

I had been leaning to a 746pro, but got scared off by the eHam reviews
on blown diodes & finals and whatnot.

By the way, the Astron 25-amp switching power supply is very quiet and
a nice match for the 7000.

The 7000 is a good buy at $1299, but I notice the current $200 coupon
expires on June 30th, if you're interested in the radio.

I think the diode/blown finals problem was addressed early on in the production cycle of the 746PRO. You might check the dates of those reviews on eHam. I've been running a 480 for a couple years now and really like it. It has no extra filters. I would like to try a 746PRO, but I don't have the budget for two rigs and don't want to give up the 480SAT. I have heard a few 7000s on the air and with the right mic (SM-20) they sound pretty good.

73,
Ed KA9EES

I was told since this radio doesn't have a makers tag on it, its a kit Neutrodyne radio from the 20-1930's (5) 201 tubes. They are in good shape not broken. The cabinet can use some refinish work. The radio is about 2.5 ft long. SORRY I have no pictures of the radio.

This radio is not restored in any way. It can be left as is OR restored.

I am open to trade for a HF radio.

Kenwood TH25/45AT battery like new. This is a W&W Assoc. replacement
battery:
Part#WC-035(7)
Kenwood part#KNB5
This battery is in excellent condition with very little use.
It lists for $51.00 on W&W.
You can have for $35.00 plus shipping.
Also the W&W Assoc. Mastercharger1 charger cup, list is $25.00 for this.
$15.00 plus shipping. This is charging cup ONLY, not the entire charger!!!
Or both for $50.00 shipped.

USPS money orders only.

WANTED: SCHURR Einhebel or other Single-Lever Pad

I am looking for a Schurr model Einhebel or other single-lever paddle/
key. I am thinking in terms of the European type paddle with the heavy
metal base. It should be in good operating condition. I would also
consider a BUG.

Thanks,
Bill

All,
I have to clean out my garage so I am selling all my parts and some equip.
It is too much to list so I will list some items.
Heathkit
2 HP 23 PS with cable
DX 40, VF 1, DX35, Heath kit mic,SB610,
Yaesu SP 102 and SP 102P
Johnson White Face CB
4 Tube caddies and a Drug Store style Tube tester Appox 500 tubes total all NOS about 200 used tubes including 2 3-500Z pulls, still 100% output
Hickok muti Tester, Simpson tester, Heathkit muti tester, grid dip meter,
Hallicrafters SX 110
2 D-104 mics
Many styles of transformers and chokes, many boxes of solid state parts, many boxes of various parts, Around 20 various variables capacitors, many HV mica caps, Various radio knobs, plus much more. Just too many items to list. All is pick up only, buyer takes all so bring a large truck. $1100.00 or best offer takes all no sorting though items. I am located in Gretna La. just across the river from New Orleans.If interested drop me a line I will give you my phone# to discuss further. I can take some photos if interested.

It should be the same for each radio. The AH4 is a really nice tuner. I use mine portable and found that it works well feeding a vertical with radials elevated rather than just a rod stuck in the ground. I am assuming that you are using the control cable that comes with the AH4. I have had difficulty with my 706MII and the tuner when I did not push the control cable plug all the way into the radio. It seemed like it was in, but it needed another push to seat the connectors.

WOW, that was FAST!!! Is that all you do? Sit there in your parent's
basement waiting for someone to order one of your hack-jobs when you
can't even give an estimate on when they will go into full production?
Don't you have anything better to do? I mean, heck..... look at posts
from yesterday afternoon, one of the biggest national holidays, when
just about everybody can find something to do besides jerking off in
front of a computer. It seems that the only people who posted were you
and the trolls. And yet, even with all that spare time because you
couldn't drag your ass away from the computer and out of the basement
long enough to join the rest of humanity in a barbecue, you AGAIN
refused to answer the tough question, just like you have done for
several years now.....

Where's the schematic for your hacked amp, Brian?

Gregg,
There is no excuse for how many out here conduct themselves... but
there are reasons.
The main reason is that they have nothing of merit to add to any
conversation here, but desperately need to be recognized.
Thanks for your comment.

Why don't you ask Twistedhed about that one. I fought him for years on
a political issue only to find out that I was wrong. I still disagree
with his freebanding, but when I'm proven wrong, at least -he- knows
that I'll stand up and take my punches.

I'm giving you a chance to prove me wrong, Brian. If you product works
like you say it does, and it doesn't cost you any money, why in the
world -wouldn't- you be willing to sell me one?

>P.S. How's your master's degree from the College of Culinary Arts

No, but last March I did finish a study on EM wave interference
pattern and polarization interactions in atmospheric media of varying
ionization. It was a joint project with the meteorology department in
the study of weather radar, with extended applications to satellite
communications. Got any opinions on the subject, Brian?

Oh, and where's that schematic for your non-linear linear?

Absolutely right. These are discussion groups, but some people would
rather use them as their own personal media for spamming products that
would otherwise be pulled from the market for patent violations and/or
false advertising. It's truly shameful how these basement-dwellers
act, isn't it, Brian?

I believe they would want to sell a new mike. I did find a button
switch that fit the mounting. I thought the shroud was part of the
assembly but it was two pieces, the switch and the shroud that held
the it. It is now working again with an investment of 32 cents. Not
bad for a little time on the bench... Thanks, Bill Piper, N8PRC

Of course, that won't stick until you point out that
rec.radio.amateur.equipment is not a buy and sell newsgroup.

It was created for the discussion of amateur radio equipment.

Ultimately, any ebay ads here are off topic because they are
ads, no different from someone trying to sell their ham equipment
directly.

Michael

From the site I get this about the solder:

From the Manufacturer
Weller 7200PK Lightweight Solder Gun Kit has a single heat gun producing 75 watts of heat. Kit contains 7200 soldering gun, coil of lead-free solder, 2 tips and an instruction leaflet.

Product Description
Soldering Gun Kit 75W Gun 40/60 Rosin Core Solder 2 Soldering Tips.

Notice how the top says LEAD-FREE solder and the botom is 60/40 which in most places indicates 60% tin and 40% LEAD. Now which is correct ? As if it really maters to anyone.

They might, but my (perhaps limited) experience with Icom was that
pretty much any part you wanted, they'd sell you, and they
weren't *that* expensive. It's certainly worth a toll-free
call to find out, IMHO.

1043. Filters to get rid of inverter noise

Newsgroup: rec.radio.amateur.equipment
Date: 2007-07-12 19:30:01 UTC
From: "Rick (W-A-one-R-K-T)" <get.my.email@from.qrz.com>
Message-ID: <pan.2007.07.12.19.29.59.763712@from.qrz.com>
Source record: 4963

I have a so-called "modified sine wave" inverter that is connected to 200+ amp hours of deep discharge battery located in about the center of the house in the basement. About a 30-foot length of #14 wire goes to an outlet box in the shack, down on one end of the house, and provides 110VAC (of a sort) when the power is off and I don't feel like hauling out the generator. :-)

Trouble is, whenever I turn on the inverter it spews harmonics all up and down the HF band and makes it difficult to impossible to hear weak signals.

I realize that a pure sine wave inverter would mostly alleviate this but that's not gonna happen any time soon... meanwhile is there a filter I can apply to the output of the inverter to round off the corners of the modified sine wave (which is really nothing but a stairstep square wave) and eliminate the worst of the harmonic noise?

Thanks...

Look in old ARRL Handbooks, or even their old Mobile Handbook.

A lot of the things about alternator noise would seem to apply
to such inverters, and even switching supplies. But it seems like
such coverage is much smaller nowadays than thirty or so years ago.

Figure out whether the signal is radiating from the chassis, or from
the output wire. If it's the former, it needs better shielding. If
it's the latter, add feedthrough capacitors in a box that shields
the output, and maybe put an LC circuit in series with the output
line, and tune it for a null. The primary of the inverter may also
be a source of noise, you need to figure that out first.

Shield the inverter and the battery together,
put an ac filter made for computers on the output of the inverter were it exits
the shielded enclosure, and ground the shielded enclosure to earth. You should
see a big difference in noise...

Good afternoon, Michael.

Yeah, I gave away a stack of my old Handbooks a while ago... XYL got tired of looking at them in the garage (hadn't finished setting up the shack yet, and still haven't...). :-(

Well, square waves have a lot of harmonics, and perfect square waves have infinite harmonics (but there's no such thing as a perfect square wave so in the real world harmonics are finite). If I can file off the corners of the stairstep wave that really should help cut down on the harmonics.

Someone emailed me and recommended a brute-force EMI filter (thanks, Dave) so since that's easiest I'll probably try that first then take things from there.

meanwhile is there a filter I can
> apply to the output of the inverter to round off the corners of the
> modified sine wave (which is really nothing but a stairstep square wave)
> and eliminate the worst of the harmonic noise?

It is generally quite easy to construct a filter to eliminate the square wave component[s] in an approximated sine wave.

First, determine how many steps are used, what is the frequency of the square wave, in one cycle to make the 'sine' wave?

Second, a three stage pi-filter is designed to severely reduce the conducted interference.

The first stage is series resonant at the fundamental square wave frequency and is across the hot line to return [not ground].

The second stage is parallel resonant in the both paths after the series filter.

The third stage is identical to the first stage, but located at the output of the parallel resonant filter.

```
--L--
---------------| |---------- [Hot]
L --C-- L
| |
C C
| --L-- |
--------------| |----------- [Return]
--C--
```

NOTE: The Return must be an isolated wire just like the Hot line. The return line MAY be connected to inverter chassis by a 'zero current' carrying connection [approximately 50 Kohms] ONLY at one point.

It will take a little effort to locate suitable cores for the inductive component. The capacitors can be electrolytic up to several 100 KHz. The key is to establish RESONANCE at the fundamental component of the square wave.

An alternative may be to replace the square wave generator with a simple op-amp and power stage configured as a WEIN Oscillator. A Wein oscillator has negligible harmonic component. One op-amp and a couple of transistors should do

the trick.

1048. HP8753A help required

Newsgroup: rec.radio.amateur.equipment
Date: 2007-07-13 10:36:16 UTC
From: David <dhuisman@bigpond.net.au>
Message-ID: <AAIIi.6575$4A1.2578@news-server.bigpond.net.au>
Source record: 4968

Hi,

I have just purchased a HP8753A VNA and need some help setting the thing up.

I want to start off just measuring impedance of lumped components but I cannot get any sensible readings. I have tried all sorts of Calibrations from the operation manual but still no luck.

I have the HP85044A Test Set and the 50 Ohm Calibration set.

I am trying to connect a coaxial lead to the Test port on the Test Set and so a 1 Port measurement. I have tried both RESPONSE cal and 1-Port Cal and placed a short,oopen and 50 Ohm load at end of the coax and then after calibration I place a leaded cap but do not get anything like I see in RF books I Have.

Any help much appreciated.

Regards

David

Anyone know of a troubleshooting guide for the HP 8640B?
My display reads all zero's although the generator is putting out a signal just fine. I'd like to find a step by step guide that would lead me to the defective component.

Thanks K. I should have said I have the manual but was hoping somewhere there was one of those flowchart guides that leads one through to the right component. I was hoping to avoid having to learn how all those digital circuits work in the counter section.
I was sort of thinking maybe somewhere in HP docs there might have been such an animal, for the HP techs to use.

1064. Daiwa CNW-518 capacitors

Newsgroup: rec.radio.amateur.equipment
Date: 2007-07-15 08:57:37 UTC
From: none <"bram\\@(none)">
Message-ID: <4699e183_3@news.bluewin.ch>

Hello,

I've got a Daiwa CNW-518 antenna tuner, and it's absolutely impossible to tune any kind of antenna. The SWR only gets worse when I use the matcher.

A friend advised me to check the capacitors, because they might have dried, and I opened the box to see if I could read values off them. But the numbers written on them gave me no clue. (I have to open the box again to copy them off, tell me if it's necessary)

Googling for the schematics, I only found reviews (good ones, mainly HI) and comments about the tuner, but no actual reference. Does anyone know where I could find more information? I'm thankful for any advice.

Greetings

bram

I have several solid state inverters (12-24 vdc to 110 vac) and they all generate serious hash. Doesn't matter what I run; radio, TV, anything audio, sounded terrible. Been like this for years and years. Inverters are nice and higher efficiency and for things like incandescent bulbs, drills, etc. I even ran a small air conditioner off a large inverter and 24 vdc out in a shed on land where there was no utility power.

I would like to hear from guys who actually built "filters" and got "nice" AC, as determined by actual performance and not "the fundamentals say you can do this."

FWIW, FYI....

What I got recently was an old dynamotor from Fair Radio Sales (Lima, Ohio) that goes from 24 vdc to 110 vac at 60 cps (yes). Its in their catalog. Its only 50% efficient and puts out about 300 watts of AC at about 600 watts DC (24 v at about 24-27 amps) input, but the output is very clean. I tried several radios and no hash at all !!! (I did not listen on ham bands with RF gain up, but AM radios, on broadcast band even between stations with volume turned up were clean).

Running full speed, these things sound like an electric drill. For me, its going to sit in the garage and I'll run an extension cord into the house

if I need this kind of clean AC. Running no load, the dynamotor ddraws the full 10-12 amps at 24 volts, and as you increase the load, the DC amps go up in proportion to the load.

The commutators on these units had oxide on the copper and so you need to rotate the armateur to start scraping off the oxide, then the thing will take off under DC and the heavy carbon brushes will completely bring a shine to the copper.

These dynamotors will turn on 12 volts, too, and put out about maybe 50-65 volts AC at a little slower frequency. 60 watt light bulb lights up to a dim level.

IIRC, they weigh about 50 lbs, cost about $65-70 now.

Out at the end of my driveway i need to use an electric weed eater and so I load the dynamotor into the trunk of the car, with two deep cycle marine batteries, and buzz away. Too far for extension cords, no matter how I do it. Don't like gas engines, noise, flamables, etc.

How about picking up a line/power conditioner from ebay? Those tend to go for reasonable money, and are meant to clean up dirty power lines. Should do admirably cleaning up most of the square wave noise in one of these inverters. Perhaps even an ordinary isolation transformer would cut a large percentage of it, especially if you place a simple line filter on the output. You could check this to some extent using any step down transformer and looking at the output on an o-scope.

How about you just TRASH, all that cheap Inverter JUNK, and spend a few
bucks on a nice SineWave Inverter, in the first place. No Square
Corners to generate harmonics, and nice cleam Ac Power to run the
stuff you need. Myself, I use a nice Trace SW4024 to power the cabin,
and all the stuff that the normal Grid Supplied folks have in their
places. I just can't run the ClothesDryer, without the genset running,
due to it being a 240Vac Load. I usually have a Ambiant Noise Level of
less than 2 S Units on the MF and HF Bands, as well as the Marine Bands.
Never can tell if the Inverter or generator is suppling the power from

the noise level.

Why pay anything? Most old HP manuals are available for free on the
HP/Agilent website.

Go here to search for available manuals:

<http://www.home.agilent.com/agilent/facet.jspx?lc=eng&cc=US&t=80039.k.1>

Go here for both the 8640B operating and service manuals:

Hi.

I am am totally new in FM electronics, so I need a guiding hand
(advice).

I would like to build a small transmitter that would send only a few
bits, ant then a receiver that will capture those bits on the other
side.
The usage would be similar to those wireless doorbells. The difference
would be only in that I want to assign a unique code to be transferred
so the receiving station would know who was the sender.

Can someone suggest me some book or Web site where to find more
information on how to build those devices. (are they maybe available
to buy?)

Thanks.

If you want a prebuilt solution, check out linx technologies. They
have some simple chips and modules to start off with.

If you want to design it yourself, do a search for OOK (on-off keying)
transmitter and receiver schematics.

A link to get you started:

Spam Trap - You are right this Item should have been posted to
"Rec.Radio.Swap" with a "FA" {For Auction} at the start of the
Subject Line so that readers will know that this was in-fact an
Item For Sale {For Auction}.

FA - R-390A Receiver (1984 - Serial #2)
eBay: http://easyurl.net/R390A

Actually to be honest and correct the eBay Seller should
have Posted eBay Auction Listing for this Item reads:
FOWLER INDUSTRIES, R-390A,
SERIAL#2, RAREST EVER MADE
eBay Item Number: 220132158407
http://cgi.ebay.com/_W0QQitemZ220132158407

But then, since this is a 'Rare' Fowler Industries R-390A
with a very low Serial Number "#2" : The eBay Seller
did feel that other "Rec.Radio" NewsGroup may have been
interested in this R-390A. Such as :
Rec.Radio.Shortwave,
Rec.Radio.Amateur.Equipment,
Rec.Radio.Amateur.Boatanchors

Why I myself did not know that some R-390As were build
by Fowler Industries. Plus the eBay Auction "Description"
itself is a very interesting and informative read about this
"Rare' R-390A Receiver. I would even say to others that
-if- you were unaware of the Fowler Industries R-390A
Receivers and you have an interest in old R-390A Receivers;
you should take the time to read this eBay Auction
'Description' for the information that it presents.

1089. ic2720h separate cable wiring info

Newsgroup: rec.radio.amateur.equipment
Date: 2007-07-20 19:21:49 UTC
From: Dan <ve4drk@gmail.com>
Message-ID: <1184959309.114953.28010@e9g2000prf.googlegroups.com>
Source record: 4909

Hi .. I have an IC2720H .. the separation cable that plugs into the
remote control head has been "separated" from the connector that plugs
into it .. I have a new connector, but I need to verify the color-
lineup of the lines into the connector .. anyone have one handy to
list me out the colors?
If it's a straight-through that's easy .. the one end that plugs into
the main rf unit (when looking down with the nipple on the top and the
ends in front) is: yellow, red, white, braid, black, green.

Any help appreciated.
Thanks.

Grundig Yacht Boy 400 (or 400PE). Nice little radio to carry in your purse or luggage, but doesn't begin to touch an R-390 for performance (but then, an R-390 doesn't run on 4 AA batteries).

Interesting! I attended the Navy's answer to R-390A school more years
ago than I would like to admit and I never heard of "Fowler Industries".
Nice piece of history but agree that it should not have been posted in
several of these groups for sale. As they say, there is a proper place
for all the stuff for sale let alone ebay's rules and policies.

On a side note, I did notice a few posts stating these receivers in
general were "junk". It all depends on your perspective. The
sensitivity, when properly aligned, is still competitive with more
modern equipment. If one were to set their new ((rig) (insert your
favorite brand named, DSP, Solid state, processed, ET. here))next to a

R-390 and exposed both to one hell of a EMP, which one do you think has a chance to still work?

Not that this was in the original design specifications but the R-390 has also stopped many a bullet or shrapnel for ripping an op in two.

To reiterate, it is all a matter of perspective kind of like relativity.

Source record: 4916

Hello Folks,

Does the Icom IC-R1500 (almost the same as PCR1500) need a EEPROM backup like the PCR1000 used to? I find no mention of this in the docs or on the Icom web site.

I want to try out a spectrum analyzer software. The only one I could find is an older version from Colin (MM5AGM/GM1LUZ) for the PCR1000 and he really stresses the point that the EEPROM should be backed up before starting his software.

If yes, do you know how to do this? Also, does anyone know newer spectrum display software that goes beyond the 5MHz range of the Icom bandscope? No idea if Bonito would but from the description I don't think so and also it does not work in my case anyway.

ISTR reading one of the R390A sites that said the Fowler unit
was built from refurbished surplus R390A parts (EAC).

As I recall, the Navy burped up a need for a couple of more R390A units
for some reason or another, and put out a RFQ. Fowler won the bid.

Or maybe I am fantasizing?

Actually, the 390A is a pretty good performer. Sensitivity isn't a whole lot better than the Yacht Boy cheapies, but the front end noise floor is better, and the selectivity is amazingly better. The selectivity for SSB and CW on the R-390A is really something you have to try to believe. Oh yes, and the front end of the R-390A won't overload. Not even with a local transmitter on the same channel. The Yacht Boy overloads if you look at it too hard.

The bad news is that the audio quality stinks, in part due to the really sharp skirt of the filters that make it so selective and in part due to power amp design. So you might prefer the Yacht Boy if audio quality is more important than DX ability.

A couple years ago I did an A/B test between the R-390A and the current generation DSP-based Watkins-Johnson military surveillance receivers. The weak signal performance was about the same for CW, although the fancy detector on the W-J was a little bit better at dealing with weak SSB signals. The digital panadaptor with the automatic signal ID on the W-J was really slick, though.... I think the W-J was a winner for ergonomics.

I wouldn't want to try and repair that R-390A, though. It's a mechanical nightmare. On the other hand, I don't think I'd want to repair that W-J either.

Which brings up the question:

You see 390As made by various manufacturers - Motorola, EAC, of course Collins themselves, and now this Fowler. Any opinions on who made them the best? Any real differences between them?

Yacht Boy can get into the sub .1 microvolt sensitivity level (10db
S+N/N)? That's pretty impressive for a solid-state receiver... usually
noise floor is a problem down below .1uv... Chuck Rippel has some that
can get into the .07 - .08uv 10db s+n/n I'm not patient enough to groom
mine that well.

> The bad news is that the audio quality stinks, in part due to the really
> sharp skirt of the filters that make it so selective and in part due to

True, but...

So you might prefer the Yacht Boy if audio quality is
> more important than DX ability.

There's precious little (IMHO) worth listening to on SW(AM) DX these
days - and audio quality isn't too important when digging an RTTY signal
out of the chaos that is propaganda and religious broadcasters these
days...

> A couple years ago I did an A/B test between the R-390A and the current

> ergonomics.

To get peak performance with a 390/1/A - consider using a Sherwood synchronous detector, or similar...

For a "head to head" run of a Drake R8 and R8A; a pair of Watkins-Johnson HF-1000's, an R388, R390A and a JRC NRD-535 against an R390A with a Sherwood - see this:

<http://r390a.com/html/history.htm>

> I wouldn't want to try and repair that R-390A, though. It's a mechanical
> nightmare.

Once you get used to them - they're VERY easy to work on - admittedly - the geartrains can be a bit intimidating at first - but after a while - you get to don't even think about them... Of course with the 390/391 - you do learn to NEVER forget the green gear - it only takes once - and you remember from then on.

Sherry's 391 with it's power autotune - yeah - those tuning heads still give me pause - but Sherry just shrugs and jumps right into them - since she likes to keep them very clean and well lubed. (replacement parts are getting harder and harder to find - so it pays to prevent damage).

> On the other hand, I don't think I'd want to repair that W-J
> either.

This old dog is getting too old to learn new tricks... besides most of these new-fangled radios are more like sitting at this computer... no warm glow, no power geartrains slewing at break-neck speeds going from one preset to another... and certainly not the smell and sound of a 28 in the room... naw - give me my boatanchors (and it's probably appropriate to apologize to those in r.r.s and r.a.a.e groups - I didn't notice this was cross posted --- but since we're all on the subject - I'll leave it cross posted for now)...

My 390A is pretty stock - and as noted - just an average performer. Sherry cheats - she "usually" runs an R390A IF in her 391 for DXing, etc. -- though she can drop the stock 391 IF back in - in about a minute - when she wants to show off broadcast stuff (i.e. the 390A IF she uses is the only thing modified - it'd have to be "returned to stock" to go back in an "A")...

best regards...

> best? Any real differences between them?

You left out Helena-Rubenstien (yes the makeup people) --- though it's usually suggested that though they "took that specific contract (believed to be 80 radios) - they subcontracted one of the regulars to build the radios. Stewart Warner is suspected - since they had the contracts on "both sides" of the H-R contract... are were obviously in a position to build them much less expensively than most anyone else at the time.

back to your question - I'm sure there are those who nit-pick this detail or that detail - but in working with these radios over the past 35 years (and probably 100+ different radios both aboard ship and otherwise) - much of the time I have to look at the tag to see who built it - and even then - after being in the fleet for any length of time - there'll be a "mix" of modules in the radio from any number of sources. Many I worked on were Stewart Warners - which as often as not had several Capehart modules in it -- as does my current 390A - though I suspect from a couple of things the frame itself started out as a Capehart and had it's tag "swapped". That's not as uncommon as you'd think - sometimes it'd be easier to fix a radio by sliding another one in it's place - changing the tag so the "boss" didn't notice. I've been told this was rather common at some shore stations where people were more interested in "hitting the beach" than "hitting that dog"...

One of the great strengths of the Collins design - is that it is truly modular - the modules aren't dependent on a neighbor to work to it's best (i.e. there is almost no interaction of alignment / adjustment between modules. A module that works in one radio - will work just as well (in it's own right) in another radio. Obviously - an improperly working module will effect the radio's overall performance - but properly working modules can be shuffled like a deck of cards - and still work just fine - regardless of the "new neighbor".

like all things subjective - just my .02

The way the contracts worked in my experience was they would all had to
meet the original design specs/requirements.

I noticed a reference to sensitivity being .1 uV and I can tell you that
if I worked on one that was in that range I started looking about to see
what was wrong with it! While working on several banks of the silly
things, .0 something uV was the norm. I'm not saying that was the
minimum specs that were required as I can't remember just that they very
often exceeded them.

They were a mechanical nightmare and a bad thing if you were waring a
tie while aligning them. During an inspection, by an admiral no less,
one of my techs was aligning one and got his dress tie caught in the
gears. When the admiral walked in an "attention on deck" was yelled out
and this poor kid had a receiver hanging off his neck! It don't take
long for 60 or so pounds to suck you to the floor in that type
situation. The admiral was very understanding and although he didn't
offer to help the kid we all ended up going out on a relatively large
drunk.

But, still a nice, heavy, old, receiver.

I threw that number out as a point of comparison... as any 390/1/A
should perform that well as a minimum.

> While working on several banks of the silly
> things,

After working on "several banks" -- the one has to wonder - if it wasn't
the tech that was getting "silly" (if not punch-drunk!)... ;-)

> .0 something uV was the norm. I'm not saying that was the
> minimum specs that were required as I can't remember just that they very
> often exceeded them.

The specs - and the way the specs were obtained - left a lot of "wiggle
room". That's why the generally accepted measurment is made with the
radio set to some specific settings - which generally produced the most
"recoverable" signal - and that's using the 4 kc filter and standard AM
detection; signal generator at 30% modulation with 10db S+N/N recovery.
Otherwise - without knowing what the "settings" were - (and they varied
depending on what tech manual you happen to have) - everyone would be
comparing apples to oranges - rather than apples to apples.

Obviously - using a wider filter; bfo to detect carrier (or carrier
re-insertion on SSB) would allow for detection WAY down into the noise
(.06 or better). .07-.08 using the above settings (4K, AM, no BFO, 30%
modulation) is akin to pulling a 20 pound rabbit out of an egg cup -
pretty cotton-pickin' good!

> They were a mechanical nightmare and a bad thing if you were waring a

You'd be surprised how easy it is, Scott. Complete guides to tearing down and rebuilding even the most complex assemblies (the RF geartrain, the PTO) are on the web. Mine came from Fair Radio (a "used-repairable" unit) with essentially sand as the geartrain lubricant, so I went through most everything.

> On the other hand, I don't think I'd want to repair that W-J either.

My WJ is 25 years old now and holding up pretty well, too, although I'm sure it would take more than a 100W soldering iron and Bristol spline wrench to fix if it had anything go wrong in the PLL!

Tim.

The only major difference I saw between the things was in the PTO... some
manufacturers seemed to build much better PTO modules than others.

By the time the gear winds up on the ham radio side of the DRMO, though,
most of them have turned into mix and match sets. So the nameplate on the
front may not indicate accurately where all the modules from.

My experience has been to avoid the EAC PTOs. If you find yourself with
a radio with a goofy or flaky PTO, though, Fair Radio has replacements.
Don't worry so much about the rest of it.

I'd have to say that this darn thing (along with the other four) must certainly have been built out of resurrected parts. There is probably no way that a company is going to gear up, and produce five of these receivers for $38,000 each, for a total cost of $190,000. The costs just wouldn't seem to add up.

Nice receivers though, when well maintained.

The costs would likely add up rapidly for a limited run of a complex
radio like the R390a. The profits would likely not add up at all and
would likely venture into negative territory.

This is very true - get a Cosmo PTO if you can find one- they seem to be
of better than average quality - IMHO.

So it goes.

Perhaps you should read the original articles in Electric Radio
Magazine, issues 71 and 72 March and April, 1995 and get the "actual
facts." I know that would be a real stretch for anything on usenet,
but you would get an education along with the other naysayers as to
the "rest of the story."

Harold

This is a small excerpt from a list which has been discussing this
particular item.:

I've been reading the archives with interest concerning the Fowler
R-390A
s/n 2. I no longer subscribe to the list, but several friends told me
of the
activity about this particular R-390A and I wanted to clear up a few
things,
so I subscribed this morning to attempt to do that.

The story about this particular receiver was originally published in Electric Radio Magazine issue 71 in March, 1995. A close-up photo of the nomenclature tag was in issue 72 in April, 1995. That is the "Real McCoy Tag" Speculate about made up tags etc. One wasn't made for this receiver except when it was built for the U.S. Navy by Fowler Industries.

I know the owner, V ********** who was mentioned in the original article and it is indeed a "genuine" Fowler and is s/n 2. T ******** reviewed the pictures of this receiver back in 1995 and knows of the validity of this particular receiver, as do several other people.

T ********* did quite a bit of research with personnel from Fowler Industries and Avondale Shipyards regarding the five R-390A's built. That information was published in subsequent issues of Electric Radio Magazine.

I don't have the time right now to answer in detail, maybe tomorrow.

T ********* knows much more detail than I do as he spoke with the former General Manager at Fowler Industries and purchasing people at Avondale (now Northrup Grumman) Shipyards.

They built them using components, but had some difficulty obtaining certain components.Fowler: When T ********* spoke with the Plant Manager he commented that they had particular problems obtaining JAN tubes, in particular 26Z5W's and 3TF7's. Remember, that they were considered "unobtanium" in the late 80's early 90's. Then the government released surplus tubes and Fair Radio was selling them at reasonable prices (they went quickly).

They potentiometers were made in Mexico, the meters were A & M Instruments, the quality of the wafer switches were not as robust as the runs during the 50's and 60's, Dittmore-Freimuth made the mechanical filters (as they did on many later versions), as well as the ones the built themselves, which were 67 EAC receivers with Dittmore's filters.

I can't say if what they obtained, but can assure you they didn't purchase
any in the crate R-390A's. Even though they were available at various locations throughout the country. When you bid on a contract the Government
lets, you fill the requirements, and they inadvertently left the R-390A spec
in the bid offering.

Avondale Shipyards probably didn't think to do a search for "in the crate"
R-390A's and put out a request for bids to build five R-390A's. Fowler
Industries was Clavier and prior to that Capehart, so they had experience
building R-390A's and suppling R-390A spare modules (Clavier).

T ********* can pick it up from here, as that is about I can remember or
verify from back when we did the ER articles.

Signed

L ********

I'm sure you can do additional research, and find someone who has these articles. I do, but don't care to scan and post them without the authors permission as they are copyrighted articles.

Nice. However all I can do is stick with my original assumption. It would be very difficult to build 5 'totally new' R390A's for a measly $190,000. Even 1984 dollars.

Nobody said they built totally new R-390A's. They sold them to the
government for $38,500. They (Fowler Industries) were formerly
Capehart who built R-490A's, and Clavier, who manufactured R-390A
modules for a government spare parts contract. They used "bits and
pieces" to paraphrase, and assembled the R-390A's for that 1984
contract. There is much more to it and I'm not going to waste anymore
time detailing nuances to this group. I just wanted to clear the air
so to speak and inform the uninformed. Usenet has always been a place
to walk the walk, but never talk the talk. I know who you are and you

are a very experienced dx'er. The gentleman who wrote the articles is a well know archivist/historian.

Different strokes for different folks.

I hate to be overly 'picky', but read what the seller says in his description:

He refers to 'new' in several places.

Jumping Jesus Christ, you are thick aren't you?

The excerpts from the articles said many of the parts were "new,"
mechanical filters, potentiometers, meters, tubes, etc., etc. They
(Fowler) did manufacture the rear panels and other items. The rear
panels had a "certain" identifying mark on them. Fowler was a defense
contractor that manufactured many other items for the government and
had the capabilities to do so.

Get over it and listen to nibi nibi again, or that heterodyne from
Pitcairn Island.

Harold

You probably get that annoyance on an R-390A.

I prefer to use quality equipment made by R. L. Drake.

I tend to agree with you Steve. Tooling up to build five completely new R-390s for $190K would be hard to do. Fowler most certainly had access to the needed equipment and parts to do the job and that's probably a big part of why they got the job.

Well you'd be surprised who I've done audio and amp work for over the last
20 years and not one ever mentioned a thing about my spelling. My reputation
gets me work, not my spelling. But thanks for caring.

Looking for an adapter to plug in a Kenwood mic w/ 8 pin round plug to convert to Icom 8 pin round plug. OR the way to rewire the Kenwood plug to match the Icom input, matching 8 volt and return audio. ? Do you need to add a capacitor to the Kenwood mic lead? Will be looking at making an adapter; any help! <k4wys@cox.net>

Geez a month? It ought to be perfect in a month! Anyway, goodluck with
learning how to use spellcheck. I know it's tough but I think you can
get the hang of it with practice.

Tracy

It's "good luck", not "goodluck". You're not perfect either. Now
shut up and change your tampon.

Your too stupid to even see how stupid your rally are. Ironically, people
like you always think their brilliant. Good day idiot. LOL!

Your right though, my wife is a hottie.

Yes it went over my head. I'm not used to dealing with rocket
scientists who have nothing better to do than pick on some guy who is
trying to run a business and maintain a web site. Go stuff your pie
hole with some doughnuts, Officer Net Cop.

Incidentally, I have an R-390A here that is almost deaf on the lowest band (.5 -1 MC). All the other bands seem to be just fine. Any suggestion what the issue might be?

The other interesting thing about this set is that the balanced input seems to be a problem even with the correct antenna source, but the unbalanced C-connector input is okay.

Chuck Rippel worked on it and couldn't find a problem, and if HE can't find a problem...

There are probably resistor spark plugs available for
this car. They will significantly reduce ignition noise
although other remedies, such as ferrite beads, will also be
helpful.

1170. Protecting receivers from damage from nearby transmitters

Newsgroup: rec.radio.amateur.equipment
Date: 2007-07-26 18:11:31 UTC
From: "Rick (W-A-one-R-K-T)" <get.my.email@from.qrz.com>
Message-ID: <pan.2007.07.26.18.11.29.545456@from.qrz.com>
Source record: 4840

Good afternoon...

I have several receivers and transceivers that I'm going to set up to monitor different frequencies. Then I'll use the main rig for transmitting (occasionally use the others to transmit but they'll be used for receiving 99 percent of the time).

I need to know how best to protect the front ends of the other radios from damage while I transmit, especially if I accidentally transmit on the frequencies to which they're tuned.

The main transmitter runs 200 watts and the antennas for all the radios are a few dozen feet apart, and that seems like an awful lot to go feeding into the front ends of some of the solid state rigs.

Receivers and transceivers are:
Icom IC-735
Kenwood TS-120S
Yaesu FT-1000
Kenwood TS-940
Hammarlund HQ-180A (I hope...if I find one) :-)
Zenith Transoceanic R-7000

The FT-1000 is the one that will be used most often for transmitting.

I'm not real concerned about the Hammarlund but the rest of them, particularly the Zenith, seem somewhat vulnerable.

news:sci.electronics.equipment has a lot of people who work with and
on test equipment, and don't use the repair newsgroup becasue of the
signal to noise ratio.

Rick,
I think you are wise. If you are transmitting primarily from one
transmitter,
you could put paired diodes across the inputs of the monitoring receivers
and use parallel grounding relays connected to the enabling voltage of the
transmitting transceiver. Of course you would need to disable the grounding
relay on the transmitting transceiver.

1174. Mind Control and Directed Energy Weapons

Newsgroup: rec.radio.amateur.equipment
Date: 2007-07-28 02:27:03 UTC
From: soleilmavis <soleilmavis@yahoo.com>
Message-ID: <1185589623.725134.47150@j4g2000prf.googlegroups.com>
Source record: 4844

Mind Control and Directed Energy Weapons

Do you know Mind Control Weapons and Brain Washing (such as CIA Mind Control Project : MKULTRA) ? Do you know voice can be transmitted to human's head from long distance(V2K)? (In 2002, the Air Force Research Laboratory patented precisely such a technology: using microwaves to send words into someone's head.)Do you know Directed Energy Weapons(such as: Electromagnetic weapons) and Non-lethal Weapons? Do you know that people's thoughts can be read now? Do you know Nano technology weapons (such as British MI5 Nano technology spy weapons which can control little spy mice from long distance)?

Such kinds of weapons have already been used covertly to torture and harass innocent, legal, unarmed and defenseless civilians for many years all over the world.

There are more than 1500 people who are suffering terribly from mind control and electromagnetic weapons torturing and harassment. Some victims were only 21-22 years old when the first time they were seriously tortured and harassed.

Have you ever imagined that there even was not one happy and peace day in the life, but only suffering for 5,10 or 20 years? Yes! Some victims died, but at the last minutes in their lives, the only thing belongs to them was still suffering.

Please come to help us by signing your support to stop these kinds of weapons torturing and harassing lawful citizens. Our goals:

(1) We wish a resolution from United Nations to stop Mind Control and Directed Energy weapons torturing and harassing. (2) We wish all government cooperate together to sentence those torturers according to law.

Hi,
I'm trying to find a set that has a low standby current.The Yaesu FT817 seems to fit the bill but the standby current seems to let it down sadly (250mA squelched and 450mA on receive).I have a 2 meter handheld with all the bells and whistles (fm admittedly) which draws 10mA squelched.I would appreciate any comments and suggestions. - Steve

Comparing the FT817 to your HT is not a fair comparison. Your Ht
has far less circuitry, probably has a power save feature, and many other
limitations that the FT817 does not have. The FT817 is a full featured HF
radio.

For a good assessment of the FT817 current draw, and some ways to
lessen it, go to: http://www.ka7oei.com/ft817_pwr.html

Message-ID: <46adde0a$0$4702$4c368faf@roadrunner.com>
Source record: 4851

I am looking for product features, specs, manual, etc. for this new radio from Kenwood.

The photo of the radio is shown in the advertisement on the back cover of the Aug. 2007 QST magazine.

I wonder if this is the replacement radio for the TM-D700A which has been in production for several years? Judging form the photo in QST it looks like this may be what is about to be released to replace the TM-D700A. There is not enought information in the ad to be certain but viewing the faceplate shown APRS clearly stands out in photograph of the radio.

The only thing I know about the radio is what is in the ad. I have not been able to find any information at the kenwood site nor at any dealer sites about this radio.

Kenwood or a secret dealer please let us know what we can expect from this radio and when it will be available for sale in the U.S. ... A MSRP would also be nice to know.

UPDATE!!!! (SOMETHING IS GOING OBSOLETE?)

The Radio model number is actually TM-D710A and the "A" should denote APRS functionality. I think I may have figured part of my earlier question out for myself.

So much for buying a TM-D700A old model when there seems to be a new model on the way.

ONE BIG POINT TO BE MADE>>>
I bet we shall see a drop in price for the TM-D700A radios soon and we certainly should be asking for a big price reduction if anyone plans on buying a (soon to be obsoleted?) TM-D700A.

The new TM-D710A radio is labeled "Data Communicator 144/440Mhz FM Dual Bander". Please understand it is only my assumption that the "A" in the model number stands for APRS as I assume it does in the TM-D700A model.

1183. Opinions on RM Italy amplifiers

Newsgroup: rec.radio.amateur.equipment
Date: 2007-07-30 14:49:05 UTC
From: "Rick (W-A-one-R-K-T)" <get.my.email@from.qrz.com>

Source record: 4853

I have a chance to buy a used RM Italy HLA-300-V HF amplifier, which can be driven by my FT-817 and claims to be capable of as much as 300 watts out on 160 through 10.

I know that some of the older RM Italy amplifiers were known for dirty output and poor harmonic suppression, and were intended mostly for illegal use on CB, but some of their newer offerings seem to be geared for the whole HF band and I'm wondering if they have cleaned up.

I know they are still illegal to import into the USA but this one is here now and I ask no questions about how it got here.

Any opinions about RM Italy in general and this model in particular?

Thanks...

Yes, it is the replacement. Kenwood had one on display, under
Plexiglas, at Dayton. They always are a bit coy about new releases
for regulatory, legal, and competitive reasons until the unit is good
to go. Early last fall, I saw a prototype with "TM-0000" on the front
panel, and as they did not power it up, it was rather hard to guess
about features.

RM Italy targeted the USA high powered CB market (big mistake). Those units
(usually red colored) are only built for 26-30 MHz -- NO low pass filter
switching.
Have you even gone to their Italian web site and looked?
http://www.rmitaly.com/home.asp
Much of it is junk for European and Middle East markets

They started an amateur radio line where they add a band switch on front
panel -- HOWEVER -- I ahve NOT seen one. How to you get afilter to fit
intot hat space -- doubtful that it is useful.

RM Italy has NOT not submitted their amateur units for FCC approval
(spectral purity, etc.) -- which may require design changes to meet minimum
requirements.

I think I may have figured part of my
> earlier question out for myself.

The "A" actually means it for the Americas (North, Central, South) market. European Kenwood products have an "E" suffix because,
among other things, the European 2 meter amateur band is 144-146 MHz and the 70 cm band is 430-440 MHz.
VHF/UHF equipment for the Asian market usually have no letter suffix.

Right, but their newer ones (grey in color if I recall correctly) are, as
you noted below, designed for 160-10.

> They started an amateur radio line where they add a band switch on front

They look similar in size and form factor to Tokyo Hy Power HF amps which
seem to have a pretty good reputation.

> RM Italy has NOT not submitted their amateur units for FCC approval
> (spectral purity, etc.)

Of course not. They couldn't get them approved anyway. The FCC clings
tenaciously to that retarded rule of theirs against low-drive-power HF
amps... FT-817 and IC-703 owners be damned. As usual, they are too lazy
to go after the real culprits so they penalize everybody.

And once again, that rule came into effect because companies and even
individuals were selling junk amplifiers for CB under the guise of
"not suitable for Class D citizen band use".

The rule has nothing to do with amateur radio, it has to do with
the illegal use of amplifiers on the citizen band.

Realistically, nobody should be giving business to a company that
sold such amplifiers, even if they are no producing legit amplifiers.
Because such companies are the reason for the rule, and feed their
pockets and you are basically giving them acceptance.

Right. My point exactly. The FCC can't seem to figure out how to go after the real lawbreakers so they just enact a rule that penalizes the rest of us just to save them from having to get off their asses and go after the bad guys.

(I was going to say "pass a rule" but that implies that we actually got to vote on that... sorry, don't know what I was thinking...)

> Realistically, nobody should be giving business to a company that
> sold such amplifiers, even if they are no producing legit amplifiers.
> Because such companies are the reason for the rule, and feed their

I suppose. But, the thing is used and privately owned, so I would be giving money to somebody who gave money to somebody (etc. through who knows how many levels) who gave business to a company that sold such amplifiers.

Every time you fill your car with gas you give money to somebody who gave money to somebody (etc. etc.) who gave money to the people who murdered your fellow citizens on 9/11. And so on.

If we had to analyze every purchase we made on the basis of who eventually gets the money, none of us would ever buy anything.

Why do u want to send this signal in the first place?

Stick your antenna in the ground!

You don't.

The only reason you'd send an SOS is because you were actually in
an emergency situation, and SOS is actually specified for a certain
level of emergency (ie you can't use it if your car breaks down).

ONce you start messing with sending SOS for any reason, you risk
causing a situation, where effort will be put into finding you, only
to discover there is no emergency.

Quoted from the Telstar Web Site:

"Whether you're whispering or shouting, VoiceMax holds your
transceiver at 100% modulation allowing you to punch through heavy
channel traffic without sacrificing voice clarity."

So, it is for AM modulation systems. The previous poster was
right...it is CB equipment! Telstar says it is, so who's to argue
with that.

-.-

This is RRAH... We build our own junk... You are spamming us with commercial announcements we don't care about and which do not meet the charter for this usenet group...
I personally don't care if your customers are CB, or broadcast radio, or whatever - but since all you are doing is trying to drum up a sale here, which is not what this group is for, why don't you move along to where your customers are... The chances that you will make even a single sale to a member of this usenet group are less than zero...

cheers ... denny

1205. RF Grounding Dilemmas

Newsgroup: rec.radio.amateur.equipment
Date: 2007-08-02 19:59:11 UTC
From: Andiroo <a.richman@btinternet.com>
Message-ID: <1186084751.533649.176800@d30g2000prg.googlegroups.com>
Source record: 4875

All

I have just installed a 1/2 wave G5RV dipole at approx. 30 ft above ground. My shack is in the back of the house but on the second floor (effectively in the roof of the house) above the garden but due to the house design i think i would struggle to have a RF ground wire of less than 30-40 feet.

Based on above discussions should I :

1) fit a ground rod and run this up to the shack even though its a long way up along various walls

2) buy an articial ground unit such as the MFJ-931

3) forget about it and make do without a ground.

I am pretty thoroughly confused.

Thanks

Andy

Just operate and have fun. Finding a true RF ground is tantamount to searching for the Holy Grail.

If your house utilizes metal radiators for heating, you might try running a ground wire to a radiator and see if it helps.

Any antenna that requires a tuner for operation is most likely going to have RF in the shack and on your radio. There really isn't much that you can do about it, except juggle the length of the feedline, if you operate mostly on one particular band.

If you use a dipole antenna you don't need a ground. I would use your
option 1. If you decide
to use a vertical antenna then you can figure your ground conductor as
part of the antenna. I did
that when I was living in a town house

I'm looking for a good working freq counter
for my vintage AM ham shack.
I wouldn't mind a Nixie tube display.
I need coverage from Hf thru 6 meters,
3 mhz - 60 mhz would be nice.

Does anyone have one that they'd like to get
rid of.

Monty,

The price is one of those things they were coy about at Dayton.
However, HRO has them in stock:

1) Manufacturer: KENWOOD
Item : TM-D710A
Description : 2M/440 APRS/TNC GPS/ECHOLINK READY
YOUR HRO PRICE $599.95

and AES has the same price.

It's probably in need of tweaking, cleaning or maybe the screw fell
out of the antenna (mine fell out I don't know when so don't laugh too
hard. Thing's made in China/mondodogkillerland)

It sounds like something connected with temperature, which could be any number of things.

Now this is a stretch, and a guess, but... Some classic GE transistor radios of 30+ years ago (such as the P975A) had completely separate AM and FM tuners. * If this is true for the SupeRadio, it might simplify troubleshooting.

I'd recommend taking a screwdriver and a can of freeze spray with you to the beach.

* GE made its own transistors, and as separating the tuners didn't increase the number of RF and IF elements required, the cost of wholly separate tuners was only a bit higher than combining them.

Sounds like a heat related problem. I have one of these I bought at the
Salvation Army in new condition for $5 I use for a work radio on
construction jobs. What a great sounding radio and so easy on batteries.

The SRIII doesn't have a tuner at all. It's a supremely crappy varactor tuned set. If only the FM is going out, it's likely that the heat is building up enough that the LO is failing. One thing to try is take a white towel with you the next time you go out, and fold it over at least once and let it on top of the radio to prevent the UV from the sun reaching that lovely black (solar collector) cabinet.

I like the great sound on FM and the good reception on AM in a radio that
it costs little next to nothing. A combination hard to find elsewhere...

The large built-in antenna (AM ferrite-bar) makes for good AM-reception,
an the "well balanced" (though very cheap) set of speakers makes the sound
unmatched for a light footprint radio this cheap.

I do have better sounding portable radios (older, genuine Grundig
Satellit's)
but they are totally different class and price range all together.

Greetings,
Knut Otterbeck

For two dollars that I gave for one, the bandwidth switch is a big
help, even and the varactor does slip around if you aren't there well
enough on AM and either switch AFC on or off.

That AFC is sloppy and seems to be a big part of it's DX so-called
atrributes. It's really good for zeroing in on weak, mostly LOCAL AM
stations and improving them against splash or harmonics.

It seems odd that, as this radio (supposedly) uses varactor tuning... Why doesn't Thomson go all the way and include full digital tuning? Given the current cheapness of electronics, it should add no more that $10 or $15 to the price.

Varactor tuning is no different from using a mechanical tuning
capacitor. You're just rotating the shaft on a resistor instead.

To make the leap to digitial tuning, you have to have a PLL (Phase
locked loop) and all the attendant dividers, and the display and
lastly, some degree of accuracy for the reference. If the display
reads 930 AM, it really should be 930, not somewhere else.

It really isn't as simple as "Just a couple more parts."

Jeff

I don't think Thomson is even involved in consumer electronics products
anymore. I believe they sold off the RCA name to Audiovox, and when you go
to the GE brand, you only get info on telephone products. Brand names are
totally meaningless these days.

I've got a Sansui T-80 that proves that. It will shift frequency and
often goes completely out of band then sometimes back to the wrong
frequency on the band and the counter is given voltages that create a
gibberish reading for the LCD display driver. All for a varactor or
two that are tweaked or fed an out-of spec signal. I don't have any
dual displays with a similar problem...my SX-3600s are always
displaying the STEREO graphic but that seems to be a common thing for
that model.

FS: MINT Grundig FR-200 Emergency Radio
Flashlight, AM, FM, shortwave 3 to 9 MHz and 9 to 22 MHz. Wind-up
generator charger for built-in rechargable battery pack. Telescopic
whip. VERY sensitive on shortwave. I was pleasantly surprised. Used in
just two ice storms this previous winter.
I will sell with a set of NiMH batteries. (This is in addition to the
emergency recharables that are already inside the unit.) I will also
sell with a Yo-Yo-Vee Portable Reel Antenna. (See http://HamRadioFun.com
for details on that antenna.) That's about $25 worth of additional
stuff...FREE!

It would also add to the noise floor, and make most of the advantage of the
tuned RF amp front end null. My biggest gripe about the SRIII is the abysmal
dial calibration. I've yet to see one that tracks across the dial. And any
time I've attempted to calibrate one (I've done dozens) the best I can get
it to do is be semi-accurate at the top and bottom, while off by several
10's of KHz in the middle.

It's fundamentally different -- you can change the rotational "position" of the "capacitor" _electrically_, without moving parts.

> To make the leap to digitial tuning, you have to have a PLL (phase
> locked loop) and all the attendant dividers, and the display and

I didn't say that. But I'll gladly allow myself to retroactively be accused of having said that.

Once you have varactor tuning, not much is needed to convert to digital tuning. How about just three parts -- a reference crystal, a custom IC, and an LCD? Digital tuning is pretty simple stuff.

I have a Sony Discman with a complete stereo-FM + AM digital tuner crammed into a tiny case about the volume of your thumb, dangling from the end of the headphone cord. The complete unit sold for $180; the replacement tuner/cable assembly went for $100. Because this device is a cleverly miniaturized piece of electronics, one can assume it's rather more expensive than what a larger, bulkier device would cost.

Is that _necessarily_ so?

On the AM band, the added "noise" would be primarily FM modulation, creating sideband noise not unlike the sideband noise generated by flutter on analog audio recorders. How audible would that be?

If you're referring to adding $10-$15 to the retail price, on the
manufacturing level that would be about $1 to $1.50 in additional parts.
Possible, but I'd guess the addition of a crystal, a microcomputer, and a
display, would probably add more than that. In the end, you would have a
very different radio, and not necessarily a better one. Microprocessors add
their own problems. These radios do offer great bang for the buck, but
honestly I think the term "super" is misapplied.

Does anyone know what the actual AM senitivity of these "super" radio might
be. Healthkit used to provide sensitivity for its AM tuners, but so far all
they talk about for the GE radio is doubletalk.

I've not seen any quantification of the AM sensitivity on the radio.
However, with the tuned RF stage, it is much more sensitive than most of the
AM/FM only portables on the market. I have one out in my shop on the shelf
that I use for verification of stations when I'm trying to realign a set
that's been overtwiddled. I'll see if I can get at least a uV reading from
my o-scope for a good listenable by-ear signal. I don't have the equipment
for a fancy uV/m or dBuV reading.

I've yet to hear a cheap (or even a multi-hundred dollar) radio with a
perfectly noiseless PLL. My Grundig (a REAL Grundig) Satellite 650 even has
PLL generated noise that brings up the noise floor at least 2-3dB, and it's
filtered and sheilded to the max (and cost $1100 new).

I haven't looked at mine in a couple weeks but as I figured the PLL would make tuning in some stations more difficult. As they are, the bandwidth position being in wide actually hinders tuning in a little 1 kw signal at 1450 in Notus called KIOV, 1350 KTIK that's more than a kilowatt and even 1490 KCID in Caldwell (*because I live next to a 5 kw DA-N at 1380). If the station was running a narrower signal to start you have to tune in narrow mode first anyway. It's picky that way. Batteries affect that too, FM more pronounced than AM, of course.

The FM antenna screw fell out a long time ago too, tried to replace it and at some point the thing got broken anyway. Good thing it has screw terminals for FM.

SWH,

I have one of the "Digital" versions of the GE Superadio
Model # 7-2882A that was made in Hong Kong an you
are right on all counts.

But it is 'nice' to be able to push a Preset and Listen
to one of your Favorite Radio Stations - Especially
when the GE Superadio III has such a badly aligned
Analog Tuning Scale.

David Moisan's - GE SuperRadio FAQ - Technical Information
http://mysite.verizon.net/vze20h45/radio/superadio/gesr_tech.html
http://mysite.verizon.net/vze20h45/radio/superadio/gesr_faq.html

Currently for the $-Money-$ the Redsun RP2100 AM/MW
Shortwave Radio seems to be one of the 'better' AM/MW
Radios that would 'fit' the Super-Radio characteristics and
has a very good 'mono' FM Tuner and Sound Too !

The "Redsun Shortwave Radios" Group at Yahoo
REDSUN => http://groups.yahoo.com/group/redsun-shortwave-radios/

~ RHF

There WAS a digital version of the GE superadio, called the superadio plus, made in 1982. It is rumored to be noisier than the analog version (big surprise) and was double the price, which kind of negated the whole cheap-but-sensitive idea behind the superadio series. It was not a big seller, and is somewhat rare today.

This model was likely the outgrowth of the 7-4650 clock-radio, which had direct-frequency entry through a keypad plus six presets. Its list price was around $90.

Whoever designed this radio was actually thinking. As the AM and FM bands have numerically unique frequencies, you simply punched in the one you want, and the band automatically switched. You don't have to select AM or FM first.

I'd like to clarify a point in the Superadio FAQ...

"Unlike most AM/FM radios the SR III has additional RF stages..."

I've never seen an FM tuner that didn't have an RF stage (with the exception of a weird direct-conversion circuit shown in the GE Transistor Manual). It would be less-incorrect to say

"Unlike most table or pocket radios, the Superadio's AM tuner has an RF stage for greatly improved sensitivity."

Most AM/FM radios don't have an RF stage. Only higher end home systems and car radios do anymore for the most part. The front ends on your average portable are just an LO section and an input tuning section (antenna). Even average home systems don't have the additional RF stage. Makes for horrid sensitivity and even worse overloading problems close in.

Well, it seems to me we need to check the GE radios against a radio which has a known sensitivity level on the AM band. I have to use my so-called Superradio with a tunable external loop to picked up most stations I want. So it is not very super. And I have the Radio Shack version too. About half the time it has distored audio, and other half it works ok, but with inferior tone. Ok, they are cheap, I'll grant you that. C. Crane and Company advertise a real super radio, the Mini CC radio. Has anyone tried it for $149.95?

If you need an external tuned loop, then you need an alignment. If it's an SRIII, then you're probably out of luck. If it's an SRII or SRI, then you can get it properly aligned and it would be pretty much unbeatable for AM and FM reception.

I have a Grundig portable with shortwave that allows you to do that
too. Type in 1130 and the radio automatically switches you to 1130
khz MW. Type in 95.50 and it tunes to 95.5 Mhz FM, And so on....

You can also just enter something like 31 or 25 or 49 and it switches
you to that desired shortwave band directly. I like that radio. :)

Brenda Ann has a National or two and a well-modified Pioneer TX-6500
tuner she built as I understand (I donated to it). All of the above
would run rings around this thing I am certain. A great DX set by GE
was probably made and it had tubes and was a tombstone.

Show me any commercial FM radio or tuner, at any price, that _doesn't_ have an RF stage. I find it very, very, very hard to believe that there are such radios.

I can think of only one _good_ reason for omitting a RF stage, and that only in digital tuners. As such tuners require a varactor-tuned front end, and varactors aren't especially linear... Fill in the blank.

I'd like to comment on the phrase "additional RF stage". An RF stage is, of course, an additional stage compared to a radio without one, but in this phrase "additional" modifies RF, not stage. I believe a few radios have had multiple RF stages, but this is uncommon.

After writing the above, I pulled out the manual for my Yaesu ("joy of Hams' desiring") FT-1000D. It seems the RF stage can be bypassed for reception of very strong signals. I'm not sure what this proves or disproves with respect to this discussion, but it's interesting.

It explains why two-three of my tuners (more) have a hard time with
1350 and 1450 when 1380 is nearby and a couple would bleed 1450 in two
other spots when KIOV was still on Clay Peak. Thanks much!

Brenda was refering to the AM section of the radio I think.
Most commercial "broadcast" radios now _are_ crap. The
manufacturers figured (probably rightly) that there's nothing
worth listening to on AM, so they don't waste the money in
production to make the AM portion decent.

Bypassed? Look again, I suspect it has a 20 dB attenuator switched
in ahead of it.

Nope. The manual -- apparently written by 'murcans -- explicitly says "bypassed". The schematics are so complex I don't have time to unscramble them to confirm or deny.

From Wikipedia:
Later in 2004, Thomson set up a joint venture (TTE) with China's TCL, giving to TCL all manufacturing of RCA and Thomson television and DVD products and making TCL the global leader in TV manufacturing. (Thomson still controls the brands themselves and licenses them to TTE.) At the time, TCL was hailed as the first Chinese company to compete on the international stage with large international corporations. Thomson initially retained all marketing of TTE's products, but transferred that to TTE in 2005.

In December 2006, Thomson agreed to sell its consumer electronics accessory business, including rights to the RCA name for consumer electronics accessories, to Audiovox.

So, I guess they are still "alive", if you want to call it that.

Just think what a ground wire of 30 foot represents in terms of
wavelength, whatever it may be it will not be an RF ground!

As suggested, the best bet is to go for a balanced antenna such as a
dipole or set of dipoles. Use a balun at the antenna and feed with
coax straight to your rig/SWR meter. This works well for me in a
first floor shack with antennas in the loft.

Charlie.

Was it originally named that by GE or just by later aficionados in their comparisons?

I've got one right here in front of me (GE 7-2882A), and it's labeled as an
"electronic tuning FM-AM receiver", not a "superadio plus" or "superadio+".

As far as I know, this was never touted by GE top be a "superadio". Does anyone have
pictures of a box or advertising they can share to show GE called it one?

Message-ID: <pan.2007.08.05.18.10.51.579229@from.qrz.com>
Source record: 4734

Can anyone suggest a decent inexpensive spectrum analyzer, that I can look for used on ebay, that would be suitable for evaluating SSB transmitter output for spurs, harmonics, etc.?

I have a cheap RM Italy former CB amplifier that has been heavily modified to work on 80 through 10, and has a set of low-pass output filters in a box with a band switch, all of which I am using with my FT-817. Its provenance is suspect, at best, and I'd like to be able to check it from time to time to make sure its output stays clean.

Also I have an old TS-120S that seems to have some serious transmit problems, part of which is probably spurs and harmonics and self-oscillation in the finals and God knows what else.

I don't mind paying a fair price for a good spectrum analyzer but I don't want to pay big bucks for a high-end unit with features I'll never use.

Thanks...

I distinctly remember a digital Superadio Plus. It sold for a very short
time around 1983 or 84? It clearly said "Superadio Plus" on the front panel.

Again, if you open up the average portable, or most cheap home stereos, you
will find only two sections to the FM tuner:

1) Local oscillator
2) Antenna tuning

Same for the AM section.

I have seen very very VERY few portables with an RF amp section for FM. Less
rare were ones with an RF amp for AM, such as the Channel Master 8
transistor sets.

Nope, was referring to both FM and AM sections.

Shoot... a lot of current generation boom boxes and such not only don't have an RF amp in the front end (well.. they sort of do.. more to come), they don't even have an IF. All they are is a very high gain amplifier with a detector. To make an AM radio, they connect an antenna, single section variable capacitor, a power source, and a small audio amp. The whole receiver section is in a three lead package (TO-92?)

As I said, I have the GE 7-2882A sitting right here in front of me, and that is the model previously claimed to be the "Superadio Plus". There is no "Superadio Plus" nametag anywhere on it. The front reads "GENERAL ELECTRIC electronic tuning FM-AM RECEIVER"

The reason I ask is that I have heard this radio called a "Superadio" in the past in other threads and several places on the internet, but no one has ever provided a picture of this radio's nameplate or any box or literature supporting the claim. Thus I have to question whether it was marketed as such, or if the name was just attributed to it later by Superadio fans. I also have the cassette recorder version of this radio, and with it came a little flyer describing the new "electronic tuning FM-AM receivers", with no "superadio" mention.

Sorry Brenda Ann, I guess I need to see some proof, not someone's 20+ year old memories to convince me.

Maybe RHF can photograph his radio and share the picture with us if his has the name somewhere on it.

Yes Pete, I have been there many times before, but no one has provided any pictures, box art, or advertising to indicate it was indeed marketed as such. Others are claiming the name is right on the radio itself. Mine is sitting right in front of me, it has no Superadio nameplate. I only want confirmation I can verify, not to start a battle.

JM,

You are Right a the GE Model 7-2882_; the so called
"Digital" GE Superadio -or- GE Superadio Plus; does
not have the "Superadio" name on the Radio.

-But- It does have a few of the Superadio features like
the 200mm Ferrite Antenna and the 5-Inch Speaker.
- - - The Look of a GE Superadio ! ? ! ?

However - What Defines a GE Superadio is the RF
and IF Circuitry that is 'internal' to the Radio and
whether the GE Model 7-2882_ has it or not is . . .
To-Be-Determined [.]

? Question ? Does anyone 'know' for sure -if- the
GE Model 7-2882_ has the same 'internal' RF and
IF Circuitry as the GE Superadios I and II ? ? ?

i want to know ~ RHF

That's pretty stupid, and I'm sorry that I have to say it. Still, one does not enter evidence into a court with a statement that "I know where it is".

Please corroborate your statements in the future, wherever/whenever or you'll have credibility trouble in a lot of places.

Radio Abby

1278. If the plate choke changes value how does it affect the plate tuning capacitor?

Newsgroup: rec.radio.amateur.equipment
Date: 2007-08-06 03:06:40 UTC
From: Dante <Dante8488488@hotmail.com>
Message-ID: <tv3db3drr732ff9ba1p43cqtiu8lql7h0b@4ax.com>
Source record: 4748

In the amplifier compartment of a 1970s vintage ham radio, if the plate choke in the B+ supply lost some of it's inductance due to some of the coil windings shorting together would it cause the plate tuning capacitor to require less capacitance (such as fully open) to reach resonance?

-Curios.

I have a CC radio...It's pretty good, but I wouldn't pay $150.00 for one
(I paid $20.00 for mine). Like the superradio, It exploits the rather
poor sensitivity of most tabletop radios of today by adding an RF stage.
If I were a consumer shopping for a sensitive radio, I'd buy one of the
many shortwave portables on the market in the same price range. They
have just about everything the C Crane radio has and shortwave to boot.

I also have the GE superradios I, II and III. my superradio III is
sensitive but is just about inferior in every other way to the other two
earlier sets. The superradio II is the best of the three for AM DX. I
also have the radio shack version-it appears to be a superradio III with
sloppy attention to proper alignment at the factory.

They exist, and they suck. Look at a low-end boombox and you will find
no RF stage for either AM or FM.

Someone posted pictures on the binaries of the radio, and also the
original box I think as well. That was a couple of years ago.

If this is so, then the manufacturer must assume the product will only be
used in areas of high signal strength.

That goes without saying, as AM radios have generally lacked an RF stage for nigh-on to 70 years. It just isn't needed for most local reception.

> I have seen very very VERY few portables with an RF amp section
> for FM. Less rare were ones with an RF amp for AM, such as the
> Channel Master 8 transistor sets.

I'm in a bad position to argue this point, because I rarely (ie, at this point in my life, never) service radios. But what you're saying goes completely against my experience -- and the service manuals for equipment I own.

The 40-year-old Sony FM/AM radios I own (TFM 825 / 850, EFM 117, & others) have RF stages for FM, and none for AM. The schematic for the GE P975A (which I don't own) shows an RF stage for the FM section, none for the AM. Ditto for all the GE clock-radios I've owned.

I went through the Sams TSM-47 transistor-radio book (dated 12/1964), which I purchased to get additional data on the Sony EFM-117 I hoped to restore. Of the 28 models covered, only two AM radios (Ross RE-1902 & Truetone DC3429B) had an RF stage, and _no_ FM radio lacked one.

The RF stage in an FM tuner * performs a number of functions, one of the most-important being to bring up the RF signal to a level where it can override the noise generated in the conversion process. Has the conversion process, and the transistors used to perform it, improved so much that the RF stage can be discarded? I don't know, but I doubt it.

Another function is gain. The lost gain has to be made up somewhere, presumably with another IF stage, which requires parts and has to be aligned, just as an RF stage. The net savings aren't going to amount to much.

An FM tuner without an RF stage would be hopelessly insensitive, to the point where few consumers would find it acceptable ("This-here goddamn radio don't pick up no stations").

I don't like gainsaying someone who regularly services electronic equipment (and who usually knows what they're talking about). But I just don't buy

this. (I read Scott Harvey's comments before posting this, and I still find it hard to believe.) Throughout the history of FM radios, an RF stage has been the normal state of affairs.

* By "tuner", I mean the electronics preceding the audio stages. All radios have tuners.

That's pretty much the case, as radio stations are no longer protected, nor
do they give a damn about listeners, outside the city grade contour.

But I have to agree with William on this. I can't remember an FM set that
didn't have an RF amp. Even the cheap tube German sets, known for their
"gutless wonder" circuitry all used 1/2 of an ECC85 for RF amplification on
FM. Transistor sets too. I worked for Sony in the 70's and every FM set had
an RF amp. Granted, most weren't tuned RF stages, but still there was an
amplification stage ahead of the oscillator/mixer.

Beitman's 1950, pp. 10
Beitman's 1950, pp. 14
Beitman's 1950, pp. 40
Beitman's 1967-69 pp. 42 (note the antenna input going directly into the
base of the mixer transistor)
Lots more where those came from.

To be fair, a lot of the early SS stuff did have an RF stage, but beginning
sometime in the late 60's, it was almost universally dropped, again, accept
for better car radios and home stereo tuners/receivers. I have an early
Sony FM stereo portable with no RF stage in it. It does OK for what it is,
but almost deaf as a post outside a strong signal area.

Two classic examples that are common as dirt in the 'old radio' world
are the RCA 68R* series and the Philco 49-905. They are everywhere
so they must have sold millions. Granted they have an additional IF
stage on FM but they are really poor performers.
Philco apparently rethought it with the 50-925 the following year
(same case, etc) and its a pretty good radio.

I live 40-50 miles out from most any FM stations and the difference in
having an RF amp or not means hearing something ...or not...without an
outdoor antenna.

1300. Good HF scanning receiver w/SSB

Newsgroup: rec.radio.amateur.equipment
Date: 2007-08-06 18:14:14 UTC
From: "Rick (W-A-one-R-K-T)" <get.my.email@from.qrz.com>
Message-ID: <pan.2007.08.06.18.14.12.337382@from.qrz.com>
Source record: 4770

Good afternoon...

Any thoughts on a good scanning receiver that covers HF from 2 MHz up, and can be used in SSB and FM modes?

I'd need something with sensitivity and selectivity that's comparable to a decent low-end HF transceiver (e.g. IC-718 or FT-817).

If it had the capability to program its memories via a computer, that would be a nice bonus.

If it had the capability to output its frequency via e.g. RS-232 every time it scans to a new frequency, that would be a REALLY nice bonus (but not expected).

I'm aware of the Icom IC-R75 and IC-R2500, and Yaesu FRG-100B and VR-5000, but wondered if there is anything else out there (perhaps for slightly fewer bucks...)

Thanks...

Hmm. An FM/AM IC that might be found in a boombox is Sony's CXA1238, and
even that includes an RF preamp for FM in common-base configuration and
allows connecting a bandpass (or rather bandstop) between RF amp and
mixer.

As far as the poor overload rejection is concerned, this has to do with
weak mixers inside ICs and insufficient RF filtering. A typical config
for a low-end FM receiver would look like this (tuning via varicap
diodes or tuning caps with plastic dielectric):

fixed bandpass for all of FM -> RF amp -> 1 tuned tank circuit -> mixer
^
. |
LO
It typically takes a frontend chip with a balanced mixer like the
venerable TA7358P/LA1185 to achieve good results in such a config
(actually the datasheet suggests this and it's commonly used that way).
The most fancy configuration I've seen with this chip is the 4-gang one
found in the Redsun RP2000/2100 and its rebadges:

1 tuned tank circuit -> RF amp -> 2 tuned tank circuits -> mixer
^
. |
LO
Unsurprisingly, its FM frontend is reported to be just about bulletproof
for a portable.

FM frontends in dedicated tuners historically had up to 7 or so tuning gangs, but with later advances in mixers in particular, there are some models with seemingly modest 4-gang frontends but not so modest sensitivity and overload handling; many 5-gang tuners in the later 1980s actually used the additional gang for a tuned LO buffer.

From: "Damn Ham"@yahoo.com
Message-ID: <ufjfb3hig6sp5sdv559igrl8m0hqlvlnl1@4ax.com>
Source record: 4775

I saw references to aligning it, but does anyone have a board layout
or alignment instructions for it?
